Comments for Public Posting: It is time for the City of Los Angeles to prioritize the safety and well being of its residents over the financial viability of an arrogant, neglectful, dangerous chemical company. Their feasibility study needs to be made public so we can ensure the surrounding neighborhoods will be protected during whatever action is taken. The existence of JCI in the middle of a residential neighborhood and right next to a Boys and Girls Club is insane. The possibility that any sort of construction will be done on a superfund site that used to produce DDT outdoors is nuts. Protect our kids. Thousands of lives are in jeopardy. JCI needs to relocate to an area where they can enclose their chlorine gas processing apparatus. Where their tankers don't drive 20 feet from homes as they enter and exit their facility from their one and only access point located mere feet from the Cheryl Green Boys and Girls Club.
