Comments for Public Posting: I fully SUPPORT Councilmember Hernandez's resolution and OPPOSE the LA ART Gondola. As a CD1 resident and car-free Metro rider, I am deeply concerned about the impacts of the Gondola towers and stations on the existing Metro A Line. The Alpine Tower looks impossibly close to the A Line tracks, yet there was no mention of the Gondola's impact on the A Line, whether during construction or long-term, in the EIR. This is unacceptable, as the A Line, unlike the Gondola, represents true public transit that serves Angelenos. I am also concerned about the impact on Olvera Street, which is not only an important part of DTLA and Chinatown history and a tourist destination, but has served as a community hub during ICE raids and related protests. Residents of CD1, CD13 and CD14 want and deserve better car-free access to Dodger Stadium, but through means such as upgraded pedestrian access with adequate solar street lighting, dedicated bus lanes, improved buses (Dodger Stadium Express, LADOT DASH, and/or Metro), and increased A Line service. If Frank McCourt and LA ART want to fund these improvements to invest in our city, I would welcome that! But it is increasingly apparent, through what has been studied and what is notably omitted from study, that the Gondola will not serve the public transit needs of Angelenos and will only worsen the public transit we do have.

Comments for Public Posting: This is a proposal that will not assist with getting fans to Dodger Stadium faster. It appears to only allow Frank McCord to possibly develop the parking lots. It seems that a guy who first bankrupted the Dodgers and sold the Dodgers shouldn't be allowed to do anything with the parking lots or the City of Los Angeles.

Comments for Public Posting: I am a resident of Los Angeles in Council District 4. I am deeply concerned about the proposed Dodger Stadium gondola project and here are the reasons why: 1. This project would cut through our communities and treasured green spaces, with reports showing it will destroy hundreds of trees, disrupt wildlife, and ruin irreplaceable park views. 2. These spaces matter to all of the people in the neighborhood where the proposed gondola would operate - especially seniors, children, and those with disabilities who rely on the open spaces for recreation and health. 3. A gondola does not address real transit needs but is really a Disneyland-type ride. For most fans and residents, better shuttle bus service or more accessible public transportation would make a far bigger difference in reducing traffic without sacrificing public parkland. 4. All City Council members whose districts are impacted by this project oppose it. 5. I urge you to oppose the gondola project and call for a comprehensive study focused on genuine transit solutions that respect our parks and communities.
