Comments for Public Posting: As a resident living in the proximity of Jones Chemicals Inc., it is very disturbing to discover the numerous violations that persist at this facility. Additionally, there is no specific effective warning system to inform the public of danger should a leak occur. We need to have proactive leadership and not reactive. Every home and business in the downwind areas/kill zone needs to be prepared to shelter in place with proper supplies of thick plastic sheeting, duct tape, and respirators. Jones Chemicals Inc. is playing a game of Russian roulette with the community when they continue to neglect the facility and disregard public safety.
