| **Comments for Public Posting:** | There is a real issue on the mismanagement of LAPD and how it is consistently given all the financing this city has to offer while the Chief officer has refused to follow California state mandate to not support ICE. This along with the massive liability shadowing all others in the city, by forcing Los Angeles city to payout up $450M in total payouts due to abuse of power through excessive use of force lawsuits. Crime rates are at their lowest in the last 60 years of this city. The LA Greens support abolishment of POLICE and redo a public safety program to protect public services |
