**Comments for Public Posting:** The residents of San Pedro respectfully request a limitation on future rehab facilities in our town. We are inundated with so many by the Fred Brown organization, many not being run with the proper oversight that they should be. Many of our neighborhoods have drugged out zombies who are supposedly residents of these “sober living” facilities yet are continuing to use drugs and commit crimes. The most recent attempt to open one of these facilities was done with no public discourse or discussion and was nearly adjacent to a church with a connected preschool where young children play on a yard outside. Our town is interested in being good stewards and we support people getting their lives together and recovering from their addictions but there needs to be proper oversight so that clusters of these organizations don’t take over our once peaceful neighborhoods.
