**Comments for Public Posting:** I want the city council to amend this motion to include all non-storefront retail cannabis activities. After the recent law change my business partners and I were excited to apply for a license that includes manufacturing, distribution, and delivery. After many months calling landlords and due diligence, we found a compliant location in Pacoima; only to find out that even if we were to submit a pre-application today, we would be denied because the municipal code has not caught up. We are happy that the City Council recognizes this issue, but the motion does not go far enough. Leaving out distribution and manufacturing, for example completely kills two thirds of our business that is built around being able to produce our own cannabis products in-house. Please allow entrepreneurs like me and many others across the city to enter the market with fully realized businesses by amending the motion to include all non-storefront retail license types.
