DEPARTMENT OF CITY PLANNING

RECOMMENDATION REPORT

City Planning Commission

Date: July 9, 2026
Time: After 8:30 A.M.*
Place: Los Angeles City Hall
200 N. Spring Street, Room 340
Los Angeles, CA 90012

And via Teleconference. Information will be provided no later than 72 hours before the meeting on the meeting agenda published at https://planning.lacity.org/about/commissions-boards-hearings and/or by contacting cpc@lacity.org.

Public Hearing: May 12, 2026
Appeal Status: Zone Change and Height District Change are appealable only by the applicant to City Council if disapproved in whole or in part. Project Review and Conditional Use are appealable to the City Council by any party.

Expiration Date: July 26, 2026
Multiple Approval: Yes

Case No.:	CPC-2025-5194-HD-CU2-PR-ZC
CEQA No.:	ENV-2025-5195-MND
Incidental Cases:	N/A
Related Cases:	N/A
Council No.:	10 – Hutt
Plan Area:	Wilshire
Specific Plan:	Mid City Recovery Redevelopment
Existing Zones:	C2-1-O
Proposed Zone:	(T)(Q)C2-2D-O
Certified NC:	Olympic Park
GPLU:	Community Commercial
Applicant:	David Kelly, Westport Properties Inc.
Representative:	Dana Sayles, Three6ixty

PROJECT LOCATION: 4802 – 4828 West San Vicente Boulevard

PROPOSED PROJECT: The Project involves the demolition and removal of an existing one-story warehouse building and surface parking, and the construction, use, and maintenance of a 161,645 square-foot, seven-story self-storage building for household goods on an approximately 30,610 square-foot site. The self-storage facility will feature storage units across each floor level, a 954-foot ground floor office area, 608 square-foot lobby, and 376 square-foot community/multi-purpose room and would operate between 7:00 a.m. to 10:00 p.m., daily.

REQUESTED ACTIONS:

1. Pursuant to Sections 21082.1(c)(3) and 21081.6 of the California Public Resources Code and CEQA Guidelines Section 15074(b), consideration of the whole of the administrative record, including the Mitigated Negative Declaration No. ENV-2025-5195-MND ("Mitigated Negative Declaration"), all comments received, the imposition of mitigation measures and the Mitigation Monitoring Program prepared for the Mitigated Negative Declaration;

2. Pursuant to LAMC Section 13B.1.4 of Chapter 1A, a **Zone Change and Height District Change** from C2-1-O to (T)(Q)C2-2D-O to permit additional floor area up to a maximum Floor Area Ratio of 6:1 in lieu of 1.5:1, including the following:

a. A waiver of the requirement to dedicate and improve an additional 2.5 feet of the existing public alley;

3. Pursuant to LAMC Section 13B.2.2 of Chapter 1A, a **Class 2 Conditional Use** to permit storage uses within 500 feet of an R Zone, and;

4. Pursuant to LAMC Section 13B.2.4 of Chapter 1A, **Project Review** for a development project which creates, or results in an increase of 50,000 gross square feet or more of nonresidential floor area.

RECOMMENDED ACTIONS:

1. **FIND**, pursuant to Sections 21082.1(c)(3) and 21081.6 of the California Public Resources Code and CEQA Guidelines Section 15074(b), after consideration of the whole of the administrative record, including the Mitigated Negative Declaration, No. ENV-2025-5195-MND ("Negative Declaration"), and all comments received, with the imposition of mitigation measures, there is no substantial evidence that the project will have a significant effect on the environment; **FIND** the Mitigated Negative Declaration reflects the independent judgment and analysis of the City; **FIND** the mitigation measures have been made enforceable conditions on the project; and **ADOPT** the Mitigated Negative Declaration and the Mitigation Monitoring Program prepared for the Mitigated Negative Declaration;

2. **RECOMMEND** that the City Council approve a Zone Change and Height District Change Ordinance from C2-1-O to (T)(Q)C2-2D-O in order to permit additional floor area up to a maximum Floor Area Ratio of 6:1 in lieu of 1.5:1, including a waiver of the requirement to dedicate and improve an additional 2.5 feet of the existing public alley;

3. **APPROVE** a Class 2 Conditional Use to permit storage uses within 500 feet of a R zone;

4. **APPROVE** a Project Review for a development project which creates, or results in, an increase of 50,000 gross square feet or more of non-residential floor area; and

5. **ADOPT** the attached Conditions of Approval and Findings.

VINCENT P. BERTONI, AICP
Director of Planning

Milena Zasadzien
Principal City Planner

Esther Ahn
City Planner

David Woon
Planning Assistant

ADVICE TO PUBLIC: *The exact time this report will be considered during the meeting is uncertain since there may be several other items on the agenda. Written communications may be mailed to the *Commission Secretariat, Room 272, City Hall, 200 North Spring Street, Los Angeles, CA 90012* (Phone No. 213-978-1300). While all written communications are given to the Commission for consideration, the initial packets are sent to the week prior to the Commission's meeting date. If you challenge these agenda items in

court, you may be limited to raising only those issues you or someone else raised at the public hearing agendized herein, or in written correspondence on these matters delivered to this agency at or prior to the public hearing. As a covered entity under Title II of the Americans with Disabilities Act, the City of Los Angeles does not discriminate on the basis of disability, and upon request, will provide reasonable accommodation to ensure equal access to these programs, services and activities. Sign language interpreters, assistive listening devices, or other auxiliary aids and/or other services may be provided upon request. To ensure availability of services, please make your request not later than three working days (72 hours) prior to the meeting by calling the Commission Secretariat at (213) 978-1300.

PROJECT ANALYSIS

PROJECT SUMMARY

The proposed Project involves the demolition and removal of an existing, one-story warehouse building and associated parking lots and the construction, use, and maintenance of a new seven-story, self-storage facility in the Wilshire Community Plan area. The storage facility will feature storage units across all seven floor levels and include a 954 square-foot office space, 608 square-foot lobby, 376 square-foot community/multi-purpose room, five vehicular parking spaces, two loading spaces, and 36 bicycle parking spaces. Storage units will range from 25 – 200 square feet and will be accessible to customers between 7:00 a.m. to 10:00 p.m., daily. As shown in Figure 1, the project will front West San Vicente Boulevard, South Tremaine Avenue, and South Longwood Avenue

Figure 1. Proposed seven-story, self-storage facility fronting San Vicente Blvd. Pedestrian and automobile access is located along San Vicente Blvd and Longwood Ave (right)

The Project will encompass a total floor area of 161,645 square feet on an approximately 30,610 square foot site, with a Floor Area Ratio (FAR) of 5.28:1, and will rise to a maximum height of 84 feet and 8 inches to the top of the building parapet. As shown in Figure 2 below, five vehicular parking spaces and two loading spaces will be located within an enclosed garage on the first-floor level and will be accessible through a two-way driveway along Longwood Avenue. The Project will also provide 18 short-term bicycle spaces along the sidewalk of Longwood Avenue and 18 long-term bicycle spaces within a bicycle storage room adjacent to the facility's office area. Pedestrian access will be located off the corner of San Vicente Boulevard and Longwood Avenue.

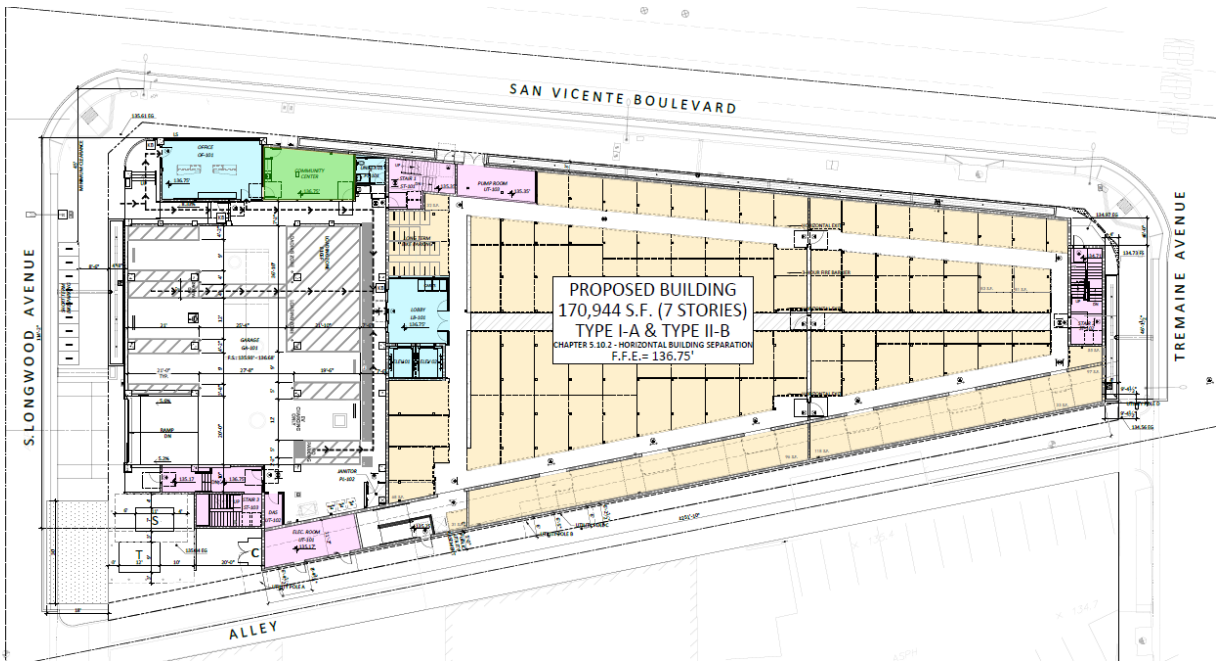

Figure 2. Conceptual Site Plan. Storage facility access and parking are located at the western portion of the site. Storage units are located across all seven (7) floor levels

The Project will feature street trees and lighting along the perimeter of the self-storage facility. A landscaped buffer and eight street trees will be installed between the sidewalk and roadway along San Vicente Boulevard. The Project's transformer and electrical cabinet will be located on the southwest corner of the site and will be appropriately screened from public view to reduce visual and auditory nuisances.

PROJECT BACKGROUND

Project Site

The subject property is comprised of 12 lots (Lots FR 660 - 671) with a total lot area of 30,613 net square feet, or 0.70 acres, in the Wilshire Community Plan area. The property has a frontage of approximately 298 feet along San Vicente Boulevard, 137 feet along Longwood Avenue, and 51 feet along Tremaine Avenue. Currently, the site is developed with a one-story warehouse building and two parking lots. All existing improvements will be demolished and redeveloped into the proposed seven-story self-storage facility.

The Project site does not contain any on-site trees. Three street trees are currently planted along San Vicente Boulevard and two street trees are planted along Longwood Avenue. The Project will remove the two trees along Longwood Avenue and replace them to the satisfaction of the Department of Public Works Urban Forestry Division. The Project proposes eight street trees within a landscaped buffer separating the pedestrian sidewalk and roadway along San Vicente Boulevard.

General Plan Land Use Designation and Zoning

The Project site is located within the Wilshire Community Plan, which is one of 34 Community Plans which together form the Land Use Element of the General Plan. The Community Plan designates the site for Community Commercial land uses with the corresponding zones of CR, C2, C4, P, PB, RAS3, and RAS4. The Project requests a Zone Change and Height District

Change from C2-1-O to (T)(Q)C2-2D-O to permit an increase in floor area. The Project site will remain consistent with the General Plan's land use designation as it will maintain its C2 zoning.

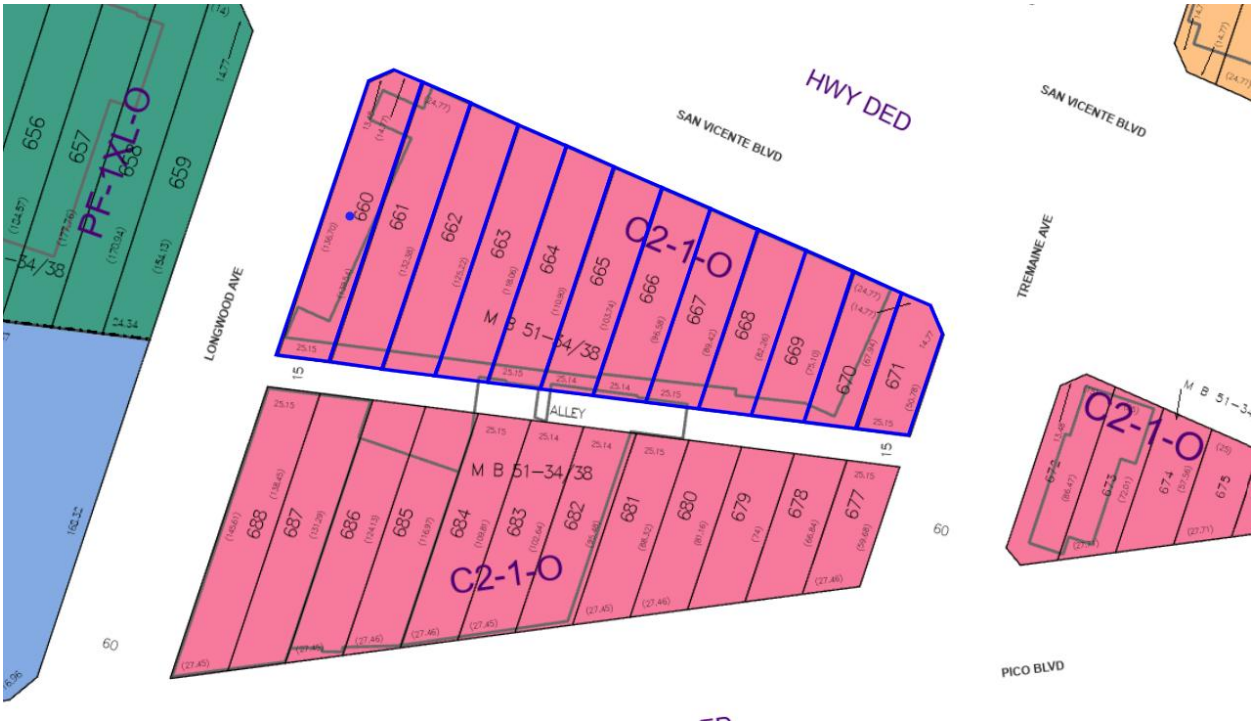

Figure 3. ZIMAS Zoning Map. The Project site requests a Zone and Height District Change from C2-1-O to (T)(Q)C2-2D-O

The site is also located in the Mid City Recovery Redevelopment Project Area, Urban Agriculture Incentive Zone, a Methane Zone, and is located approximately 3.7 kilometers from the Newport – Inglewood Fault Zone. Portions of the Project site are located within a 100-Year Flood Zone (Zone AO).

Surrounding Properties

The Project site is located in an urbanized area surrounded by commercial, public facilities, and residential uses. As shown in Figure 4 below, properties north of the Project site and across San Vicente Boulevard are zoned R3-1-O for multi-family residential uses and are developed with several two-story apartment buildings. Properties to the east of the Project site, across South Tremaine Avenue, are zoned C2-1-O for commercial and multi-family uses and are developed with a one-story auto service facility. Properties to the west, across from Longwood Avenue, are zoned PF-1XL-O for public facilities and are developed with the LADWP Distributing Station No. 8. Properties to the south, across from the adjoining alley, are zoned C2-1-O for commercial and multi-family uses and are developed with several one-story commercial warehouse buildings consisting of photography studios and a grocery store.

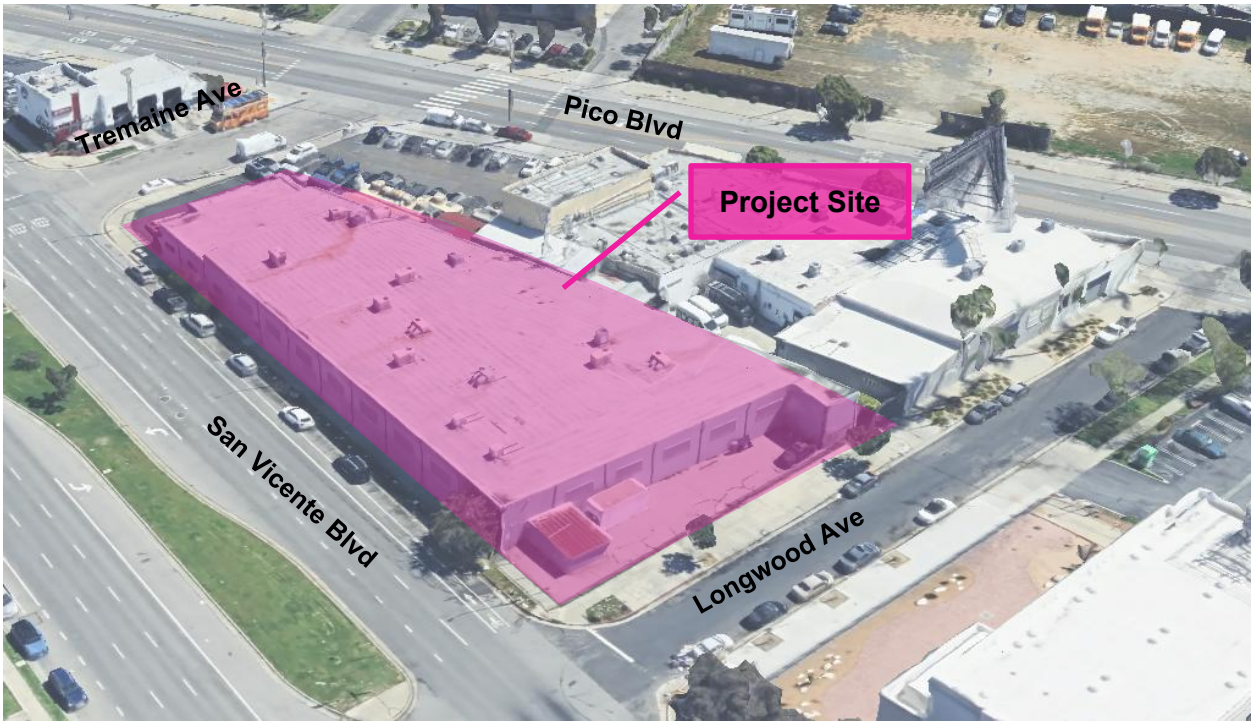

Figure 4. Project Site and Surrounding Area, look southeast

Streets, Circulation, and Transit

West San Vicente Boulevard, according to the Mobility Plan 2035 adjoining the subject property to the north is a Boulevard II, with a designated right-of-way width of 110 feet and a roadway width of 80 feet, and is improved with an asphalt roadway, concrete curb, gutter, and sidewalk. The existing street includes a central 20-foot-wide landscaped median which separates eastbound and westbound traffic and within a 150-foot wide right-of-way and a 10-foot wide sidewalk area is provided along the property, less than the required 15-foot wide width.

South Longwood Avenue, according to the Mobility Plan 2035 adjoining the subject property to the west is a Local Street – Standard, with a designated right-of-way width of 60 feet and a roadway width of 36 feet, and is improved with an asphalt roadway, concrete curb, gutter, and sidewalk. The existing sidewalk exceeds the minimum required 12-foot wide width.

South Tremaine Avenue, according to the Mobility Plan 2035 adjoining the subject property to the east is a Local Street – Standard, with a designated a right-of-way width of 60 feet and a roadway width of 36 feet, and is improved with an asphalt roadway, concrete curb, gutter, and sidewalk.

Alley, adjoining the subject property to the south is an alley, designated for a right-of-way width of 20 feet, however, the existing width is 15-feet. The public alley is partially occupied by privately-owned structures erected by the southern adjacent property owners and therefore does not currently provide unobstructed east-west travel between South Longwood Avenue and South Tremaine Avenue. The Project requests a waiver of the requirement to dedicate and improve an additional 2.5 feet of the existing public alley.

Public Transit

The Project site is located approximately 300 feet west from public transit stops located along West Pico Boulevard and West San Vicente Boulevard. These bus stops serve Metro Local Line

30, Santa Monica Big Blue Bus 7 and Rapid, which connect commuters to communities between Downtown Los Angeles, Koreatown, and the City of Santa Monica.

Relevant Cases

Project Site

There are no previous Planning Actions or Entitlements on the project site.

Surrounding Properties:

There are no relevant cases on surrounding properties within the past 10 years.

REQUESTED ENTITLEMENTS

In order to develop the Project, the Applicant has requested the following entitlements:

1. **Zone Change and Height District Change** from C2-1-O to (T)(Q)C2-2D-O to permit additional floor area up to a maximum Floor Area Ratio of 6:1 in lieu of 1.5:1, including a waiver of the requirement to dedicate and improve an additional 2.5 feet of the existing public alley;

2. **Class 2 Conditional Use** to permit storage uses within 500 feet of an R Zone, and;

3. **Project Review** for a development project which creates, or results in an increase of 50,000 gross square feet or more of nonresidential floor area.

ISSUES AND CONSIDERATIONS

Public hearing

A public hearing on this matter was held by the Hearing Officer virtually on May 12, 2026. General opposition to the project centered around concerns regarding the Project's height and scale, neighborhood compatibility, and noise and traffic impacts. Details from the public hearing are documented in Public Hearing and Communications, Page P-1.

In response to public comments, it should be noted that both the existing C2-1 zone and proposed C2-2D zone permit unlimited height and number of stories. However, the Height District Change request would allow for the site to increase allowable floor area from a FAR of 1.5:1 to up to 6:1. In addition, noise and transportation impacts from the Project were found to be less than significant pursuant to the environmental analysis undertaken for the project.

Professional Volunteer Program (PVP)

The proposed project was reviewed by the Urban Design Studio's Professional Volunteer Program (PVP) on December 9, 2025. The resulting comments and suggestions focus on three design approaches including Pedestrian-First Design, 360 Degree Design, and Climate-Adapted Design.

Pedestrian-First Design

The PVP recommended that the Project provide for a more friendly and safe pedestrian experience along the street with enhanced glazing, lighting, and landscaping and the removal and infill of any used curb cuts. They also suggested that the placement of the self-storage facility sign

be lowered and integrated with the recessed façade of the building to reinforce street-scale identity.

Applicant Response:

In response, the Applicant stated that the proposed design addresses ground-floor activation with enhanced glazing on the ground floors and all building façades, layered landscaping, and a transparent lobby area that functions as “eyes on the street” from the corner of San Vicente Boulevard and Longwood Avenue. Pedestrian-scaled lighting, secure access controls, and a security surveillance system will promote a safe and comfortable pedestrian experience. The Project’s signage will comply with the applicable signage standards to maintain visibility and reinforce street-scale identity and the unused curb cut along San Vicente Boulevard will be removed and infilled.

360 Degree Design

While the PVP acknowledges that the industrial context and lack of immediate residential adjacency of the Project site may support the proposed scale of the Project, it recommends that the proposed self-storage facility provide enhanced façade articulation, landscaping, and public-realm improvements to balance the surrounding uses and character of the neighborhood. They also recommend that the Project introduce additional glazing, chamfered corners to bring daylight into interior spaces, improve wayfinding, and animate the building exterior.

Applicant response:

In response to PVP’s comments, the Applicant refers to the improvements and enhancements that were previously discussed above under “Pedestrian-First Design” which involve enhancing glazing, layered landscaping, a transparent lobby area, and signage that complies with the applicable signage standards. These features will help reduce the perceived bulk of the Project. In addition, given the mixed-scale of development in the vicinity and along San Vicente Boulevard which experience a right-of-way width of 150 feet, the Project is in scale with the surrounding development and streets.

Climate-Adapted Design

The PVP recommended that the Project improve the street medians along San Vicente Boulevard with new trees. They also recommended that the Project expand opportunities for stormwater infiltration through landscaped areas given the large amount of impervious surface introduced with the construction of a new self-storage facility.

Applicant response:

In response to PVP’s recommendations, the Applicant stated that the condition of the street medians is managed by the City and is not within the scope of this Project. Additionally, the Project will consider stormwater infiltration through landscape areas, planters, etc. once a civil engineer is engaged during the plan development process to develop LID and irrigation plans.

CONCLUSION

Based on evaluation of the project and information submitted, input from the public, and the project’s compliance with the Wilshire Community Plan, the Department of City Planning recommends that the City Planning Commission recommend approval of the Zone and Height District Change with “T”, “Q” and “D” Limitations, a Class 2 Conditional Use, and a Project Review.

Based on the public hearing and information submitted to the record, staff recommends that the City Planning Commission adopt, based on its independent judgment, after consideration of the administrative record, the Mitigated Negative Declaration, No. ENV-2025-5195-MND and mitigation monitoring program for the project.

CONDITIONS FOR EFFECTUATING (T) TENTATIVE CLASSIFICATION REMOVAL

Pursuant to Section 12.32 G of the Municipal Code, the (T) Tentative Classification shall be removed by the posting of guarantees through the B-permit process of the City Engineer to secure the following without expense to the City of Los Angeles, with copies of any approval or guarantees provided to the Department of City Planning for attachment to the subject planning case file.

Dedication(s) and Improvement(s). Prior to the issuance of any building permits, the following public improvements and dedications for streets and other rights of way adjoining the subject property shall be guaranteed to the satisfaction of the Bureau of Engineering, Department of Transportation, Fire Department (and other responsible City, regional and federal government agencies, as may be necessary):

Responsibilities/Guarantees

1. As a part of early consultation, plan review, and/or project permit review, the applicant/developer shall contact the responsible agencies to ensure that any necessary dedications and improvements are specifically acknowledged by the applicant/developer.

2. **Bureau of Engineering.**

   A. Dedication Required:

      Longwood Avenue (Local Street) – A 15-foot by 15-foot cut corner or a 20- foot radius property line return is required at the northerly corner of the property at the intersection of Longwood Avenue and San Vicente Boulevard.

      San Vicente Boulevard (Boulevard II) – None.

      Tremaine Avenue (Local Street) – A 15-foot by 15-foot cut corner or a 20-foot radius property line return is required at the northerly corner of the property at the intersection of Tremaine Avenue and San Vicente Boulevard.

      First Alley South of San Vicente Boulevard (Alley) – None

   B. Improvements Required:

      Longwood Avenue – Remove and replace the existing curb ramp and alley intersection; any existing broken curb, gutter, and roadway pavement. These improvements should suitably transition to join the existing improvements satisfactory to the City Engineer.

      San Vicente Boulevard – Remove and replace any existing broken curb, gutter, roadway pavement, and sidewalk. These improvements should suitably transition to join the existing improvements satisfactory to the City Engineer.

      Tremaine Avenue – Remove and replace the existing curb ramp and alley intersection; any existing broken curb, gutter, and roadway pavement. These improvements should suitably transition to join the existing improvements satisfactory to the City Engineer.

      First Alley South of San Vicente Boulevard – None

Notes:

Broken curb and/or gutter includes segments within existing score lines that are depressed or upraised by more than ¼ inch from the surrounding concrete work or are separated from the main body of the concrete piece by a crack through the entire vertical segment and greater than 1/8 inch at the surface of the section.

Non-ADA compliant sidewalk shall include any sidewalk that has a cross slope that exceeds 2% and/or is depressed or upraised by more than ¼ inch from the surrounding concrete work or has full concrete depth cracks that have separations greater than 1/8 inch at the surface. The sidewalk also includes that portion of the pedestrian path of travel across a driveway.

All new sidewalk curb and gutter shall conform to the Bureau of Engineering Standard Plans S410-2, S440-4, S442-6 and S444-0.

Upgrade all driveways and curb ramps to comply with ADA requirements.

Install tree wells with root barriers and plant street trees satisfactory to the City Engineer and the Urban Forestry Division of the Bureau of Street Services. The applicant should contact the Urban Forestry Division for further information (213) 847-3077 or via https://appointments.lacity.org/apptsys/Public/Account.

Notes: Street lighting may be required satisfactory to the Bureau of Street Lighting (213) 847-1551 or via https://appointments.lacity.org/apptsys/Public/Account.

Department of Transportation may have additional requirements for dedication and improvements.

Refer to the Department of Transportation regarding traffic signals, signs and equipment (818) 374-4699 or viahttps://appointments.lacity.org/apptsys/Public/Account.

Regarding any conflicts with power pole matters, contact the Department of Water and Power at (213) 367-2715 or via https://appointments.lacity.org/apptsys/Public/Account.

Refer to the Fire Department Hydrants and Access Unit regarding fire hydrants (818) 374-5005 or via https://appointments.lacity.org/apptsys/Public/Account.

C. Provide proper drainage for streets being improved and for the site being developed. Sewer mainlines exist in the first alley south of San Vicente Boulevard. Construction of sewer laterals to the new property line will be required. All Sewerage Facilities Charges and Bonded Sewer Fees are to be paid prior to obtaining a building permit https://engpermits.lacity.org/public or https://appointments.lacity.org/apptsys/Public/Account.

Submit a parking area and driveway plan to the Central District Office of the Bureau of Engineering and the Department of Transportation for review and approval.

3. **Bureau of Street Lighting.**

A. Prior to the recordation of the final map or issuance of the Certificate of Occupancy (C of O), street lighting improvement plans shall be submitted for review and the owner shall provide a good faith effort via a ballot process for the formation or annexation of the property within the boundary of the development into a Street Lighting Maintenance Assessment District.

B. Construct new street light: one (1) on Longwood Ave. If street widening per BOE improvement conditions, relocate and upgrade street lights: three (3) on San Vicente Blvd. And one (1) on Tremaine Ave.

4. **Urban Forestry Division.**

A. Street Trees

i. Project shall preserve all healthy mature street trees whenever possible. All feasible alternatives in project design should be considered and implemented to retain healthy mature street trees. A permit is required for the removal of any street tree and shall be replaced 2: 1 as approved by the Board of Public Works and Urban Forestry Division.

ii. When street dedications are required and to the extent possible, the project shall provide larger planting areas for existing street trees to allow for growth and planting of larger stature street trees. This includes and is not limited to parkway installation and/or enlargement of tree wells and parkways.

iii. Plant street trees at all feasible planting locations within dedicated streets as directed and required by the Bureau of Street Services, Urban Forestry Division. All tree plantings shall be installed to current tree planting standards when the City has previously been paid for tree plantings. The sub divider or contractor shall notify the Urban Forestry Division at: (213) 847-3077 upon completion of construction for tree planting direction and instructions.

Note: Removal of street trees requires approval from the Board of Public Works. All projects must have environmental (CEQA) documents that appropriately address any removal and replacement of street trees. Contact Urban Forestry Division at: (213) 847-3077 for tree removal permit information.

5. **Los Angeles Fire Department.** Incorporate into the building plans the recommendations of the Fire Department relative to fire safety, which includes the submittal of a plot plan for approval by the Fire Department either prior to the recordation of a final map or the approval of a building permit, and the following:.

A. Access for Fire Department apparatus and personnel to and into all structures shall be required.

B. Address identification. New and existing buildings shall have approved building identification placed in a position that is plainly legible and visible from the street or road fronting the property.

C. One or more Knox Boxes will be required to be installed for LAFD access to the project .

D. Location and number to be determined by LAFD Field Inspector. (Refer to FPB Req # 75).

E. The entrance or exit of all ground dwelling units shall not be more than 150 feet from the edge of a roadway of an improved street, access road, or designated fire lane.

F. No building or portion of a building shall be constructed more than 150 feet from the edge of a roadway of an improved street, access road, or designated fire lane.

G. Fire Lane Requirements:

i. Fire lane width shall not be less than 20 feet. When a fire lane must accommodate the operation of Fire Department aerial ladder apparatus or where fire hydrants are installed, those portions shall not be less than 28 feet in width.

ii. The width of private roadways for general access use and fire lanes shall not be less than 20 feet, and the fire lane must be clear to the sky.

iii. Fire lanes, where required and dead ending streets shall terminate in a cul-de-sac or other approved turning area. No dead ending street or fire lane shall be greater than 700 feet in length or secondary access shall be required.

iv. Submit plot plans indicating access road and turning area for Fire Department approval.

v. All parking restrictions for fire lanes shall be posted and/or painted prior to any Temporary Certificate of Occupancy being issued.

vi. Plans showing areas to be posted and/or painted, “FIRE LANE NO PARKING” shall be submitted and approved by the Fire Department prior to building permit application sign-off.

vii. Electric Gates approved by the Fire Department shall be tested by the Fire Department prior to Building and Safety granting a Certificate of Occupancy.

viii. All public street and fire lane cul-de-sacs shall have the curbs painted red and/or be posted “No Parking at Any Time” prior to the issuance of a Certificate of Occupancy or Temporary Certificate of Occupancy for any structures adjacent to the cul-de-sac.

ix. No framing shall be allowed until the roadway is installed to the satisfaction of the Fire Department.

H. Construction of public or private roadway in the proposed development shall not exceed 10 percent in grade.

I. On small lot subdivisions, any lots used for access purposes shall be recorded on the final map as a “Fire Lane”.

J. Private development shall conform to the standard street dimensions shown on Department of Public Works Standard Plan S-470-0.

K. Standard cut-corners will be used on all turns.

L. The Fire Department may require additional vehicular access where buildings exceed 30 feet in height.

M. Where the vertical distance between the grade plane and the highest roof surface exceeds 30 feet, approved aerial fire apparatus access roads shall be provided.

N. The following recommendations of the Fire Department relative to fire safety shall be incorporated into the building plans, which includes the submittal of a plot plan for approval by the Fire Department either prior to the recordation of a final map or the approval of a building permit. The plot plan shall include the following minimum design features: fire lanes, where required, shall be a minimum of 20 feet in width; all structures must be within 300 feet of an approved fire hydrant, and entrances to any dwelling unit or guest room shall not be more than 150 feet in distance in horizontal travel from the edge of the roadway of an improved street or approved fire lane.

O. Site plans shall include all overhead utility lines adjacent to the site.

P. Where access for a given development requires accommodation of Fire Department apparatus, overhead clearance shall not be less than 14 feet.

Q. FPB #105 – 5101.1 Emergency responder radio coverage in new buildings. All new buildings shall have approved radio coverage for emergency responders within the building based upon the existing coverage levels of the public safety communication systems of the jurisdiction at the exterior of the building. This section shall not require improvement of the existing public safety communication systems.

R. Any roof elevation changes in excess of 3 feet may require the installation of ships ladders.

S. Entrance to the main lobby shall be located off the address side of the building.

T. Any required Fire Annunciator panel or Fire Control Room shall be located within 20ft visual line of site of the main entrance stairwell or to the satisfaction of the Fire Department.

U. Adequate off-site public and on-site private fire hydrants may be required. Their number and location to be determined after the Fire Department's review of the plot plan.

V. Any required fire hydrants to be installed shall be fully operational and accepted by the Fire Department prior to any building construction.

6. **Cable.** Make any necessary arrangements with the appropriate cable television franchise holder to assure that cable television facilities will be installed in City rights-of-way in the same manner as is required of other facilities, pursuant to Municipal Code Section 17.05 N to the satisfaction of the Department of Telecommunications.

Notice: Certificates of Occupancy for the subject property will not be issued by the City until the construction of all the public improvements (streets, sewers, storm drains, etc.), as required herein, are completed to the satisfaction of the City Engineer.

(Q) QUALIFIED CONDITIONS

Pursuant to LAMC Section 12.32 G, the following limitations are hereby imposed upon the use of the project site, subject to the “Q” Qualified Classification:

1. **Site Plan.** The use and development of the property shall be in substantial conformance with the plans submitted with the application and marked Exhibit "A", dated June 23, 2026, and attached to the subject case file. No change to the plans (except as conditioned) will be made without prior review by the Department of City Planning and written approval by the Director of Planning. Each change shall be identified and justified in writing. Minor deviations may be allowed in order to comply with the provisions of the LAMC or the Project conditions.:

2. **Use.** The use and area regulations for the new development on-site shall be developed for the uses as permitted in the C2 Zone as defined in LAMC Section 12.14, except as modified by the conditions herein or subsequent action.

“D” DEVELOPMENT LIMITATIONS

Pursuant to Section 12.32 G of the Municipal Code, the following limitations are hereby imposed upon the use of the subject property, subject to the “D” Development Limitations.

1. **Floor Area.** The total floor area permitted on the subject property shall not exceed a Floor Area Ratio of 6:1.

2. **Height.** The project shall be limited to seven stories and 85 feet. Roof structures and equipment shall not exceed the height limit by more than what is permitted in LAMC Section 12.21.1 B.3.

CONDITIONS OF APPROVAL

Pursuant to Sections 13B.2.2 and 13B.2.4 of the Los Angeles Municipal Code, the following conditions are hereby imposed upon the use of the subject property:

Class 2 Conditional Use for Storage Use within 500 feet of an R Zone

1. **Authorization.** Approved herein is the construction, use, and maintenance of a seven-story 161,645 square-foot self-storage facility.

