Comments for Public Posting: Thank you for potentially addressing this chronic issue in a meaningful way One individual can cause horrific concern to many hundreds of Taxpaying Voters and Pets with each extra loud aerial explosion As each new year becomes the hottest on record, the ongoing use of illegal fireworks becomes increasingly catastrophic potentially everywhere A wide-area zero-tolerance policy is a must for rational enforcement Increased penalties and escalating penalties are both proven deterrents A well crafted host-liability system could mitigate some of the most egregious offenders while offering specific protections for property owners Unpaid fines should be assigned to the properties next year's tax bill Disposal of seized fireworks needs to be streamlined and costs minimized Any cost of response should be assigned to those using illegal fireworks Cities all around Los Angeles are successful utilizing Drones, while being cost neutral or even cash positive based on fines issued. The objective is not a new revenue stream, but a significant reduction in the cost of responses and a reduction in the risk of wholesale destruction Which of two brush fires New Years Eve, one illegal fireworks, the other an off-duty Uber driver, was ever determined to be the cause of the Pallisades fire ? All Community relationships are enhanced by illegal fireworks mitigation and reduced fireworks related calls for service allows resources to be used elsewhere
