**Comments for Public Posting:** As someone who frequents this specific area of Ktown, pedestrianizing this street would be a bonus in making this already heavily visited zone even better. Removing car traffic allows the community to move freely between businesses and have a new leisure space without fear of cars speeding through. This plan to give the street back to the community is a win, and can be a model for other populous areas throughout the city!

**Comments for Public Posting:** Pedestrianized streets are great and LA should have more of them, this is a great program!
