**Council File No:** 25-1518  
**Comments for Public Posting:** This is an outrage and something when we first started fighting for this, we were told that the Historic Bldg would be preserved. There is a reason, cities and Los Angeles have this preservation. To remember outstanding and / or different types of architecture or history that helped make this city. When we originally started on this project, close to 14 years ago, we preserved the building. The non sterility of the building, looking like everything else, was its beauty. Its use of a patio and the nature of the 2 story building. With rooms that aren't square, that have a unique look and identity and the anomaly of it all. I am outraged now that the city would allow this to go on, with no checks and accountability and ignoring the procedures set in place to protect our history and buildings. I strongly reject this project and strongly reject this procedure of moving ahead without regard to the procedures already set up. To the council, reject this proposal. Save history. Save the reminder of what was there before. Reject opportunists who want to go around EPA, City & State mandates et. al.
