

MOTION

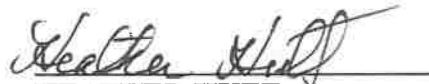

The Major Transit and Transportation Construction Traffic Management Committee (TCTMC) works to minimize the loss of traffic capacity within various Major Transit and Transportation Construction Impact Areas resulting from construction activity, including Metro Rail, Light Rail, busway, utility, private development, street improvement, street maintenance, and major public works project in accordance with the City of Los Angeles Municipal Code SEC. 62.250. While the TCTMC's objectives are well-intended, in practice it has unduly increased the time required for projects to obtain plan approvals due to numerous inefficiencies.

Given the history of the TCTMC, the City should dissolve the committee and have City staff come back with a new process that provides the efficiency and timeliness these projects require and deserve.

I THEREFORE MOVE that the City Council REQUEST the City Attorney to draft an ordinance repealing the TCTMC.

I FURTHER MOVE that the City Council INSTRUCT the Bureau of Engineering to report back with recommendations to implement a new process to take the place of the TCTMC that creates a timely, internal process that moves projects to approval in a quick and efficient manner.