2. **Use.** All other use, height and area regulations of the Municipal Code and all other applicable government/regulatory agencies shall be strictly complied with in the development and use of the property, except as such regulations are herein specifically varied or required.

3. **Site Development.** The use and development of the property shall be in substantial conformance with the plans submitted with the application and marked Exhibit "A", dated June 23, 2026 and attached to the subject case file. No change to the plans (except as conditioned) will be made without prior review by the Department of City Planning and written approval by the Director of Planning. Each change shall be identified and justified in writing. Minor deviations may be allowed in order to comply with the provisions of the LAMC or the Project conditions

4. **Hours of Operation.** Hours of operation of the self-storage facility shall be limited from 7:00 a.m. to 10:00 p.m., daily.

Project Review

5. **Site Development.** The use and development of the property shall be in substantial conformance with the plans submitted with the application and marked Exhibit "A", dated June 23, 2026 and attached to the subject case file. No change to the plans (except as conditioned) will be made without prior review by the Department of City Planning and written approval by the Director of Planning. Each change shall be identified and justified in writing. Minor deviations may be allowed in order to comply with the provisions of the LAMC or the Project conditions

6. **Parking**. Automobile parking shall be provided consistent with the LAMC and/or Assembly Bill (AB) 2097. A greater number than the minimum required may be provided at the applicant's discretion.

7. **Circulation.** The applicant shall submit a parking and driveway plan to the Los Angeles Department of Transportation (LADOT) for approval. Review and approval of the driveways should be coordinated with DOT's Citywide Planning Coordination Section (201 North Figueroa Street, 5th Floor, Room 550, at 213-482-7024).

8. **Materials**. A variety of high-quality exterior building materials, consistent with Exhibit A, dated June 23, 2026, shall be used. Substitutes of an equal quality shall be permitted, to the satisfaction of the Department of City Planning.

9. **Pedestrian Access.** The project shall maintain at least one pedestrian pathway to and from the building entrance. There shall be a direct, linear pathway from the street to the entrance.

10. **Graffiti.** All graffiti on the site shall be removed or painted over to match the color of the surface to which it is applied within 24 hours of its occurrence.

11. **Maintenance.** The subject property (including all trash storage areas, associated parking facilities, walkways, common open space and exterior walls along the property lines) shall be maintained in an attractive condition and shall be kept free of trash and debris.

12. **Landscaping.**

    A. **Landscape Plan.** All open areas not used for buildings, driveways, parking areas, or walks shall be attractively landscaped, including an automatic irrigation system, and maintained in accordance with a landscape plan prepared by a licensed landscape architect or licensed architect, and submitted for approval to the Department of City Planning.

    B. **Soil depths.** The project shall conform with the minimum soil depth and volume requirements for trees and other plants as outlined in the Soil Depths Design Resource published by the Los Angeles City Planning Urban Design Studio.

        i. Shrubs, perennials, and ground cover shall require a minimum soil depth of as follows:

            (1) A minimum depth with a height ranging from 15 to 40 feet shall be 42 inches.
            (2) A minimum depth with a height ranging from 9 to 15 feet shall be 36 inches.
            (3) A minimum depth with a height ranging from 1 to 8 feet shall be 24 inches.
            (4) A minimum depth with a height less than 1 foot shall be 18 inches.
            (5) A minimum depth of an extensive green roof shall be 3 inches.

        ii. Trees shall have a minimum soil depth of 42 inches.

13. **Street Trees.** Plant street trees at all feasible planting locations within dedicated streets as directed and required by the Bureau of Street Services, Urban Forestry Division. All tree plantings shall be installed to current tree planting standards when the City has previously been paid for tree plantings. The contractor shall notify Urban Forestry Division at 213-847-3077 upon completion of construction for tree planting direction and instructions.

14. **Tree Replacement.** Street trees and replacement trees shall be provided to the satisfaction of the Urban Forestry Division.

15. **Lighting.** Outdoor lighting shall be designed and installed with shielding, such that the light source does not illuminate adjacent residential properties or the public right-of-way, nor the above night skies.

16. **Trash/Storage.** All trash collection and storage areas shall be located on-site and not visible from the public right-of-way. Trash and recycle receptacles shall be stored within a fully enclosed portion of the building at all times.

17. **Mechanical and Rooftop Equipment Screening.** Any structures on the roof, such as air conditioning units and other equipment, shall be fully screened from view of any abutting properties and the public right-of-way. All screening shall be setback at least five feet from the edge of the building.

18. **Utilities.** All utilities shall be fully screened from view of any abutting properties and the public right-of-way.

Environmental Conditions

Mitigation Measure Monitoring Program

19. **Implementation**. The Mitigation Monitoring Program (MMP) **(Conditions 19-22),** shall be enforced throughout all phases of the Project. The Applicant shall be responsible for implementing each Project Design Features (PDF) and Mitigation Measure (MM) and shall be obligated to provide certification, as identified below, to the appropriate monitoring and enforcement agencies that each PDF and MM has been implemented. The Applicant shall maintain records demonstrating compliance with each PDF and MM. Such records shall be made available to the City upon request.

20. **Construction Monitor.** During the construction phase and prior to the issuance of building permits, the Applicant shall retain an independent Construction Monitor (either via the City or through a third-party consultant), approved by the Department of City Planning, who shall be responsible for monitoring implementation of PDFs and MMs during construction activities consistent with the monitoring phase and frequency set forth in this MMP.

    The Construction Monitor shall also prepare documentation of the Applicant's compliance with the PDFs and MMs during construction every 90 days in a form satisfactory to the Department of City Planning. The documentation must be signed by the Applicant and Construction Monitor and be included as part of the Applicant's Compliance Report. The Construction Monitor shall be obligated to immediately report to the Enforcement Agency any non-compliance with the MMs and PDFs within two business days if the Applicant does not correct the non-compliance within a reasonable time of notification to the Applicant by the monitor or if the non-compliance is repeated. Such non-compliance shall be appropriately addressed by the Enforcement Agency.

21. **Substantial Conformance and Modification.** After review and approval of the final MMP by the Lead Agency, minor changes and modifications to the MMP are permitted, but can only be made subject to City approval. The Lead Agency, in conjunction with any appropriate agencies or departments, will determine the adequacy of any proposed change or modification. This flexibility is necessary in light of the nature of the MMP and the need to protect the environment. No changes will be permitted unless the MMP continues to satisfy the requirements of CEQA, as determined by the Lead Agency.

    The Project shall be in substantial conformance with the PDFs and MMs contained in this MMP. The enforcing departments or agencies may determine substantial conformance with PDFs and MMs in the MMP in their reasonable discretion. If the department or agency cannot find substantial conformance, a PDF or MM may be modified or deleted as follows: the enforcing department or agency, or the decision maker for a subsequent discretionary project related approval finds that the modification or deletion complies with CEQA, including CEQA Guidelines Sections 15162 and 15164, which could include the preparation of an addendum or subsequent environmental clearance, if necessary, to analyze the impacts from the modifications to or deletion of the PDFs or MMs. Any addendum or subsequent CEQA clearance shall explain why the PDF or MM is no longer needed, not feasible, or the other basis for modifying or deleting the PDF or MM, and that the modification will not result in a new significant impact consistent with the requirements of CEQA. Under this process, the modification or deletion of a PDF or MM shall not, in and of itself, require a modification to any Project discretionary approval unless the

Director of Planning also finds that the change to the PDF or MM results in a substantial change to the Project or the non-environmental conditions of approval.

22. **Tribal Cultural Resources.**

A. **MM-TCR-1** Retain a Native American Monitor Prior to Commencement of Ground-Disturbing Activities.

i. The Applicant shall retain a Native American Monitor from or approved by the Gabrieleno Band of Mission Indians – Kizh Nation. The monitor shall be retained prior to the commencement of any "ground-disturbing activity" for the Project at all Project locations (i.e., both on-site and any off-site locations that are included in the project description/definition and/or required in connection with the project, such as public improvement work). "Ground-disturbing activity" shall include, but is not limited to, demolition, pavement removal, potholing, auguring, grubbing, tree removal, boring, grading, excavation, drilling, and trenching.

ii. A copy of the executed monitoring agreement shall be submitted to the lead agency prior to the earlier of the commencement of any ground-disturbing activity, or the issuance of any permit necessary to commence a ground-disturbing activity.

iii. The monitor will complete daily monitoring logs that will provide descriptions of the relevant ground-disturbing activities, the type of construction activities performed, locations of ground-disturbing activities, soil types, cultural-related materials, and any other facts, conditions, materials, or discoveries of significance to the Tribe. Monitor logs will identify and describe any discovered tribal cultural resources, including but not limited to, Native American cultural and historical artifacts, remains, places of significance, etc., as well as any discovered Native American (ancestral) human remains and burial goods. Copies of monitor logs will be provided to the City upon written request to the Tribe.

iv. On-site tribal monitoring shall conclude upon the latter of the following (1) written confirmation to the Gabrieleno Band of Mission Indians – Kizh Nation from a designated point of contact for the Project Applicant that all ground-disturbing activities and phases that may involve ground-disturbing activities on the Project site or in connection with the Project are complete; or (2) a determination and written notification by the Gabrieleno Band of Mission Indians – Kizh Nation to the City that no future, planned construction activity and/or development/construction phase at the Project Site possesses the potential to impact Gabrieleno Band of Mission Indians – Kizh Nation tribal cultural resources.

B. **MM-TCR-2** Unanticipated Discovery of Tribal Cultural Resource Objects (Non-Funerary/Non-Ceremonial)

i. Upon discovery of any tribal cultural resources, all construction activities in the immediate vicinity of the discovery shall cease (i.e., not less than the surrounding 50 feet) and shall not resume until the discovered tribal cultural resource has been fully assessed by the Gabrieleno Band of Mission Indians – Kizh Nation monitor and/or archaeologist. The Gabrieleno Band of Mission Indians – Kizh Nation will recover and retain all discovered tribal cultural resources in the form and/or manner the Tribe deems appropriate, in the Tribe's sole discretion, and for any purpose the Tribe deems appropriate, including for educational, cultural and/or historic purposes.

C. **MM-TCR-3** Unanticipated Discovery of Human Remains and Associated Funerary or Ceremonial Objects

i. Native American human remains are defined in PRC 5097.98 (d)(1) as an inhumation or cremation, and in any state of decomposition or skeletal completeness. Funerary objects, called associated grave goods in Public Resources Code Section 5097.98, are also to be treated according to this statute.

ii. If Native American human remains and/or grave goods are discovered or recognized on the project site, then Public Resource Code 5097.9 as well as Health and Safety Code Section 7050.5 shall be followed.

iii. Human remains and grave/burial goods shall be treated alike per California Public Resources Code section 5097.98(d)(1) and (2).

iv. Preservation in place (i.e., avoidance) is the preferred manner of treatment for discovered human remains and/or burial goods.

Any discovery of human remains/burial goods shall be kept confidential to prevent further disturbance.

Administrative Conditions

23. **Final Plans.** Prior to the issuance of any building permits for the project by the Department of Building and Safety, the applicant shall submit all final construction plans that are awaiting issuance of a building permit by the Department of Building and Safety for final review and approval by the Department of City Planning. All plans that are awaiting issuance of a building permit by the Department of Building and Safety shall be stamped by Department of City Planning staff “Final Plans”. A copy of the Final Plans, supplied by the applicant, shall be retained in the subject case file.

24. **Building Plans.** A copy of the first page of this grant and all Conditions and/or any subsequent appeal of this grant and its resultant Conditions and/or letters of clarification shall be printed on the building plans submitted to the Development Services Center and the Department of Building and Safety for purposes of having a building permit issued.

25. **Corrective Conditions.** The authorized use shall be conducted at all times with due regard for the character of the surrounding district, and the right is reserved to the City Planning Commission, or the Director pursuant to Section 12.27.1 of the Municipal Code, to impose additional corrective conditions, if, in the Commission’s or Director’s opinion, such conditions are proven necessary for the protection of persons in the neighborhood or occupants of adjacent property.

26. **Approvals, Verification and Submittals**. Copies of any approvals, guarantees or verification of consultations, reviews or approval, plans, etc., as may be required by the subject conditions, shall be provided to the Department of City Planning for placement in the subject file.

27. **Code Compliance.** All area, height and use regulations of the zone classification of the subject property shall be complied with, except wherein these conditions explicitly allow otherwise.

28. **Covenant.** Prior to the issuance of any permits relative to this matter, an agreement concerning all the information contained in these conditions shall be recorded in the

County Recorder's Office. The agreement shall run with the land and shall be binding on any subsequent property owners, heirs or assign. The agreement must be submitted to the Department of City Planning for approval before being recorded. After recordation, a copy bearing the Recorder's number and date shall be provided to the Department of City Planning for attachment to the file.

29. **Definition.** Any agencies, public officials or legislation referenced in these conditions shall mean those agencies, public offices, legislation or their successors, designees or amendment to any legislation.

30. **Enforcement.** Compliance with these conditions and the intent of these conditions shall be to the satisfaction of the Department of City Planning and any designated agency, or the agency's successor and in accordance with any stated laws or regulations, or any amendments thereto.

31. **Expedited Processing Section.** Prior to the clearance of any conditions, the applicant shall show proof that all fees have been paid to the Department of City Planning, Expedited Processing Section.

32. **Indemnification and Reimbursement of Litigation Costs.**

Applicant shall do all of the following:

a. Defend, indemnify and hold harmless the City from any and all actions against the City relating to or arising out of, in whole or in part, the City's processing and approval of this entitlement, including but not limited to, an action to attack, challenge, set aside, void, or otherwise modify or annul the approval of the entitlement, the environmental review of the entitlement, or the approval of subsequent permit decisions, or to claim personal property damage, including from inverse condemnation or any other constitutional claim.

b. Reimburse the City for any and all costs incurred in defense of an action related to or arising out of, in whole or in part, the City's processing and approval of the entitlement, including but not limited to payment of all court costs and attorney's fees, costs of any judgments or awards against the City (including an award of attorney's fees), damages, and/or settlement costs.

c. Submit an initial deposit for the City's litigation costs to the City within 10 days' notice of the City tendering defense to the Applicant and requesting a deposit. The initial deposit shall be in an amount set by the City Attorney's Office, in its sole discretion, based on the nature and scope of action, but in no event shall the initial deposit be less than $50,000. The City's failure to notice or collect the deposit does not relieve the Applicant from responsibility to reimburse the City pursuant to the requirement in paragraph (ii).

d. Submit supplemental deposits upon notice by the City. Supplemental deposits may be required in an increased amount from the initial deposit if found necessary by the City to protect the City's interests. The City's failure to notice or collect the deposit does not relieve the Applicant from responsibility to reimburse the City pursuant to the requirement in paragraph (ii).

e. If the City determines it necessary to protect the City's interest, execute an indemnity and reimbursement agreement with the City under terms consistent with the requirements of this condition.

The City shall notify the applicant within a reasonable period of time of its receipt of any action and the City shall cooperate in the defense. If the City fails to notify the applicant of any claim, action, or proceeding in a reasonable time, or if the City fails to reasonably cooperate in the defense, the applicant shall not thereafter be responsible to defend, indemnify or hold harmless the City.

The City shall have the sole right to choose its counsel, including the City Attorney's office or outside counsel. At its sole discretion, the City may participate at its own expense in the defense of any action, but such participation shall not relieve the applicant of any obligation imposed by this condition. In the event the Applicant fails to comply with this condition, in whole or in part, the City may withdraw its defense of the action, void its approval of the entitlement, or take any other action. The City retains the right to make all decisions with respect to its representations in any legal proceeding, including its inherent right to abandon or settle litigation.

For purposes of this condition, the following definitions apply:

"City" shall be defined to include the City, its agents, officers, boards, commissions, committees, employees, and volunteers.

"Action" shall be defined to include suits, proceedings (including those held under alternative dispute resolution procedures), claims, or lawsuits. Actions include actions, as defined herein, alleging failure to comply with any federal, state or local law.

Nothing in the definitions included in this paragraph are intended to limit the rights of the City or the obligations of the Applicant otherwise created by this condition.

FINDINGS

ZONE CHANGE FINDINGS PURSUANT TO SECTION 13B.1.4.E.1 OF CHAPTER 1A OF THE LOS ANGELES MUNICIPAL CODE AND SECTION 556 OF THE CITY OF LOS ANGELES CHARTER

1. **The action is in substantial conformance with the purposes, intent, and provisions of the General Plan.**

   a. General Plan Land Use Designation.

   The Land Use Element of the City's General Plan is divided into 35 Community Plans. The subject property is located within the Wilshire Community Plan area and is zoned C2-1-O. The property has a General Plan Land Use Designation of Community Commercial which has corresponding zones CR, C2, C4, P, PB, RAS3, and RAS4.

   The Applicant requests a zone and height district change from C2-1-O to (T)(Q)C2-2D-O to increase the maximum floor area permitted on the Project site from 1.5:1 to 6:1. The proposed zoning of the site will remain consistent with the Community Commercial land use designation as it will maintain the C2 zoning of the site. Therefore, the proposed construction of a self-storage building at the Project site will be in substantial conformance with the purposes, intent and provisions of the General Plan land use designation.

   b. Land Use Element.

   The City's General Plan establishes the overarching policy framework for managing growth and development across Los Angeles. Its Land Use Element is implemented through 35 localized Community Plans, including the Wilshire Community Plan, which define specific goals, policies, and objectives for land use decisions within distinct subareas. While these plans outline broader policy goals, they are codified and enforced through the specific zoning regulations of the Los Angeles Municipal Code (LAMC). As designed, the proposed Project complies with all applicable provisions of both the Wilshire Community Plan and the LAMC.

   Wilshire Community Plan. The Wilshire Community Plan text includes the following relevant land use goals, objectives, and policies:

   Goal 2: Encourage strong and competitive commercial sectors which promote economic vitality and serve the needs of the Wilshire Community through well-designed, safe and accessible areas, while preserving historic and cultural character.

   Objective 2-1: Preserve and strengthen viable commercial development and provide additional opportunities for new commercial development and services within existing commercial areas.

   Policy 2-1.1: New commercial uses should be located in existing established commercial areas or shopping centers.

   Objective 2-3: Promote distinctive commercial districts and pedestrian-oriented areas.

Policy 2-2.1: Encourage pedestrian-oriented design in designated areas and in new development.

The requested Zone and Height District Change to permit the increase in floor area of a self-storage facility from 1.5:1 to 6:1 will promote a strong and competitive commercial sector as it will replace an existing warehouse building and associated parking areas with a new commercial use that will contribute to the variety of commercial services in the neighborhood. The Project proposes a seven-story self-storage facility that will rise to a maximum height of 84 feet and 8 inches. The self-storage facility will encompass a floor area of 161,645 square feet and will comprise of: storage units across all seven floors, 954 square feet of office space, 608 square-foot lobby, 376 square-foot community/multi-purpose room, five vehicular parking spaces and two loading spaces within an enclosed parking garage, and 36 bicycle parking spaces. Approval of the Project will attract commercial activity and contribute to the economic well-being of the surrounding neighborhood through the creation of jobs and public convenience.

In addition, the Project's design will be compatible with the surrounding residential and commercial use properties in the vicinity. The Project will incorporate façade articulation and various building materials to reduce the bulk and massing of the self-storage facility, particularly along the San Vicente Boulevard frontage which face residential properties across the street. The Project will activate the street frontage and enhance the pedestrian experience with eight street trees and install a landscape buffer beside the sidewalk fronting San Vicente Boulevard. The street trees will provide shade coverage and relief from excessive sunlight exposure and heat. The landscape buffer will function as a buffer between roadway and pedestrian traffic thereby improving walkability and safety along the corridor. In addition, the Project will install lighting and surveillance cameras to create a safe and comfortable pedestrian experience. Pedestrian access to the Project site will be provided along the corner of San Vicente Boulevard and Longwood Avenue, and vehicular access to the site will be fulfilled through a new two-way driveway along Longwood Avenue. The driveway will provide sole access to the Project's parking and loading zone and therefore will not contribute to congestion along major corridors such as San Vicente Boulevard and West Pico Boulevard. Therefore, these improvements will complement nearby land uses and will promote economic well-being and public convenience in the community.

c. **Framework Element.** The Framework Element for the General Plan was adopted by the City of Los Angeles in December 1996 and re-adopted in August 2001. The Framework Element provides guidance regarding policy issues for the entire City of Los Angeles, including the project site. The Framework Element also sets forth a Citywide comprehensive long-range growth strategy and defines Citywide policies regarding such issues as land use, housing, urban form, neighborhood design, open space, economic development, transportation, infrastructure, and public services. The Framework Element includes the following goals, objectives and policies relevant to the instant request:

Chapter 3: Land Use

Goal 3A: A physically balanced distribution of land uses that contributes towards and facilitates the City's long-term fiscal and economic viability, revitalization of economically depressed areas, conservation of existing residential neighborhoods, equitable distribution of public resources, conservation of natural resources, provision of adequate infrastructure and public services, reduction of traffic congestion and improvement of air quality, enhancement of recreation and open space opportunities, assurance of environmental

justice and a healthful living environment, and achievement of the vision for a more livable city.

Objective 3.1: Accommodate a diversity of uses that support the needs of the City's existing and future residents, businesses, and visitors.

Chapter 7: Economic Development

Goal 7B: A City with land appropriately and sufficiently designated to sustain a robust commercial and industrial base.

Goal 7H: A distribution of economic opportunity throughout the City.

The requested Zone and Height District Change will help facilitate the City's long-term fiscal and economic viability by constructing a new seven-story self-storage facility. The Project site is located within an urbanized neighborhood comprised of commercial, public facilities, and residential uses. Properties located east, west, and south of the Project site are developed with commercial and public facilities uses including an auto service facility, commercial-warehouse buildings consisting of photo studios and market, and the LADWP Distributing Station No. 8. Properties located north of the Project site, across San Vicente Boulevard, are two-story apartment buildings. The Project will be compatible with the surrounding neighborhood as it will provide a beneficial commercial service and respect the adjacent properties through its design. The Project site is located in the C2 Zone and self-storage uses are permitted in the commercial zone. The Project will serve as a needed self-storage service providing individuals the opportunity to lease storage units to store household goods. The self-storage facility will feature security gates, lighting, and landscaping to provide a safe and comfortable environment for customers and adjacent property owners. The site will be accessible through a two-way driveway and pedestrian entrance along Longwood Avenue and therefore will not contribute to traffic congestion along nearby major corridors including San Vicente Boulevard and Pico Boulevard. The aforementioned corridors provide local access to communities across the City and may attract commercial activity to the vicinity. As such, the Project will complement the character of the surrounding neighborhood and contribute to the community's economic viability.

The Project substantially conforms with goals, objectives, and policies of the General Plan Framework Element. Therefore, the requested Zone and Height District Change will contribute to the general character of the existing uses in the area.

d. **Mobility Element.** The Mobility Element of the General Plan (Mobility Plan 2035) is not likely to be affected by the recommended action herein including the waiver of the requirement to dedicate and improve the southern adjoining alley. Based on the Bureau of Engineering's (BOE) recommendation report dated May 6, 2026 (see Exhibit D), the Project is required to provide dedications and/or improvements along adjacent streets and alleys including Longwood Avenue, San Vicente Boulevard, Tremaine Avenue, and the southern adjoining alley. The Applicant will comply with all of BOE's requirements with the exception of a 2.5-foot dedication, and improvements for additional surfacing, and a new concrete gutter along the southern adjoining alley. Strict compliance to the dedication and improvement requirements along the alley will not promote the City's mobility needs as depicted in the Mobility Plan 2035 as they would require the relocation of substantial utilities (i.e. power poles) along the alley and would solely impact an approximately 330-foot mid-block path between two street blocks, Tremaine Avenue and Longwood Avenue. Both streets can be accessed via San Vicente Boulevard and Pico Boulevard

approximately 155 feet north and south of the alley. Since regional and local circulation is already efficiently absorbed by these primary streets, widening this isolated alley segment would fail to yield a significant or measurable improvement to the local circulation network.. In addition, the project does not propose any building or site access from the alley, and of the existing commercial uses to the south, only one requires alley access to its business' surface parking, loading, and rear entrance. The existing alley is also partially physically obstructed by privately-owned structures by an adjacent southern property owner which prohibit east-west travel between Tremaine Avenue and Longwood Avenue. These structures are not part of the Project site and would need to be removed or relocated.

The Project will continue to advance the Mobility 2035's policies in recognizing walking as a component of every trip to ensure high-quality pedestrian access. Along San Vicente Boulevard, eight trees will be provided along the Project's street frontage to provide an accessible, safe, and comfortable pedestrian experience. The Project will construct a new two-way driveway along Longwood Avenue with access to the Project's on-site garage.

The Project as designed and conditioned will meet the following policies of Mobility Plan 2035:

Policy 2.10: Facilitate the provision of adequate on- and off-street loading areas.

Policy 3.4: Provide all residents, workers and visitors with affordable, efficient, convenient, and attractive transit services.

Policy 5.4: Continue to encourage the adoption of low and zero emission fuel sources, new mobility technologies, and supporting infrastructure.

The Project will feature a single, two-way driveway along Longwood avenue as the sole vehicular access point to the Project's enclosed garage with five parking spaces and two loading spaces. The Project's loading area is adjacent to the self-storage facility's elevators and storage units providing patrons direct and secure movement of household goods.

Per LAMC Section 12.21 A.16, the Project is also required to provide one short-term and one long-term bicycle space for every 10,000 square feet of area. The Project will provide 18 short-term and 18 long-term bicycle parking spaces for a project encompassing a total floor area of approximately 161,645 square feet. The short-term spaces will be located on the sidewalk along Longwood Avenue and the long-term spaces will be located within a bicycle storage room located adjacent to the facility's office area. Additionally, the Project site is located 300 feet west from public transit stops located along Pico Boulevard and San Vicente Boulevard. These bus stops serve Metro Local Line 30, Santa Monica Big Blue Bus 7 and Rapid, which connect commuters to communities between Downtown Los Angeles, Koreatown, and the City of Santa Monica.

Therefore, the Zone and Height Change are consistent with the Mobility Plan 2035 and the goals, objectives, and policies of the General Plan.

The approval of the Project will facilitate the development of a new seven-story self-storage facility that will provide a beneficial service to the community by contributing to the community's economic viability and offering individuals a necessary amenity for the storage of household goods that cannot be accommodated by their home's existing storage capacity. With the redevelopment of the existing site for self-storage use and overall design of the Project, the Project will complement the surrounding neighborhood

and help provide a safer and more comfortable environment for the community. The Project will activate San Vicente Boulevard and enhance the existing pedestrian experience with the sidewalk enhancements, landscaping, and lighting. Given the nature and general activities associated with self-storage uses, i.e. the loading and unloading of household goods between the patron's storage unit and vehicle, would not likely attract a high turnover of patrons visiting the site on a day-to-day basis, the project will unlikely have an adverse impact on the surrounding properties. Therefore, the Project is in substantial conformance with the goals, objectives and policies of the General Plan and the Wilshire Community Plan.

ZONE CHANGE and HEIGHT DISTRICT CHANGE and "T" AND "Q" CLASSIFICATION FINDINGS

2. Pursuant to Section 12.32 C of the LAMC, the Zone Change is in conformance with the public necessity, convenience, general welfare, and good zoning practice.

a. Public Necessity.

Approval of the Zone and Height District Change from C2-1-O to (T)(Q)C2-2D-O to increase the maximum floor area ratio (FAR) from 1.5:1 (45,290 square feet) to 6:1 (183,678 square feet) is necessary in order for the Project to develop a sufficiently- sized self-storage facility. The proposed self-storage facility will encompass 161,645 square feet with a FAR of 5.28:1. The Project is consistent with the type of development encouraged by the Wilshire Community Plan and the General Plan Framework Element, with regard to Community Commercial development. The Project will provide a commercial service that is beneficial to the community and will help facilitate the City's long-term fiscal and economic viability.

The Project involves the construction of a seven-story, self-storage building consisting of storage units across all seven floor levels, a 954 square-foot office area, 608 square-foot lobby, 376 square-foot community/multi-purpose room, five vehicle parking spaces, two loading spaces, and 36 bicycle parking spaces. Individuals will be allowed to lease a storage unit for storing household goods within a secure facility. The self-storage facility's office will operate from 7:00 a.m. to 10:00 p.m., daily. Pedestrian and vehicular access to the Project site will be provided by a new two-way driveway along Longwood Avenue. The Project will incorporate lighting, landscaping, and a surveillance camera system to create a safe and comfortable user and pedestrian experience.

Therefore, granting the Zone and Height District Change will permit a greater utilization of the Project site, will be compatible with surrounding properties, and will be of a public necessity to the growth of the community.

b. **Convenience**.

The Project site is located adjacent to San Vicente Boulevard to the north, and commercial and public facilities uses (i.e. auto service facility, photo studios, market, and the LADWP Distributing Station No. 8) to the east, west, and south. Across San Vicente Boulevard, approximately 130 feet, are multi-family residential buildings. The proposed construction of a new self-storage facility will provide a function that is beneficial to the community as it will offer individuals the opportunity to store their personal household goods at a secure location. The Project will incorporate landscaping, lighting, and a surveillance camera system to provide a safe and comfortable environment for patrons and pedestrians. Regional access to and from the Project site is provided through San Vicente Boulevard

(adjacent to the site), Pico Boulevard (approximately 250 feet from the site), La Brea Boulevard (approximately 950 feet from the site), and the Interstate 10 freeway (approximately 1.3 miles from the site). In addition, the Project site is located approximately 300 feet west from public transit stops located along West Pico Boulevard and West San Vicente Boulevard. These bus stops serve Metro Local Line 30, Santa Monica Big Blue Bus 7 and Rapid, which connect commuters to communities between Downtown Los Angeles, Koreatown, and the City of Santa Monica. Therefore, the Project provides a beneficial and convenient service for the community.

c. **General Welfare**.

Granting the Zone and Height District Change allows for the development of a more intense self-storage use that will be compatible with and beneficial to the surrounding community. The Project proposes the development of a 161,645 square-foot, seven-story self-storage facility in an urbanized community comprised of single- and multi-family residential buildings, commercial development, and public facilities. Individuals would have the opportunity to lease and store their household goods in a secure storage unit. The Project site will be regionally accessible from San Vicente Boulevard, Pico Boulevard, and the Interstate 10 Freeway which connects to communities across the City. As such, the self-storage facility will attract economic activity to the neighborhood.

The layout and design of the project will complement the character of the surrounding properties as it will incorporate high quality building materials, window treatments, and façade articulation that will create a safe, comfortable pedestrian experience and will reduce the bulk and massing of the self-storage facility. The project site's main entrance will be located at the northwest corner of the site (near the intersection of Longwood Avenue and San Vicente Boulevard) frontage and the Project will provide a total of five vehicular parking spaces, two loading spaces, and 36 bicycle parking spaces accessible from Longwood Avenue. The self-storage facility will utilize a variety of high-quality building materials such as light- and dark-colored metal panels, concrete blocks, and window glazing to create a clear and cohesive design. The Project's spandrel glazing will provide breaks and depth along the façade of the building. In addition, the proposed Project will be set back from the nearest residential properties by approximately 130 feet (located across San Vicente Boulevard) and will feature a landscape buffer with eight street trees that will provide shade coverage and relief from excessive sun exposure. These features will promote a safe and comfortable environment. With the proposed Project design, site layout, and setbacks, the height and scale of the Project will be compatible with the surrounding neighborhood. Therefore, the Project will enhance the general welfare of the community.

d. **Good Zoning Practices**.

Approval of the Zone and Height District Change from the C2-1-O Zone to the (T)(Q) C2-2D-O Zone to increase the maximum allowable FAR from 1.5:1 to 6:1 will be consistent with the General Plan Framework Element, the Wilshire Community Plan, and the General Plan's Community Commercial land use designation. The C2-1-O and (T)(Q)C2-2D-O Zones both permit self-storage uses of household goods on the Project site and Height District Nos. 1 and 2 provide no limitations on height or number of building stories. Encompassing a total lot area of 30,613 square feet, the existing C2-1-O zoning of the Project site would limit the maximum floor area of the proposed Project to 45,920 square feet. The proposed Zone and Height District Change to (T)(Q)C2-2D-O would permit a maximum floor area of 183,678 square feet. The Project proposes a seven-story, self-storage facility that will encompass 161,645 square feet with a FAR of 5.28:1. The Project

will maintain the existing C2 zoning of the site and therefore will be compatible with the corresponding zones (CR, C2, C4, P, PB, RAS3, RAS4) of the Community Commercial land use designation.

"T" and "Q" Classification Findings (LAMC Section 12.32 G) and D Limitations

The requested Zone Change has been made contingent upon compliance with "Q" Qualified Classification and "T" Tentative Classification conditions of approval imposed herein. The "Q" Qualified Classification conditions will limit the scope and scale of the proposed self-storage facility to the project plans presented for a 183,678 square foot facility, and the D limitations will limit the development to a FAR of 6:1 and the 85-foot height. These "Q" and "D" limitations are also necessary to protect the best interests of community, to assure that the project is compatible with surrounding properties and the overall pattern of development in the community, to secure an appropriate development in harmony with the General Plan, and to prevent or mitigate the potential adverse environmental effects of the subject recommended action. The "T" Tentative conditions are necessary to ensure the identified dedications, improvements, and actions are undertaken to meet the public's needs, convenience, and general welfare served by the actions required. These conditions will provide the necessary infrastructure to serve the proposed community at this site.

As such, the (T)(Q)C2-2D-O Zone will ensure that the project will be compatible with existing and future development in the surrounding neighborhood and will provide opportunities for employment and economic prosperity.

CLASS 2 CONDITIONAL USE FINDINGS

3. The project will enhance the built environment in the surrounding neighborhood or will perform a function to provide a service that is essential or beneficial to the community, city, or region.

The Project involves the construction, use and maintenance of a seven-story, 161,645 square-foot self-storage facility consisting of storage units across all seven levels of the facility, a 954-square-foot office area, 608 square-foot lobby, 376 square-foot community/multi-purpose room, five vehicular parking spaces, 36 bicycle parking spaces, and two loading spaces. As the Project is located within a commercial zone and is located within 500 feet of a R Zone (single- and multi-family residential buildings are located approximately 130 feet north of the Project site across San Vicente Boulevard and are zoned R2-1-O and R3-1-O), a Conditional Use permit is required to allow storage buildings for household goods pursuant to LAMC Section 12.24 W.50.

The construction of a new seven-story, self-storage facility will provide a beneficial service to the community by contributing to the community's economic viability and offering individuals a necessary amenity for the storage of excess household goods that cannot be accommodated by their home's existing storage capacity. The Project will be designed in a manner that is compatible with the surrounding neighborhood by utilizing high-quality materials, façade articulation, landscaping, and lighting to express a clear and coherent design that is compatible with the nearby commercial, public facilities, and residential uses. Vehicular and pedestrian access to the Project site will be provided by a newly constructed two-way driveway and building entrance along Longwood Avenue. The Project will provide five vehicular parking spaces and two loading spaces within an enclosed parking garage accessible from Longwood Avenue. Bicycle parking spaces will also be provided on the sidewalk along Longwood Avenue and within a bicycle storage room adjacent to the facility's

office area. Landscaping, lighting, and a surveillance camera system will be incorporated along the perimeter of the site to promote a safe and comfortable environment for patrons and pedestrians. Individuals will have the opportunity to lease one of the many storage units at the proposed self-storage facility to store their household goods at a secure location. The self-storage facility will operate from 7:00 a.m. – 10:00 p.m., daily.

The Project is located adjacent to San Vicente Boulevard and is in close proximity to Pico Boulevard, La Brea Boulevard, and the Interstate 10 Freeway making it regionally accessible for residents and visitors. With the development of the Project site into a self-storage facility, the Project will also enhance local connectivity and pedestrian infrastructure in the vicinity through the improvement of the adjoining sidewalks and curbs and the planting of new street trees and a landscape buffer along San Vicente Boulevard. These features also promote a more pedestrian-friendly experience for the community. Therefore, approval of the Conditional Use request to permit the proposed self-storage use within 500 feet of a R Zone will be beneficial to the community as it attracts commercial activity to the neighborhood and supports the wellbeing of the community.

4. The project's location, size, height, operations, and other significant features will be compatible with and will not adversely affect or further degrade adjacent properties, the surrounding neighborhood, or the public health, welfare and safety.

