Comments for Public Posting: I strongly oppose any attempt to delay or phase the implementation of SB 79. The proposed 2030 timeline is an unacceptable postponement of our city's future. Every year of delay leaves our transit corridors under-utilized and keeps housing costs out of reach for families. We must move away from the "tyrant's veto" of discretionary reviews and adopt the objective standards of SB 79 immediately. Increased density is not a threat; it is the economic engine that sustains our local businesses against online giants and provides the property tax base necessary to fund the green spaces I am fighting to build. We need livable density now to create the community interaction and open space equity our neighborhoods deserve. Do not delay—implement SB 79 on July 1, 2026.
