**Comments for Public Posting:** I support this motion to revoke the permit issued to build the concrete wall at 4311 Lincoln Blvd. I have been using this access point to access coastal resources for 30 years and want access to be restored. I have tried to access the path and neighborhood from other points along Lincoln and they are cumbersome and dangerous. Riding a bike on Lincoln in that area is not safe. Our only other option is to then ride along the sidewalk on Lincoln which is also not safe. I dont understand why the access point is not considered a public easement. It has been used continuously for decades and for the property owners to unilaterally block access creates a harm and nuisance to the community. We need a safe, easy and accessible access point to the bike path and the Marina. Thank you in advance for your consideration of this matter.

**Comments for Public Posting:** I support this motion to revoke the permit issued to build a concrete wall at 4311 Lincoln Blvd. I have been using this access point to access coastal resources for 5 years and want this access to be restored for pedestrians and cyclists ASAP. The audacity to think one developer had the right to cut off a public access point was a gross miscalculation and an unfortunate choice to not take the public's use of this point into account before granting the permit.
