**Council File No:** 26-0489

**Comments for Public Posting:** I demand the City Council place the Charter Reform Commission's full package on the ballot without alterations. Specifically, I support the proposal to expand the City Council to 25 single-member districts to improve constituent representation. Furthermore, to solve our city's infrastructure crisis, I support the creation of a mandatory Citywide Capital Infrastructure Program (CIP) and the elimination of Charter Section 580, ensuring centralized, accountable management of our transit and street safety data free from local political delays when it benefits the city at large.