The Project involves the construction of a new seven-story, 161,645 square-foot self-storage facility with storage units across all seven floor levels, a 954-square-foot office area, 608 square-foot lobby, 376 square-foot community/multi-purpose room, five vehicular parking spaces, 36 bicycle parking spaces, and two loading spaces. The Project will incorporate various design features including high quality building materials, window treatments, and façade articulation that will be compatible with the surrounding neighborhood. The Project is bounded by San Vicente to the north, Longwood Avenue to the west, Tremaine Avenue to the east, and an alley to the south. Across San Vicente Boulevard, approximately 130 feet, are residential properties developed with single- and multi-family homes. The storefront entrance into the self-storage facility is located on the northwest corner of the facility near the intersection of Longwood Avenue and San Vicente Boulevard. The storefront entrance provides direct access to the facility's leasing office with hours of operation from 7:00 a.m. – 10:00 p.m., daily. Patrons' visiting their storage units will only be allowed between 7:00 a.m. – 10:00 p.m. daily therefore the facility would not contribute to any late night traffic or nuisances in the vicinity. Vehicular access to the site is located along Longwood Avenue through a newly constructed two-way driveway with secure access to a parking garage and loading area. The self-storage facility will require a unique passcode for building entry and elevator usage and will maintain logged entry and exit times, and maximum parking lot lighting. Digital security cameras will be installed to record all activity in the parking lot, loading zones, elevator lobbies and internal corridors. In addition, the Project will utilize a variety of high-quality building materials such as light- and dark-colored metal panels, concrete blocks, and window glazing to create a clear and cohesive design. The Project's spandrel glazing will provide breaks and depth along the building façade thereby reducing the Project's bulk and massing. In addition, the proposed Project will feature landscaping, lighting, window treatments, and a surveillance camera system along the perimeter of the facility to promote a safe and comfortable environment for pedestrians and patrons. A landscape buffer along San Vicente Boulevard with eight street trees will be installed to provide shade coverage and relief from excessive sun exposure. The landscape buffer will also function as a buffer between roadway and pedestrian traffic thereby improving walkability and safety along the corridor. Although the Project site is located within 500 feet of residential uses, the Project does not directly abut any homes. The nearest residential use is located across San Vicente Boulevard, approximately 130 feet north from the site. Given the nature and general activities associated

with self-storage uses, i.e., the loading and unloading of household goods between the patron's storage unit and vehicle, the Project will unlikely have an adverse impact on the surrounding properties.

As conditioned, the operation of the self-storage facility in conjunction with the Project's proximity to residential uses will not adversely affect or further degrade adjacent properties, the surrounding neighborhood, or the public health, welfare and safety and the development of the community.

5. The project substantially conforms with the purpose, intent and provisions of the General Plan, the applicable community plan, and any applicable specific plan.

Pursuant to LAMC Section 12.36 D, when acting on multiple applications for a project, when appropriate, findings may be made by reference to findings made for another application involving the same Project. This finding is substantially identical to General Plan/Charter Finding No. 1 and is hereby incorporated by reference.

Additional Findings for Storage Buildings for Household Goods in the C2 Zone (LAMC 12.24.W.50)

6. The project provides for an arrangement of uses, buildings, structures, open spaces and other improvements that are compatible with the scale and character of the adjacent properties and surrounding neighborhood.

The Project involves the construction of a new seven-story, 161,645 square-foot self-storage facility. The self-storage facility will front San Vicente Boulevard to the north, Longwood Avenue to the west, Tremaine Avenue to the east, and an alley to the south. The subject property is located within an urbanized, transitional corridor of the Wilshire Community Plan area, characterized by a distinct interface between multi-family residential density and low-scale commercial buildings. Properties directly to the north, across the 130-foot-wide right-of-way of West San Vicente Boulevard, are zoned R3-1-O and developed with two-story multi-family apartment buildings. The remaining frontages are defined by low-intensity commercial, light-industrial, and public facility uses; these include the LADWP Distributing Station No. 8 to the west (zoned PF-1XL-O), a one-story automotive repair facility to the east (zoned C2-1-O), and a block of one-story commercial warehouses and photography studios to the south across an adjoining public alley (zoned C2-1-O). This surrounding land use pattern positions the Project site as a logical transition, where the low-impact, low-traffic nature of the proposed self-storage facility will remain compatible with the neighborhood's existing character and scale, and the seven-story building would be physically and visually separated from the lower scale residential uses nearby.

Pedestrian and vehicular access to the site will be provided along the western portion of the facility with a newly constructed two-way driveway off Longwood Avenue and a storefront entrance near the intersection of San Vicente Boulevard and Longwood Avenue. The self-storage facility's vehicular parking and loading areas will be located within a secure and enclosed garage through the two-way driveway. With the main access points proposed along Longwood Avenue, vehicular traffic associated with the self-storage facility will not result in significant congestion along nearby major transit corridors including San Vicente Boulevard and Pico Boulevard. In addition, given the nature and general activities associated with self-storage uses, i.e., the loading and unloading of household goods between the patron's storage unit and vehicle, the number of visitors to the site is not expected to result in an overflow of traffic to nearby streets.

The Project will feature various design features that will be compatible with the surrounding neighborhood and will contribute to the site's commercial viability. Surrounding the Project site are commercial, public facilities, and residential uses. The Project site does not directly abut any nearby residential structures; the nearest residential use is located approximately 130 feet north of the site across San Vicente Boulevard. The existing and proposed zoning for the Project site (C2-1-O Zone to (T)(Q)C2-2D-O Zone) permit unlimited height with no restrictions on the number of floors. Nevertheless, the Project has been conditioned not to exceed a seven-story height limit. Project will also utilize a variety of high-quality building materials such as light- and dark-colored metal panels, concrete blocks, and window glazing to create a clear and cohesive design that will complement the character and scale of nearby uses. The Project's black spandrel glazing will provide breaks and depth along the building façade to reduce the bulk and massing of the self-storage facility. In addition, the proposed Project will feature landscaping, lighting, window treatments, and a surveillance camera system to create a safe and comfortable environment for pedestrians and patrons. A landscape buffer along San Vicente Boulevard with eight street trees will be installed to provide shade coverage and relief from excessive sun exposure. The landscape buffer will also function as a buffer between roadway and pedestrian traffic thereby reducing vehicular glare onto pedestrians and improving walkability and safety along the corridor. Overall, the Project will enhance the surrounding built environment and will be compatible with the scale and character of the surrounding neighborhood.

PROJECT REVIEW FINDINGS

7. The project is in substantial conformance with the purposes, intent and provisions of the General Plan, applicable community plan, and any applicable specific plan.

Pursuant to LAMC Section 12.36 D, when acting on multiple applications for a project, when appropriate, findings may be made by reference to findings made for another application involving the same Project. This finding is substantially identical to General Plan/Charter Finding No. 1 and is hereby incorporated by reference.

8. The project consists of an arrangement of buildings and structures (including height, bulk and setbacks), off-street parking facilities, loading areas, lighting, landscaping, trash collection, and other such pertinent improvements that is or will be compatible with existing and future development on adjacent properties and neighboring properties.

The Project involves the construction, use, and maintenance of a new 161,645 square-foot, seven-story self-storage facility consisting of storage units across all seven floor levels of the facility, a 954-square-foot office area, 608 square-foot lobby, and 376 square-foot community-multi-purpose room. The Project will rise to a maximum building height of 84 feet and 8 inches and will provide a total of five vehicular parking spaces and two loading spaces within an enclosed garage accessible from a new two-way driveway along Longwood Avenue. A total of 36 bicycle parking spaces will be provided; 18 short-term spaces will be located on the sidewalk along Longwood Avenue and 18 long-term spaces will be located within an enclosed room adjacent to the facility's office area. Primary access to the Project site for vehicles and pedestrians will be located along the western portion of the site adjacent to Longwood Avenue.

The Project site is comprised of a total lot area of 30,613 square feet, or 0.70 acres, in the Wilshire Community Plan area. The site encompasses all 12 lots fronting San Vicente Boulevard, between Longwood Avenue and Tremaine Avenue, and is located in an urbanized area surrounded by commercial, public facilities, and residential uses. Properties north of the Project site and across San Vicente Boulevard are zoned R3-1-O and are developed with

several two-story apartment buildings. Properties to the east of the Project site, across South Tremaine Avenue, are zoned C2-1-O and are developed with a one-story auto service facility. Properties to the west, across from Longwood Avenue, are zoned PF-1XL-O and are developed with the LADWP Distributing Station No. 8. Properties to the south, across from the adjoining alley, are zoned C2-1-O and are developed with several one-story commercial warehouse buildings consisting of photograph studios and a grocery store.

Height, Bulk and Setbacks

The Project will replace an existing one-story warehouse building and associated parking lots with a seven-story self-storage building rising to a maximum building height of 84 feet and 8 inches. The existing C2-1-O zoning and the proposed (T)(Q)C2-2D-O zoning of the Project site, in conjunction with the Project's Zone and Height District Change request, both permit unlimited height and no limitations on the number of building stories. The Project will utilize a variety of high-quality building materials such as light- and dark-colored metal panels, concrete blocks, and window glazing to complement the character of the surrounding neighborhood. The Project's spandrel glazing will provide breaks and depth along the façade of the building thereby reducing the bulk and massing of the self-storage facility. While the windows placed on the upper floor levels are not intended to provide natural light ventilation into the building interior, they provide a perceived sense of transparency from the street level.

The self-storage facility will front San Vicente Boulevard and will be set back from the nearest residential use across the corridor by approximately 130 feet. The facility will be set back from the adjacent LADWP Distributing Station and auto service facility across Longwood Avenue and Tremaine Avenue by approximately 60 feet, and the adjacent retail businesses and photograph studios south of the site by 15 feet. Given the project design, site layout, and the distance between the subject project and the adjacent commercial, public facilities, and residential uses in the vicinity, the height and scale of the project will be minimized. Therefore, the height, bulk, and setbacks of the self-storage facility will be compatible with the existing and future developments in the neighborhood.

Off-Street Parking Facilities

Pursuant to AB 2097, the Project is not required to provide a minimum quantity of vehicular parking spaces for the proposed self-storage facility. Nevertheless, the Project will provide five vehicular parking spaces within an enclosed parking garage accessible through a new two-way driveway installed along Longwood Avenue.

Per LAMC Section 12.21 A.16, the Project is required to provide a minimum of 18 short-term and 18 long-term bicycle spaces. The Project will be consistent with the code providing a total of 36 bicycle spaces; 18 short-term spaces will be provided on the sidewalk along Longwood Avenue and 18 long-term spaces will be provided within a bicycle storage room adjacent to the facility's office area.

Vehicular access to the Project site will be provided by a new two-way driveway along Longwood Avenue and pedestrian access will be provided through a storefront entrance on the northwest corner of the facility near the intersection of San Vicente Boulevard and Longwood Avenue.

Loading Areas

The self-storage facility will feature a loading area comprised of two loading spaces for patrons to transfer their household goods between their storage unit and automobile. The loading area

is located within the parking garage and is adjacent to the facility's office area, elevators, and storage units. These areas will only be accessible through a two-way driveway off Longwood Avenue and during the facility's hours of operation from 7:00 a.m. – 10:00 p.m., daily.

Lighting

The Project will feature outdoor lighting as well as light fixtures that illuminate the windows along the building's façade to provide a safe and comfortable environment for project users and the community. The Project has been conditioned such that outdoor lighting shall be installed with shielding and that the light source does not illuminate adjacent residential properties or the public right-of-way.

On- and Off-Site Landscaping

The Project will install a landscaped buffer and eight street trees along San Vicente Boulevard frontage between the sidewalk and roadway. As conditioned, the Project will plant street trees as directed and required by the Bureau of Street Services, Urban Forestry Division. These features help create a more attractive and comfortable pedestrian experience by reducing vehicular glare and providing shade coverage and relief from excessive sunlight exposure and heat.

Transformer

The Project's transformer and electrical rooms will be located at the southwest corner of site. As conditioned, the transformer will be screened from view of any abutting properties and the public right-of-way. The electrical rooms will be enclosed and out of sight from public view.

Therefore, the arrangement of buildings and structures (including height, bulk and setbacks), off-street parking facilities, loading areas, lighting, landscaping, and other such pertinent improvements that will be compatible with existing and future development on neighboring properties.

Community/Multi-purpose Room

The Project will provide a community/multi-purpose room located adjacent to ground-floor office area as an additional amenity for the building and for the local community to use upon request.

9. The residential project provides recreational and service amenities to improve habitability for its residents and minimize impacts on neighboring properties.

The proposed Project involves the development of a self-storage facility. No residential uses are proposed. The proposed Project is not subject to the City's open space requirements pursuant to LAMC Section 12.21 G.2, however, the Project has been conditioned so that street trees be planted as directed and required by the Bureau of Street Services, Urban Forestry Division.

ENVIRONMENTAL FINDINGS/ADDITIONAL MANDATORY FINDINGS

10. Environmental Findings. On April 9, 2026, a Mitigated Negative Declaration (ENV-2025-5195-MND) was prepared and published for the proposed project. On the basis of the whole of the record before the lead agency including any comments received, the lead agency finds that there is no substantial evidence that the proposed project will have a significant effect on

the environment. The attached Mitigated Negative Declaration reflects the lead agency's independent judgment and analysis. The records upon which this decision is based are with the Environmental Review Section of the Department of City Planning in Room 763, 200 North Spring Street.

The Mitigated Negative Declaration determined that the Project would have a less than significant impact on Tribal Cultural Resources with the incorporation of mitigation measures. A list of the mitigation measures that will be incorporated can be found under the Conditions of Approval, Condition No. 22 (pages C-4 to C-5).

PUBLIC HEARING AND COMMUNICATIONS

Public Hearing

Summary

A public hearing for the Project was held virtually by the Hearing Officer on Tuesday, May 12, 2026. The purpose of the hearing was to receive public testimony on behalf of the City Planning Commission as the decision maker on the case.

The public hearing was attended by the Applicant's team, the Planning Deputy for Council District 10, the applicant's representatives, and nine members of the public.

During the public testimony portion of the Hearing Officer hearing, three members of the public expressed concern regarding the Project's height and scale, noise and traffic impacts. The Applicant's representative addressed these comments stating that the proposed height of the Project is permitted under both the existing C2-1 and proposed C2-2 zoning of the Project site. The C2-1 and C2-2 both permit unlimited height and number of stories. The requested Zone and Height District Change would allow for an increase in floor area with a requested FAR of 6:1 in lieu of 1.5:1, which is typical for self-storage projects. Transportation and noise impacts were analyzed in the Initial Study for the prepared MND (Case No. ENV-2025-5195-MND), and it concluded that the Project will not result in any significant traffic or noise impacts. The area surrounding the Project site is developed with commercial and public facility uses, with the nearest residential use being across San Vicente Boulevard to the north. Given the use and nature of a self-storage facility use, Project trip generation to and from the site is expected to be minimal in comparison with the surrounding uses.

During the public testimony portion of the Hearing Officer hearing, the Planning Deputy for Council District 10 requested that their office meet with the Applicant's team and the developer on addressing the public's concerns and if a community benefit can be provided. The Applicant's team agreed to meet with the Council Office to continue their discussions following the hearing.

The Hearing Officer concluded the hearing announcing that the decision meeting with the City Planning Commission will be scheduled for July 9, 2026.

Public Correspondence

Following the May 12, 2026 Hearing Officer public hearing, Planning Staff received letters of opposition from three residents who: (1) dispute the Olympic Park Neighborhood Council (OPNC) approval of the proposed Project and the developer's assertion that the OPNC approved the project; (2) dispute the residency of the board members that represent the OPNC, and (3) have presented a draft petition to reject the proposed Project.

On June 16, 2026, Planning Staff received a petition to reject the proposed seven-story, self-storage facility. The petition demands:

1. A 3-story height limit
2. Reasonable operating hours – Request that the hours of operation be limited to 7:00 a.m. – 10:00 p.m.
3. Rejection of the bicycle loophole – Reject the developer's use of bicycle parking spaces to replace vehicular parking spaces
4. Procedural fairness

The petition received 117 signatures.

On June 24, 2026, the Applicant submitted a letter to Planning Staff to respond to the public comments, correspondence, and petition. The letter addresses comments regarding the proposed height, floor area, automobile and bicycle parking, hours of operation, public hearing transparency, and a request for a proposed community alternative. The Applicant's response letter can be found in the "Exhibit E – Public Comment" of this report.

4 THE LAND DESCRIBED HEREIN IS INCLUDED WITHIN A PROJECT AREA OF THE THE MID-CITY RECOVERY REDEVELOPMENT PROJECT, AND THAT PROCEEDINGS FOR THE REDEVELOPMENT OF SAID PROJECT HAVE BEEN INSTITUTED UNDER THE REDEVELOPMENT LAW (SUCH REDEVELOPMENT TO PROCEED ONLY AFTER THE ADOPTION OF THE REDEVELOPMENT PLAN) AS DISCLOSED BY A DOCUMENT RECORDED MAY 16, 1996 AS INSTRUMENT NO. 96-771910, OF OFFICIAL RECORDS.

(DOCUMENT AFFECTS - NOTHING TO PLOT)

5 THE LAND DESCRIBED HEREIN IS INCLUDED WITHIN A PROJECT AREA OF THE THE MID-CITY RECOVERY REDEVELOPMENT PROJECT AREA, AND THAT PROCEEDINGS FOR THE REDEVELOPMENT OF SAID PROJECT HAVE BEEN INSTITUTED UNDER THE REDEVELOPMENT LAW (SUCH REDEVELOPMENT TO PROCEED ONLY AFTER THE ADOPTION OF THE REDEVELOPMENT PLAN) AS DISCLOSED BY A DOCUMENT RECORDED NOVEMBER 30, 2007 AS INSTRUMENT NO. 20072636437, OF OFFICIAL RECORDS.

(DOCUMENT AFFECTS - NOTHING TO PLOT)

6-10 TITLE COMPANY STATEMENTS.

ALTA/NSPS TABLE "A" ITEM NOTES

ITEM 2 THE SITE ADDRESS OBSERVED WHILE CONDUCTING THE SURVEY IS:
4800 SAN VICENTE BOULEVARD
LOS ANGELES, CA 90019

ITEM 3 THE LAND SHOWN ON THIS SURVEY LIES PARTIALLY WITHIN FLOOD ZONE "X" (SHADED), BEING DESCRIBED AS "0.2% ANNUAL CHANCE FLOOD HAZARD, AREAS OF 1% ANNUAL CHANCE FLOOD WITH AVERAGE DEPTH LESS THAN ONE FOOT OR WITH DRAINAGE AREAS OF LESS THAN ONE SQUARE MILE", PARTIALLY WITHIN FLOOD ZONE "X" (UNSHADED), BEING DESCRIBED AS "AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN" AND PARTIALLY WITHIN FLOOD ZONE "AO", BEING DESCRIBED AS "SPECIAL FLOOD HAZARD AREAS WITH BASE FLOOD ELEVATION (BFE) DEPTH OF 2 FEET" PER FLOOD INSURANCE RATE MAP (FIRM) - COMMUNITY PANEL NUMBER 06037C1612G, DATED DECEMBER 21, 2018.

ITEM 4 THE GROSS LAND AREA IS: 30,612 SF / 0.703 ACRES

ITEM 5 THE CONTOURS AND ELEVATIONS SHOWN HEREON ARE BASED ON THE FOLLOWING BENCHMARK:

BM No.: 13-03105 ELEV.: 136.983' (CITY OF LOS ANGELES BENCHMARK)
DATUM: NAVD 88
DESCRIPTION: WIRE SPK IN W CURB LA BREA AVE; 9FT S OF BC CURB RETURN OF SAN VICENTE BLVD.

CONTOUR INTERVAL=1'

ITEM 6(a) ***THE CURRENT ZONING CLASSIFICATION IS _____ PER THE CITY OF ...***

(INSERT ZONING INFORMATION HERE - INDICATE SOURCE AND DATE OF INFO)

ITEM 6(b) ***SEE THE SURVEY PLAT FOR THE LOCATION OF SETBACK LINES.***

ITEM 7(a) SEE THE SURVEY PLAT FOR EXTERIOR DIMENSIONS OF ALL BUILDINGS AT GROUND LEVEL.

ITEM 7(b)(1) SEE THE SURVEY PLAT FOR THE SQUARE FOOTAGE OF THE EXTERIOR FOOTPRINT OF ALL BUILDINGS AT GROUND LEVEL.

ITEM 7(c) SEE THE SURVEY PLAT FOR THE MEASURED HEIGHT ABOVE GRADE OF ALL BUILDINGS.

ITEM 8 SEE THE SURVEY PLAT FOR ANY SUBSTANTIAL FEATURES OBSERVED IN THE PROCESS OF CONDUCTING THE SURVEY.

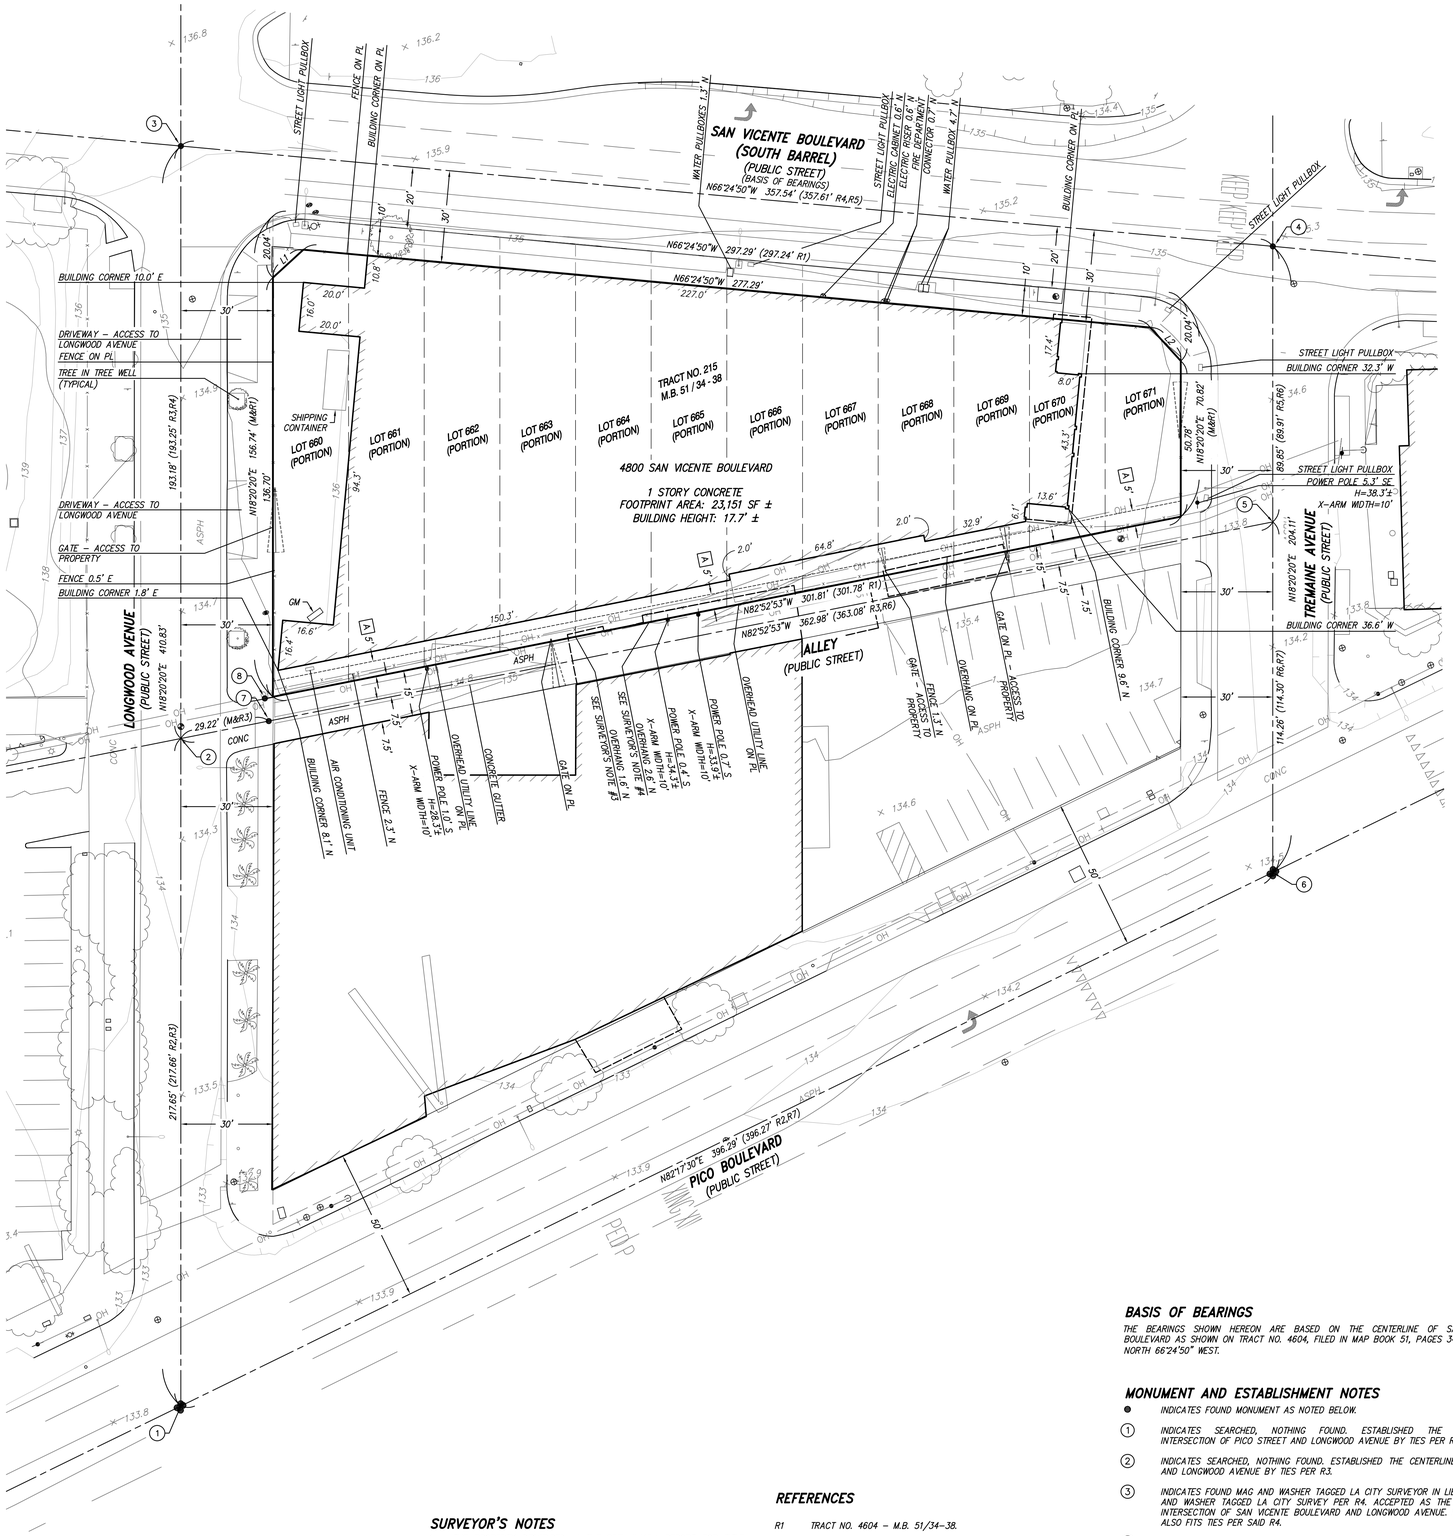

ITEM 9 NO PARKING STRIPING WAS OBSERVED ON THE SUBJECT PROPERTY.

ITEM 13 SEE THE SURVEY PLAT FOR THE NAMES OF ADJOINING OWNERS, IF ANY.

ITEM 14 SEE THE SURVEY PLAT FOR THE DISTANCE TO THE NEAREST INTERSECTING STREET.

ITEM 15 THE TOPOGRAPHIC INFORMATION SHOWN HEREON WAS COMPILED PHOTOGRAMMETRICALLY FROM AERIAL PHOTOGRAPHY DATED JANUARY 15, 2025 BY INLAND AERIAL SURVEYS INC AND SUPPLEMENTED BY A FIELD SURVEY COMPLETED IN FEBRUARY, 2025.

THE PHOTOGRAMMETRIC MAPPING SHOWN HEREON HAS BEEN CHECKED FOR ACCURACY AND MEETS OR EXCEEDS THE UNITED STATES NATIONAL MAP ACCURACY STANDARDS FOR HORIZONTAL [AND VERTICAL IF ITEM 5 IS SELECTED] ACCURACY AS ISSUED BY THE NATIONAL GEOSPATIAL PROGRAM EXCEPT IN AREAS OBSCURED BY SHADOWS, DENSE TREES OR BRUSH, CANOPIES, ROOF OVERHANGS, AND OTHER OVERHEAD OBSTRUCTIONS.

BASIS OF BEARINGS

THE BEARINGS SHOWN HEREON ARE BASED ON THE CENTERLINE OF SAN VICENTE BOULEVARD AS SHOWN ON TRACT NO. 4604, FILED IN MAP BOOK 51, PAGES 34-38, BEING NORTH 66°24'50" WEST.

MONUMENT AND ESTABLISHMENT NOTES

- ● INDICATES FOUND MONUMENT AS NOTED BELOW.
- (1) INDICATES SEARCHED, NOTHING FOUND. ESTABLISHED THE CENTERLINE INTERSECTION OF PICO STREET AND LONGWOOD AVENUE BY TIES PER R2.
- (2) INDICATES SEARCHED, NOTHING FOUND. ESTABLISHED THE CENTERLINE OF ALLEY AND LONGWOOD AVENUE BY TIES PER R3.
- (3) INDICATES FOUND MAG AND WASHER TAGGED LA CITY SURVEYOR IN LIEU OF SPIKE AND WASHER TAGGED LA CITY SURVEY PER R4. ACCEPTED AS THE CENTERLINE INTERSECTION OF SAN VICENTE BOULEVARD AND LONGWOOD AVENUE. SAND POINT ALSO FITS TIES PER SAID R4.
- (4) INDICATES FOUND MAG AND WASHER TAGGED LA CITY SURVEYOR IN LIEU OF SPIKE AND WASHER TAGGED LA CITY SURVEYOR PER R5. ACCEPTED AS THE CENTERLINE INTERSECTION OF SAN VICENTE BOULEVARD AND TREMAINE AVENUE. SAID POINT ALSO FITS TIES PER SAID R5.
- (5) INDICATES SEARCHED, NOTHING FOUND. ESTABLISHED THE CENTERLINE INTERSECTION OF ALLEY AND TREMAINE AVENUE BY TIES PER R6.
- (6) INDICATES SEARCHED, NOTHING FOUND. ESTABLISHED THE CENTERLINE INTERSECTION OF PICO STREET AND TREMAINE AVENUE BY TIES PER R7.
- (7) INDICATES FOUND LEAD, TACK AND LA CITY SURVEYOR TAG, PER R3, FLUSH.
- (8) INDICATES FOUND LEAD, TAG AND PARTIALLY ILLEGIBLE TAG STAMPED "LS _371", NO REFERENCE, FLUSH. SAID MONUMENT IS LOCATED SOUTH 82°52'53" EAST, 1.00 FOOT FROM THE WEST CORNER OF LOT 660 OF R1.

Mitigated Negative Declaration

4802 - 4828 San Vicente Self-Storage Facility Project

Case Number: CPC-2025-5194-HD-CU2-PR-ZC
Environmental Number: ENV-2025-5195-MND

Project Location: 4802-4828 W. San Vicente Boulevard, Los Angeles, CA 90019

Community Plan Area: Wilshire

Council District: 10 – Heather Hutt

Project Description: The Project involves the demolition and removal of the existing one-story warehouse building and two (2) surface parking lots for the construction, use, and maintenance of a seven-story self-storage facility for household goods encompassing a floor area of 161,645 square feet. The self-storage facility would feature storage units across each floor level, a 954-square-foot office area, five (5) vehicular parking spaces, 36 bicycle parking spaces, and two (2) loading spaces and would operate between 6:00 a.m. to 11:00 p.m., daily. Along the adjoining streets (San Vicente Boulevard, Longwood Avenue, and Tremaine Avenue) are five (5) non-protected street trees. The Project would remove two (2) street trees along South Longwood Avenue and replace them to the satisfaction of the Department of Public Works Urban Forestry Division. The Project Site does not contain any on-site trees. In total, the Project proposes the planting of eight (8) trees.

Discretionary entitlements, reviews, permits and approvals required to implement the Project include, but are not limited to, the following:

- **Zone Change/Height District Change (ZC/HD)**, per LAMC Chapter 1A Section 13B.1.4, from the C2-1-O Zone to the C2-2-O Zone in order to permit additional floor area up to a maximum Floor Area Ratio of 6:1 in lieu of 1.5:1; including
  - **A waiver of the requirement** to dedicate and/or improve an additional 2.5 feet of the existing public alley;
  - **A waiver of the requirement** to improve an additional 3 feet of street widening along South Longwood Avenue;
- **Class 2 Conditional Use Permit (CU2)**, per LAMC Chapter 1A Section 13.B.2.2, to permit storage uses within 500 feet of a R Zone; and
- **Project Review (PR)**, pursuant to LAMC Chapter 1A Section 13B.2.4, for a proposed development project that results in an increase of 50,000 gross square feet of non-residential floor area.

Section 1

Introduction

An application for the proposed 4802 - 4828 San Vicente Self-Storage Facility (Project) has been submitted to the City of Los Angeles (City) Department of City Planning for discretionary review. The Department of City Planning, as Lead Agency, has determined that the Project is subject to the California Environmental Quality Act (CEQA) and that the preparation of an Initial Study and Mitigated Negative Declaration (IS/MND) is appropriate. Thus, this document has been prepared in compliance with the relevant provisions of CEQA and the State CEQA Guidelines as implemented by the City. As discussed in greater detail throughout this document, the analysis in this IS/ND concludes that with implementation of the identified mitigation measures, the Project would not result in any significant environmental impacts. The IS/MND is an informational document and is required to be adopted by the decision maker prior to Project approval by the City.

1.1 Purpose of an Initial Study

CEQA was enacted in 1970 with several basic purposes, including: (1) to inform governmental decision makers and the public about the potential significant environmental effects of proposed projects; (2) to identify ways that environmental damage can be avoided or significantly reduced; (3) to prevent significant, avoidable damage to the environment by requiring changes in projects through the use of feasible alternatives or mitigation measures[1]; and (4) to disclose to the public the reasons behind a project's approval even if significant environmental effects are anticipated.

An Initial Study is a preliminary analysis conducted by the Lead Agency, in consultation with other agencies (responsible or trustee agencies, as applicable), to determine whether there is substantial evidence that a project may have a significant effect on the environment. If the Initial Study shows that there is no substantial evidence, in light of the whole record before the agency, that the project may have a significant effect on the environment, the Lead Agency shall prepare a Negative Declaration. If the Initial Study identifies potentially significant effects but revisions have been made by or agreed to by the applicant that would avoid the effects or mitigate the effects to a point where clearly no significant effects would occur, a Mitigated Negative Declaration is appropriate. If the Initial Study concludes that neither a Negative Declaration nor Mitigated Negative Declaration is appropriate, an Environmental Impact Report (EIR) is normally required.[2]

1.2 CEQA Process

In compliance with the State CEQA Guidelines, the City, as the Lead Agency for the Project, will provide opportunities for the public to participate in the environmental review process. Throughout the CEQA process, an effort will be made to inform, contact, and solicit input on the Project from

1 The study of alternatives to a project is only required as part of an Environmental Impact Report.

2 State CEQA Guidelines Section 15063(b)(1) identifies the following three options for the Lead Agency when there is substantial evidence that the project may cause a significant effect on the environment: "(A) Prepare an EIR, or (B) Use a previously prepared EIR which the Lead Agency determines would adequately analyze the project at hand, or (C) Determine, pursuant to a program EIR, tiering, or another appropriate process, which of a project's effects were adequately examined by an earlier EIR or negative declaration.

various government agencies and the general public, including stakeholders and other interested parties.

At the onset of the environmental review process, the City has prepared this Initial Study to determine whether the Project may have a significant effect on the environment. The analysis contained herein determined that the Project would not have a significant effect on the environment. Therefore, an IS/ND was determined to be the appropriate CEQA document.

1.3 Organization of the IS/MND

This IS/MND is organized into five sections and appendices as follows:

1 INTRODUCTION

Describes the purpose and content of the IS/MND and provides an overview of the CEQA process.

2 EXECUTIVE SUMMARY

Provides Project information, identifies key areas of environmental concern, and includes a determination as to whether the Project may have a significant effect on the environment.

3 PROJECT DESCRIPTION

Provides a description of the Project and its environmental setting, including specific characteristics of the Project and a list of discretionary actions.

4 EVALUATION OF ENVIRONMENTAL IMPACTS

Contains the completed Initial Study Checklist and discussion of the environmental factors that would be potentially affected by the Project.

