Council File No: 26-0205

Comments for Public Posting: Hello Council Members. I am writing in support of Item No. 26-0205, specifically authorizing the city to further utilization of Solar-Powered Streetlights. In a time of an epidemic copper wire thefts, periodic power outages and natural and man-made urban catastrophes, this is a smart and feasible means to ensure reliable street lighting services, both for the benefit of public safety and to lessen the city's liability in those situations in which lack of street lighting is held responsible for a claim against the city. Please lend your encouragement and your vote to this proposal. With Many Thanks - PGN
