Comments for Public Posting: We need more bike lanes wherever we can in this city. Requiring them to be a certain width will slow down installation. Drivers will have to make room for emergency vehicles as always.

Comments for Public Posting: As someone who is on his bike dail, wider bike lanes initially sounded like a good idea to me. However if this gets in the way of finishing a connected network of lanes so riding a bike is a safe option to get around, I'm not in favor. If there's only space for the usual smaller lane they should be permitted so the city can keep building a network.

Comments for Public Posting: I fully support this item to install wider bike lanes. And while we're at it, they need to be protected bike lanes as well. I understand that there is incentive of emergency vehicles being able to use the bike lanes, however, if there is only room for standard 5' bike lanes, they should be allowed to be installed on future projects. Thank you for your consideration.
