Council File No: 26-1150

Comments for Public Posting: I support Council File 26-1150. Street takeovers are dangerous and disruptive for residents and anyone traveling through these areas. I also support exploring the use of physical measures like bump stops to help prevent takeovers and make these streets safer. Thank you for supporting this motion. Derek

Comments for Public Posting: Building off of last Friday's street takeover enforcement please make the street takeover issue a priority. This is not true car culture and the residents and businesses in the surrounding areas feel helpless. These street takeovers target areas that they and the community perceive as abandoned by the city. The presence of a takeover should be a signal that the people believe that area to be unsupported by the city.
