Comments for Public Posting: I support this motion to add \$65,000,000 to the 2025-26 Municipal Improvement Corporation of Los Angeles (MICLA) Program to surge installation of solar-powered streetlights across the City (at least 500 per Council District) with the Street Lighting Maintenance Assessment Fund as the source of funds to support these MICLA projects. Many of our areas are left in darkness making walking and driving dangerous in our communities. At the corner of San Pascual and York, every time I make a left turn, I worry that there may be a pedestrian who I may hit because it is so dark and the angle going down limits visibility. I try to be a safe driver, but am frightened each time I navigate this turn from York to San Pascual. Let's use the sun to light our City streets and not have to worry about copper wire thefts. Thank you for bringing this motion.