5 PREPARERS AND PERSONS CONSULTED

Lists the agencies, persons, and technical professionals that were consulted to prepare the IS/MND.

APPENDICES

Includes technical reports, memorandum, and other documentation used in the preparation of the IS/MND.

PROJECT DESCRIPTION SUMMARY

The Project includes demolition and removal of the existing warehouse and surface parking from the Project Site and development of the site with a seven-story self-storage facility with approximately 161,645 square feet of floor area (5.28:1 FAR). Discretionary entitlements, reviews, permits and approvals required to implement the Project include, but are not limited to, the following:

- **Zone Change/Height District Change (ZC/HD)**, per LAMC Chapter 1A Section 13B.1.4, from the C2-1-O Zone to a C2-2-O Zone in order to permit additional floor area up to a maximum Floor Area Ratio of 6:1 in lieu of the current 1.5:1; including

  - **A waiver of the requirement** to dedicate and/or improve an additional 2.5 feet of the existing public alley;
  - **A wavier of the requirement** to improve an additional 3 feet of street widening along South Longwood Avenue;

- **Class 2 Conditional Use Permit (CU2)**, per LAMC Chapter 1A Section 13.B.2.2, to permit storage uses within 500 feet of an R Zone; and

- **Project Review (PR)**, pursuant to LAMC Chapter 1A Section 13B.2.4, for a proposed development project that results in an increase of 50,000 gross square feet of non-residential floor area.

(For additional detail, see **Section 3. Project description** of this document).

ENVIRONMENTAL SETTING SUMMARY

The approximately 0.7-acre (30,612-square-foot) Project Site is located on the south side of San Vicente Boulevard, between Longwood Avenue to the west and Tremaine Avenue to the east, in the Wilshire Community Plan Area of the City of Los Angeles. The Project Site is currently a single-story, 23,151-square-foot warehouse building and two (2) surface parking lots (one (1) along Tremaine Avenue and one (1) along Longwood Avenue). The Project Site is currently designated for Community Commercial land uses and is zoned C2-1-O.

(For additional detail, see **Section 3. Project description** of this document).

OTHER PUBLIC AGENCIES WHOSE APPROVAL IS REQUIRED

(e.g. permits, financing approval, or participation agreement)

At this time no public agencies whose approval is required have been identified.

CALIFORNIA NATIVE AMERICAN CONSULTATION

The City issued a Tribal Consultation on November 20, 2025. Subsequently the Gabrieleno Band of Mission Indians Kizh Nation requested government-to-government consultation with the City of Los Angeles pursuant to Assembly Bill 52 and the California Environmental Quality Act (CEQA).

Note: Conducting consultation early in the CEQA process allows tribal governments, lead agencies, and project proponents to discuss the level of environmental review, identify and address potential adverse impacts to tribal cultural resources, and reduce the potential for delay and conflict in the environmental review process. (See Public Resources Code section 21080.3.2.) Information may also be available from the California Native American Heritage Commission's Sacred Lands File per Public Resources Code section 5097.96 and the California Historical Resources Information System administered by the California Office of Historic Preservation. Please also note that Public Resources Code section 21082.3(c) contains provisions specific to confidentiality.

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED

The environmental factors checked below would be potentially affected by this project involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

(For additional detail see **Section 4, Environmental Impact Analysis** of this document).

☐ Aesthetics	☐ Greenhouse Gas Emissions	☐ Public Services
☐ Agriculture & Forestry Resources	☐ Hazards & Hazardous Materials	☐ Recreation
☐ Air Quality	☐ Hydrology/Water Quality	☐ Transportation
☐ Biological Resources	☐ Land Use/Planning	☐ Tribal Cultural Resources
☐ Cultural Resources	☐ Mineral Resources	☐ Utilities/Service Systems
☐ Energy	☐ Noise	☐ Wildfire
☐ Geology/Soils	☐ Population/Housing	☐ Mandatory Findings of Significance

DETERMINATION

(To be completed by the Lead Agency)

On the basis of this initial evaluation:

☐ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

☒ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions on the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

☐ I find the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

☐ I find the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

☐ I find that the Project is a qualified "transit priority project" that satisfies the requirements of Sections 21155 and 21155.2 of the Public Resources Code (PRC), and/or a qualified "residential or mixed use residential project" that satisfies the requirements of Section 21159.28(d) of the PRC, and although the project could have a potentially significant effect on the environment, there will not be a significant effect in this case, because the SUSTAINABLE COMMUNITIES ENVIRONMENTAL ASSESSMENT (SCEA) identifies measures that either avoid or mitigate to a level of insignificance all potentially significant or significant effects of the Project.

PRINTED NAME, TITLE

4/2/26

DATE

EVALUATION OF ENVIRONMENTAL IMPACTS

1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).

2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.

3) Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less that significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.

4) "Less Than Significant With Mitigation Incorporated" applies where the incorporation of a mitigation measure has reduced an effect from "Potentially Significant Impact" to "Less Than Significant Impact." The lead agency must describe the mitigation measures and briefly explain how they reduce the effect to a less than significant level (mitigation measures from "Earlier Analysis," as described in (5) below, may be cross referenced).

5) Earlier analysis must be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR, or negative declaration. Section 15063 (c)(3)(D). In this case, a brief discussion should identify the following:

   a) Earlier Analysis Used. Identify and state where they are available for review.

   b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.

   c) Mitigation Measures. For effects that are "Less Than Significant With Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.

6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.

7) Supporting Information Sources: A sources list should be attached, and other sources used or individuals contacted should be cited in the discussion.

8) This is only a suggested form, and lead agencies are free to use different formats; however, lead agencies should normally address the questions from this checklist that are relevant to a project's environmental effects in whichever format is selected.

9) The explanation of each issue should identify:

   a) The significance criteria or threshold, if any, used to evaluate each question; and

   b) The mitigation measure identified, if any, to reduce the impact to less than significance.

Section 3

Project Description

This section is based on the following item, which is included in **Appendix A** of this document:

A Plans, KSP Studio Architecture, October 10, 2025

3.1 Project Summary

The Project involves the demolition and removal of the existing one-story warehouse building and two (2) associated parking lots and the construction, use, maintenance of a new seven-story self-storage facility encompassing a floor area of 161,645 square feet with a Floor Area Ratio (FAR) of 5.28:1, five (5) vehicle parking spaces, and two (2) loading spaces. The Project would feature storage units across all seven (7) floor levels of the facility and includes a 954-square-foot office area, and 36 bicycle parking spaces (18 short-term, 18 long-term). The Project would remove and replace two (2) of the five (5) street trees located along San Vicente Boulevard and Longwood Avenue to the satisfaction of the Department of Public Works Urban Forestry Division. The Project would provide a total of eight (8) trees upon completion.

3.2 Environmental Setting

3.2.1 Project Location

The Project Site is located on the south side of San Vicente Boulevard, between Longwood Avenue to the west and Tremaine Avenue to the east, in the Wilshire Community Plan Area of the City of Los Angeles (City). The Site is located approximately 4.0 miles west of Downtown Los Angeles and 9.5 miles northeast of the Pacific Ocean.

See **Figure 3-1, Regional Location Map**, for the location within the context of the City.

See **Figure 3-2, Aerial Map**, for an aerial of the Site and the immediate surrounding area.

3.2.2 Surrounding Land Uses

North, across San Vicente Boulevard, are several 2-story multi-family residential-use buildings (4801-4823 San Vicente Boulevard). This area is zoned R3-1-O.

South, across a 15-foot-wide alley, are several one-story commercial warehouse buildings (4801-4831 Pico Boulevard) consisting of photography studios (Edge Studios and Grips, 1388 Longwood Avenue) (Off Pico Studios, 4823 Pico Boulevard) and a grocery store (Western Kosher Supermarket, 4817 Pico Boulevard). This area is zoned C2-1-O.

West, across Longwood Avenue, is a two-story public facility buildings (LADWP Distributing Station 8, 4858 San Vicente Boulevard). This area is zoned PF-1XL-O.

East, across Tremaine Avenue, is an auto service facility (Jiffy Lube, 4777 Pico Boulevard). This area is zoned C2-1-O.

Figure 3-1
Regional Location Map

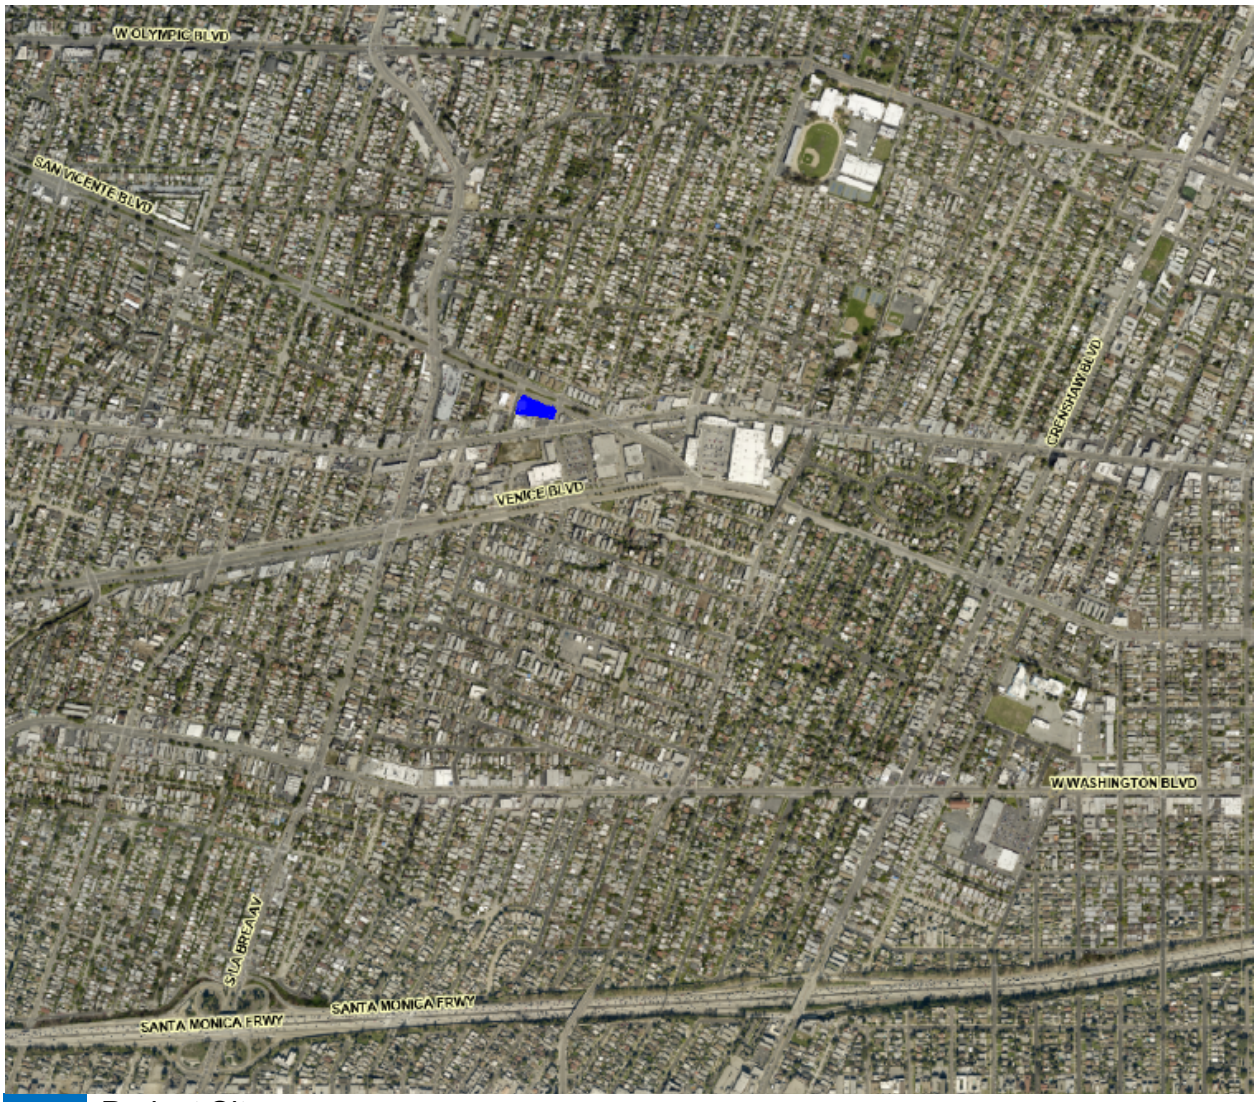

Figure 3-2
Aerial Map

The nearest residential uses include:

- Multi-family residential-use buildings (4801 - 4823 San Vicente Boulevard), approximately 150 feet north of the Site across San Vicente Blvd.
- Multi-family residential-use buildings (1304 - 1316 Highland Avenue), approximately 225 feet west of the Site across Longwood Avenue and separated by a two-story public facilities building.

The nearest historic resources[1, 2, 3]:

- Department of Water and Power Distributing Station No. 8, 4858 San Vicente Boulevard, approximately 60 feet west of the Site. The building has been determined significant by the Los Angeles Historic Resources Inventory and is therefore a historical resourced under

1 NavigateLA, Historic-Cultural Monuments layer: https://navigatela.lacity.org/navigatela, accessed July 3, 2025.

2 HistoricPlacesLA: https://hpla.lacity.org/search, accessed July 3, 2025.

3 SurveyLA: https://planning.lacity.gov/preservation-design/survey-la-results-wilshire, accessed July 3, 2025.

CEQA. While not currently listed, the property appears eligible for National Register, California Register, and local listing.[4]

- San Vicente Boulevard Median, 55 feet north of the Site. The resource has been determined to be eligible by the Los Angeles Historic Resources Inventory for local listing and is therefore treated as a historical resources under CEQA.[5]

3.2.3 Regional and Local Access

Regional access is provided by:

- I-10 (Santa Monica) Freeway, 5,050 feet south of the Site

Local access is provided by (designation in the Mobility Plan 2035):

- San Vicente Boulevard (Boulevard II), adjacent north of the Site
- Longwood Avenue (Local Street Standard), adjacent west of the Site
- Tremaine Avenue (Local Street Standard), adjacent east of the Site
- Pico Boulevard (Avenue I), 80 feet south of the Site
- La Brea Avenue (Avenue I), 725 feet west of the Site
- Venice Boulevard (Modified Boulevard II), 700 feet south of the Site

3.2.4 Pedestrian Facilities

There is a sidewalk along the Project Site's northern boundary along San Vicente Boulevard, western boundary along Longwood Avenue, and eastern boundary along South Tremaine Avenue. The sidewalk along San Vicente Boulevard contains three (3) street trees and the sidewalk along Longwood Avenue contains two (2) street trees. The Project proposes the removal of the two (2) street trees along Longwood Avenue and will replace them at a 2:1 ratio to the satisfaction of the Urban Forestry Division – Bureau of Street Service.

Crosswalks are provided at all legs of the nearest signalized intersections:

- San Vicente Boulevard and Pico Boulevard, 300 feet east of the Site

3.2.5 Bicycle Facilities

The following bicycle facilities are located nearby:

- Bicycle-friendly streets:

4 https://hpla.lacity.org/report/6d808be7-021c-4589-94d5-5dc8670ac131, accessed July 3, 2025.

5 https://hpla.lacity.org/report/5e360f3f-4d0d-4842-afa6-fae553eaba2e, accessed July 3, 2025.

- Pico Boulevard, 80 feet south to the Site

- Bicycle Lane:
  - Class II bicycle lanes on San Vicente Boulevard, adjacent north of the Site
  - Class II bicycle lanes on Venice Boulevard, 700 feet south of the Site

3.2.6 Public Transit

The Site is within a High-Quality Transit Area (HQTA), which are areas within one-half mile of a high-quality transit corridor, which is a corridor with fixed route bus service with service intervals no longer than 15 minutes during peak commute hours.[6] The City defines peak commute hours as between 6:00 AM and 9:00 AM and between 3:00 PM and 7:00 PM.[7]

Los Angeles County Metropolitan Transportation Authority (Metro), Los Angeles Department of Transportation (LADOT), and City of Santa Monica Big Blue Bus (BBB) operate public transit in the area, as shown in **Table 3-1, Public Transit**.

The Project Site is within 0.5 miles of a qualified Major Transit Stop at the intersection of San Vicente Boulevard and Pico Boulevard, 300 feet east of the Site, which is served by Metro bus line 30 and BBB lines 7 and Rapid 7. The lines have under 20-minute headways during peak hours.[8] Assembly Bill (AB) 2553 changes the criteria of a Major Transit Stop from a 15-minute to 20-minute bus route service interval.[9]

Based on the Site's proximity to a Major Transit Stop, development at the Site is eligible for reduced parking requirements as may be authorized under AB 2097 (codified in Gov. Code Section 65863.2).

[6] SCAG, HQTA 2016 based on the 2020-2045 RTP/SCS: https://gisdata-scag.opendata.arcgis.com/datasets/high-quality-transit-areas-hqta-2016-scag-region?geometry=-121.570%2C33.364%2C-114.731%2C34.954, accessed July 3, 2025.

[8] Major Transit Stop is a site containing a rail station or the intersection of two or more bus routes with a service interval of 20 minutes (per AB 2553) or less during the morning and afternoon peak commute periods. The stations or bus routes may be existing, under construction or included in the most recent Southern California Association of Governments (SCAG) Regional Transportation Plan (RTP).

3.2.7 Planning and Zoning

Table 3-2, Project Site Data, lists the Site's APNs, zoning, and General Plan land use designation. The Site is zoned C2-1-O (Commercial Zone, Height District 1, Oil Drilling Overlay) and Community Commercial land use designation.

The Project Site also is subject to the following relevant Zoning Information (ZI) items:

- ZI-2488 Redevelopment Project Area: Mid City Recovery
- ZI-2535 Prior Housing Element Sites – Ministerial Approval
- ZI-2512 Housing Element Sites
- ZI-2452 Transit Priority Area in the City of Los Angeles
- ZI-2280 Redevelopment Project Area: Mid City Recovery (Billboard)
- ZI-2498 Local Emergency Temporary Regulations – Time Limits and Parking Relief

The Site is identified in a Methane Zone. The Site is identified in the Las Cienegas Oil/Gas Field. The Site is identified in a 500-Year Flood Zone and 100-Year Flood Zone AO.

Table 3-2
Project Site Data

Address	Lot	APN	Size (sf)	Zone	Land Use
4828 W. San Vicente Boulevard	FR 660	5070-004-026	3,480.6	C2-1-O	Community Commercial
4826 W. San Vicente Boulevard	FR 661		3,355.7		
4822 W. San Vicente Boulevard	FR 662		3,182.4		
4820 W. San Vicente Boulevard	FR 663		2,998.8		
4818 W. San Vicente Boulevard	FR 664		2,822.4		
4816 W. San Vicente Boulevard	FR 665		2,647.2		
4812 W. San Vicente Boulevard	FR 666		2,469.5		
4810 W. San Vicente Boulevard	FR 667		2,293.9		
4808 W. San Vicente Boulevard	FR 668		2,117.3		
4806 W. San Vicente Boulevard	FR 669		1,940.7		
4804 W. San Vicente Boulevard	FR 670		1,764.1		
4802 W. San Vicente Boulevard	FR 671		1,537.7		
Source: Zone Information & Map Access System (ZIMAS): http://zimas.lacity.org, July 2025.					

3.3 Existing Conditions

The lot area is 30,613 square feet (0.70 acres).[10] The Project Site contains a one-story, 23,151-square-foot warehouse building and two (2) associated surface parking lots (one along Tremaine Avenue and one along Longwood Avenue). There are no on-site trees on the Project site. Two (2) street trees (southern magnolia) are planted along Longwood Avenue, and three (3) street trees (one purple orchid tree and two Japanese privet) are planted along San Vicente Boulevard.[11] None are protected tree or shrubs as defined by the City.[12]

3.4 Description Of Project

3.4.1 Project Overview

The Project includes demolition and removal of all existing uses from the Project Site and development of the Site with a new seven-story self-storage facility with approximately 161,645 square feet of floor area (5.28:1 FAR), five (5) vehicle parking spaces, and two (2) loading spaces.

10 Plans, KSP Studio Architecture, August 27, 2025, updated November 3, 2025. Included in **Appendix A** to document.

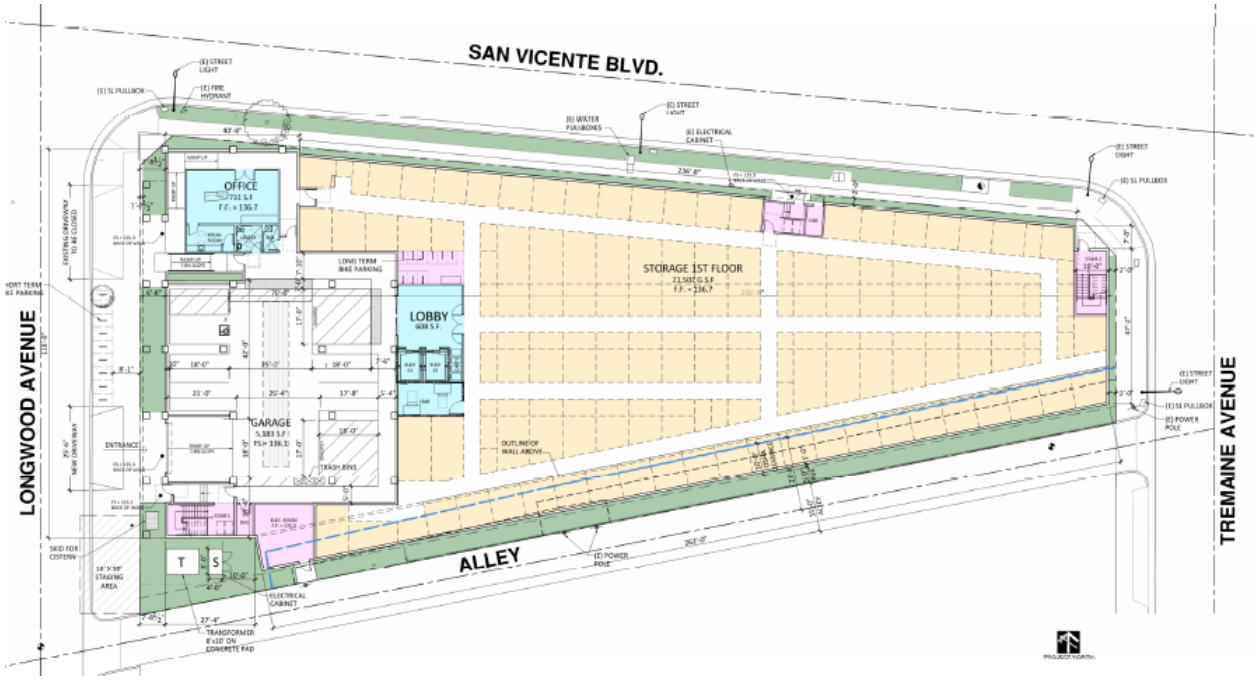

11 Los Angeles City Planning Form CP-4068 Tree Report, Alison Lancaster, Updated November 3, 2025. Included in **Appendix B**.

12 LAMC Section 46.01: "PROTECTED TREE OR SHRUB" means any of the following Southern California indigenous tree species, which measures four inches or more in cumulative diameter, four and one-half feet above the ground level at the base of the tree, or any of the following Southern California indigenous shrub species, which measures four inches or more in cumulative diameter, four and one-half feet above the ground level at the base of the shrub: Protected Trees: (a) Oak tree including Valley Oak (*Quercus lobata*) and California Live Oak (*Quercus agrifolia*), or any other tree of the oak genus indigenous to California but excluding the Scrub Oak (*Quercus berberidifolia*); (b) Southern California Black Walnut (*Juglans californica*); (c) Western Sycamore (*Platanus racemosa*); (d) California Bay (*Umellularia californica*). Protected Shrubs: (a) Mexican Elderberry (*Sambucus mexicana*); (b) Toyon (*Heteromeles arbutifolia*). This definition shall not include any tree or shrub grown or held for sale by a licensed nursery, or trees or shrubs planted or grown as a part of a planting program.

The building includes self-storage rooms on all seven floors, as well as a 954-square-foot office area on the ground floor. The storage units would range in size from between 25 to 200 square feet across each floor. The proposed hours of operation of the self-storage facility would be between 6:00 AM to 11:00 PM, daily.

See **Figure 3-3, Site Plan**, for the plan of the Project.

Figure 3-3
Site Plan

3.4.2 Design and Architecture

See **Appendix A** of this document for floor plans, elevations, sections, and renderings. The Project has been designed as an integrated single structure with articulation and variation consistent with applicable City design guidance. The Project's five (5) parking spaces would be located in an enclosed ground floor parking area. Storage units within the building have been integrated into the overall architectural theme of the Project.

The ground floor of the building will include a leasing office located at the northwest side of the building, as well as a lobby within the secured area of the facility. Storage units would range in size and are distributed throughout all levels of the building.

The proposed development is designed as a contemporary multi-story storage facility with a streamlined, functional layout. The architecture emphasizes efficiency and accessibility, with a ground floor that incorporates a lobby, office space, loading areas, and parking garage, while upper levels are dedicated to storage units arranged in consistent modular grids. Two centrally located elevators and dual stairwells provide circulation and meet safety requirements, while

ramps accommodate smooth vehicular and pedestrian access. The building massing is straightforward and rectilinear, with parapet walls and a roof-level elevator penthouse adding to the vertical expression. Landscape elements, including drought-tolerant plantings such as agave, rosemary, and star jasmine, soften the edges of the property and enhance the streetscape along San Vicente Boulevard. Overall, the building blends functionality with modern architectural flair, creating an upscale look for what is typically a utilitarian use.

Mechanical systems, trash enclosures, utilities, and surface or roof mounted mechanical equipment are screened from public view.

3.4.3 Floor Area

See **Table 3-3** for the floor area and floor area ratio (FAR). Per the definition of Buildable Area in Los Angeles Municipal Code (LAMC) Section 12.03, "All that portion of a lot located within the proper zone for the proposed main building, excluding those portions of the lot which must be reserved for yard spaces, building line setback space, or which may only be used for accessory buildings or uses."

Table 3-3
Project Floor Area

Buildable Area	LAMC Base		Maximum		Proposed	
	FAR	Floor Area	FAR	Floor Area	FAR	Floor Area
30,613 sf	1.5:1	45,919 sf	6:1	183,678 sf	5.72:1	161,645 sf
sf = square feet LAMC = Los Angeles Municipal Code Plans, KSP Studio Architecture, October 10, 2025. Included in **Appendix A** of this document.						

Under LAMC Section 12.14.C.3, properties located in the C Zone with a Height District of1are limited to a FAR of 1.5:1. With a buildable area of 30,612 square feet, the buildable floor area at the Project Site is limited to 45,919 square feet.

The Project requests a Zone Change/Height District Change from the existing C2-1-O Zone to the proposed C2-2-O Zone to increase the allowable FAR from 1.5:1 to 6:1. The Zone and Height District Change would specifically update the Height District from 1 to 2 to permit the additional floor area.

The Project proposes a total of 161,645 square feet (5.28:1 FAR).

3.4.5 Setbacks

Under LAMC Section 12.14.C.1 and 2, front yards are not required, and side and rear yards are not required for buildings erected and used exclusively for commercial purposes.

LAMC Section 12.03 defines Commercial Corner Development as, "(1) Any commercially used corner lot located in a C or M zone in Height District Nos. 1, 1-L, 1-VL or 1-XL, the lot line of which adjoins, is separated only by an alley adjacent to, or is located across the street from, any portion of a lot zoned A or R, or improved with any residential use (except in an M zone)…"

Because the Project Site is located within a C Zone and Height District 1 and is located across the street from an R3 zone, Commercial Corner regulations apply.

3.4.6 Height

Pursuant to LAMC Section 12.21.1.B.3(a), rooftop structures, equipment and improvements may exceed the maximum building height when authorized, provided the structure, equipment or improvement is screened from public view using non-reflective materials or otherwise made compatible with the overall design of the building.

Pursuant to LAMC Section 12.21.1.B.3, chimney, exhaust ducts, solar water heaters, or any roof structure housing stairways, elevators or ventilation fans may also exceed the building height limit by up to five feet but are not required to provide a setback from the perimeter of the roof. Where height is limited to 75 feet, roof structures for the housing of elevators and stairways may exceed the building height limit by up to 20 feet in height.

The maximum height in the C Zone within Height District No. 1 is unlimited to height and stories.

The proposed seven-story (84 feet and 8 inches to top of parapet) building will be consistent with the unlimited height and stories.

3.4.7 Trash, Loading, and Mechanical Equipment

The Project is designed to minimize the visual impact of trash receptacles and utility areas. Trash bin space is located within the ground floor parking area. Landscaping and the building walls would hide the parking and trash area and is not visible from surrounding public streets and public view.

One loading space is required and must have a minimum height of 14 feet and shall be directly accessible through a usable door not less than 3 feet in width and 6 feet,6 inches in height opening from the building it is to serve. The space must have a minimum area of 600 square feet, minimum width of 20 feet measured along the alley line, and minimum depth of 10 feet measure perpendicularly to the alley line. There will be two loading spaces (612 square feet) immediately adjacent to the lobby.

Utility rooms will be located within the building and not visible from surrounding public streets and public view. Rooftop mechanical equipment will be set back from the roof parapet edge and appropriately screened from public view.

3.4.8 Access and Circulation

There is one (1) curb cut along Tremaine Avenue and two (2) curb cuts along Longwood Avenue fronting the Project Site. All curb cuts would be closed. One (1) new curb cut and driveway would be provided on Longwood Avenue providing access to the ground level parking area and loading area.

3.4.9 Vehicle Parking

Table 3-4, Vehicle Parking, provides the amount of required and provided vehicle parking for this Project. Pursuant to LAMC Section 12.21.A.4(c)(1), the required number is parking spaces for a warehouse building (including a self-storage building), is one parking space for each 500 square feet of floor area for the first 10,000 square feet, and one parking space for each additional 5,000 square feet of floor area.

AB 2097 generally prohibits a public agency from imposing minimum automobile parking requirements on most types of development within half a mile of a Major Transit Stop (see Section 3.2.6 for further details). Pursuant to AB 2097, the Project would request relief from the automobile parking requirements otherwise imposed by LAMC 12.21.A.4.

The Project will voluntarily provide five (5) parking spaces.

Table 3-4
Vehicle Parking

Use	Size	LAMC Required		AB 2097	Provided
		Rate	Amount	Amount	
Warehouse	First 10,000 sf	1 space / 500 sf	20	0	
	Next 165,047 sf	1 space / 5,000 sf	33		
Total			**53**	**0**	**5**
Per LAMC Section 12.21.A.4(c)(1). Plans, KSP Studio Architecture, October 10, 2025. Included as **Appendix A** of this document.					

3.4.10 Bicycle Parking

Table 3-5, Bicycle Parking, provides the amount of required and provided bicycle parking. LAMC 12.21.A.16(a) requires new projects to provide bicycle parking spaces. Short-term bicycle parking shall consist of bicycle racks that support the bicycle frame at two points. Long-term bicycle parking shall be secured from the general public and enclosed on all sides and protect bicycles from inclement weather. The Project will provide 36 bicycle parking spaces (18 short-term and 18 long-term).

3.4.11 Lighting and Signage

Exterior lighting will be shielded to reduce glare and eliminate light being cast into the night sky. Security lighting will be integrated into the overall architecture and landscaping. The Project will also comply with LAMC lighting regulations that include approval of street lighting plans by the Bureau of Street Lighting; limited light intensity from signage to no more than three foot-candles above ambient lighting; and limited exterior lighting to no more than two-foot-candles of lighting intensity or direct glare onto specified sensitive uses, under the terms of the LAMC Section 93.0117(b).

Project signage will include building identification, wayfinding, and security markings. Signage will be similar to other signage in the Project's vicinity.

Table 3-5
Bicycle Parking

Use	Size	Short-Term Spaces			Long-Term Spaces		
		Rate	Required	Provided	Rate	Required	Provided
Office	731 sf	2 minimum	2	2	2 minimum	2	2
Storage	160,914 sf	1 / 10,000 sf	16	16	1 / 10,000 sf	16	16
Total			**18**	**18**		**18**	**18**

LAMC Table 12.21 A.16 (a)(1)(i) and Ordinance No. 185,480.
A minimum of two short-term bicycle parking spaces shall be provided in all cases.
Per LAMC Section 12.21.A.16(b): When the application of these regulations results in the requirement of a fractional bicycle space, any fraction up to and included on half may be disregarded, and any fraction over one-half shall be construed as requiring one bicycle parking space.
Therefore the 2.5 spaces rounds down to 2 spaces.
Plans, KSP Studio Architecture, October 10, 2025. Included as **Appendix A** of this document.

3.4.12 Street Tree Removal and Replacement

As mentioned previously, there are two (2) street trees (southern magnolia) along Longwood Avenue and three (3) street trees (one purple orchid tree and two Japanese privet) along San Vicente Boulevard. The Project includes removal of the two (2) southern magnolia street trees and replacement of these street trees at a 2:1 ratio in accordance with City standards and to the satisfaction of the Department of Public Works Urban Forestry Division. The remaining street trees would be protected in place.

3.4.13 Site Security

The building will include premium security features that include internally accessed storage units, a unique passcode required for building entry and elevator usage, logged entry and exit times, and maximum parking lot lighting. Access into the building is through the ground floor lobby with two elevators and stairwells at the southwestern and northeastern corners of the Property. There will be digital security cameras recording all activity in the parking lot, loading zones, elevator lobbies and internal corridors, 24/7 with no blind spots. All locks on storage units will be provided by USSC to ensure maximum security. Customer access hours will be limited between 6:00 AM and 11:00 PM, and customer pin codes will not allow access outside of those hours.

The Project would provide a security program to ensure the safety of its employees and visitors. Security features to assist in crime prevention efforts and to reduce the demand for police protection services would include secured building access/design to interior areas; lighting of building entryways and areas; and possible video surveillance. The security program would include controlling access; monitoring entrances and exits of buildings; monitoring fire/life/safety systems, and security lighting.

3.5 Sustainability Features

The Project would comply with the applicable Los Angeles Green Building Code (LAGBC, 2023 version effective January 1, 2023) and the applicable California Green Building Standards Code

(CalGreen, 2022 version effective January 1, 2023). The applicability is determined when the Project is submitted and accepted by plan check.

All building systems would meet applicable Title 24 Energy Standards. These standards would reduce energy and water usage and waste and, thereby, reduce associated greenhouse gas emissions and help minimize the impact on natural resources and infrastructure.

The sustainability features to be incorporated into the Project would include, but not be limited to, WaterSense-labeled plumbing fixtures and Energy Star-labeled appliances, reduction of indoor and outdoor water use, weather-based controller and drip irrigation systems, and water-efficient landscape design. In addition, the landscaping on the outdoor decks would serve to help reduce solar heat gain and facilitate possible stormwater retention on-site.

The Project would recycle and reuse building and construction materials to the maximum extent feasible. The Project would provide EV spaces as required by the LAMC.

The Project's infill location would promote the concentration of development in an urban location with extensive infrastructure and access to public transit facilities. The Project's proximity to public transportation would reduce vehicle trips and vehicle miles traveled for employees and visitors.

3.6 Estimated Construction Schedule

The estimated construction schedule is shown in **Table 3-6, Construction Schedule**. This information has been provided by the Applicant and reflects Site- and Project-specific assessments of anticipated construction phase lengths and equipment to be utilized.

The estimated operational year is 2028. Construction is proposed to finish in 2028, and the Project will undergo a standard process to obtain its certification of occupancy and will begin leasing. The operational year relates to future traffic operations and assumes a fully leased building for maximum trip and VMT purposes. The Project will remove approximately 2,080 tons of debris by demolishing the existing building and surface parking lots. The Project will cut 350 cubic yards (cy) of soil, fill 1,300 cy, and import 95 cy. There would be no export.

Truck routes are expected to utilize the most convenient access to freeway ramps. The truck routes will comply with the approved truck routes designated within the City and/or adjacent jurisdictions. Trucks traveling to and from the Project Site must travel along the designated routes. These streets are part of different approved haul routes.[13] The truck route will be approximately 8 miles one-way to Express Disposal, 2221 East Washington Boulevard, Los Angeles, CA 90021.

[13] NavigateLA, Haul Route layer: https://navigatela.lacity.org/navigatela/, accessed March 6, 2026.

