Council File No: 26-0803

Comments for Public Posting: This motion addresses my concern that the recently implemented speed camera pilot program - which I in principal support given how people continue to drive in this city - would open up a market for greater and less responsible surveillance, and in particular contracts with Flock. Technology has consistently outpaced legislation since I was born, and the result has been a world in which someone accessing the website to submit a comment on this motion is more than likely having their privacy violated for profit by their browser and/or computer. At least today you can still log off and go outside, but we are already seeing a proliferation of for-profit cameras in the form of Waymos and food delivery robots, with alarmingly little oversight of who is watching and where the feeds are going - and Flock is a worse actor and greater threat by far.
