ADHCC Recovery

MOTION

As part of the Fire Department's brush clearance program, the Department recently issued a number of notices of non-compliance, which includes a \$31 fine, to owners whose property was damaged or destroyed in the Palisades Fire.

While these notices are issued by an automated system, it is unacceptable to send these notices to Palisades fire victims. The majority of these lots are vacant, and have no structures or vegetation of concern. These property owners should not be fined for brush clearance issues while they are in the rebuilding process, and the City should ensure that these notices are rescinded, and any fees collected refunded.

I THEREFORE MOVE that the Fire Department BE DIRECTED to rescind notices of brush clearance non-compliance issued to property owners of damaged or destroyed properties in the Pacific Palisades, and refund any fees collected as well as stop any process for escalating fees or penalties associated with brush clearance on these properties.

I FURTHER MOVE that the Fire Department BE DIRECTED to report in 30 days regarding the feasibility of developing a customized program to deliver active brush clearance and maintenance in the Palisades disaster zone, including private properties, as well as outreach, notification, and collaboration with the local community regarding compliances, deadlines and fees.
