

## ADOPTED BUDGET RECOMMENDATION

Instruct the Department of Transportation, with assistance from the Public Works Bureau of Street Lighting, to report to the Transportation Committee with options to pursue parking fines and fees for non-electrical vehicles parking in a bay designated for electric vehicle charging, also known as ICing, which creates transportation electrification issues and is a public nuisance. The report should include options that would allow the City to be cost-neutral for the Electric Vehicle charging program.

(Pursuant to Council Action of July 30, 2025; Council file No. 25-0600-S32)