Table 3-6
Construction Schedule

Phase	Schedule	Duration
Demolition	January 15, 2027 – February 15, 2027	1 month
Site Preparation	February 15, 2027 – February 30, 2027	2 weeks
Grading	March 01, 2027 – March 21, 2027	3 weeks
Trenching	March 15, 2027 – April 30,2027	3 weeks
Paving	March 01, 2027 – March 05, 2027	1 week
Construction	March 01, 2027 – May 01, 2028	14 months
Architectural Coatings	March 01, 2028 – May 30, 2028	3 months

Demolition involves removing buildings or structures.
Site Preparation involves clearing vegetation (grubbing and tree/stump removal) and removing stones and other unwanted material or debris prior to grading.
Grading involves the cut and fill of land to ensure that the proper base and slope is created for the foundation.
Building Construction involves the construction of the foundation, structures, and buildings.
Trenching is associated with underground utilities, including gas, water, electricity, telecommunications.
Paving involves the laying of concrete or asphalt such as in parking lots, roads, driveways, or sidewalks.
Architectural Coating involves the application of coatings to both the interior and exterior of buildings or structures, the painting of parking lot or parking garage striping, associated signage and curbs, and the painting of the walls or other components such as stair railings inside parking structures.

Construction schedule, including start, end, and duration dates are estimates only.
Some overlap of phasing may occur.
The analysis assumes that construction will start in 2026. In practice, construction could begin at a later time. However, using an earlier start date represents a worst-case scenario for the analysis of construction emissions, because equipment and vehicle emission factors for later years will be slightly less due to more stringent standards for in-use off-road equipment and heavy-duty trucks, as well as fleet turnover replacing older equipment and vehicles in later years.
Estimates provided by the Applicant, September 2025.

3.7 Discretionary Requests

Discretionary entitlements, reviews, permits and approvals required to implement the Project will include, but are not necessarily limited to, the following:

- **Zone Change/Height District Change (ZC/HD)**, per LAMC Chapter 1A Section 13B.1.4, from the C2-1-O Zone to the C2-2-O Zone in order to permit additional floor area up to a maximum Floor Area Ratio of 6:1 in lieu of 1.5:1; including

    - **A waiver of the requirement** to dedicate and/or improve an additional 2.5 feet of the existing public alley;
    - **A waiver of the requirement** to improve an additional 3 feet of street widening along South Longwood Avenue;

- **Class 2 Conditional Use Permit (CU2)**, per LAMC Chapter 1A Section 13.B.2.2, to permit

storage uses within 500 feet of an R Zone; and

- **Project Review (PR)**, pursuant to LAMC Chapter 1A Section 13B.2.4, for a proposed development project that results in an increase of 50,000 gross square feet of non-residential floor area

As required by various sections of the LAMC, the Applicant will request the necessary administrative approvals and permits from the Building and Safety Department and other municipal agencies for Project construction actions, including but not limited to the following: demolition, excavation, shoring, grading, foundation, building, haul route, street tree removal and tenant improvements.

Section 4

Evaluation of Environmental Impacts

4.1 Aesthetics

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Except as provided in Public Resources Code Section 21099, would the project:					
a.	Have a substantial adverse effect on a scenic vista?	☐	☐	☐	☒
b.	Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?	☐	☐	☐	☒
c.	In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?	☐	☐	☐	☒
d.	Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?	☐	☐	☐	☒

Impact Analysis

a) Would the project have a substantial adverse effect on a scenic vista?

No Impact. A significant impact would occur if a project introduced incompatible scenic elements within a field of view containing a scenic vista or substantially block views of an existing scenic vista. A scenic vista is a panoramic view of a valued visual resource. Panoramic views or vistas provide visual access to a large geographic area, for which the field of view can be wide and extend into the distance. Panoramic views are typically associated with vantage points looking out over a section of urban or natural areas that provide a geographic orientation not commonly available. Examples of panoramic views include an urban skyline, valley, mountain range, the ocean, or other water bodies. Focal views are also relevant when considering this question from Appendix G of the CEQA Guidelines. Examples of focal views include natural landforms, public art/signs, individual buildings, and specific, important trees.

Minimal scenic or natural setting views are visible due to the surrounding urban uses. In addition, CEQA is only concerned with public views with broad access by persons in general, not private

views that will affect particular persons.[1] Urban features that may contribute to a valued aesthetic character or image include: structures of architectural or historic significance or visual prominence; public plazas, art or gardens; heritage oaks or other protected trees or plants; consistent design elements (such as setbacks, massing, height, and signage) along a street or district; pedestrian amenities; landscaped medians or park areas; etc. There are no tall features on the Project Site from which scenic vistas may be obtained or which make up part of the scenic landscape of the surrounding community.

The Project Site is located along San Vicente Boulevard within an urbanized portion of the City of Los Angeles (City). The surrounding area is developed with a mix of one- to two-story commercial, industrial, residential, and public utility uses, including multi-family housing, studios, a grocery store, and LADWP infrastructure. The area does not contain any designated or prominent scenic vistas, and the site itself is not located within a designated scenic corridor, view protection area, or Specific Plan that includes view preservation standards.

The Project involves the construction of a seven-story self-storage building with a maximum height of approximately 84 feet and 8 inches. The proposed structure has been designed with a sleek, modern architectural style incorporating articulation, varying materials, and transparent glazing. The building would replace an existing single-story warehouse and parking lot and would be consistent with the urban scale and character of the surrounding built environment. Furthermore, views of notable features in the broader region—such as the Santa Monica Mountains or Downtown Los Angeles skyline—are already blocked or filtered by existing development and vegetation and would not be newly obstructed or altered by the project. The design integrates landscaping, setbacks, and screened rooftop equipment to minimize visual massing and avoid creating a prominent visual intrusion. No designated scenic vistas or recognized public view corridors would be adversely affected. Thus, the Project would not have a substantial adverse effect on a scenic vista. Therefore, no impacts related to scenic vistas would occur as a result of the Project.

b) Would the project substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?

No Impact. The California Department of Transportation (Caltrans) maintains an official list of State Scenic Highways. The Project Site is not located along a state scenic highway. The closest officially designated state scenic highways are[2]:

- State Route 27, Topanga Canyon Boulevard, from Mulholland Highway to Pacific Coast Highway. This is 14.0 miles west of the site.

1 Obstruction of a few private views in a project's immediate vicinity is not generally regarded as a significant environmental impact. (See Ocean View Estates Homeowners Assn., Inc. v. Montecito Water Dist., supra, 116 Cal.App.4th at p. 402 [that a project affects "only a few private views" suggests that its impact is insignificant]; Mira Mar Mobile Community v. City of Oceanside, supra, 119 Cal.App.4th at pp. 492-493 [distinguishing public and private views; "[u]nder CEQA, the question is whether a project will affect the environment of persons in general, not whether a project will affect particular persons"].

2 Caltrans State Scenic Highways Map: https://caltrans.maps.arcgis.com/apps/webappviewer/index.html?id=465dfd3d807c46cc8e8057116f1aacaa, accessed August 4, 2025.

- State Route 2, Angeles Crest Highway, from 3 miles north of I-210 in La Canada to the San Bernardino County Line. This is 14.75 miles northeast of the site.

Additionally, the Project Site does not contain any scenic resources. Thus, the Project would not substantially damage scenic resources within a state scenic highway as no state scenic highways are located adjacent to or near the Project Site. Therefore, no impacts related to this issue would occur as a result of the Project.

c) In non-urbanized areas, would the project substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point.) If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?

No Impact. The Project Site is located within an urbanized area. As such, this analysis focuses on whether the Project would conflict with applicable zoning and other regulations governing scenic quality.

Zoning

The Project Site is currently zoned C2-1-O (Commercial Zone, Height District 1, Oil Drilling Overlay). The "1" suffix corresponds to the Height District 1, which in the C Zone permits unlimited height and stories and a maximum Floor Area Ratio (FAR) of 1.5:1. The Project proposes the construction of a new seven-story self-storage warehouse building encompassing a floor area of 161,645 square feet (5.28:1 FAR). The Project requests both a Zone Change and Height District Change, pursuant to LAMC Chapter 1A Section 13B.1.4, to accommodate the proposed Floor Area Ratio and a Class 2 Conditional Use Permit (CUP), per LAMC Chapter 1A Section 13.B.2.2, for storage uses within 500 feet of an R Zone. In addition, pursuant to LAMC Chapter 1A Section 13B.2.4, the Project requests a Project Review for a proposed development project resulting in an increase of 50,000 square feet of non-residential floor area.

The Project Site is located along West San Vicente Boulevard within an urbanized portion of the City. The surrounding area is developed with a mix of one- to two-story commercial, industrial, residential, and public utility uses, including multi-family housing, studios, a grocery store, and LADWP infrastructure. As such, the proposed uses would not degrade the existing visual character or quality of the area.

The proposed building would be an extension of the existing types of buildings already in the area (large warehouse-style buildings such as the existing on-site building, "Living Spaces" building to the south, and "Lowe's Home Improvement" building to the east) and would not introduce a new visual feature that would be out of character for the area and overall Community Plan area. Therefore, the proposed building and height would not conflict with the existing visual character of the area surrounding the Project Site.

Local land use regulations applicable to the Project Site that include policies that address scenic quality include the Los Angeles Municipal Code (LAMC), the City of Los Angeles General Plan Framework Element (Framework Element), the Community Plan, and the Citywide Design Guidelines. These plans, policies, and regulations are discussed in more detail below.

The Project would be consistent with a number of the design elements, including minimizing contrasts in scale and massing with the surrounding area, designing the Project consistent with applicable design guidelines and maintaining the Project Site such that blight or nuisance conditions do not occur.

General Plan Framework Element

The Framework Element provides direction regarding the City's vision for future development in the City. Although the Framework Element does not directly address the design of individual neighborhoods or communities, it embodies general neighborhood design policies and implementation programs that guide local planning efforts. Specifically with regard to aesthetics, the Framework Element includes goals, policies, and objectives regarding the scale and character of neighborhoods, the quality of development and public realm (Chapter 5), and topics related to lighting (Chapter 9). The Project's consistency with each of the relevant goals, policies, and objectives is outlined in **Table 4.1-1**.

Table 4.1-1
Project Consistency with City of Los Angeles General Plan Framework Element

Goal/Objective/Policy	Analysis of Project Consistency
General Plan Framework Element Land Use Chapter (Chapter 3)	
Goal 3.J: Industrial growth that provides job opportunities for the City's residents and maintains the City's fiscal viability.	**No Conflict.** The Project includes development of a self-storage facility that will provide employment opportunities and generate sales and property tax.
General Plan Framework Element Urban Form and Neighborhood Design Chapter (Chapter 5)	
Objective 5.5: Enhance the livability of all neighborhoods by upgrading the quality of development and improving the quality of the public realm.	**No Conflict.** The Project would construct a new modern public self-storage facility that will activate the site. The Project's street frontages would have additional landscaping buffers with additional trees, thereby creating a pedestrian-friendly environment and improving the quality of the public realm. Overall, the Project would be designed to complement and enhance the surrounding area.
General Plan Framework Element Infrastructure and Public Services Chapter (Chapter 9)	
Goal 9P: Appropriate lighting required to: (1) provide for nighttime vision, visibility, and safety needs on streets, sidewalks, parking lots, transportation, recreation, security, ornamental, and other outdoor locations; (2) provide appropriate and desirable regulation of architectural and informational lighting such as building façade lighting or advertising lighting; and (3) protect and preserve the nighttime environment, views, driver visibility, and otherwise minimize or prevent light pollution, light trespass, and glare.	**No Conflict.** The Project would include low-level exterior lights for security. All lighting would comply with current energy standards and regulations, as well as design requirements. Project lighting would be designed to provide efficient and effective on-site lighting while minimizing light spill-over from the Project Site, reducing sky-glow, and improving nighttime visibility through glare reduction. All exterior and interior lighting would meet high energy efficiency requirements utilizing light emitting diode (LED) or efficient fluorescent lighting technology. New street and pedestrian lighting within the public right-of-way would comply with applicable City regulations.
Objective 9.40: Ensure efficient and effective energy management in providing appropriate	**No Conflict.** Proposed lighting would be implemented in accordance with the lighting standards set forth in the

Table 4.1-1
Project Consistency with City of Los Angeles General Plan Framework Element

Goal/Objective/Policy	Analysis of Project Consistency
levels of lighting for private outdoor lighting for private streets, parking areas, pedestrian areas, security lighting, and other forms of outdoor lighting and minimize or eliminate the adverse impact of lighting due to light pollution, light trespass, and glare.	California Building Code and the California Energy Code, which establish light intensities for various land uses. Furthermore, as discussed above under Goal 9P, the Project would minimize light pollution, light trespass, and glare.
Policy 9.40.1: Require lighting on private streets, pedestrian oriented areas, and pedestrian walks to meet minimum City standards for street and sidewalk lighting.	**No Conflict.** Refer to the discussion for Goal 9P above.
Policy 9.40.2: Require parking lot lighting and related pedestrian lighting to meet recognized national standards.	**No Conflict.** Refer to the discussion for Goal 9P above. The Project would provide sufficient lighting throughout the Project Site to ensure safety and visibility.
Policy 9.40.3: Develop regulations to ensure quality lighting to minimize or eliminate the adverse impact of lighting due to light pollution, light trespass, and glare for façade lighting, security lighting, and advertising lighting, including billboards.	**No Conflict.** While this policy is a citywide goal relating to lighting regulations, the Project would not conflict with its implementation. Refer to the discussion for Goal 9P above.
General Plan Conservation Element (Section 15)	
Objective: Protect and reinforce natural and scenic vistas as irreplaceable resources and for the aesthetic enjoyment of present and future generations.	**No Conflict.** The Project is located in an urban area and built out surroundings. Therefore, publicly available views of any valued visual resources in the vicinity of the Project Site would be maintained. Thus, the Project would not obstruct or remove access to natural and scenic vistas.
Project consistency with additional Framework Element goals, objectives, and policies is analyzed under Section 5.11, Land Use and Planning.	

The Project would enhance the built environment in the surrounding area and upgrade the quality of development by constructing a self-storage building that would incorporate design elements that would enhance the quality of the visual environment.

The built environment is characterized by a variety of architectural styles, age of buildings, type of developments, and size. The Project design alternates different textures, colors, materials, and distinctive architectural treatments to add visual interest while avoiding dull and repetitive façades.

This building has a sleek, modern design characterized by clean lines and a striking facade. The most distinctive element is the dynamic wave-like pattern on the glass and metal upper facade. The undulating dark and light blue tones create a sense of movement and visual interest. The upper portion of the building features extensive glass panels, giving it a contemporary and transparent look. Vertical fins or louvers enhance the visual rhythm. The structure combines stone or concrete at the base with metal and glass on the upper floors, offering a solid, durable foundation with a lighter, more refined top. Trees and greenery line the sidewalk and parking area, softening the structure's modern feel. Overall, the building blends functionality with modern

architectural flair, creating an upscale look for what is typically a utilitarian use. Mechanical systems, trash enclosures, utilities, and surface or roof mounted mechanical equipment will be screened from public view. In addition, the Project would activate the ground-floor street-facing façades with enhanced landscaping, a transparent lobby frontage, and increased glazing. As such, the Project would be designed to complement and enhance the surrounding area.

During construction, construction walls and barriers would be erected to protect the site from vandalism and, which have the potential to attract unauthorized bills and postings. The Project will comply with LAMC Section 14.4.17, which regulates temporary signage on construction barriers.

During operation, the Project would be maintained in a safe and sanitary condition and good repair, and free from, debris, rubbish, garbage, trash, overgrown vegetation or other similar material, pursuant to LAMC Section 91.8104.

The Project would also support the Framework Element's goals, policies and objectives related to lighting. Project lighting would be designed to minimize light trespass from the Project Site and would comply with all applicable LAMC requirements. In addition, any new street and pedestrian lighting within the public right-of-way would comply with applicable City regulation and would require approval from the Bureau of Street Lighting in order to maintain appropriate and safe lighting levels on sideways and roadways while minimizing light and glare on adjacent streets.

Overall, the Project design would contribute to the overall quality of the visual environment and would not contrast with the varying design elements of the uses adjacent to the Project Site. The Project would be generally consistent with the applicable goals, policies, and objectives set forth in the Framework Element's regarding scenic quality as detailed above.

Community Plan

As it relates to scenic quality, the Wilshire Community Plan includes Objective 2-3:

> *Enhance the visual appearance and appeal of commercial districts.*

The Project would construct a self-storage building in a commercial area. The Project incorporates a modern, well-articulated building design with high-quality materials and façade treatments that provide visual interest and break up massing, contributing positively to the streetscape. The project includes new landscaping along the street frontage and perimeter of the site, as well as pedestrian-oriented improvements such as decorative paving and appropriate lighting, which enhance the public realm and improve the pedestrian experience. Since the Project Site is currently underutilized with aging or deteriorating structures, the new development would represent a visual upgrade and reinvestment in the corridor, replacing obsolete or unsightly conditions with a clean, modern facility. The Project has been designed to be compatible with surrounding commercial development in terms of scale, massing, and setbacks, helping it integrate into the existing urban fabric while reinforcing a cohesive visual identity for the district. As a professionally managed facility, the self-storage project is expected to be well-maintained over time, contributing to long-term visual appeal and reducing the likelihood of deterioration or vacancy, which can negatively affect commercial corridors. Thus, the Project would be generally consistent with this Community Plan provision.

Citywide Design Guidelines

The Citywide Design Guidelines, adopted October 24, 2019, establishes ten guidelines to carry out the common design objectives that maintain neighborhood form and character while promoting quality design and creative infill development solutions. Although each of the Citywide Design Guidelines should be considered in a project, not all will be appropriate in every case. The Project would not conflict with the Citywide Design Guidelines, as discussed below.

Guideline 1: Promote a safe, comfortable, and accessible pedestrian experience for all.

The Project would not conflict with the pedestrian experience adjacent to the Project Site which contains sidewalks along San Vicente Boulevard, Longwood Avenue, and Tremaine Avenue. In addition, the Project would install new trees and landscaping along the sidewalks to help create a safe and comfortable passage for pedestrians. The installation of eight (8) trees will provide shade coverage on warm days The Project also addresses clear identification, and transparency from the street-level with glazing on all building façades, integrated lighting, and clear signage. Access points would be designed to meet all applicable City Building Code and Fire Code requirements regarding site access and would incorporate pedestrian warning systems, as appropriate.

The Project would also comply with Americans with Disabilities Act (ADA) requirements.

Furthermore, the Project would include low-level exterior lights adjacent to the building and along pathways that would serve to enhance the safety of visitors and employees at night. Overall, these Project elements would promote a safe, comfortable, and accessible pedestrian experience for all. Thus, the Project would support this guideline.

Guideline 2: Carefully incorporate vehicular access such that it does not degrade the pedestrian experience.

There is currently one (1) curb cut on Tremaine Avenue and two (2) curb cuts on Longwood Avenue adjacent to the Project Site. All existing curb cuts would be closed with the proposed Project. The Project proposed one (1) new curb cut and driveway on Longwood Avenue providing access to the ground-level parking loading areas. The driveway would be designed to meet all applicable City Building Code and Fire Code requirements regarding site access and would incorporate pedestrian warning systems, as appropriate. Thus, the Project would support this guideline.

Guideline 3: Design projects to actively engage with streets and public space and maintain human scale.

The building uses a variety of architectural materials and building planes. In addition, the Project would install landscaping, including new trees. Overall, the Project would be designed to actively engage with streets and public space and maintain human scale. Thus, the Project would support this guideline.

Guideline 4: Organize and shape projects to recognize and respect surrounding context.

The area surrounding the Project Site is predominantly developed with low-rise residential uses. The Project design alternates different textures, colors, materials, and distinctive architectural treatments to add visual interest while avoiding dull and repetitive façades. Overall, relative to the surrounding development, the Project design would complement the varying design elements of the uses adjacent to the Project Site. Thus, the Project would support this guideline.

Guideline 5: Express a clear and coherent architectural idea.

The building use a variety of architectural materials and building planes. The Project design alternates different textures, colors, materials, and distinctive architectural treatments to add visual interest while avoiding dull and repetitive façades. The proposed design employs a variety of elements to break down the building façade. Overall, the Project design would express an active, pedestrian-friendly, compatible design that would complement the varying design elements of the uses adjacent to the Project Site. Thus, the Project would support this guideline.

Guideline 6: Provide amenities that support community building and provide an inviting, comfortable user experience.

The Project would provide a total of eight (8) street trees and enhanced landscaping along the adjacent sidewalks (Three (3) of the existing five (5) street trees will remain, and the two (2) trees proposed for removal will be replaced at a 2:1 ratio to the satisfaction of the Urban Forestry Division). The street trees would provide shade coverage over the right-of-way thereby creating a comfortable passage for pedestrians. In addition, the Project would include low-level exterior lights adjacent to the building and along walkways that would serve to enhance the safety of pedestrians at night. Thus, the Project would support this guideline.

Guideline 7: Carefully arrange design elements and uses to protect site users.

Parking would be provided in an existing surface lot that will be restriped. The Project would also include lighting of building entry and walkway to provide for pedestrian orientation and to clearly identify a secure route between the parking lot and the building. Thus, the Project would support this guideline.

Guideline 8: Protect the site's natural resources and features.

The Project Site is located in an urbanized area. There are no on-site trees. There are two (2) street trees (southern magnolia) along Longwood Avenue and three (3) street trees (one (1) purple orchid tree and two (2) Japanese privet) along San Vicente Boulevard.[3] None are protected trees or shrubs as defined by the City.[4] The Project would remove the two (2) southern

[3] City of Los Angeles, StreetsLA: https://streetsla.lacity.org/tree-inventory, accessed July 3, 2025.

[4] LAMC Section 46.01: "PROTECTED TREE OR SHRUB" means any of the following Southern California indigenous tree species, which measures four inches or more in cumulative diameter, four and one-half feet above the ground level at the base of the tree, or any of the following Southern California indigenous shrub species, which measures four inches or more in cumulative diameter, four and one-half feet above the ground level at the base of the shrub: Protected Trees: (a) Oak tree including Valley Oak (*Quercus lobata*) and California Live Oak (*Quercus agrifolia*), or any other tree of the oak genus indigenous to California but excluding the Scrub Oak (*Quercus berberidifolia*); (b) Southern California Black Walnut (*Juglans californica*); (c) Western Sycamore (*Platanus racemosa*); (d) California Bay (*Umellularia californica*). Protected Shrubs: (a) Mexican Elderberry (*Sambucus mexicana*); (b) Toyon (*Heteromeles arbutifolia*). This definition shall not include any tree or shrub grown or held for sale by a licensed nursery, or trees or shrubs planted or grown as a part of a planting program.

magnolia street trees along Longwood Avenue and replace these street trees at a 2:1 ratio in accordance with City standards. The remaining street trees would be protected in place. Thus, the Project would support this guideline.

Guideline 9: Configure the site layout, building massing and orientation to lower energy demand and increase the comfort and well-being of users.

The Project has been designed and would be constructed to incorporate environmentally sustainable building features and construction protocols required by the Los Angeles Green Building Code and the CALGreen. The Project's design is based on principles of smart growth and environmental sustainability, as demonstrated by its mixed-use configuration, emphasis on walkability, bike-friendly environment, and proximity to public transit. "Green" features would include energy-efficient buildings, a pedestrian-friendly site design, and water conservation and waste reduction measures, among others. The Project would also utilize sustainable planning and building strategies and would incorporate the use of environmentally friendly materials wherever applicable. Therefore, the Project would lower energy demand and increase the comfort and well-being of users through site layout, building massing, and orientation. Thus, the Project would support this guideline.

Guideline 10: Enhance green features to increase opportunities to capture stormwater and promote habitat.

The Project would be required to comply with the City's Low Impact Development (LID) ordinance and implement standard erosion controls to limit stormwater runoff. As part of these requirements, the Project would include the installation of building roof drain downspouts, catch basins, and planter drains throughout the Project Site. The installed BMP systems will be designed with an internal bypass overflow system to prevent upstream flooding during major storm events. The stormwater, which bypasses the BMP systems, would discharge to an approved discharge point in the public right-of-way.

The Project generally drains south towards existing public catch basins on Longwood Avenue, San Vicente Boulevard, and Tremaine Avenue, which all drain to drainage facilities in Pico Boulevard. The Project will maintain existing drainage patterns to Pico Boulevard drainage facilities. Per the geotechnical report, infiltration is infeasible. A capture and use system of approximately 2,510 cubic feet is proposed for the site, per LID requirements.[5]

In addition, the Project would incorporate drought tolerant landscaping throughout the Project Site. Thus, the Project would support this guideline.

Based on the above, the Project would not conflict with applicable regulations governing scenic quality, including those contained in the LAMC, General Plan Framework Element, Community Plan, and Citywide Design Guidelines. Therefore, no impacts related to this issue would occur as a result of the Project.

5 Peak Flow Hydrologic Analysis, DRC Engineering, August 2025.

d) Would the project create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?

No Impact. Nighttime illumination of varying intensities is characteristic of most urban land uses, including those in the vicinity of the Project Site. New light sources introduced by a project may increase ambient nighttime illumination levels. Additionally, nighttime spillover of light onto adjacent properties has the potential to interfere with certain functions, including vision, sleep, privacy, and general enjoyment of the natural nighttime condition. The significance of the impact depends on the type of use(s) affected, proximity to the affected use(s), the intensity of the light source, and the existing ambient light environment. Uses considered sensitive to nighttime light include, but are not limited to, residential, some commercial and institutional uses, and natural areas.

Glare occurs during both daytime and nighttime hours. Daytime glare is caused by the reflection of sunlight or artificial light from highly polished surfaces, such as window glass or reflective materials, and, to a lesser degree, from broad expanses of light-colored surfaces. Daytime glare generation is common in urban areas and is typically associated with mid- to high-rise buildings with exterior façades largely or entirely comprised of highly reflective glass or mirror-like materials from which the sun can reflect, particularly following sunrise and prior to sunset. Daytime glare generation is typically related to sun angles, although glare resulting from reflected sunlight can occur regularly at certain times of the year. Glare can also be produced during evening and nighttime hours by artificial light directed toward a light-sensitive land use.

Construction

While the majority of Project construction would occur during daylight hours, there is a potential that construction could occur in the evening hours and require the use of artificial lighting, particularly during the winter season when daylight is no longer sufficient earlier in the day. Outdoor lighting sources, such as floodlights, spotlights, and/or headlights associated with construction equipment and hauling trucks, typically accompany nighttime construction activities. To the extent evening construction includes artificial light sources, such use would be temporary, for a short duration while construction activities conclude for the day and would cease upon completion of Project construction. Furthermore, construction-related illumination would be used for safety and security purposes only, in compliance with LAMC light intensity requirements.[6] Additionally, as part of the Project, construction lighting would be shielded to minimize the potential for light spillover to affect adjacent residential properties. Project construction lighting, while potentially bright, would be focused on the particular area undergoing work.

Daytime glare could potentially occur during construction activities if reflective construction materials were positioned in highly visible locations where the reflection of sunlight could occur. Minor amounts of glare could also occur due to on-site vehicles. However, any glare would be highly transitory and short-term, given the movement of construction equipment and materials within the construction area and the temporary nature of construction activities. In addition, large,

6 LAMC Chapter 9, Article 3, Section 93.0117(b) provides that no exterior light source may cause more than 2 foot-candles (21.5 lx) of light intensity or generate direct glare onto exterior glazed windows or glass doors; elevated porch, deck, or balcony; or any ground surface intended for uses such as recreation, barbecue or lawn areas or any property containing a residential unit or units.

flat surfaces that are generally required to generate substantial glare are typically not an element of construction activities. Furthermore, as noted above, construction would primarily occur during the daytime hours in accordance with the LAMC. Therefore, there would be a negligible potential for nighttime glare associated with construction activities to occur, and impacts would be less than significant.

Operation

The Project would construct a seven-story building and interior lighting through windows would increase as compared to the existing setting. Also, the commercial nature of the Project would create additional lighting into the night hours. The Project will provide illumination at street level for security. All security lighting will be shielded and focused on the site and directed away from the neighboring land uses to the maximum extent feasible and consistent with safety requirements. In addition to increasing the ambient "glow" presently associated with urban settings and with this part of the City, project-related light sources could potentially spill over and illuminate off-site vantages including adjacent streets and land uses.

Vehicle headlights from traffic also contribute to overall ambient lighting levels. The Project would include low-level exterior lights along pathways for security and wayfinding purposes. In addition, low-level lighting to accent signage would be incorporated. All lighting would comply with current energy standards and regulations, as well as design requirements. Project lighting would be designed to provide efficient and effective on-site lighting while minimizing light spill-over from the Project Site, reducing sky-glow, and improving nighttime visibility through glare reduction. Specifically, all on-site exterior lighting would be automatically controlled via photo sensors to illuminate only when required and would be shielded or directed toward areas to be illuminated to limit spill-over onto neighboring properties. All exterior and interior lighting would meet high energy efficiency requirements utilizing light emitting diode (LED) or efficient fluorescent lighting technology. New parking lot lighting would comply with applicable City regulations.

Proposed signage would be designed to be aesthetically compatible with the proposed architecture of the building and its surroundings. Proposed signage would include identity signage, building and tenant signage, and general ground level and way-finding pedestrian signage that would comply with LAMC regulations, as applicable. No new billboards or other off-site advertising are proposed as part of the Project. The Project would also not include signage with flashing or mechanical properties. Proposed signage would be illuminated via low-level, low-glare external lighting, internal halo lighting, or ambient light. Exterior lighting for signage would be directed onto signs to avoid creating off site glare. Illumination used for Project signage would comply with light intensities set forth in the LAMC and as measured at the property line of the nearest residentially zoned property.

As it relates to glare, sun reflection from Project development could occur when the sun is low on the horizon, and motor vehicle operations could be affected when the point of reflection within the Project Site is in front of the driver. The Project would feature a variety of surface materials, including, but not limited to, glass, concrete, timber, and metal. As part of the Project, glass used in building façades would have high-performance coatings that would not be highly reflective, thereby minimizing glare from reflected sunlight.

Nighttime glare could result primarily from on-site illumination and vehicle headlights. As described above, the Project's illuminated signs would not exceed the prescribed LAMC lighting requirements. Furthermore, while headlights from vehicles entering and exiting the Project Site would be visible during the evening and nighttime hours, such lighting sources would be typical for the area. Thus, nighttime glare would not result in a substantial adverse impact.

The Project would adhere to existing regulatory requirements regarding light and glare, including those contained in the LAMC, the City's Green Building Code, and CALGreen (e.g., LAMC Section 93.0117(b), LAMC Section 99.05.106.8, CALGreen Section 5.106.8).

The Project would not create a new source of substantial light or glare that would adversely affect day or nighttime views in the area. Compliance with regulatory requirements would further ensure that impacts associated with light and glare would be less than significant. Notwithstanding, the Project would be consistent with a number of the design elements, including use of shielded light fixtures with low reflectivity, limiting construction activities to the permitted construction hours, incorporating lighting to minimize off-site light pollution, and use of low-reflective glass.

Thus, based on the above, construction and operation of the Project would not create a new source of substantial light or glare that would adversely affect day or nighttime views in the area. Therefore, no impacts would occur.

Cumulative Impacts

A cumulative analysis of aesthetics impacts includes the related projects that would be sufficiently close to influence the visual character of the immediate Project area, that fall within the same viewshed as the Project, or that affect the same off-site sensitive uses.

There are three (3) related projects identified by the City within 0.5 miles of the Project (see **Table 4.21-1**). These related projects are dispersed within a highly urbanized environment and are separated from the Project by existing development and public rights-of-way. While each project may incrementally alter the visual character of its immediate surroundings, the changes are consistent with the established urban form and zoning designations of the area. The proposed self-storage facility would incorporate high-quality design and landscaping improvement and would not introduce visual elements that are out of scale or character with the surrounding context. Because the related projects are largely residential and geographically dispersed, they do not contribute to a collective degradation of the visual environment when considered with the Project. Each related projects, and the Project, is subject to individual design review and regulatory oversight to ensure compatibility with local visual and urban design standards.

The related projects would not be visible from the Project Site area, due to distance and intervening structures. No scenic vistas are available from the Project Site area and as such, development of related projects in the vicinity of the Project Site would not result in any cumulative impacts related to scenic vistas. The degree to which each of the Related Project sites contain scenic resources that could be affected by the related projects would be considered by the City on a case-by-case basis. The Project Site does not contain any scenic resources that are shared by or common to any of the related project sites. Related projects within the Project Site area would be required to undergo review and approval by the Department of City Planning to ensure

compliance with applicable design guidelines, which would ensure continuity of these projects with the City's visual character/quality standards.

All related projects would result in an overall incremental intensification of land uses in the vicinity of the Project Site. However, the Project and related projects, including those identified above, would be required to comply with applicable City regulations, design guidelines, and other land use and zoning controls regarding density, floor area, lighting, and design. Furthermore, as described above, the Project would result in no impacts regarding scenic vistas, visual character, and light and glare.

Therefore, cumulative aesthetics impacts would be less than significant.

4.2 Agriculture and Forest Resources

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a. Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	☐	☐	☐	☒
b. Conflict with existing zoning for agricultural use, or a Williamson Act contract?	☐	☐	☐	☒
c. Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?	☐	☐	☐	☒
d. Result in the loss of forest land or conversion of forest land to non-forest use?	☐	☐	☐	☒
e. Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?	☐	☐	☐	☒

Impact Analysis

a) Would the project convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?

No Impact. The Project Site and surrounding area are designated Urban and Built-Up Land and not mapped as Prime Farmland, Unique Farmland, or Farmland of Statewide Importance pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency Department of Conservation.[7] Thus, the Project would not convert Farmland to a non-agricultural use. Therefore, no impacts related to this issue would occur as a result of the Project.

[7] State of California Department of Conservation, Farmland Mapping and Monitoring Program, Los Angeles County Important Farmland 2018, Map, websites: https://maps.conservation.ca.gov/DLRP/CIFF/, and https://www.conservation.ca.gov/dlrp/fmmp/Pages/LosAngeles.aspx, accessed August 4, 2025.

b) Would the project conflict with existing zoning for agricultural use, or a Williamson Act contract?

No Impact. The Project Site is located in an urbanized area of the City. The site is zoned C2-1-O (Commercial Zone, Height District 1, Oil Drilling Overlay) and Community Commercial land use designation. Additionally, the Project Site and surrounding area are also not enrolled under a Williamson Act Contract.[8] Thus, the Project would not conflict with any existing zoning for agricultural uses or a Williamson Act Contract. Therefore, no impacts related to this issue would occur as a result of the Project.

c) Would the project conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?

No Impact. The Project Site does not include any forest land or timberland. In addition, the Project Site is currently zoned for commercial uses and is not zoned and/or used as forest land. Thus, the Project would not conflict with existing zoning for, or cause rezoning of, forest land or timberland as defined by Public Resources Code section 12220(g), Public Resources Code section 4526, and Government Code section 51104(g). Therefore, no impacts related to this issue would occur as a result of the Project.

d) Would the project result in the loss of forest land or conversion of forest land to non-forest use?

No Impact. The Project Site is located in an urbanized area and does not contain any forest land. Thus, the Project would not result in the loss of forest land or conversion of forest land to non-forest use. Therefore, no impacts related to this issue would occur as a result of the Project.

e) Would the project involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland to non-agricultural use or conversion of forest land to non-forest use?

No Impact. The Project Site is located within an urbanized area, and there is no farmland or forest land on or near the Project Site. Thus, the Project would not result in the conversion of farmland to non-agricultural use or forest land to non-forest use. Therefore, no impacts related to this issue would occur as a result of the Project.

Cumulative Impacts

The Project and the related projects are located within a developed, urbanized area of the City generally zoned for commercial and residential uses and do not support existing farming, agricultural, or forest-related operations. Thus, development of the related projects together with the Project would not result in the conversion of State-designated agricultural land from an agricultural use to a non-agricultural use or result in the loss of forest land or the conversion of forest land to non-forest use. Therefore, the Project's contribution to cumulative impacts regarding

8 State of California Department of Conservation, Williamson Act Program, website: https://www.conservation.ca.gov/dlrp/wa, accessed August 4, 2025.

agricultural resources would not be cumulatively considerable and no cumulative impacts would occur.

4.3 Air Quality

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a. Conflict with or obstruct implementation of the applicable air quality plan?	☐	☐	☒	☐
b. Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?	☐	☐	☒	☐
c. Expose sensitive receptors to substantial pollutant concentrations?	☐	☐	☒	☐
d. Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?	☐	☐	☒	☐

The information and analysis presented below is largely based on the following source (refer to Appendix C-1):

C-1 Air Quality, Energy, and Greenhouse Gas Impact Analysis, EPD Solutions, December 16, 2025.

Impact Analysis

a) Would the project conflict with or obstruct implementation of the applicable air quality plan?

