Comments for Public Posting: The areas near Girard track in woodland hills are already dense with housing in an area that is extremely hilly, winding & prone to wild fire. Destroying the open space & trees that the golf course currently has will put the entire area from Topanga Canyon to Calabasas to Malibu in danger during a wild fire not only that but the area is not commercial it is a residential neighborhood. This development does not make any sense for this area as we have enough apartments and storefronts going up in warmer center. Stop this dangerous development now & keep open space & trees in the Santa Monica Mountains!
