Comments for Public Posting: I'd like to support this motion because the Allegheny Park is in my community. The splash pads would be a great asset to this park. However, I would like a town hall where the community can learn about how the splash pads will be incorporated into the space. When this park was proposed, there were at least three community meetings where we discussed the park's theme, the amenities, the equipment, the materials to be used, the type of trees, the landscape, the benches, the art, the barbeque tables, the restrooms, the walking path, and the office. I welcome the Splash pads, but I'd like to know that the work and feedback the community put into getting this park approved is being respected. I am a board member of the SVANC, but I am speaking on my behalf.
