

MOTION

As authorized by Council File 25-0333, the Bureau of Street Lighting entered into an agreement with the California Department of Technology to build a 12.1-mile segment of the State's Middle Mile Broadband Initiative fiber-optic network along the Highway 110 Corridor, between Downtown Los Angeles and Highway 91. Construction is scheduled to be completed by December 31, 2026, and the project remains on track. Overtime has been necessary to keep the project on schedule and reduce impacts on nearby communities. This is especially important during the fiber installation phase, when cables are pulled through long sections of underground conduit. The overtime will be paid from existing project funds dedicated to this project and cannot be used for other purposes. As a result, this transfer of funds will not impact the Bureau's other work.

I THEREFORE MOVE that \$400,000 be transferred/appropriated from the Digital Inclusion Fund No. 65Q-50, Account No. 50AMMB to the Public Works Bureau of Street Lighting Fund No. 100-84, Account No. 001090 (Overtime General) to complete the Middle Mile Broadband Initiative fiber-optic network project.

I FURTHER MOVE that the Bureau of Street Lighting be authorized to make any corrections, clarifications, or revisions to the above fund transfer instructions, including any new instructions, in order to effectuate the intent of this Motion, and including any corrections and changes to fund or account numbers; said corrections/clarifications/changes may be made orally, electronically, or by any other means.
