GLASSELL PARK
IMPROVEMENT ASSOCIATION

17 June 2026

Councilmember Eunisses Hernandez
Councilmember Hugo Soto-Martínez
200 N. Spring Street
Los Angeles, CA 90012

Re: CF-26-0803

Dear Councilmembers:

The Glassell Park Improvement Association (GPIA) supports CF-26-0803 as written, and we also believe the motion should be amended to request both removal of all existing Flock Safety cameras in the City of Los Angeles and suspension of future camera installations until the reviews requested have been received and fully vetted.

Speeding on our city's thoroughfares and residential streets is, of course, dangerous; but there are remedies for speeding that don't involve widespread collection of—with the possibility of selling—data on our city's residents.

We are concerned that, without clear rules governing how the data will be used, information collected by cameras throughout the city could be used against residents; and we, therefore, urge you to amend and then approve the motion to completely stop data collection of any kind by Flock Safety.

Thank you.

Sincerely,

Bill Curtis

Bill Curtis, President
On behalf of the GPIA Board of Directors

Comments for Public Posting: Dear Members of the Public Safety Committee, I am a resident of the Cheviot Hills neighborhood of the City Of Los Angeles, writing to express my support for maintaining the LAPD's ability to use the Flock Safety ALPR cameras. Our neighborhood association raised over $200,000 of private funding in just a few weeks to install a network of ALPR cameras. We evaluated multiple approaches to crime prevention and ultimately chose ALPR cameras because our residents wanted a solution that would both act as a deterrent and assist the LAPD in identifying and apprehending suspects once a crime had occurred. The level of private funding demonstrates the level of confidence and support our Cheviot community has for this technology. On a personal note, our home was burglarized shortly before Christmas of 2024, during a time when Cheviot was experiencing multiple burglaries a week -- if not a day!. Since the ALPR cameras have been installed, they have helped the LAPD identify suspect vehicles on a number of occasions which were connected to burglaries, robberies and other crimes. They have provided LAPD with valuable investigative leads that they would not have otherwise had, and have contributed to arrests and case resolutions. Most recently, they helped LAPD identify a burglary "crew" operating in several West L.A. neighborhoods, as well as suspects connected to recent street robbery investigations. I understand the concerns regarding privacy and support necessary and appropriate safeguards and oversight regarding the use of this technology. However, I don't believe eliminating the ALPR cameras is the right approach. I respectfully ask that you take into consideration the experiences of the communities that have seen significant public safety benefits from these cameras before making any decisions regarding the City's agreement with Flock Safety. Thank you in advance for your consideration and, as always, thank you for your service to our city. Regards, Chris Ann Maxwell Council District 5 / Cheviot Hills

Comments for Public Posting: I’m writing in support of maintaining flock cameras in my neighborhood in cheviot hills. We have found these helpful tools for deterring crime and for catching criminal when we work together with law enforcement and our string neighborhood watch program. Thank you
