Comments for Public Posting: I am writing in strong support of an appeal to, and ultimately the reversal of, the Scattergood Green Hydrogen plan. Despite its "green" label, this project will burn methane for decades more and is incompatible with the City's commitment to achieving 100% clean energy. Furthermore, it's a boondoggle, as it will cost nearly a billion dollars at best but is predicated on technology that doesn't even exist yet. Finally, it will harm the health of City residents and pose a substantial risk of explosions. I urge you to reject this ill-advised plan and invest in true green energy solutions.