Less Than Significant Impact. The Project Site is located within the 6,745-square-mile South Coast Air Basin (Basin), which includes all of Orange County and portions of Los Angeles, Riverside, and San Bernardino Counties. The South Coast Air Quality Management District (SCAQMD) is the air pollution control agency for the Basin and is required, pursuant to the Clean Air Act, to reduce emissions of criteria pollutants for which the Basin is in non-attainment (i.e., ozone [O_3]).

SCAQMD's 2022 Air Quality Management Plan (2022 AQMP) is the regional blueprint for achieving air quality standards and healthful air. The 2022 AQMP contains a comprehensive list of pollution control strategies directed at reducing emissions and achieving ambient air quality standards. These strategies are developed, in part, based on regional population, housing, and employment projections prepared by SCAG.

SCAG is the regional planning agency for Los Angeles, Orange, Ventura, Riverside, San Bernardino, and Imperial Counties and addresses regional issues relating to transportation, the

economy, community development and the environment.[9] With regard to future growth, SCAG has prepared the 2020–2045 Regional Transportation Plan/Sustainable Communities Strategy (2020–2045 RTP/SCS), which provides population, housing, and employment projections for counties and cities under its jurisdiction. The growth projections in the 2020–2045 RTP/SCS are based in part on projections originating under County and City General Plans. These growth projections were utilized in the preparation of the air quality forecasts and consistency analysis included in the 2022 AQMP. The 2020-2045 RTP/SCS accounts for 4,771,300 persons; 1,793,000 households; and 2,135,900 jobs in the City by 2045.

The 2022 AQMP was adopted by the SCAQMD as a program to lead the Air Basin into compliance with several criteria pollutant standards and other federal requirements. It relies on emissions forecasts based on demographic and economic growth projections provided by SCAG's 2020–2045 RTP/SCS. SCAG is charged by California law to prepare and approve "the portions of each AQMP relating to demographic projections and integrated regional land use, housing, employment, and transportation programs, measures and strategies." Projects whose growth is included in the projections used in the formulation of the AQMP are considered to be consistent with the plan and not to interfere with its attainment. More specifically, SCAQMD's CEQA Handbook provides the following two criteria to determine whether a project would be consistent with the 2022 AQMP:

1. The Project would not generate population and employment growth that would be inconsistent with SCAG's growth forecasts from the 2020-2045 RTP/SCS; and

2. The Project would not result in an increase in the frequency or severity of existing air quality violations or cause or contribute to new violations or delay the timely attainment of air quality standards or the interim emissions reductions specified in the AQMP.

Consistency Criterion No. 1 refers to the SCAG's growth forecasts and associated assumptions included in the AQMP. The future air quality levels projected in the AQMP are based on SCAG's growth projections, which are based in part on the general plans of cities and counties located within the SCAG region, as stated previously. Thus, if the level of housing and employment growth related to the Project is consistent with the applicable assumptions used in the development of the AQMP, the Project would not jeopardize attainment of the air quality levels identified in the AQMP.

The Project Site is presently zoned C2-1-O and is located within the Wilshire Community Plan area with a General Plan Land use designation of Community Commercial. The C2-1-O zone is a commercial zone, which permits self-storage uses with approval of a Condition Use Permit, if the site is within a 500-foot radius of a residential zone. The Project Applicant is requesting a Z Change and Height District Change from C2-1-O to C2-2-O to permit additional floor area up to a maximum Floor Area Ratio (FAR) 6:1 in lieu of 1.5:1. It is anticipated that the employment base for both the construction and operational phases of the Project would come from the existing population in the region. The Project would result in an incremental increase in employment in the City, since self-storage uses do not require a substantial number of employees for operation. (The Project would employ approximately 11 people.) In addition, the Project would not directly result in growth of the City's population, since it is not a residential project. Thus, implementation

9 SCAG serves as the federally designated metropolitan planning organization (MPO) for the southern California region.

of the Project would not exceed the growth assumptions for the SCAG region. As a result, the proposed Project would be consistent with Criterion 1.

Consistency Criterion No. 2 refers to the California Ambient Air Quality Standards. An impact would occur if the long-term emissions associated with the proposed Project exceed the SCAQMD's regional significance thresholds for construction and operational emissions. As presented in **Tables 4.3-1** through **4.3-3**, the Project would not result in emitting emissions that exceed SCAQMD-established thresholds. Thus, the Project would be consistent with Criterion No. 2.

Based on all of the reasons discussed above, the Project would be consistent with the 2022 AQMP. Therefore, Project impacts related conflict with or obstruction regarding the implementation of the applicable air quality plan would be less than significant.

b) Would the project result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?

Less Than Significant Impact. As indicated above, the Project Site is located within the South Coast Air Basin, which is characterized by relatively poor air quality. State and federal air quality standards are often exceeded in many parts of the Basin, including the monitoring stations nearest to the Project Site, which exceed the most stringent ambient air quality standard for ozone and particulate matter. The Project would contribute to local and regional air pollutant emissions during construction (short-term) and Project occupancy (long-term). However, as discussed in greater detail below and in the technical reports incorporated within this document, the Project would not generate emissions in excess of applicable thresholds, and the Project would not result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard. Therefore, Project impacts related to this issue would be less than significant.

Construction Impacts

Construction of the Project has the potential to create regional air quality impacts through the use of heavy-duty construction equipment and vehicle trips generated by construction workers traveling to and from the Project Site. In addition, fugitive dust emissions would result from site preparation, grading, and construction activities. Mobile source emissions, primarily particulate matter and nitrogen oxides (NO_X), would result from the use of construction equipment such as loaders, graders, backhoes, and haul trucks. During the finishing phase, paving operations and the application of architectural coatings (e.g., paints) and other building materials would release volatile organic compounds (VOCs). Construction emissions can vary substantially from day to day, depending on the level of activity, the specific type of operation and, for dust, the prevailing weather conditions.

Based on criteria set forth in the SCAQMD CEQA Air Quality Handbook, a project would have the potential to violate an air quality standard or contribute substantially to an existing violation and result in a significant impact with regard to construction emissions if regional emissions from both direct and indirect sources would exceed any of the following SCAQMD prescribed threshold levels: (1) 75 pounds a day for VOCs; (2) 100 pounds per day for NO_X; (3) 550 pounds per day

for carbon monoxide (CO); (4) 150 pounds per day for sulfur oxides (SO_X); (5) 150 pounds per day for PM_{10}; and (6) 55 pounds per day for $PM_{2.5}$.

Regional Emissions

Regional construction-related emissions associated with heavy construction equipment were calculated using the SCAQMD recommended California Emissions Estimator Model (CalEEMod). The analysis assumes that all construction activities would comply with SCAQMD Rule 403 regarding the control of fugitive dust. As shown in **Table 4.3-1**, the Project would not generate construction-related pollutant emissions in excess of SCAQMD significance thresholds. Therefore, the Project's construction related regional air quality impacts would be less than significant.

Table 4.3-1
Regional Construction Emissions

Construction Year	Daily Emissions (Pounds Per Day)					
	VOC	**NO_X**	**CO**	**SO_X**	**PM_{10}**	**$PM_{2.5}$**
2027	3.1	26.2	34.6	0.1	4.8	2.3
2028	26.1	8.5	15.9	<0.1	1.6	0.6
Maximum Total	***26.1***	***26.2***	***34.6***	***0.1***	***4.8***	***2.3***
Threshold	*75*	*100*	*550*	*150*	*150*	*55*
Exceed Threshold?	**No**	**No**	**No**	**No**	**No**	**No**
Source: EPD Solutions, 2025. Modeling sheets included in Appendix C.						

Localized Emissions

The localized effects from on-site daily emissions were evaluated at sensitive receptor locations potentially impacted by the Project according to SCAQMD's localized significance thresholds (LST) methodology, which uses on-site mass emissions rate lookup tables and Project-specific modeling, where appropriate. SCAQMD provides LSTs applicable to the following criteria pollutants: NO_X, CO, PM_{10}, or $PM_{2.5}$. SCAQMD does not provide an LST for SO_2 since land use development projects typically result in negligible construction and long-term operation emissions of this pollutant. Since VOCs are not a criteria pollutant, there is no ambient standard or SCAQMD LST for VOCs. Due to the role VOCs play in O_3 formation, it is classified as a precursor pollutant, and only a regional emissions threshold has been established.

LSTs represent the maximum emissions from a project that are not expected to cause or contribute to an exceedance of the most stringent applicable federal or state ambient air quality standards and are developed based on the ambient concentrations of that pollutant for each source receptor area and distance to the nearest sensitive receptor. The mass rate lookup tables were developed for each source receptor area and can be used to determine whether or not a project may generate significant adverse localized air quality impacts.

Estimates of maximum construction-related localized (on-site) daily emissions for NO_X, CO, PM_{10}, or $PM_{2.5}$ are presented in **Table 4.3-2**. As shown, the Project would not generate construction-related construction emissions in excess of SCQMD's significance thresholds. Therefore, the Project's construction-related localized air quality impacts would be less than significant.

Table 4.3-2
Localized Construction Emissions

Construction Year	Daily Emissions (Pounds Per Day)			
	NO_X	**CO**	**PM_{10}**	**$PM_{2.5}$**
Year 1 (2027)	24.1	28.2	3.1	1.9
Year 2 (2028)	7.2	10.4	0.2	0.2
Maximum Total	***24.1***	***28.2***	***3.1***	***1.9***
Threshold	*90*	*1,125*	*20*	*6*
Exceed Threshold?	**No**	**No**	**No**	**No**
Source: EPD Solutions, 2025. Modeling sheets included in Appendix C.				

Operational Impacts

SCAQMD has established separate significance thresholds to evaluate potential impacts due to the incremental increase in criteria air pollutants associated with long-term operations. Regional operational emissions for the Project were calculated using CalEEMod. Inputs into the CalEEMod model include Project-related vehicle trips, as well as land uses and square footage to determine energy, water usage, and waste generation. Mobile-source emissions were calculated within CalEEMod based on data from the trip generation. In addition, the proposed land uses would result in an increase in emissions generated by energy sources (e.g., natural gas combustion) and area sources (e.g., landscape fuel combustion, consumer products, and architectural coatings.

Regional Emissions

The results of the modeled emissions calculations are provided in **Table 4.3-3**. As shown, the Project would not generate operational-related regional emissions in excess of SCAQMD's applicable significance thresholds. Therefore, the Project's operational regional air quality impacts would be less than significant.

Table 4.3-3
Regional Operations Emissions

Emissions Source	Daily Emissions (Pounds Per Day)					
	VOC	**NO_X**	**CO**	**SO_X**	**PM_{10}**	**$PM_{2.5}$**
Mobile	0.8	0.66	6.4	<0.1	1.5	0.4
Area	5.4	0.1	7.6	<0.1	<0.1	<0.1
Energy	<0.1	0.7	0.6	<0.1	0.1	0.1
Total	***6.2***	***0.7***	***0.6***	***<0.1***	***0.1***	***0.1***
(Less Existing Total)	*(0.8)*	*(1.1)*	*(2.1)*	*(<0.1)*	*(0.5)*	*(0.1)*
Net Total	**5.4**	**0.3**	**12.6**	**<0.1**	**1.6**	**0.5**
Significance Threshold	*55*	*55*	*550*	*150*	*150*	*55*
Exceed Threshold?	**No**	**No**	**No**	**No**	**No**	**No**
Source: EPD Solution, 2025. Modeling sheets included in Appendix C.						

Localized Emissions

As shown in **Table 4.3-4**, the Project would not generation operational-related localized emissions in excess of SCAQMD's applicable significance thresholds. Therefore, the Project's operational localized air quality impacts would be less than significant.

Table 4.3-4
Localized Operations Emissions

Emissions Source	Daily Emissions (Pounds Per Day)			
	NO_X	CO	SO_X	$PM_{2.5}$
Mobile	0.2	1.5	<0.1	<0.1
Area	0.1	7.6	<0.1	<0.1
Energy	0.7	0.6	<0.1	0.1
Total	***1.0***	***9.7***	***0.1***	***0.1***
Significance Threshold	*74*	*882*	*4*	*2*
Exceed Threshold?	**No**	**No**	**No**	**No**
Source: EPD Solution, 2025. Modeling sheets included in Appendix C.				

c) Would the project expose sensitive receptors to substantial pollutant concentrations?

Less Than Significant Impact. Certain population groups are especially sensitive to air pollution and should be given special consideration when evaluating potential air quality impacts. These population groups include children, the elderly, persons with pre-existing respiratory or cardiovascular illness, and athletes or others who engage in frequent exercise. As defined in the SCAQMD CEQA Air Quality Handbook, a sensitive receptor to air quality is defined as any of the following land use categories: (1) long-term health care facilities; (2) rehabilitation centers; (3) convalescent centers; (4) retirement homes; (5) residences; (6) schools (i.e., elementary, middle school, high schools); (7) parks and playgrounds; (8) child care centers; and (9) athletic fields. The closest sensitive receptors to the Project Site are multi-family residential uses located approximately 165 feet north of the site.

As discussed above, construction and operation of the Project would result in less-than-significant impacts relative to both regional and localized air pollution emissions. Therefore, the Project would not expose sensitive receptors to substantial pollutant concentrations. In addition, Project construction activities would comply with SCAQMD Rule 403 regarding the control of fugitive dust and other specified dust control measures. As such, impacts to off-site sensitive receptors would be less than significant, and no mitigation measures are required.

When considering potential air quality impacts under CEQA, consideration is given to the location of sensitive receptors within close proximity of land uses that emit toxic air contaminants (TACs). The California Air Resources Board (CARB) has published and adopted the Air Quality and Land Use Handbook: A Community Health Perspective (2005), which provides recommendations regarding the siting of new sensitive land uses near potential sources of air toxic emissions (e.g., freeways, distribution centers, rail yards, ports, refineries, chrome plating facilities, dry cleaners, and gasoline dispensing facilities). SCAQMD adopted similar recommendations in its

Guidance Document for Addressing Air Quality Issues in General Plans and Local Planning. Together the CARB and SCAQMD guidelines recommend siting distances for both the development of sensitive land uses in proximity to TAC sources and the addition of new TAC sources in proximity to existing sensitive land uses.

The Project would not include any sources of TACs such as generators, boilers or any other combustion sources. As the Project would not contain substantial TAC sources and is consistent with the CARB and SCAQMD guidelines, the Project would not result in the exposure of off-site sensitive receptors to carcinogenic or TACs that exceed the maximum incremental cancer risk of 10 in one million or an acute or chronic hazard index of 1.0, and potential TAC impacts would be less than significant.

The SCAQMD recommends a Health Risk Assessment (HRA) for substantial sources of diesel particulate matter such as warehouse distribution and cold storage facilities. No such facilities are located in proximity to the Project Site, and the Project does not propose any such uses. As such, a HRA was not required for the Project.

Based on the above, the Project would not expose sensitive receptors to substantial pollutant concentrations, and impacts would be less than significant.

d) Would the project result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?

Less Than Significant Impact. No objectionable odors are anticipated as a result of either construction or operation of the Project. Specifically, construction of the Project would involve the use of conventional building materials typical of construction projects of similar type and size. Any odors that may be generated during construction would be localized and temporary in nature and would not be sufficient to affect a substantial number of people.

With respect to Project operation, according to the SCAQMD CEQA Air Quality Handbook, land uses associated with odor complaints typically include agricultural uses, wastewater treatment plants, food processing plants, chemical plants, composting, refineries, landfills, dairies, and fiberglass molding. The Project will introduce a storage use to the area but would not result in activities that create objectionable odors. On-site trash receptacles would be contained, located, and maintained in a manner that promotes odor control, and would not result in substantially adverse odor impacts.

Construction and operation of the Project would also comply with SCAQMD Rules 401, 402, and 403, regarding visible emissions violations. In particular, SCAQMD Rule 402 provides that a person shall not discharge from any source whatsoever such quantities of air contaminants or other material which cause injury, detriment, nuisance, or annoyance to any considerable number of persons or to the public, or which endanger the comfort, repose, health or safety of any such persons or the public, or which cause, or have a natural tendency to cause, injury or damage to business or property.

Based on the above, construction and operation of the Project would not result in other emissions, such as those leading to odors, adversely affecting a substantial number of people. Therefore, Project impacts related to odors would be less than significant.

Cumulative Impacts

According to SCAQMD, individual projects that do not exceed SCAQMD's recommended daily thresholds for project-specific impacts would not contribute a cumulatively considerable increase in emissions for those pollutants for which the Air Basin is in non-attainment. As discussed above, the Project's construction and operational pollutant emissions would not exceed any of the applicable significance thresholds. Therefore, the Project's contribution to cumulative air quality impacts would not be cumulatively considerable.

4.4 Biological Resources

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:					
a.	Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?	☐	☐	☐	☒
b.	Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?	☐	☐	☐	☒
c.	Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	☐	☐	☐	☒
d.	Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	☐	☐	☒	☐
e.	Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	☐	☐	☐	☒
f.	Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?	☐	☐	☐	☒

Impact Analysis

a) Would the project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?

No Impact. The Project Site and surrounding area are developed with urban uses. No vegetation or other biological resources are located on the Project Site. Thus, the Project would not have a substantial adverse effect, either directly or through habitat modifications, on any species

identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service. Therefore, no impacts related to this issue would occur as a result of the Project.

b) Would the project have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?

No Impact. The Project Site and surrounding area are developed with urban uses. No riparian habitat or other sensitive natural communities are located on the Project Site. Thus, the Project would not have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service. Therefore, no impacts related to this issue would occur as a result of the Project.

c) Would the project have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?

No Impact. The Project Site and surrounding area are developed with urban uses. No wetlands are located on the Project Site. Thus, the Project would not have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means. Therefore, no impacts related to this issue would occur as a result of the Project.

d) Would the project interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

Less Than Significant Impact. The Project Site and surrounding area are developed with urban uses, do not contain any water sources, and are not part of a migratory wildlife corridor. Additionally, the Project Site is not located near any native wildlife nursery sites.

The Project Site is located in an urbanized area. There are no on-site trees. There are two (2) street trees (southern magnolia) along Longwood Avenue and three (3) street trees (one purple orchid tree and two Japanese privet) along San Vicente Boulevard.[10] None of the existing street trees are protected trees or shrubs as defined by the City.[11] The Project includes removal of the

10 City of Los Angeles, StreetsLA: https://streetsla.lacity.org/tree-inventory, accessed July 3, 2025.

11 LAMC Section 46.01: "PROTECTED TREE OR SHRUB" means any of the following Southern California indigenous tree species, which measures four inches or more in cumulative diameter, four and one-half feet above the ground level at the base of the tree, or any of the following Southern California indigenous shrub species, which measures four inches or more in cumulative diameter, four and one-half feet above the ground level at the base of the shrub: Protected Trees: (a) Oak tree including Valley Oak (*Quercus lobata*) and California Live Oak (*Quercus agrifolia*), or any other tree of the oak genus indigenous to California but excluding the Scrub Oak (*Quercus berberidifolia*); (b) Southern California Black Walnut (*Juglans californica*); (c) Western Sycamore (*Platanus racemosa*); (d) California Bay (*Umellularia californica*). Protected Shrubs: (a) Mexican Elderberry (*Sambucus mexicana*); (b) Toyon (*Heteromeles arbutifolia*). This definition shall not include any tree or shrub grown or held for sale by a licensed nursery, or trees or shrubs planted or grown as a part of a planting program.

two southern magnolia street trees and replacement of these street trees at a 2:1 ratio in accordance with City standards. The remaining street trees would be protected in place.

Because these trees could contain nesting birds (depending on the time of year), the Project Applicant would be required to comply with the Migratory Bird Treaty Act (MBTA) (Title 33, United States Code, Section 703 et seq., see also Title 50, Code of Federal Regulation, Part 10) and Section 3503 of the California Department of Fish and Wildlife Code, which regulates vegetation removal during the nesting season (February 15th to August 15th) to ensure that no significant impacts to migratory birds would occur. Thus, the Project would not interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors or impede the use of native wildlife nursery sites. Therefore, Project impacts related to this issue would be less than significant.

e) Would the project conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance (e.g., oak trees or California walnut woodlands)?

No Impact. The City of Los Angeles Protected Tree and Shrub Relocation and Replacement Ordinance (Ordinance No. 177,404, as amended by Ordinance No. 186,873, adopted February 4, 2021) (Protected Tree and Shrub Ordinance) regulates the relocation or removal of all Southern California native oak trees (excluding scrub oak), California black walnut trees, Western sycamore trees, California bay trees, Mexican elderberry shrubs, and toyon shrubs, of at least 4 inches in diameter at 4.5 feet above the ground level at the base of the tree or shrub.[12]

The Project Site is located in an urbanized area. As noted previously and in the Tree Report incorporated within this document, there are no on-site trees. There are two (2) street trees (southern magnolia) along Longwood Avenue and three (3) street trees (one purple orchid tree and two Japanese privet) along San Vicente Boulevard. None are protected trees or shrubs as defined by the City. The Project includes removal of the two southern magnolia street trees and replacement of these street trees at a 2:1 ratio in accordance with City standards. The remaining street trees would be protected in place. Thus, the Project would not conflict with any local policies or ordinances protecting biological resources. Therefore, no impacts related to this issue would occur as a result of the Project.

(It might be also helpful to refer to a completed “Applicant’s Declaration of Biological Resources” and “Tree Disclosure Statement” form. Please provide the signed documents which can be found here:

https://planning.lacity.gov/odocument/f743e937-e944-4783-b163-543073d6a119/Owners_Declaration_of_Biological_Resources.pdf

12 Pursuant to the Ordinance No. 186,873 and as defined in LAMC Section 17.02, a protected tree or shrub includes any of the following Southern California indigenous tree species, which measure 4 inches or more in cumulative diameter, four and one-half feet above the ground level at the base of the tree, or any of the following Southern California indigenous shrub species, which measure 4 inches or more in cumulative diameter, 4.5 feet above the ground level at the base of the shrub: Oak tree; Southern California Black Walnut tree; Western Sycamore tree; California Bay tree; Mexican Elderberry shrub; and Toyon shrub.

https://planning.lacity.gov/odocument/8bf21b33-41e7-4843-9f03-5042e2795035/Tree_Disclosure_Statement.pdf

f) Would the project conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?

No Impact. The Project Site is not within the boundaries of an adopted habitat conservation plan, natural community conservation plan, or other approved habitat conservation plan. Thus, the Project would not conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan. Therefore, no impacts related to this issue would occur as a result of the Project.

Cumulative Impacts

There are three (3) related projects identified by the City within 0.5 miles of the Project (see **Table 4.21-1**). The Project Site and the sites of the related projects are either currently developed or have previously been developed and subject to grading and other ground-disturbing activities. Also, the Project Site and the sites of the related projects are substantially surrounded by urban development and do not contain any sensitive habitat, riparian habitat, wetlands, and are not part of a native wildlife migratory corridor. As with the Project, any trees removed as part of the related projects would be required by the City to occur in accordance with applicable City requirements for protected trees (if applicable) and street trees and the Migratory Bird Treaty Act. Therefore, cumulative impacts related to biological resources would be less than significant.

4.5 Cultural Resources

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a. Cause a substantial adverse change in the significance of a historical resource pursuant to § 15064.5?	☐	☐	☐	☒
b. Cause a substantial adverse change in the significance of an archaeological resource pursuant to § 15064.5?	☐	☐	☒	☐
c. Disturb any human remains, including those interred outside of dedicated cemeteries?	☐	☐	☒	☐

The information and analysis presented below is largely based on the following source (refer to Appendix D):

D Cultural Resources Assessment, BCR Consulting, September 14, 2025

Impact Analysis

a) Would the project cause a substantial adverse change in the significance of a historical resource pursuant to § 15064.5?

No Impact. BCR Consulting (BCR) prepared a Cultural Resources Assessment for the Project (refer to Appendix D) to determine, in part, whether the Project would result in a substantial adverse change in the significance of a historical resource under CEQA. The assessment noted that the existing building on the Project Site is of historic age (i.e., older than 50 years old), and two (2) other known historical resources are located in the vicinity of the Project Site. These are all discussed below.

Significance Criteria

The California Register of Historical Resources (California Register) criteria are based on the National Register of Historic Places (National Register) criteria. For a property to be eligible for inclusion on the California Register or as a City Landmark, one or more of the following criteria must be met:

1. It is associated with the events that have made a significant contribution to the broad patterns of local or regional history, or the cultural heritage of California or the U.S.;

2. It is associated with the lives of persons important to local, California, or U.S. history;

3. It embodies the distinctive characteristics of a type, period, region, or method of construction, represents the work of a master, possesses high artistic values; and/or

4. It has yielded, or has the potential to yield, information important to the prehistory or history of the local area, California, or the nation.

In addition to meeting one or more of the above criteria, the California Register requires that sufficient time has passed since a resource's period of significance to "obtain a scholarly perspective on the events or individuals associated with the resources." (CCR 4852 [d][2]). The California Register also requires that a resource possess integrity. This is defined as the ability for the resource to convey its significance through seven aspects: location, setting, design, materials, workmanship, feeling, and association.

Evaluations

Building at 4800 San Vicente Boulevard (Project Site)

Criterion 1: The Hollywood Clothes business existed within the Great Depression and the post-World War II expansion years of the 1950s. The business was established at its original location in the Garment District at the end of the 1920s, during a period of expansion for this industry, and remained viable through the Great Depression. The business was notable for ending its union affiliation during an era when many unions were expanding. Although the early era of Hollywood Clothes is interesting, there is no physical connection between the Project Site and 1920s expansion of clothing manufacturers or the Great Depression. Thus, the business cannot be significantly associated with events from that time. Its expansion during the 1950s was typical of local clothing manufacturers' tendency to modernize and emphasize wholesale trade. Research has not revealed any evidence to suggest that the building on the Project Site represents a significant contribution to this expansion. As a result, the building is not significantly associated with events that have contributed to the broad patterns of the area, California, or the U.S. and does not appear eligible for listing on the California Register under Criterion 1.

Criterion 2: The building was designed by a well-known engineer, Donald R. Warren. Warren designed many more substantial and/or elaborate structures such as dams and bridges. A simple, small, utilitarian, tilt-up industrial building, a type of building which was very commonly constructed at the time, is not a unique or exceptional example of the work for which he was known. Charles Lyons, the owner of Hollywood Clothes, was a successful local businessman, but there is no evidence that he made important contributions within any historical contexts explored here. No other notable individuals were associated with the building. Therefore, the building on the Project Site does not appear to be eligible for listing on the California Register under Criterion 2.

Criterion 3: This building was designed and built using a ubiquitous and utilitarian Mid-Century Modern style commonly utilized in industrial buildings of the period. Thus, the building does not embody the distinctive characteristics of a type, period, region, or method of construction and does not appear eligible for listing on the California Register under Criterion 3.

Criterion 4: The building was thoroughly assessed in the Cultural Resources Assessment and has not and is not likely to yield information important to prehistory or history. The building at the Project Site does not appear eligible for listing to the California Register under Criterion 4.

Based on all of the information presented above, the building on the Project Site does not appear to be eligible for listing in the California Register. Thus, the building on the Project Site is not a significant historical resource under CEQA.

Los Angeles Department of Water and Power Station No. 8.

The Los Angeles Department of Water and Power Station No. 8 is located across the street to the west of the Project Site, in the impact area (as defined by the City of Los Angeles Planning). This building was constructed in 1939 and has been determined significant by the Los Angeles Historic Resources Inventory. Thus, the building is a significant historical resource under CEQA. Most of the surrounding buildings and landscape features from this era have been removed or are not recognizable. As a result, the neighborhood does not appear to possess any characteristics that convey this resource's historical significance, and development of the Project would not result in a substantial adverse effect to this historical resource.

San Vicente Boulevard Median

The San Vicente Boulevard Median is located across the street to the north of the Project Site, in the impact area (as defined by the City of Los Angeles Planning). This is a landscaped median that was built between 1955 and 1961 within the alignment of the former streetcar tracks. It is a "prominent visual landmark" and has been determined eligible by the Los Angeles Historic Resources Inventory and is considered a significant historical resource under CEQA. When the San Vicente Boulevard Median was constructed, the neighborhood to the north and west were primarily residential and the neighborhood to the south and east were commercial and industrial. Development of the Project would carry on the commercial/industrial character that the site currently occupies and would not create any visual impairment to or from the median that are not already present. Therefore, indirect impacts to the San Vicente Boulevard Median would not occur as a result of the Project, and development of the Project would not result in a substantial adverse effect to this historical resource.

Conclusion

Based on all of the information presented above, the Project would not cause a substantial adverse change in the significance of a historical resource pursuant to § 15064.5. Therefore, no impacts related to this issue would occur as a result of the Project.

b) Would the project cause a substantial adverse change in the significance of an archaeological resource pursuant to State CEQA Guidelines §15064.5?

Less Than Significant Impact. CEQA Guidelines Section 15064.5(a)(3)(D) generally defines archaeological resources as any resource that "has yielded, or may be likely to yield, information important in prehistory or history." Archaeological resources are features, such as tools, utensils, carvings, fabric, building foundations, etc., that document evidence of past human endeavors and that may be historically or culturally important to a significant earlier community.

The Project Site is located within an urbanized area of the City and has been subject to grading, excavation and fill activities, and development in the past. The Project would involve grading for the foundation elements, and grading of soils. Because the Project Site has undergone previous

grading associated with the existing building, any new archaeological survey is unlikely to observe surface artifacts.

Disturbances associated with previous excavation and construction of the existing historic period building at the project site have been severe and have disrupted soil beyond depths at which buried cultural resources are likely. And no significant buried cultural resources have been recorded in the vicinity of the project site. As a result, the potential to encounter in-situ remains associated with significant archaeological materials during project-related excavation is low.

Nevertheless, since the Project would include ground-disturbing activities, there is potential for an archaeological site to be identified during construction activities associated with the Project. Thus, standard measures would be implemented to address the inadvertent discovery of archaeological resources.

Although none were yielded during the field survey, record search results show historic-period resources are in close proximity to the project site and ground-disturbing activities have the potential to reveal buried deposits not observed on the surface. Prior to the initiation of ground-disturbing activities, field personnel should be alerted to the possibility of buried prehistoric or historic cultural deposits. In the event that field personnel encounter buried cultural materials, work in the immediate vicinity of the find should cease and a qualified archaeologist should be retained to assess the significance of the find. The qualified archaeologist should have the authority to stop or divert construction excavation as necessary. If the qualified archaeologist finds that any cultural resources present meet eligibility requirements for listing on the California Register or the National Register of Historic Places (National Register), plans for the treatment, evaluation, and mitigation of impacts to the find will need to be developed.

The Project would not cause a substantial adverse change in the significance of an archaeological resource pursuant to State CEQA Guidelines Section 15064.5. Therefore, impacts would be less than significant.

c) Would the project disturb any human remains, including those interred outside of dedicated cemeteries?

Less Than Significant Impact. The Project Site has been subject to previous grading and development associated with the building. No known traditional burial sites have been identified on-site. In addition, if human remains were discovered during construction of the Project, work in the immediate vicinity would be halted, the County Coroner, construction manager, and other entities would be notified per California Health and Safety Code Section 7050.5, and disposition of the human remains, and any associated grave goods would occur in accordance with Public Resources Code Section 5097.91 and 5097.98.

In addition, as outlined under Checklist Section 18, Tribal Cultural Resources, if the coroner determines or has reason to believe the remains are those of a Native American, the coroner must contact the Native American Heritage Commission (NAHC) within 24 hours (Section 7050.5(c)).

With the implementation of regulatory requirements, potential impacts associated with the disturbance of human remains, including those interred outside of dedicated cemeteries, would be less than significant.

(Refer to Checklist Section 18, Tribal Cultural Resources, regarding the Project's potential impacts to tribal cultural resources.)

Cumulative Impacts

There are three (3) related projects identified by the City within 0.5 miles of the Project (see **Table 4.21-1**). None of the related projects share proximity with the same historical or potentially historical resources. Additionally, the potential for archaeological resources and human remains to occur at a site is site-specific. As with the Project, in the event that archaeological resources and/or human remains are uncovered, each Related Project would be required to comply with applicable regulatory requirements. Further, as part of the environmental review processes for the related projects, it is expected that measures would be established or the City's standard Condition of Approval regarding inadvertent discovery of archaeological or tribal cultural resources would be applied, as necessary**.** Therefore, cumulative impacts related to cultural resources would be less than significant.

4.6 Energy

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a. Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?	☐	☐	☒	☐
b. Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?	☐	☐	☒	☐

Impact Analysis

a) Would the project result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?

Less Than Significant Impact. With regard to Energy Threshold (a), this analysis relies upon Appendix F of the CEQA Guidelines as well as the *L.A. CEQA Thresholds Guide*. Appendix F of the CEQA Guidelines was prepared in response to the requirement in PRC Section 21100(b)(3), which states that an EIR shall include a detailed statement setting forth "[m]itigation measures proposed to minimize significant effects of the environment, including, but not limited to, measures to reduce the wasteful, inefficient, and unnecessary consumption of energy." In addition, with regard to potential impacts to energy, the *L.A. CEQA Thresholds Guide* states that a determination of significance shall be made on a case-by-case basis, considering the following factors:

- The extent to which the project would require new (off-site) energy supply facilities and distribution infrastructure; or capacity-enhancing alterations to existing facilities;
- Whether and when the needed infrastructure was anticipated by adopted plans; and
- The degree to which the project design and/or operations incorporate energy-conservation measures, particularly those that go beyond City requirements.

In accordance with Appendix F and the *L.A. CEQA Thresholds Guide*, the following criteria will be considered in determining whether this threshold of significance is met:

a) The project's energy requirements and its energy use efficiencies by amount and fuel type for each stage of the project including construction, operation, maintenance, and/or removal. If appropriate, the energy intensiveness of materials may be discussed;

b) The effects of the project on local and regional energy supplies and on requirements for additional capacity;

c) The effects of the project on peak and base period demands for electricity and other forms of energy;

d) The degree to which the project complies with existing energy standards;

e) The effects of the project on energy resources;

f) The project's projected transportation energy use requirements and its overall use of efficient transportation alternatives.

g) The degree to which the project design and/or operations incorporate energy-conservation measures, particularly those that go beyond City requirements.

h) Whether the Project conflicts with adopted energy conservation plans.

The following analysis considers these eight criteria (a through h) in the analysis below.

a) The project's energy requirements and its energy use efficiencies by amount and fuel type for each state of the project including construction, operation, maintenance, and/or removal. If appropriate, the energy intensiveness of materials may be discussed;

The Project would consume energy during construction and operational activities. Sources of energy for these activities would include electricity usage, natural gas consumption, and transportation fuels such as diesel and gasoline. The analysis below includes the Project's energy requirements and energy use efficiencies by fuel type for each stage of the Project (construction, operations, and maintenance activities). For purposes of this analysis, Project maintenance would include activities such as repair of structures, landscaping and architectural coatings. Energy usage related to Project maintenance activities are assumed to be included as part of Project operations.

Construction

During Project construction, energy would be consumed in the form of electricity associated with the conveyance of water used for dust control and, on a limited basis, powering lights, electronic equipment, or other construction activities necessitating electrical power. As discussed below, construction activities, including the construction of the new buildings, typically do not involve the consumption of natural gas. Project construction would also consume energy in the form of petroleum-based fuels associated with the use of offroad construction vehicles and equipment on the Project Site, construction worker travel to and from the Project Site, and delivery and haul truck trips (e.g., hauling of demolition material to off-site reuse and disposal facilities).

Electricity

Electricity would be supplied to the Project Site by LADWP and would be obtained from both existing infrastructure serving the Project Site and gas and/or diesel-powered portable generators, as required. The electricity demand at any given time would vary throughout the construction period based on the construction activities being performed and would cease upon completion of construction. When not in use, electric equipment would be powered off so as to avoid unnecessary energy consumption. In addition, although Title 24 requirements typically apply to energy usage for buildings, long-term construction lighting (greater than 120 days) providing illumination for the Project Site and staging areas would also comply with applicable Title 24 requirements (includes limits on the wattage allowed per specific area), which would result in the conservation of energy. Therefore, the use of electricity during project construction would be minimal and would not be wasteful, inefficient, or unnecessary.

Natural Gas

Construction activities, including the construction of the new buildings, typically do not involve the consumption of natural gas. Accordingly, natural gas would not be supplied to support Project construction activities; thus, there would be no demand generated by construction.

Operation

During operation of the Project, energy would be consumed for multiple purposes, including, but not limited to HVAC; refrigeration; lighting; and the use of electronics, equipment, and machinery. Energy would also be consumed during Project operations related to water usage, solid waste disposal, and vehicle trips. The Project would increase electrification by installing space heating, water heating and residential appliances (cooking, clothes dryers) powered by electricity while restaurant cooking will be powered by natural gas.

