Council File No: 26-1124

Comments for Public Posting: Stop treating this city like a company. No Construction projects for homelessness, childcare. Not even one. Also why is this not in the Budget Committee, besides the obvious fact that the chair is Padilla. At a time when Mayor Bass seat is being challenged and looking to reward her allies. I demand that you fund something for the social welfare without expectation to generate revenue. If you really are serious about making profit tax those city that are not paying their fair share of taxes. Residents and Companies alike.
