Comments for Public Posting: I'm wondering Council Members how many of you and your staff took public transportation to city meetings today? My guess is none. Parents are driving their kids to one or two schools in the morning before they go to work. Not sure how many parents would let their children take public transportation due to the unsafe conditions. Industries such as gardeners, pool service, day laborers, construction workers etc., all need vehicles. Where would they park their cars/trucks? When developments are penciled out, more units can be built if parking is not required. Which would YOU choose, more money or less profit? You cannot let the developers decide. Whose best interest will prevail? This is a very bad idea.
