Comments for Public Posting: I am in strong support of Councilmember McOske's street takeover motion. These illegal activities have been happening for far too long with little to no law enforcement. While they have been most prevalent in the Harbor Gateway area, they are now spreading quickly to other jurisdictions including San Pedro where I reside which is why I ask that the motion expand to include more geographic areas. If we don't, the illegal activities may move to areas with little to no focus. This is a problem for all of us. I agree with all of the actions suggested in the motion. There must be more arrests, increased fines, and possible jail time to discourage future takeovers. Keep listening to our communities recognizing that this problem requires more than a one-size-fits-all response. It requires enforcement, engineering, technology, accountability, community involvement, and coordination across jurisdictional boundaries. Our stakeholders deserve protection from this continued criminal activity.