Electricity

As the Project would comply with Title 24 standards and applicable requirements of the City's Green Building Code, buildout of the Project would result in a projected net increase in the on-site demand for electricity. Based on LADWP's 2022 Resource Plan, LADWP forecasts that its total energy demand in 2029 (the Project's projected first operation year) will be 22,339 gigawatt hour (GWh) of electricity.[13] In addition, LADWP is committed to ensuring the sustainability of its power supply, and is required to procure at least 60 percent by 2030, which will ensure that projected supplies will be more than sufficient to meet demand.

Natural Gas

The Southern California Gas Company (SoCal Gas) provides natural gas service to the Project Site vicinity. With compliance of Title 24 standards and applicable requirements of the City's Green Building Code, buildout of the Project is anticipated to generate an increase in the on-site

13 California Energy Demand Forecast, 2021-2035, LADWP High Demand Case: https://www.energy.ca.gov/filebrowser/download/3930 and LADWP, 2022 Final Power Strategic Long-Term Resource Plan. https://www.ladwp.com/ladwp/faces/ladwp/aboutus/a-power/a-p-integratedresourceplanning?_adf.ctrl-state=2o233f8ir_86&_afrLoop=433722383789167, accessed June 12, 2025.

demand for natural gas totaling approximately 920,871 cubic feet (cf) per year, or approximately 2,522 cf per day. Based on the 2024 California Gas Report, the California Energy and Electric Utilities estimates natural gas capacity available within SoCal Gas's planning area will be approximately 2.16 billion cf per day in 2029.[14] The Project would be within the forecasted 2029 consumption in SoCal Gas's planning area.

Transportation Energy

During operation, Project-related traffic would result in the consumption of petroleum-based fuels related to vehicular travel to and from the Project Site. The Project Site is located adjacent to a Job Center, High Quality Transit Area (HQTA) and a Neighborhood Mobility Area (NMA), as designated by SCAG, which indicates that the Project Site is an appropriate site for increased employment opportunities from a "smart growth" regional planning perspective.[15] Extensive public bus service is provided within the Project study area. The existing transit services in the vicinity of the Project Site would provide Project employees, and visitors with various public transportation opportunities in lieu of driving. As such, operational impacts to transportation energy would be less than significant.

b) The effects of the project on local and regional energy supplies and on requirements for additional capacity

Construction

As discussed above, electricity would be intermittently consumed during the conveyance of the water used to control fugitive dust, as well as to provide electricity for temporary lighting and other general construction activities. The electricity demand at any given time would vary throughout the construction period based on the construction activities being performed and would cease upon completion of construction. When not in use, electric equipment would be powered off so as to avoid unnecessary energy consumption. The estimated construction electricity usage represents far less than the estimated net annual operational demand which, as discussed below, would be within the supply and infrastructure service capabilities of LADWP. Furthermore, the electricity demand during construction would be somewhat offset with the removal of the existing on-site uses which currently generate a demand for electricity. Construction activities, including the construction of new buildings and facilities, typically do not involve the consumption of natural gas. Accordingly, natural gas would not be supplied to support Project construction activities. Thus, there would be no demand generated by construction. Transportation fuel usage during Project construction activities would represent approximately 0.01 percent of gasoline usage and approximately 0.04 percent of diesel usage within Los Angeles County, respectively.[16] As energy consumption during Project construction activities would be relatively negligible, the Project would not likely affect regional energy consumption during the construction period.

14 California Gas and Electric Utilities, 2024 California Gas Report.

15 According to the 2020–2045 RTP/SCS an HQTA is a corridor-focused Priority Growth Area (PGA) within 0.5 mile of an existing or planned fixed guideway transit stop or a bus transit corridor where buses pick up passengers at a frequency of every 15 minutes (or less) during peak commuting hours; an NMA is a PGA with a high number of intersections, low observed travel speed, high mix of uses and high accessibility to "everyday" destinations where complete streets and sustainability policies support and encourage replacing or reducing single and multi-occupant automobile use.

16 California Air Resources Board, EMFAC2021 Web Database, www.arb.ca.gov/emfac

Operation

The 2022 Power Strategic Long-Term Resource Plan (SLTRP) serves as a comprehensive roadmap through 2045 that guides the Los Angeles Department of Water and Power's (LADWP) Power System The 2022 SLTRP describes how the City will achieve 100 percent carbon-free energy by 2035.[17] In 2022-2023, the LADWP supplied 21,600 gigawatt-hours (gWh) of power.[18] Furthermore, LADWP has confirmed that the Project's electricity demand can be served by the facilities in the Project area (Appendix I of the Strategic Long-Term Resources Plan).

Based on the 2024 California Gas Report, the California Energy and Electric Utilities estimates natural gas consumption within SoCal Gas's planning area will be approximately 2.16 billion cf per day in 2029.[19] The Project would be within the forecasted 2029 consumption in SoCal Gas's planning area.

As energy consumption during Project operations would be relatively negligible and energy requirements are within LADWP's and SoCal Gas' service provision, Project operational impacts on energy usage would be less than significant.

c) The effects of the project on peak and base period demands for electricity and other forms of energy

As discussed above, electricity demand during construction and operation of the Project would have a negligible effect on the overall capacity of LADWP's power grid and base load conditions. In addition, LADWP's annual growth projection in peak demand of the electrical power grid of 0.3 percent would be sufficient to account for future electrical demand by the Project.[20] Therefore, Project electricity consumption during operational activities would have a negligible effect on load conditions of the power grid.

d) The degree to which the project complies with existing energy standards

Although Title 24 requirements typically apply to energy usage for buildings, long-term construction lighting (greater than 120 days) providing illumination for the Project Site and staging areas would also comply with applicable Title 24 requirements (includes limits on the wattage allowed per specific area). In addition, construction equipment would comply with energy efficiency requirements contained in the Federal Energy Independence and Security Act or previous Energy Policy Acts for electrical motors and equipment.[21] Electricity and Natural Gas usage during Project operations would comply with Title 24 standards and applicable CalGreen requirements and Los Angeles Green Building Code. Therefore, Project construction and operational activities would comply with existing energy standards with regards to electricity and natural gas usage.

19 California Gas and Electric Utilities, 2024 California Gas Report.

20 LADWP, 2018 Retail Electric Sales and Demand Forecast.

21 Energy Independence and Security Act of 2007, Public Law 110-140.

With regard to transportation fuels, trucks and equipment used during proposed construction activities, the Project would comply with CARB's anti-idling regulations as well as the In-Use Off-Road Diesel-Fueled Fleets regulation. Although these regulations are intended to reduce criteria pollutant emissions, compliance with the anti-idling and emissions regulations would also result in efficient use of construction-related energy. During Project operations, vehicles travelling to and from the Project Site are assumed to comply with CAFE fuel economy standards, as required.

Based on the above, Project construction and operational activities would comply with existing energy standards with regards to electricity and natural gas usage, as well as transportation fuel consumption.

e) Effects of the Project on Energy Resources

LADWP's electricity generation is derived from a mix of non-renewable and renewable sources such as coal, natural gas, solar, geothermal wind and hydropower. The LADWP's most recently adopted 2022 Power Strategic Long-Term Resources Plan identifies adequate resources (natural gas, coal) to support future generation capacity through 2045.[22]

Natural gas supplied to the Southern California is mainly sourced from out of state with a small portion originating in California. Sources of natural gas for the Southern California region are obtained from locations throughout the western United States as well as Canada.[23] According to the U.S. Energy Information Administration (EIA), the United States currently has over 86 years of natural gas reserves.[24] Compliance with energy standards is expected to result in more efficient use of natural gas (lower consumption) in future years. Therefore, Project construction and operation activities would have a negligible effect on natural gas supply.

Transportation fuels (gasoline and diesel) are produced from crude oil which is imported from various regions around the world. Based on current proven reserves, crude oil production would be sufficient to meet consumption through 2050.[25] The Project would also comply with CAFE fuel economy standards, which would result in more efficient use of transportation fuels (lower consumption). Therefore, Project construction and operation activities would have a negligible effect on the transportation fuel supply.

As discussed above, LADWP is required to procure at least 50 percent of their energy portfolio from renewable sources by 2030. The current sources of renewable energy procured by LADWP include wind, solar, and geothermal sources. These sources account for 35.6 percent of LADWP's overall energy mix in 2022, the most recent year for which data are available.[26] This represents the available off-site renewable sources of energy that would meet the Project's energy demand.

22 LADWP, 2022 Final Power Strategic Long-Term Resource Plan: https://www.ladwp.com/ladwp/faces/ladwp/aboutus/a-power/a-p-integratedresourceplanning?_adf.ctrl-state=2o233f8ir_86&_afrLoop=433722383789167, accessed August 4, 2025.

25 U.S. Energy Information Administration, Frequently Asked Questions, www.eia.gov/tools/faqs/faq.php?id=38&t=6, accessed August 4, 2025.

26 LADWP Annual Power Content Labels for 2022, https://www.ladwp.com/who-we-are/power-system/power-content-label, accessed August 4, 2025.

With regard to on-site renewable energy sources, the Project would include the provision of conduit that is appropriate for future photovoltaic and solar thermal collectors. However, due to the Project Site's location, other on-site renewable energy sources would not be feasible to install on-site as there are no local sources of energy from the following sources: biodiesel, biomass hydroelectric and small hydroelectric, digester gas, methane, fuel cells, landfill gas, municipal solid waste, ocean thermal, ocean wave, and tidal current technologies, or multi-fuel facilities using renewable fuels. Furthermore, wind-powered energy is not viable on the Project Site due to the lack of sufficient wind in the Los Angeles basin. Specifically, based on a map of California's wind resource potential, the Project Site is not identified as an area with wind resource potential.[27]

f) The project's projected transportation energy use requirements and its overall use of efficient transportation alternatives

As discussed above, the Project would include project features to reduce VMT during operational activities. The Project design, which includes dedicated bicycle parking facilities and an improved streetscape with pedestrian amenities, also encourages non-automotive forms of transportation such as walking or biking to destinations. In addition, the Project would be located in close proximity to multiple existing and future transit stops. Therefore, the Project would encourage the use of efficient transportation alternatives.

g) The degree to which the project design and/or operations incorporate energy-conservation measures, particularly those that go beyond City requirements

The current City of LA Green Building Code requires compliance with CalGreen and California's Building Energy Efficiency Standards (Title 24). Use of energy efficient materials, lighting and heating and cooling systems would reduce the Project's greenhouse gas (GHG) emissions.

Therefore, the Project would incorporate measures that are above and beyond current State and City energy conservation requirements.

The City has also adopted several plans and regulations to promote the reduction, reuse, recycling, and conversion of solid waste going to disposal systems. These regulations include the City of Los Angeles Solid Waste Management Policy Plan, the RENEW LA Plan, and the Exclusive Franchise System Ordinance (Ordinance No. 182,986). These solid waste reduction programs and ordinances help to reduce the number of trips associated with hauling solid waste, thereby reducing the amount of petroleum-based fuel consumed. Furthermore, recycling efforts indirectly reduce the energy necessary to create new products made of raw material, which is an energy-intensive process. Thus, through compliance with the City's construction-related solid waste recycling programs, the Project would contribute to reduced fuel-related energy consumption.

With implementation of these features along with complying with state and local energy efficiency standards, the Project would meet and/or exceed all applicable energy conservation policies and regulations.

27 California Energy Commission, Systems Assessment & Facilities Siting Division Cartography Unit, California Wind Resource Potential Map.

h) Whether the Project conflict with adopted energy conservation plans

As discussed under Checklist Section 8, Greenhouse Gas Emissions, the City has published its LA Green Plan/ClimateLA in 2007 as well as the Green New Deal in 2020, which outline goals and actions by the City to reduce GHG emissions. To facilitate implementation of the LA Green Plan/Climate LA, the City adopted the Green Building Code. The Project would comply with applicable regulatory requirements for the design of new buildings, including the provisions set forth in the 2022 CALGreen Code and California's Building Energy Efficiency Standards, which have been incorporated into the City's Green Building Code.

With regard to transportation uses, the Project design would reduce the VMT throughout the region and encourage use of alternative modes of transportation. The Project would be consistent with regional planning strategies that address energy conservation. As discussed above and under Item 11, Land Use and Planning, SCAG's 2020–2045 RTP/SCS focuses on creating livable communities with an emphasis on sustainability and integrated planning, and identifies mobility, economy, and sustainability as the three principles most critical to the future of the region. As part of the approach, the 2020–2045 RTP/SCS focuses on reducing fossil fuel use by decreasing VMT, reducing building energy use, and increasing use of renewable sources.

The Project would be consistent with the energy efficiency policies emphasized in the 2020–2045 RTP/SCS. Most notably, the Project would be an infill mixed-use development developed within an HQTA, and NMA and adjacent to a Job Center. The Project would provide greater proximity to neighborhood services, jobs, and residences and would be well-served by existing public transportation, including Metro bus lines.

The introduction of new job opportunities within an HQTA, as proposed by the Project, is consistent with numerous policies in the 2020–2045 RTP/SCS related to locating new housing and jobs near transit. The 2020–2045 RTP/SCS would result in an estimated 19 percent decrease in VMT by 2035. As discussed above, OPR recommended that achieving 15 percent lower per capita (residential or employee) VMT than existing development is both generally achievable and is supported by evidence that connects this level of reduction to the State's emissions goals (i.e., SB 375 goal).

With regard to transportation uses, the Project design would reduce the VMT throughout the region and encourage use of alternative modes of transportation. The Project would be consistent with regional planning strategies that address energy conservation. As discussed above and under Checklist Section 11, Land Use and Planning, SCAG's 2020–2045 RTP/SCS and 2024-2050 RTP/SCS focuses on creating livable communities with an emphasis on sustainability and integrated planning, and identifies mobility, economy, and sustainability as the three principles most critical to the future of the region. As part of the approach, the 2020–2045 RTP/SCS and 2024-2050 RTP/SCS focuses on reducing fossil fuel use by decreasing VMT, reducing building energy use, and increasing use of renewable sources.

The Project would be consistent with the energy efficiency policies emphasized in the 2020–2045 RTP/SCS. Most notably, the Project would be an infill development developed within an HQTA, TPA, and NMA and adjacent to a Job Center. The Project would provide greater proximity to neighborhood services, jobs, and residences and would be well-served by existing public transportation, including Metro bus lines.

The introduction of new job opportunities within an HQTA, as proposed by the Project, is consistent with numerous policies in the 2020–2045 RTP/SCS and 2024-2050 RTP/SCS related to locating new housing and jobs near transit. The 2020–2045 RTP/SCS and 2024-2050 RTP/SCS would result in an estimated 19 percent decrease in VMT by 2035. As discussed above, OPR recommended that achieving 15 percent lower per capita (residential or employee) VMT than existing development is both generally achievable and is supported by evidence that connects this level of reduction to the State's emissions goals (i.e., SB 375 goal).

In addition, the Project would comply with State energy efficiency requirements, and would use electricity from LADWP, which has a current renewable energy mix of 35 percent. All of these features would serve to reduce the consumption of electricity, natural gas, and transportation fuel. Based on the above, the Project would be consistent with adopted energy conservation plans.

Conclusion

As demonstrated in the analysis above, the Project's energy requirements would not significantly affect local and regional supplies or capacity. The Project's energy usage during base and peak periods would be consistent with electricity and natural gas future projections for the region. Electricity generation capacity and supplies of natural gas and transportation fuels would be sufficient to meet the needs of Project-related construction and operational activities. During construction the Project would comply with Title 24 energy efficiency standards where applicable resulting in efficient use of energy. During operations, the Project would comply with applicable energy efficiency requirements such as CalGreen, as well as include energy conservation measures beyond requirements.

Specifically, the Project would incorporate multiple green building and energy efficiency measures in compliance with CALGreen and the LA Green Building Code. In addition, the Project would provide electric vehicle charging stations and infrastructure as well as bicycle parking spaces in compliance with LAMC requirements.

Thus, overall, the Project would not result in potentially significant environmental impacts due to wasteful, inefficient, and unnecessary consumption of energy resources during construction or operation, and impacts would be less than significant.

b) Would the project conflict with or obstruct a state or local plan for renewable energy or energy efficiency?

Less Than Significant Impact. The Project was evaluated for consistency with adopted energy conservation plans and policies relevant to the Project. Such adopted energy conservation plans and policies include Title 24 energy efficiency requirements, CalGreen and City building codes. Also, as discussed under Checklist Section 8, Greenhouse Gas Emissions, of this MND, the Project would also be consistent with the SCAG RTP/SCS which includes goals to reduce VMT and corresponding decrease in fuel consumption.

The Project would be subject to the energy conservation requirements of the California Energy Code (Title 24 of the California Code of Regulations, Part 6) and the California Green Building Standards Code (24 CCR part 11). The California Energy Code provides energy conservation standards for all new and renovated commercial buildings constructed in California. The Code

applies to the building envelope, space-conditioning systems, and water-heating and lighting systems of buildings and appliances. The Code provides guidance on construction techniques to maximize energy conservation. Minimum efficiency standards are given for a variety of building elements, including appliances; water and space heating and cooling equipment; and insulation for doors, pipes, walls and ceilings. The Code also emphasizes saving energy at peak periods and seasons and improving the quality of installation of energy efficiency measures. In addition, the California Green Building Standards Code sets targets for: energy efficiency; water consumption; dual plumbing systems for potable and recyclable water; diversion of construction waste from landfills; and use of environmentally sensitive materials in construction and design, including eco-friendly flooring, carpeting, paint, coatings, thermal insulation, and acoustical wall and ceiling panels.

The City adopted and released the City's first ever Sustainable City pLAn, which set short-term and long-term energy and conservation targets geared towards advancing the City's economy and equity. In 2019, the City prepared the 2019 Green New Deal, which provided an expanded vision of the pLAn, focusing on securing clean air and water and a stable climate, improving community resilience, expanding access to healthy food and open space, and promoting environmental justice for all. Through the Green New Deal, the City would cut an additional 30 percent in GHG emissions above and beyond the 2015 pLAn to ensure that the City stays within its carbon budget between now (2022) and 2050.[28]

A consistency analysis is provided under Checklist Section 8, Greenhouse Gas Emissions, which outlines specific policies of the Green New Deal that the Project would be consistent with. To summarize, the Project would be required to comply with the Title 24 standards for Energy Efficiency and Conservation that are in effect at the time of development. In addition, per compliance with the California Energy Code, the Project would allocate roof area for future solar panels.

Incorporation of these design features, combined with compliance with regulatory standards, would ensure that the Project would not conflict with energy and conservation measures provided by the state or City, and as such, impacts would be less than significant.

Cumulative Impacts

There are three (3) related projects identified by the City within 0.5 miles of the Project (see **Table 4.21-1**). The geographic context for the cumulative impacts analysis regarding electricity is LADWP's service area and the geographic context for the cumulative impacts analysis regarding natural gas is the SoCal Gas service area. The City has determined to assess the Project's potential cumulative impacts in the context of County-wide consumption. Growth within these geographic areas is anticipated to increase the demand for energy, as well as the need for energy infrastructure, such as new or expanded energy facilities.

As described above, the Project would comply with existing energy standards, would be consistent with adopted energy conservation plans, and would not result in wasteful, inefficient, and unnecessary consumption of energy resources during construction or operation. Therefore, the Project's contribution to cumulative impacts related to energy consumption would not result in

28 City of Los Angeles, L.A.'s Green New Deal Sustainable City pLAn 2019.

a cumulatively considerable effect related to the wasteful, inefficient, and unnecessary consumption of energy during construction or operation. Therefore, cumulative impacts related to energy would be less than significant.

4.7 Geology and Soils

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a. Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:				
i. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42?	☐	☐	☐	☒
ii. Strong seismic ground shaking?	☐	☐	☒	☐
iii. Seismic-related ground failure, including liquefaction?	☐	☐	☐	☒
iv. Landslides?	☐	☐	☐	☒
b. Result in substantial soil erosion or the loss of topsoil?	☐	☐	☒	☐
c. Be located on a geologic unit that is unstable, or that would become unstable as a result of the project, and potentially result in on or off-site landslide, lateral spreading, subsidence, liquefaction, or collapse?	☐	☐	☐	☒
d. Be located on expansive soil, as defined in Table 181B of the Uniform Building Code (1994), creating substantial direct or indirect risks to life or property?	☐	☐	☒	☐

f. Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	☐	☐	☒	☐

The information and analysis presented below is largely based on the following sources (refer to Appendices D and E):

D Cultural Resources Assessment, BCR Consulting, September 14, 2025

E-1 Geotechnical Engineering Investigation, Norcal Engineering, June 30, 2025

Impact Analysis

a) Would the project directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:

i. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42?

No Impact. According to the *Geotechnical Engineering Investigation* prepared for the Project (refer to Appendix E), the Project Site is not located within an Alquist-Priolo Earthquake Fault Zone and does not show evidence of an active fault at the site. Thus, the Project would not directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42. Therefore, no impacts related to this issue would occur as a result of the Project.

ii. Strong seismic ground shaking?

Less Than Significant Impact. The Project Site is located in the seismically active Southern California region, which generally experiences moderate to strong ground shaking in the event of an earthquake on a local or regional fault. However, as noted above, no active faults are known to pass directly beneath the Project Site and therefore, the Project would not exacerbate existing environmental conditions such that people or structures would be exposed to strong seismic ground shaking.

Additionally, state and local code requirements ensure that buildings are designed and constructed in a manner that, although the buildings may sustain damage during a major earthquake, would reduce the substantial risk that buildings would collapse. Specifically, the Project would comply with the Los Angeles Building Code, which incorporates current seismic design provisions of the California Building Code with City amendments. The California Building Code incorporates the latest seismic design standards for structural loads and materials, as well as provisions from the National Earthquake Hazards Reduction Program to mitigate losses from an earthquake and maximize earthquake safety.

LADBS is responsible for implementing the provisions of the Los Angeles Building Code, and the Project would be required to comply with the plan review and permitting requirements of LADBS, including the recommendations provided in a final, site-specific geotechnical report subject to review and approval by LADBS. The *Geotechnical Engineering Investigation* includes recommendations that would be enforced by the LADBS for the construction of the Project.

Thus, the Project would not directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving strong seismic ground shaking. Therefore, Project impacts related to this issue would be less than significant.

iii. Seismic-related ground failure, including liquefaction?

No Impact. Liquefaction occurs when loose, relatively cohesionless soils lose their strength due to excess water pressure that builds up during repeated movement from seismic activity. Liquefaction usually results in horizontal and vertical movements from lateral spreading of liquefied materials and post-earthquake settlement of liquefied materials. Factors that contribute to the potential for liquefaction include a low relative density of granular materials, a shallow groundwater table, and a long duration and high acceleration of seismic shaking. The effects of liquefaction include the loss of the soil's ability to support footings and foundations which may cause buildings and foundations to buckle.

According to the *Geotechnical Engineering Investigation* prepared for the Project (refer to Appendix E), the Project Site is not situated within an area of historic occurrence of liquefaction, or local geological geotechnical and groundwater conditions to indicate a potential for permanent round displacement. Thus, the Project would not directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving seismic-related ground failure, including liquefaction.

iv. Landslides?

No Impact. The Project Site and surrounding area are flat and not susceptible to landslides. Thus, the Project would not directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving seismic-related ground failure, including landslides.

b) Would the project result in substantial soil erosion or the loss of topsoil?

Less Than Significant Impact. During the Project's construction phase, soil would be exposed. However, the Applicant would be required to implement SCAQMD Rule 403 – Fugitive Dust to minimize wind and water-borne erosion at the site. Also, the Applicant would be required to prepare and implement a Stormwater Pollution Prevention Plan (SWPPP), in accordance with the National Pollutant Discharge Elimination System (NPDES) General Permit for Discharges of Storm Water Associated with Construction Activity and Land Disturbance Activities. The site-specific SWPPP would be prepared prior to any ground-disturbing activities and would be implemented during Project construction. The SWPPP would include best management practices (BMPs) and erosion control measures to prevent pollution in storm water discharge. Typical BMPs that could be used during construction include good-housekeeping practices (e.g., street sweeping, proper waste disposal, vehicle and equipment maintenance, concrete washout area, materials storage, minimization of hazardous materials, proper handling and storage of hazardous materials, etc.) and erosion/sediment control measures (e.g., silt fences, fiber rolls, gravel bags, storm water inlet protection, and soil stabilization measures, etc.). The SWPPP would be subject to review and approval by the City for compliance with the City's Development Best Management Practices Handbook, Part A, Construction Activities. Additionally, all Project construction activities would comply with the City's grading permit regulations, which require the implementation of grading and dust control measures, including a wet weather erosion control plan if ground-disturbing activities occur during a rainy season, as well as inspections to ensure that sedimentation and erosion is minimized. Through compliance with these existing regulations, the Project would not result in any significant impacts related to soil erosion during ground-disturbing activities.

Additionally, during the Project's operational phase, most of the Project Site would be developed with impervious surfaces, and all stormwater flows would be directed to storm drainage features and would not come into contact with bare soil surfaces, as occurs in the existing condition. Therefore, with compliance with applicable regulatory requirements, development of the Project would not cause or exacerbate soil erosion or loss of topsoil, and Project impacts related to soil erosion would be less than significant.

c) Would the project be located on a geologic unit that is unstable, or that would become unstable as a result of the project, and potentially result in on or off-site landslide, lateral spreading, subsidence, liquefaction, or collapse?

No Impact. As discussed in response to Checklist Question VII(a)(iii) (Geology and Soils – Liquefaction), the Project Site is not situated within an area of historic occurrence of liquefaction, or local geological geotechnical and groundwater conditions to indicate a potential for permanent round displacement. The *Geotechnical Engineering Investigation* prepared for the Project (refer to Appendix E) did not identify any issues related to lateral spreading, subsidence, or collapse. Thus, the Project would not be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse. Therefore, no impacts related to this issue would occur as a result of the Project.

d) Would the project be located on expansive soil, as defined in Table 181B of the Uniform Building Code (1994), creating substantial direct or indirect risks to life or property?

Less Than Significant Impact. Expansive soils are typically associated with fine-grained clayey soils that have the potential to shrink and swell with repeated cycles of wetting and drying. Due to high clay content, expansive soils expand with the addition of water and shrink when dried, which can cause damage to overlying structures. According to the *Geotechnical Engineering Investigation* prepared for the Project (refer to Appendix E), the on-site soils are moderate in expansion potential and would be accounted for as part of the Project design and construction. Furthermore, construction of the Project would be required to comply with the current California Building Code and supplemental requirements of the LAMC, as enforced by the City through the building permit process. These requirements would include building foundation and other requirements appropriate to site-specific conditions that would be provided in accordance with the design-level Geotechnical Investigation required by the City. Thus, the Project would not create substantial direct or indirect risks to life or property with regard to expansive soil. Therefore, Project impacts related to this issue would be less than significant.

e) Would the project have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?

No Impact. The Project Site is served by existing wastewater infrastructure, and the Project's wastewater demand would be accommodated by connections to the existing wastewater infrastructure. As such, the Project would not require the use of septic tanks or alternative wastewater disposal systems. Therefore, no impacts related to this issue would occur as a result of the Project.

f) Would the project directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?

Less than Significant Impact. There are no other distinct and prominent geologic or topographic features (i.e., hilltops, ridges, canyons, ravines, rock outcrops, water bodies, streambeds, or wetlands) on the Project Site. Thus, the Project would not destroy any distinct and prominent geologic or topographic features. Therefore, no impact would occur.

Paleontological resources are the fossilized remains of organisms that have lived in a region in the geologic past and whose remains are found in the accompanying geologic strata. This type of fossil record represents the primary source of information on ancient life forms, since the majority of species that have existed on earth from this era are extinct. Public Resources Code Section 5097.5 specifies that any unauthorized removal of paleontological remains is a misdemeanor. Furthermore, California Penal Code Section 622.5 includes penalties for damage or removal of paleontological resources.

The Project Site is located within an urbanized area and has been subject to repeated grading and development in the past. Thus, surficial paleontological resources that may have existed at one time have likely been previously disturbed. It is unlikely that very shallow excavations in the deposits underlaying the Project Site are to uncover significant vertebrate deposits. The geologic units underlying the Project Site area are mapped as alluvial deposits dating from the Holocene. Holocene alluvial units are typically too young to preserve fossil resources. Based on this information, the Project Site has low potential for buried fossils. According to the *Cultural Resources Report* prepared for the Project (refer to Appendix D), no additional paleontological resource work or monitoring is recommended. However, if inadvertent fossil discoveries occur during project activities, a qualified paleontologist should be retained to recommend treatment.

Thus, the Project would not destroy a unique paleontological resource or site or unique geologic feature. Therefore, Project impacts related to this issue would be less than significant.

Cumulative Impacts

There are three (3) related projects identified by the City within 0.5 miles of the Project (see **Table 4.21-1**). Due to the site-specific nature of geological conditions (i.e., soils, geological features, subsurface features, seismic features, etc.), impacts associated with geology and soils are generally evaluated within the context of each individual project rather than on a cumulative basis. Nonetheless, cumulative growth in the surrounding area (inclusive of the Project and the related projects) would expose a greater number of people to seismic hazards. However, as with the Project, related projects and other future development projects would be required to comply with existing regulatory requirements and the City's grading permit review and approval process, as well as site-specific geotechnical evaluations that would identify potential effects related to the underlying geologic and soil conditions for a particular Related Project site. In addition, in the event that paleontological resources are uncovered, each Related Project would be required to comply with the applicable regulatory requirements, and the City's standard Condition of Approval regarding inadvertent discovery of paleontological resources would apply. Therefore, cumulative impacts related to geology and soils (would be less than significant.

4.8 Greenhouse Gas Emissions

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a. Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	☐	☐	☒	☐
b. Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	☐	☐	☒	☐

The information and analysis presented below are partially based on the following source (refer to Appendix C):

C-1 Air Quality, Energy, and Greenhouse Gas Impact Analysis, EPD Solutions, December 16, 2025.

C-2 Detailed Greenhouse Gas Emissions Regulatory Background.

Regulatory Background

Global climate change is driven in large part by increased atmospheric greenhouse gas (GHG) concentrations from human activities (e.g., fossil fuel combustion, industrial processes, land use change), which intensify the natural "greenhouse effect" and contribute to higher global average temperatures and related climatic and ecological consequences. The primary GHG is carbon dioxide (CO_2), though other gases (e.g., methane [CH_4], nitrous oxide [N_2O], hydrofluorocarbons [HFCs], perfluorocarbons [PFCs], sulfur hexafluoride [SF_6], and nitrogen trifluoride [NF_3]) can have much higher global warming potentials and are commonly expressed as carbon dioxide equivalents (CO_2e). Climate change is expected to affect California through a range of pathways, including increased temperatures, changes in precipitation and snowpack, heightened wildfire risk, air quality degradation (including more ozone and smoke-related impacts), water supply uncertainty, sea level rise and coastal flooding/erosion, and disruptions to ecosystems, wildlife, and agricultural productivity. The regulatory framework addressing GHG emissions includes federal actions under the Clean Air Act (including USEPA endangerment findings and vehicle/fuel economy programs), and an extensive set of California policies and statutes (e.g., Executive Orders establishing statewide reduction targets and carbon neutrality goals; AB 32 and SB 32; SB 97 CEQA GHG guidance; SB 743's shift to VMT; SB 375's regional SCS framework; and CARB's Scoping Plan updates), as well as regional and local planning efforts (e.g., SCAG's RTP/SCS investments and VMT/GHG reduction goals, SCAQMD policy direction, and City of Los Angeles measures such as CALGreen implementation, all-electric building requirements, and transportation assessment guidelines). A more detailed discussion of the environmental setting

and regulatory framework is provided in Appendix C.

Threshold of Significance

Methodology

Amendments to CEQA Guidelines Section 15064.4 were adopted to assist lead agencies in determining the significance of the impacts of GHG emissions. Consistent with existing CEQA practice, Section 15064.4 gives lead agencies the discretion to determine whether to assess those emissions quantitatively or qualitatively. If a qualitative analysis is used, in addition to quantification, this section recommends certain qualitative factors that may be used in the determination of significance (i.e., extent to which the project may increase or reduce GHG emissions compared to the existing environment; whether the project exceeds an applicable significance threshold; and extent to which the project complies with regulations or requirements adopted to implement a reduction or mitigation of GHG emissions).

The City has not adopted a numerical threshold for assessing impacts related to GHG emissions and has not formally adopted a local plan for reducing GHG emissions. In addition, neither SCAQMD, OPR, CARB, CAPCOA, nor any other state or regional agency has adopted a numerical significance threshold for assessing GHG emissions that is applicable to the Project. Since there is no applicable adopted or accepted numerical threshold of significance for GHG emissions, the methodology for evaluating the Project's impacts related to GHG emissions focuses on its consistency with statewide, regional, and local plans adopted for the purpose of reducing and/or mitigating GHG emissions. This evaluation of consistency with such plans is the sole basis for determining the significance of the Project's GHG-related impacts on the environment.

The analysis below includes an estimation of the amount of GHG emissions that would be attributable to the Project using recommended air quality models to satisfy CEQA Guidelines Section 15064.4(a), which calls for a good-faith effort to describe and calculate emissions. The estimated emissions inventory is also used to determine if there would be a reduction in the Project's incremental contribution of GHG emissions as a result of compliance with regulations and requirements adopted to implement plans for the reduction or mitigation of GHG emissions. However, the significance of the Project's GHG emissions impacts is not based on the amount of GHG emissions resulting from the Project.

Consistency with Applicable Plans and Policies

The Project's GHG emissions impacts are evaluated by assessing the Project's consistency with applicable statewide, regional, and local GHG strategies. As discussed previously, the Project will be evaluated for consistency with AB 32's 2022 Climate Change Scoping Plan, SCAG's 2020-2045 RTP/SCS, and the Green New Deal.

OPR encourages lead agencies to make use of programmatic mitigation plans and programs from which to tier when they perform project analyses. Statewide, the Climate Change Scoping Plan provides measures to achieve AB 32 and SB 32 targets. On a regional level, SCAG's 2020-2045 RTP/SCS contains measures to achieve VMT reduction required by SB 375. The City does not have a programmatic mitigation plan from which to tier from, such as a GHG Emissions Reduction

Plan as recommended in the relevant amendments to the CEQA Guidelines. However, the City has the Green New Deal and Green Building Code that encourage and require applicable projects to implement energy efficiency measures. The Green New Deal is a mayoral initiative and not an adopted plan. However, it includes short-term and long-term aspirations pertaining to climate change and this analysis addresses consistency with these strategies and goals. Thus, if the Project is designed in accordance with these policies and regulations, the Project would result in a less than significant impact, because it would be consistent with the overarching State regulations on GHG reduction (AB 32, SB 32, AB 100, AB 1493, and SB 375). A consistency analysis is provided below that describes the Project's consistency with the applicable parts of CARB's Climate Change Scoping Plan, SCAG's 2020-2045 RTP/SCS, and the Green New Deal.

Impact Analysis

a) Would the project generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?

b) Would the project conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?

Less Than Significant Impact. The threshold questions listed immediately above are addressed together. As discussed previously, the City has not adopted a numerical threshold for assessing impacts related to GHG emissions, and the City relies on a project's consistency with applicable plans, policies, and regulations adopted for the purpose of reducing GHG emissions to determine a project's impact related to GHG emissions. The analysis here includes an estimation of the Project's GHG emissions to satisfy CEQA Guidelines Section 15064.4(a), which calls for a good-faith effort to describe and calculate emissions. As discussed below, the Project would not generate GHG emissions that may have a significant impact on the environment and that the Project would not conflict with any applicable plans, policies or regulations adopted for the purpose of reducing the emissions of GHG emissions. Therefore, Project impacts related to GHG emissions would be less than significant.

Project GHG Emissions

The Project's construction GHG emissions are shown in **Table 4.8-1**, and the overall construction and operational emissions are shown in **Table 4.8-2**. These emissions were calculated using the CalEEMod model. The construction emissions are amortized over 30 years and added to the operational GHG emissions. As shown in Table **4.8-2**, the Project's construction and gross operation GHG emissions would total 863 $MTCO_2e$ per year. Accounting for existing site emissions, the Project would have net annual emissions of 602 $MTCO_{2e}$.

