

CIS CF-25-1363 and CF 25-1370    Oppose unless amended

While we support the City's legal obligation to adopt the State WUI Code structure, we oppose any attempt to use that structure to bypass the CFAC/LAFD report to CF 10-2468-S2 voted by City Council as the City's adopted policy framework. Nor should this structure be used to impose sweeping vegetation-removal rules that degrade our neighborhoods and our urban forest and make hillside communities less safe.

We respectfully urge you to uphold your prior decision, and ensure that LAWUIC reflects the science-based, ecologically grounded approach that Los Angeles has already embraced.

CFAC continues to collaborate with LAFD, and their position supporting hydrated vegetation remains unchanged.

This position was voted and adopted at our December 4, 2025 CFAC meeting.

Joanne D'Antonio  
Chair, Community Forest Advisory Committee
