Comments for Public Posting: I have lived about 1 mile from the Jones chlorine transfer station for over 50 years, and drive and visit frequently the area. I cringe at the Boys & Girls club located just feet from this site. The area has many families living within 1/2 mile of this site. My God, several hundred will be killed and more will suffer if an accident happens at this place. Surely there is an area where this transfer station can be located in a less populated area. This is a disaster waiting to happen.
