**Comments for Public Posting:** LA's animals NEED this urgently!! There is no need to continue euthanising animals, because of overcrowding, animals's lives are equally worthy to humans and if the system built is collapsing, then there needs to be rethinking to change for the better and bigger without inhumane and cruelty to animals' welfare. Rethinking and building lasting change for better now is ALWAYS smarter than feeding into an existing problem and looking away. No real change was ever created that way!
