Comments for Public Posting: With the threat of reduced funding, perhaps you will be a bit more careful with your expenditures. Like caving to the public unions for outlandish salaries and benefits. Like flushing millions down the homeless industrial complex. Your fetish for criminals, the mentally ill and or drug addicted homeless, and illegal aliens. The stupidity of bringing the Olympics to this city in decline. And of course, bending over backwards giving all sorts of cash and prizes to the movie industry because after doing the math, they fled LA and then you stick it to those who can't leave for friendlier business climates. You gin up the crowd against Trump, ICE, the Feds, so they march with silly signs with incoherent statements. Perfect, they focus on that shiny object which provides cover for your gross incompetence and dirty dealing.
