Council File No: 25-0912

Comments for Public Posting: Hon. City Council: I support Council File 25-0912, which would require special event permittees to include public transit access information in their promotional materials. Major events generate traffic impacts, even in areas that have already seen substantial investment in transit. I want to emphasize that bicycle infrastructure and safe bike lanes should be included. Such as where these bike lanes are located and how to make it easier for bicyclists to access them. Other required information should include the nearest train/subway/bus stations and late-night options as well. We must ensure that transit riders have access to all forms of multimodal transportation and options be made available for everyone.
