Council File No: 26-0184

Comments for Public Posting: Dear City Council members, This is Dr. Kioumars Kashi and I strongly support Councilmember Blumenfield's Motion (CF 26-0184). Our community in the Girard Tract is located within a Very High Fire Hazard Severity Zone (VHFHSZ) and lacks the infrastructure for the high-density development proposed under AB 2011/2243. The City must require a full CEQA review and an Environmental Impact Report (EIR) to protect our public safety and the fragile Santa Monica Mountains ecosystem. Please approve this motion to ensure responsible, balanced land use. Best regards Kioumars Kashi, MD

Comments for Public Posting: We strongly support Councilmember Blumenfield's Motion (CF 26-0184). Our community is located within a Very High Fire Hazard Severity Zone (VHFHSZ) and lacks the infrastructure for the high-density development proposed under AB 2011/2243. The City must require a full CEQA review and more importantly an Environmental Impact Report (EIR) to protect our public safety and the fragile Santa Monica Mountains ecosystem. The country club is a migration site for Canada geese and a green lung in the area. Please approve this motion to ensure responsible, balanced land use.

Comments for Public Posting: As a resident of the Girard Tract, I strongly support Councilmember Blumenfield's Motion (CF 26-0184). Our neighborhood is located within a Very High Fire Hazard Severity Zone, with narrow roads and limited infrastructure that are not equipped to handle the high-density development proposed under AB 2011/2243. Given the serious wildfire risks and the sensitive Santa Monica Mountains ecosystem, the City must require a full CEQA review and Environmental Impact Report (EIR) before moving forward. Public safety and responsible land use must come first. Please approve this motion to protect our community.

Comments for Public Posting: I'm outraged at even the suggestion of a development on the north end of this ecologically important neighborhood green space. I strongly support Councilman Bob Blumenfield's motion (CF 26-0184). Our community in the Girard Tract is located within a Very High Fire Hazard Severity Zone (VHFHSZ) and lacks the infrastructure for the high-density development proposed under AB 2011/2243. The City must require a full CEQA review and an Environmental Impact Report (EIR) to protect our public safety and the fragile Santa Monica Mountains ecosystem. Please approve this motion to ensure responsible, balanced land use.

Comments for Public Posting: I strongly urge the council to adopt Councilmember Blumenfield's motion CF26-0184. The environment is not permanent. It cannot be retroactively saved. A fire started, a landslide in progress, and a rockfall in motion cannot be easily halted. But we can put away fire starters, avoid removing land supports, and pave our roads in areas that aren't adjacent to unstable rocks. Close the loopholes. Examine the safety of the project. Stop the damage before it can't be undone.

Comments for Public Posting: I strongly feel that the proposed development of The Woodland Hills Country Club is an attempt to take advantage of unfortunate loop holes in the law. Roads in the area are unable to safely handle the major increase in evacuation traffic that would be produced in a fire, earthquake or other real emergency and likely would result in increased injury and death. In addition, the current open space of the golf course now serves as a firebreak potentially protecting areas around it from fire. I strongly support Councilmember Blumenfield's Motion (CF 26-0184). Our community in the Girard Tract is located within a Very High Fire Hazard Severity Zone (VHFHSZ) and lacks the infrastructure for the high-density development proposed under AB 2011/2243.
