Comments for Public Posting: As a former resident living right on the corner of 6th and Kenmore, I know how much of an improvement this would be. There has always been too much commotion, congestion, and opportunity for accidents on 6th st due to its 2 way traffic and parking on both sides of the street and the fact that there is already a lot of foot traffic as well. Padestrianizing 6th would not only be an improvement but a very logical one at that. I fully support this item!

Comments for Public Posting: Koreatown is notorious for the lack of parking because people don't have the incentive or options to enjoy car-lite or car-free recreation, a pedestrianized 6th Street in Koreatown could change that. Or perhaps they already do with Purple line stops in place but the extension will make it even more accessible. The feedback from Koreatown locals has been very positive. As a Westwood local, I would love to see the success of Broxton Plaza in Westwood replicated all over the city. More public park-like third places are good for businesses, community wellbeing, and standard of living, as long as we don't let greedy landlords take advantage of it, which would lead to green gentrification.

Comments for Public Posting: My wife and I are the process of moving to the neighborhood around this proposed pedestrian area. One of the big selling points for the area was what a nice place 6th was to be. This could only be improved by limiting car access. It would make the area more pleasant and would encourage more people to stick around and support local businesses. Please restrict cars on the weekends and consider making the change permanent.
