**Comments for Public Posting:** I strongly support Item #4 (25-0894) to dissolve the Major Transit and Transportation Construction Traffic Management Committee. As we face worsening climate and housing crises, Los Angeles must do everything in its power to accelerate housing and multimodal infrastructure construction. This committee's sole purpose is to save motorists several seconds on ongoing construction projects, which is antithetical to our climate goals. Instead, Los Angeles should be focusing on completing these critical infrastructure projects as quickly as possible, benefiting everyone rather than only motorists.

**Comments for Public Posting:** I support dissolving the Major Transit and Transportation Construction Traffic Management Committee as it mainly results in long delays for construction projects with minimal impact on the traffic affected by the construction. I'm not inherently against bureaucracy, but this committee is ineffective, and we need more multi-use building immediately to make our metro initiatives a success.

**Comments for Public Posting:** SUPPORT This item would dissolve the Major Transit and Transportation Construction Traffic Management Committee – a committee put in place to “minimize the loss of traffic capacity” during major construction of projects. In reality, it just slows projects down (including new housing construction) for the benefit of motorists saving a few seconds. We need to move faster building new housing and building multimodal infrastructure as a city This committee simply slowed everything down, sometimes for more than 6 months on particular projects, just to avoid slight delays to motorists Support dissolving the committee

**Comments for Public Posting:** I support dissolving the committee and hope you will too. Projects were slowed down, some for more than 6 months, without much benefit to motorist. Getting new housing and multimodal infrastructure built needs to be a higher priority. Thank you
