Comments for Public Posting: I strongly oppose this project! Sun Valley has done its share when it comes to supporting the unhoused population. Sun Valley should receive improvement without having to exchange for a Tiny Homes project. Sun Valley has done its fair share! We need projects that bring pride to the residents of Sun Valley. We supermarkets, department stores, and family restaurants. Those individuals who want housing and resources have taken them. Those who do not want housing, resources, and rules continue to dwell in vehicles creating nuisance in our community. They receive care, care plus services that only clean the space and as soon as the City departments are finished with the cleanups, the homeless come back and many times multiplied to more encampments and vehicular dwelling. Sun Valley will end up with the homeless who want housing from other Council Districts in addition to all those who continue to live in the streets. The unhoused population will grow in Sun Valley. We have the perfect environment for them given that approximately one third of Sun Valley is industrial zoned. No more tiny home projects! I am a member of SVANC, but I am speaking on my behalf.