Table 4.8-1
Estimated Project Construction GHG Emissions

Construction Year	Annual GHG Emissions ($MTCO_{2e}$)

Project Consistency with Plans, Policies, and Regulations

CARB 2022 Scoping Plan

Following Executive Order S-3-05, Executive Order B-55-189 was signed in 2018 in order to achieve carbon neutrality by 2045. This order mandated that the California 2017 Climate Scoping Plan was the guiding document which outlines actions for the State to achieve such GHG reduction goals. In 2020, CARB released a report titled "Achieving Carbon Neutrality in California"10 which evaluated various scenarios needed to meet at least an 80 percent reduction in GHG levels from 1990 by 2045. This report was then used by CARB to inform the development of the 2022 Scoping Plan for Achieving Carbon Neutrality11 (2022 Scoping Plan), an update to the 2017 Climate Scoping Plan. Broad goals discussed in the Achieving Carbon Neutrality in California report were incorporated into the 2022 Scoping Plan. CARB's 2022 Scoping Plan sets California's GHG emission reduction target for 2045 at 85 percent below 1990 levels, which was codified by SB 32. As shown below in **Table 4.8-3**, 2022 Scoping Plan Consistency Summary, the Project would comply with all applicable plans and programs intended to reduce GHG emissions. Thus, the Project would be consistent with the 2022 Scoping Plan.

Table 4.8-3
Project Consistency with the 2022 Scoping Plan

Action	Consistency Discussion
GHG Emissions Reductions Relative to the SB 32 Target	
40% Below 1990 levels by 2030.	**Consistent.** The Project would comply with Title 24 Part 6 building energy requirements along with other local and State initiatives that aim to achieve GHG levels 40%\ percent below 1990 by 2030.
Smart Growth/Vehicle Miles Traveled (VMT)	
VMT per capita reduced 25% below 2019 levels by 2030, and 30% below 2019 levels by 2045.	**Consistent.** As previously discussed in Section 3 (Air Quality), the Project would be consistent with the growth assumptions in the 2024 Connect SoCal, so the Project would not interfere with the analysis completed for the Connect SoCal report outlining VMT reduction targets and measures.
New Residential and Commercial Buildings	
All electric appliances beginning 2026 (residential) and 2029 (commercial), contributing to 6 million heat pumps installed statewide by 2030.	**Consistent.** The Project would comply with Title 24 Parts 6 and 11, which includes electric heat pumps installed during construction and electric hookups for all appliances.
Construction Equipment	
25% of energy demand electrified by 2030 and 75% electrified by 2045.	**No Conflict.** The Project would be required to use construction equipment that is registered by CARB and meet CARB's standards. CARB sets its standards to be in line with the goal of reducing energy demand by 25 percent in 2030 and 75 percent in 2045.
Local Action - VMT Reduction	
Adopt and implement Complete Streets policies and investments, consistent with general plan circulation element requirements.	**No Conflict**. The Project does not propose any street improvements and would not interfere with the implementation of Complete Streets in the City.
Increase public access to shared clean mobility options (such as planning for and investing in electric shuttles, bike share, car share, transit).	**Consistent.** The Project Site is located in a developed urban area with sidewalks available along all nearby roadways. The proposed on-site roadway system includes walkways throughout the Project Site that would connect to the off-site sidewalks. The nearest bus stop from the existing Project driveway is the La Brea/San Vicente stop, located approximately 0.1 miles west. In addition, there are six other bus stops within 0.5 miles of the Project Site.
Local Action - Building Decarbonization	
Adopt all-electric new construction reach codes.	**No Conflict**. The Project would comply with Title 24 Parts 6 and 11, which include electric heat pumps installed during construction and electric hookups for all appliances.
Adopt policies and incentive programs to reduce electrical loads from equipment plugged into outlets (such as purchasing	**No Conflict.** The Project would be constructed in accordance with Title 24 CALGreen requirements, which include

Table 4.8-3
Project Consistency with the 2022 Scoping Plan

Action	Consistency Discussion
Energy Star equipment for municipal buildings, occupancy sensors, smart power strips, equipment controllers, etc.).	installation of Energy Star equipment and appliances in new buildings.
Facilitate deployment of renewable energy production and distribution and energy storage.	**No Conflict.** The Project would be constructed in accordance with the California Energy Code (Title 24 Part 6) to meet all requirements related to solar energy production and the CALGreen Building Energy Efficiency Standards (Title 24 Part 11) to meet efficiency standards. In addition, the Project would be built to be solar ready.
Source: 2022 Scoping Plan.	

SCAG Connect SoCal 2024

On April 4, 2024, SCAG's Regional Council adopted Connect SoCal 2024, the 2024-2050 RTP/SCS, which includes long-range regional transportation plans, regional transportation improvement programs, regional housing needs allocations, and other plans for the region. SCAG's Connect SoCal 2024 policies focus largely on regional transportation and the efficiency of transportation, which are implemented by counties and cities within the SCAG region, as part of the overall planning and maintenance of the regional transportation system. However, these strategies are also intended to reduce GHG emissions from passenger vehicles. As an individual development, the policies are not directly applicable to the Project since the Project does not propose any changes to regional transportation systems or roadways. However, the Project would not interfere with the implementation of these policies, since the Project would be consistent with the growth assumptions outlined in the Connect SoCal 2020 and 2024. In addition, the Project proposes to redevelop a site that is currently within the vicinity of several bus stops within a 0.5-mile radius. While a majority of SCAG's Implementation Strategies are related to transportation, the Project would be consistent with the Sustainable Development measures, which focus on a reduction of resource consumption, through compliance with energy efficacy measures from Title 24 standards. Therefore, the Project would be consistent with the Connect SoCal 2024 plan.

Los Angeles's Green New Deal

The City released L.A.'s Green New Deal in 2019, a guidance document containing targets and measures to reduce GHG emissions within the City to 50 percent below 1990 levels by 2025; 73 percent below 1990 levels by 2035; and becoming carbon neutral by 2050. The City has 13 different sectors of focus, identified by the chapters of the plan, to reduce GHG emissions. The chapter targets and initiatives for each chapter are primarily intended for the City as an organization to implement. However, development of the Project would not inhibit the City's ability to meet these GHG reduction goals. The Project's consistency with the plan is discussed in **Table 4.8-4**. As noted, the Project would be consistent with the City's Green New Deal.

Table 4.8-4
Project Consistency with the Green New Deal

Action	Consistency Discussion
Renewable Energy	
LADWP will supply 55% renewable energy by 2025; 80% by 2036; and 100% by 2045.	**No Conflict.** These measures are initiatives for the City and for Los Angeles Department of Water and Power to implement. However, on an individual development scale, the Project would be constructed to be solar ready and would not inhibit the installation of future solar energy generation.
Increase cumulative MW by 2025; 2035; and 2050 of: • Local solar to 900-1,500 MW; 1,500-1,800 MW; and 1,950 MW • Energy storage capacity to 1,654-1,750 MW; 3,000 MW; and 4,000 MW • Demand response (DR) programs to 234 MW (2025) and 600 MW (2035)	
Local Water	
Reduce potable water use per capita by 22.5% by 2025; and 25% by 2035; and maintain or reduce 2035 per capita water use through 2050.	**No Conflict.** The Project would be required to meet water efficiency standards for the flow rates of water fixtures, as outlined in Title 24 CALGreen measures.
Clean and Healthy Buildings	
All new buildings will be net zero carbon by 2030; and 100% of buildings will be net zero carbon by 2050	**No Conflict.** The Project would be constructed in accordance with Title 24 CALGreen requirements, which includes installation of Energy Star equipment and appliances in new buildings. In addition, the Project would be built to be solar ready.
Reduce building energy use per sq. ft. for all building types 22% by 2035; 34% by 2035; and 44% by 2050.	
Mobility and Public Transit	
Reduce VMT per capita by at least 13% by 2025; 39% by 2035; and 45% by 2050.	**No Conflict.** The Project includes self-storage uses located in a commercial corridor characterized by a high degree of pedestrian activity. The Project would provide greater proximity to neighborhood services, jobs, and residences and would be well-served by existing public transportation. Therefore, the Project would support VMT reductions.
Industrial Emissions & Air Quality Monitoring	
Reduce industrial emissions by 38% by 2035; and 82% by 2050.	**No Conflict.** The Project would not exceed SCAQMD's air quality and GHG emissions thresholds, as detailed above. SCAQMD's regional maximum emission thresholds set standards to reduce the burden of SCAQMD to attain and maintain ambient air quality standards. Therefore, the Project would not result in a significant impact to air quality on both project levels and cumulative levels.
Source: City of Los Angeles. (2019). L.A.'s Green New Deal.	

Conclusion

As described above, the proposed Project's annual construction and gross operational GHG emissions would total 863 $MTCO_{2e}$. Net operational emissions would total 602 $MTCO_{2e}$ per year. The Project is consistent with the actions and measures of CARB's 2022 Scoping Plan, SCAG Connect SoCal 2024, and the City's Green New Deal and would not interfere with the policies and goals set within those plans. Therefore, the Project's contribution to GHG emissions impacts would not be considerable.

Cumulative Impacts

The analysis of a project's GHG emissions is inherently a cumulative impacts analysis, because climate change is a global problem, and the emissions from any single project alone would be negligible. Accordingly, the analysis above considered the potential for the Project to contribute to a significant cumulative impact on global climate change.

4.9 Hazards and Hazardous Materials

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a. Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	☐	☐	☒	☐
b. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	☐	☐	☒	☐
c. Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	☐	☐	☐	☒
d. Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would create a significant hazard to the public or the environment?	☐	☐	☐	☒
e. For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?	☐	☐	☐	☒
f. Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	☐	☐	☒	☐
g. Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?	☐	☐	☐	☒

The information and analysis presented below is largely based on the following sources (refer to Appendix F):

F-1 Phase I Environmental Site Assessment, Hazard Management Consulting, February 6, 2025

F-2 Phase I Environmental Site Assessment, Hazard Management Consulting, July 10, 2025

Impact Analysis

a) Would the project create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?

Less Than Significant Impact. The Project would not involve the routine (long-term) transport of hazardous materials to and from the Project Site during construction. During demolition, site

preparation, on-site grading, and building construction, hazardous materials such as fuel and oils associated with construction equipment, as well as coatings, paints, adhesives, and caustic or acidic cleaners could be routinely used on the Project Site. While some hazardous materials used during construction could require disposal, such activity would occur only for the duration of construction and would cease upon completion of the Project.

In addition, all potentially hazardous materials to be used during construction of the Project would be used and disposed of in accordance with manufacturers' specifications and instructions, thereby reducing the risk of hazardous materials use. Construction of the Project would also comply with all applicable federal, state, and local requirements concerning the use, storage, and management of hazardous materials. Consequently, Project construction activities would not create a significant hazard to the public or the environment through the use of hazardous materials during construction.

The Project involves the development of a new seven-story self-storage facility. The Project does not involve the routine use, transport, or disposal of hazardous materials during operation. The proposed use of the Project Site is a typical urban use that does not involve the routine use of hazardous materials. For example, the proposed use would involve the use and storage of small quantities of potentially hazardous materials such as cleaning solvents, paints, and pesticides for landscaping.

Likewise, the Project's commercial and associated office use could include commercial-grade cleaning solvents, waxes, dyes, toners, paints, bleach, grease, and petroleum products that are typically associated with commercial land uses. In other words, the Project generally would not produce significant amounts of hazardous waste, use or transport hazardous waste beyond those materials typically used in an urban development. Thus, none of the Project's operational features, or the type of hazardous materials used on the Project Site, creates a significant hazard to the environment or public.

Moreover, the Project would adhere to regulatory requirements for source hazardous waste reduction measures (e.g., recycling of used batteries, recycling of elemental mercury, etc.) that would further minimize the generation of hazardous waste. In addition, the Project will comply with the applicable City ordinances regarding implementation of hazardous waste reduction efforts on-site (i.e., the City's Green Building Ordinance). The applicable regulatory requirements further ensure that the minimal number of hazardous materials associated with the Project are properly treated and disposed of at licensed resource recovery facilities or hazardous waste landfills. Tenants may occasionally store household chemicals or small amounts of materials, but such use is strictly regulated by lease agreements and facility policies prohibiting the storage of flammable, corrosive, or hazardous substances.

Thus, the Project would not create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials. Therefore, Project impacts related to this issue would be less than significant.

b) Would the project create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?

Less Than Significant Impact. The Phase I ESA included historical site utilization research and a site reconnaissance to identify potential on-site hazards. The current and past land uses within the Project Site were identified as part of the Phase I ESA to assess their potential to present concerns relative to the presence of hazards within the Project Site. These are described below:

- Recognized Environmental Condition (REC) is defined by the current ASTM Standard E1527 as the (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

- Controlled Recognized Environmental Condition (CREC) is defined by the current ASTM Standard E1527 as a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

- Historical Recognized Environmental Condition (HREC) is defined by the current ASTM Standard E1527 as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

- Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the current ASTM Standard E1527. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property. A de minimis condition is defined by the ASTM Standard as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

The Phase I ESA for the Project Site provides the following conclusions and recommendations:

Conclusions

- REC – Former gas station facility in 1929.

- REC – Former clothing manufacturing facility in the 1950s through 1970s.

- REC – The site's location in the Los Angeles Methane Zone. Potential for the presence of elevated methane and hydrogen sulfide in the subsurface.

- Non-Scope items included observations of suspect asbestos containing materials.

Recommendations:

- Conduct a Phase II ESA for both soil and soil vapor analysis including methane. If the site is planned for redevelopment, the City will require a methane survey as well. If there are plans for redevelopment, the soil gas survey component of the Phase II can be designed to satisfy the Los Angeles Department of Building and Safety level methane survey protocols.

- Conduct an asbestos survey prior to demolition or any other activity that may disturb suspect materials.

Based on the conclusions and recommendations of the Phase I ESA, a Phase II ESA was prepared and made the following conclusions and recommendations:

Conclusions:

- Soil analytical results indicated that total petroleum hydrocarbons (TPH), volatile organic compounds (VOCs), and metals were below regulatory commercial /industrial (C/I) screening criteria. Overall results do not identify the presence of a significant release of hazardous chemicals.

- Soil vapor analytical results for VOCs were generally below regulatory C/I screening criteria, except for sparse and relatively low magnitude concentrations of 1,3-butadiene, benzene, and chloroform. Overall VOC results do not appear indicative of a significant release at the site or migration of impacts from off-site sources.

- Results of the screening-level methane survey indicated that concentrations were detected at elevated levels exceeding the lower explosive limit (LEL), upper explosive limit (UEL), and likely require installation of a LADBS Level V mitigation system.

Recommendations:

- No further investigation for soil or VOCs in soil vapor.

- If the property is to be redeveloped, perform methane site testing following LADBS standards, including conducting a Shallow Soil Gas Test and Gas Probe Test by a LADBS-certified methane testing technician.

- If the property is to remain in its current configuration, a subslab depressurization system be installed to mitigate migration of methane inside of the building where it could pose an explosive risk.

- Conduct an asbestos survey prior to any demolition or disturbance of suspect ACM.

Before any demolition or renovation work in the City, a Certified Asbestos Consultant (CAC) must conduct a survey to determine whether asbestos-containing materials (ACM) are present. If ACM is found, the CAC must prepare a cleanup plan, and removal must be performed by a licensed asbestos abatement contractor in accordance with SCAQMD Rule 1403, which governs surveys, notifications, work practices, containment, and disposal. Rule 1403 requires electronic notification to SCAQMD prior to removal, and the LAMC further requires a Fire Department permit for removal of 100 square feet or more of ACM (or its equivalent in linear feet), except in certain small residential buildings. Abatement work must follow strict containment protocols, including sealed work areas, negative air pressure, and HEPA filtration, to prevent the release of asbestos fibers into the environment.

Additionally, as mentioned above, the Project Site is located within a designated Methane Zone. The City regulates building and paving in Methane Zones and Methane Buffer Zones through Division 71, “Methane Seepage Regulations,” of the LAMC, which sets minimum requirements for controlling methane intrusion into buildings and confined spaces. These regulations apply to all new buildings and paved areas within a Methane Zone or Methane Buffer Zone and require compliance with the City’s Methane Mitigation Standards as a condition of building permit issuance.

Under LAMC Sections 91.7103 and 91.7104.2, all buildings in a Methane Zone or Methane Buffer Zone must be evaluated for methane hazard and provided with an appropriate methane mitigation system, as specified in Table 71 based on the site’s methane “design level.” In practice, LADBS requires a methane soil-gas investigation by qualified professionals to determine the site-specific design level and then requires installation of a mitigation system (often including a sub-slab barrier, passive or active venting, and methane detection/ventilation equipment) consistent with the applicable design level. The Fire Department and LADBS jointly enforce requirements for gas-detection and ventilation systems, and ongoing testing, maintenance, and emergency procedures are also mandated under Division 71 to ensure continued protection of occupants over the life of the building.

For the Project, compliance with these existing methane regulations would be required as part of the standard building permit process. The Project would undergo LADBS review to confirm its location in a Methane Zone, completion of a methane investigation, and incorporation of a methane mitigation system meeting or exceeding the City’s Methane Mitigation Standards and any Project-specific requirements imposed by LADBS and the Fire Department. With these regulatory requirements in place, mandating design, installation, and ongoing operation of methane barriers, venting systems, and detection/ventilation equipment, the potential for hazardous accumulation of methane gas within the building or on the site would be effectively controlled.

Based on all of the information presented above, the Project would not create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment. Therefore, Project impacts related to this issue would be less than significant.

c) Would the project emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?

No Impact. There are no schools within 0.25 miles of the Project Site. The Holy Spirit STEM Academy located approximately 0.8 miles west of the site is the school closest to the Project site. Thus, the Project would not emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school. Therefore, no impacts related to this issue would occur as a result of the Project.

d) Would the project be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would create a significant hazard to the public or the environment?

No Impact. Section 65962.5 of the California Government Code requires the California Environmental Protection Agency (CalEPA) to develop and update annually the Cortese List, which is a "list" of hazardous waste sites and other contaminated sites. While Section 65962.5 references to the preparation of a "list," many changes have occurred related to web-based information access since 1992 and information regarding the Cortese List is now compiled on the websites of multiple agencies including the Department of Toxic Substances Control (DTSC), the State Water Resources Control Board (SWRCB), and CalEPA. A review of Envirostor shows that the Project Site is not listed.[29] Thus, the Project would not be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would create a significant hazard to the public or the environment. Therefore, no impacts related to this issue would occur as a result of the Project.

e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?

No Impact. The Project Site is not located within the vicinity of a private airstrip or an airport land use plan. The nearest airport is Los Angeles International Airport (LAX) located 7.15 miles southwest of the site. Thus, the Project would not expose people residing or working in the project area to excessive airport-related noise levels. Therefore, no impacts related to this issue would occur as a result of the Project.

f) Would the project impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?

Less Than Significant Impact. The Project Site is located on the south side of San Vicente Boulevard between Longwood Avenue and Tremaine Avenue in the Wilshire Community Plan Area. The surrounding street network consists of an established urban grid with wide arterial roadways, including San Vicente Boulevard, which serves as a designated disaster route within the City of Los Angeles. The Project would demolish the existing warehouse building and surface

[29] DTSC, Envirostor, https://www.envirostor.dtsc.ca.gov/public/map/?global_id=60000842&zl=12, accessed November 13, 2025.

parking lots on the Project Site and construct a new seven-story self-storage facility with 161,645 square feet of floor area, along with five (5) parking spaces and two (2) loading spaces.

Construction activities would be confined to the boundaries of the Project Site and would occur in accordance with standard City requirements for temporary traffic control, including compliance with the Los Angeles Department of Transportation (LADOT) Traffic Control Manual and the Work Area Traffic Control Handbook (WATCH). Any temporary lane closures, if needed, would be subject to LADOT permit conditions requiring maintenance of emergency vehicle access at all times. Construction would not require full closure of San Vicente Boulevard, Longwood Avenue, or Tremaine Avenue, and would not interfere with emergency access along these streets.

During operation, the Project would not alter the existing street network, modify traffic circulation patterns, or introduce land uses that generate substantial vehicle traffic or blocking of circulation routes. A self-storage facility typically generates low traffic volumes and infrequent loading activity, and the proposed driveways and loading areas would be fully contained on site. Emergency access would continue to be provided from both Longwood Avenue and Tremaine Avenue, and the Project would be required to comply with all Fire Department access, fire-lane, and building clearance requirements as part of the building permit process. These design requirements ensure that adequate emergency ingress and egress are maintained.

The City does not have a stand-alone adopted emergency evacuation plan for individual neighborhoods. Instead, emergency response is guided by the City's Emergency Operations Plan (EOP) and related functional annexes. The EOP focuses on citywide coordination and does not designate project-specific evacuation routes that would be affected by development at the Project Site. The Project does not propose street closures, changes to roadway classifications, or modifications to disaster route functionality.

Thus, the Project would not impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan. Therefore, Project impacts related to this issue would be less than significant.

g) Would the project expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?

No Impact. The Project Site is not located in a Very High Fire Hazard Severity Zone.[30] Thus, the Project would not expose people or structures, directly or indirectly, to a significant risk of loss, injury, or death involving wildland fires. Therefore, no impacts related to this issue would occur as a result of the Project.

Cumulative Impacts

There are three (3) related projects identified by the City within 0.5 miles of the Project (see **Table 4.21-1**). The geographic extent of the Project's environmental impacts is limited to the Project Site and would not contribute to any other potential environmental impact that may occur beyond the boundaries of the Project Site. The related project identified would be subject to discretionary or

30 City of Los Angeles Department of City Planning, Zone Information and Map Access System (ZIMAS), Parcel Profile Report for 4828 San Vicente Boulevard, https://zimas.lacity.org/, accessed August 4, 2025.

ministerial review by the City, which would be responsible for assessing potential hazards risks associated with the related project, and if necessary, the applicant of that project would be required to implement measures appropriate for the type and extent of hazardous materials present and the land use proposed to reduce the risk associated with the hazardous materials to an acceptable level. As stated previously, the Project would not result in any significant impacts related to hazards and hazardous materials. Therefore, no significant cumulative impacts related to hazards and hazardous materials would occur.

4.10 Hydrology and Water Quality

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a. Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?	☐	☐	☒	☐
b. Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?	☐	☐	☐	☒
c. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:	☐	☐	☒	☐
i. Result in substantial erosion or siltation on or off-site;	☐	☐	☒	☐
ii. substantially increase the rate or amount of surface runoff in a manner which would result in flooding on or off-site;	☐	☐	☒	☐
iii. create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or	☐	☐	☒	☐
iv. impede or redirect flood flows?	☐	☐	☒	☐
d. In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?	☐	☐	☒	☐
e. Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?	☐	☐	☒	☐

Impact Analysis

a) Would the project violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?

Less Than Significant Impact. The Project Site is smaller than one acre and as a result, is not subject to the Statewide Construction General Permit (Order 2009-0009-DWQ, as amended), which requires preparation of a Storm Water Pollution Prevention Plan (SWPPP) for projects that disturb one acre or more of soil. However, construction and operation of the Project must comply with local stormwater regulations administered through the City and the Los Angeles Regional Water Quality Control Board (RWQCB), which ensure that pollutants are minimized and water quality is protected even for smaller development sites.

During construction, the Project would be required to comply with the City's Low Impact Development (LID) Ordinance and Standard Urban Stormwater Mitigation Plan (SUSMP) requirements, which apply to most development projects regardless of acreage. The Project would implement appropriate best management practices (BMPs) such as erosion-control measures, sediment barriers, proper handling and storage of construction materials, and good-housekeeping practices. These measures would prevent pollutants—including sediment, trash, construction debris, and chemicals, from leaving the Site and entering the storm drain system. Compliance with LID/SUSMP ensures that stormwater runoff is treated or infiltrated on site to the maximum extent feasible.

Stormwater runoff generated during operation of the Project has the potential to introduce small amounts of pollutants typically associated with commercial developments (e.g., household cleaners, landscaping pesticides, and vehicle petroleum products) into the stormwater system. Stormwater runoff from precipitation events could carry urban pollutants into municipal storm drains, however during operation the Project would be required to comply with the City's LID Ordinance. The LID Ordinance applies to all development and redevelopment in the City that requires a building permit. LID Plans are required to include a site design approach and BMPs that address runoff and pollution at the source. Further, to comply with LID Ordinance the Project would be required to capture and treat the first 3/4-inch of rainfall in accordance with established stormwater treatment priorities. Compliance with the LID Ordinance would reduce the amount of surface water runoff leaving the Project Site as compared to the current conditions. Compliance with the LID Plan and SUSMP, including the implementation of BMPs, would ensure that operation of the Project would not violate water quality standard and discharge requirements or otherwise substantially degrade water quality.

Conformance with these regulations would ensure construction and operational activities would result in would not violate water quality standards, waste discharge requirements, or otherwise substantially degrade water quality. Therefore, Project impacts related to water quality would be less than significant.

b) Would the project substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?

No Impact. The Project Site in its existing condition is completely developed with impervious surfaces such as the foundation of the existing warehouse building, parking areas, and paved driveways and walkways. During storm events, nearly all of the storm water that encounters the Project Site is directed to the existing local storm drain system. No storm water at the Project Site reaches groundwater levels. As such, the Project Site is not a source of groundwater recharge. Under the Project, all storm water would be directed toward landscaped areas and/or the local storm drain system and would not have the ability to reach groundwater level at the Project Site. Additionally, all water consumption associated with the Project would be supplied by the City and not from groundwater beneath the Project Site. Thus, the Project would have no effect on groundwater supplies or recharge. Therefore, no impacts related to this issue would occur as a result of the Project.

c) Would the project substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:

i. Result in substantial erosion or siltation on or off-site;

Less Than Significant Impact. As discussed previously, the Project Applicant would be required to prepare a SWPPP and implement BMPs to reduce runoff and preserve water quality during construction of the Project. While grading and construction activities may temporarily alter the existing drainage patterns of the site, BMPs would be implemented to minimize soil erosion impacts during Project grading and construction activities. In addition, the Project Applicant would be required to implement a LID Plan (during operation), which would reduce the amount of surface water runoff leaving the Project Site after a storm event. Specifically, the LID Plan would require the implementation of stormwater BMPs to retain or treat the runoff from a storm event producing 3/4-inch of rainfall in a 24-hour period. Thus, the Project would not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner, which would result in substantial erosion or siltation on- or off-site. Therefore, Project impacts related to erosion or siltation would be less than significant.

ii. Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on or off-site;

Less Than Significant Impact. As stated previously, given the existing surface site conditions, during storm events, nearly all of the stormwater flows from the site to the local streets where the runoff enters the City's storm drain system. The Project developer would be required to implement BMPs and to develop appropriate drainage infrastructure on the site to meet regulatory water quality requirements and to control drainage from the site to not exceed existing rates. Thus, the Project would not increase the runoff from the site entering the City's existing storm drain facilities. As such, the Project would not cause flooding on or off site. Therefore, Project impacts related to flooding would be less than significant.

iii. Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or

Less Than Significant Impact. As stated previously, given the existing surface site conditions, during storm events, nearly all of the stormwater flows from the site to the local streets where the runoff enters the City's storm drain system. The Project developer would be required to implement BMPs and to develop appropriate drainage infrastructure on the site to meet regulatory water quality requirements and to control drainage from the site to not exceed existing rates. Thus, the Project would not increase the runoff from the site entering the City's existing storm drain facilities. As such, the Project would not exceed the capacity of the existing or planning drainage system. Therefore, Project impacts related to storm drain capacity would be less than significant.

iv. Impede or redirect flood flows?

Less Than Significant Impact. The Project Site is located within a FEMA-designated 100-year flood zone (Zone AO) and 500-year flood zone, which correspond to a 1-percent and 0.2-percent annual chance of flooding, respectively. The Project Site, however, is fully developed with a single-story warehouse building and associated surface parking lots, and contains no natural drainages, streams, rivers, or other hydrologic features that could be altered or redirected. Existing stormwater runoff sheet-flows across paved surfaces toward existing storm drain inlets in the surrounding street network.

Implementation of the Project would remove the existing warehouse building and pavement and construct a new seven-story self-storage facility with associated hardscape. While the Project would introduce new impervious surfaces, the site is already predominantly impervious under existing conditions; therefore, the Project would not substantially increase imperviousness or materially change the timing or quantity of stormwater runoff compared to existing conditions. In accordance with the LAMC, the LID Ordinance, and the City's Stormwater and Urban Runoff Pollution Control requirements, the Project would be required to implement on-site stormwater management features designed to retain or treat runoff and prevent increased flows from leaving the site. Compliance with these requirements ensures that post-construction runoff volumes and rates do not exceed existing conditions.

Because the Project does not include any modification to the course of a stream or river, and because on-site stormwater flows would continue to drain to the existing municipal storm drain system in a manner consistent with existing conditions, the Project would not impede, divert, or redirect flood flows within the FEMA-designated flood zones. Furthermore, the new building would be required to comply with all applicable flood-hazard development standards, including finished-floor elevation requirements, flood-proofing, and LADBS review for construction within a Zone AO or 500-year flood zone. These requirements ensure that the Project is designed to withstand potential flood events without altering flood behavior on or off the site.

Thus, the Project would not substantially alter drainage patterns or impede or redirect flood flows. Therefore, Project impacts related to this issue would be less than significant.

d) In flood hazard, tsunami, or seiche zones, would the project risk release of pollutants due to project inundation?

Less Than Significant Impact. As discussed above, the Project is located in a Zone AO or 500-year flood zone. The new building would be required to comply with all applicable flood-hazard development standards, including finished-floor elevation requirements, flood-proofing, and LADBS review for construction within a Zone AO or 500-year flood zone. Additionally, as a self-storage facility, the Project would not contain any pollutants that would necessarily result in water quality issues in the event of flooding. The Project Site is not located near any large bodies of open water, the closest being the Pacific Ocean located approximately nine miles west of the site. Thus, the Project would not risk release of pollutants due to project inundation. Therefore, Project impacts related to this issue would be less than significant.

e) Would the project conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?

Less Than Significant Impact. As discussed previously in response to Checklist Question X(a), the Project would be required to comply with the NPDES General Construction Permit including the preparation of a SWPPP and implementation of BMPs, required to minimize soil erosion and sedimentation from entering the storm drains during the construction period. In addition, the Project would be subject to the City's Stormwater and Urban Runoff Pollution Control regulations (Ordinance No. 172,176 and No. 173,494) to ensure pollutant loads from the Project Site would be minimized for downstream receiving waters. Compliance with the NPDES and implementation of the SWPPP and BMPs, as well as the City's discharge requirements would ensure that construction stormwater runoff would not violate water quality and/or discharge requirements.

Stormwater runoff generated during operation of the Project has the potential to introduce small amounts of pollutants typically associated with mixed-use developments (e.g., household cleaners, landscaping pesticides, and vehicle petroleum products) into the stormwater system. Stormwater runoff from precipitation events could carry urban pollutants into municipal storm drains, however during operation the Project would be required to comply with the City's LID Ordinance. The Stormwater LID Ordinance applies to all development and redevelopment in the City that requires a building permit. LID Plans are required to include a site design approach and BMPs that address runoff and pollution at the source. Further, to comply with LID Ordinance the Project would be required to capture and treat the first 3/4-inch of rainfall in accordance with established stormwater treatment priorities. Compliance with the LID Ordinance would reduce the amount of surface water runoff leaving the Project Site as compared to the current conditions. Compliance with the LID Plan and Standard Urban Stormwater Mitigation Plan (SUSMP), including the implementation of BMPs, would ensure that operation of the Project would not violate water quality standard and discharge requirements or otherwise substantially degrade water quality.

Conformance with these regulations would ensure construction and operational activities would not violate water quality standards, waste discharge requirements, or otherwise substantially degrade water quality. Therefore, Project impacts related to water quality would be less than significant.

As discussed in response to Checklist Question X(b), the Project Site in its existing condition is completely developed with impervious surfaces such as the foundation of the previous restaurant building, parking areas, and paved driveways and walkways. During storm events, nearly all of the storm water that encounters the Project Site is directed to the existing local storm drain system. No storm water at the Project Site reaches groundwater levels. As such, the Project Site is not a source of groundwater recharge. Under the Project, all storm water would be directed toward landscaped areas and/or the local storm drain system and would not have the ability to reach groundwater level at the Project Site. Additionally, all water consumption associated with the Project would be supplied by the City and not from groundwater beneath the Project Site. Thus, the Project would have no effect on groundwater supplies or recharge, and no impacts related to this issue would occur.

Cumulative Impacts

Less Than Significant Impact.

There are three (3) related projects identified by the City within 0.5 miles of the Project (see **Table 4.21-1**). The sites of the Project and the related project are located in an urbanized area where most of the surrounding properties are already developed. The existing storm drainage system serving this area has been designed to accommodate runoff from an urban built-out environment. When new construction occurs, it generally does not lead to substantial additional runoff, since new developments are required to control the amount and quality of stormwater runoff coming from their respective sites. Additionally, all new development in the City is required to comply with the City's LID requirements and incorporate appropriate stormwater pollution control measures into the design plans to ensure that water quality impacts are minimized. Therefore, cumulative impacts related to hydrology and water quality would be less than significant.

4.11 Land Use and Planning

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:					
a.	Physically divide an established community?	☐	☐	☐	☒
b.	Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?	☐	☐	☒	☐

Impact Analysis

a) Would the project physically divide an established community?

No Impact. The Project would not cause any permanent street closures, block access to any surrounding land use, or cause any change in the existing street grid system. The Project is not of a scale or nature that would physically divide an established community. The Project is not affecting any rights-of-way. The Project will be built on an existing urban infill site and is contiguous and bounded by streets. In addition, the site is not large enough to encompass an established community. The Project would be constructed within the boundaries of the Project Site, and the proposed uses would be located within the building. These uses would be consistent with other developments located adjacent to and in the general vicinity of the Project Site. All proposed development would also occur within the boundaries of the Project Site. In addition, the Project does not propose a freeway or other large infrastructure that could divide the existing surrounding community. Thus, the Project would not physically divide an established community Therefore, no impacts related to this issue would occur as a result of the Project.

b) Would the project cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?

Less Than Significant Impact. The determination of consistency with applicable land use policies and ordinances is based upon a review of the previously identified planning and zoning documents that regulate land use or guide land use decisions pertaining to the Project Site.

A project is considered consistent with the provisions and general policies of applicable City or regional land use plan and regulation if it is consistent with the overall intent of the plan or regulation and would not preclude the attainment of its primary goals.[31] More specifically, according to the ruling in *Sequoyah Hills Homeowners Association v. City of Oakland*, state law does not require an exact match between a project and the applicable general plan. Rather, to be

31 Sequoyah Hills Homeowners Association v. City of Oakland (1993) 23 Cal.App.4th.704, 719.

"consistent," the project must be "compatible with the objectives, policies, general land uses, and programs specified in the applicable plan," meaning that a project must be in "agreement or harmony" with the applicable land use plan to be consistent with that plan.

Various local and regional plans and regulatory documents guide development of the Project Site. The following discussion addresses the Project's consistency with the requirements and policies of SCAG's RTP/SCS, the City's General Plan (including the Framework Element, the Housing Element, Conservation Element, and Mobility Plan 2035), the Community Plan, and the LAMC, to the extent that various goals, objectives, and policies of these plans have been adopted for the purpose of avoiding or mitigating an environmental effect. The Project's consistency with certain other goals, objectives, and policies that do not directly relate to the avoidance or mitigation of environmental effects is also briefly discussed for informational purposes.

Southern California Association of Governments

Regional Transportation Plan/Sustainable Communities Strategy

SCAG's 2024–2050 RTP/SCS, also known as Connect SoCal, was adopted on April 4, 2024. The 2024–2050 RTP/SCS presents a long-range visioning plan that balances future mobility and housing needs with economic, environmental, and public health goals through the year 2050 for the six-county region of Imperial, Los Angeles, Orange, Riverside, San Bernardino, and Ventura counties. The core vision of the 2024–2050 RTP/SCS is to build upon and expand land use and transportation strategies established over several planning cycles to increase mobility options and achieve a more sustainable growth pattern. The 2024–2050 RTP/SCS builds upon this core vision with new initiatives at the intersection of land use, transportation, and technology to reach the region's GHG reduction goals. These initiatives include policies, projects, and programs that strengthen and enhance each other beyond what each would accomplish in isolation. Strategies to advance the core vision address sustainable development, system preservation and resilience, demand and system management, transit backbone, complete streets, and goods movement. For each of these strategies, SoCal Connect provides information on progress made since the prior RTP/SCS.

The Project's consistency with the 2024–2050 RTP/SCS is discussed under Checklist Section 8, Greenhouse Gas Emissions. As discussed there, the Project would be substantially consistent with the 2024-2050 RTP/SCS.

City of Los Angeles General Plan

Framework Element

The Framework Element, adopted in December 1996 and readopted in August 2001, sets forth general guidance regarding land use issues for the City and defines citywide policies regarding land use that influence the community plans and most of the City's General Plan Elements. Specifically, the Framework Element defines citywide policies for land use, housing, urban form and neighborhood design, open space and conservation, economic development, transportation, and infrastructure and public services. The Project's consistency with the applicable goals, objectives and policies of the General Plan Framework Element is provided in **Table 4.11-1** and summarized below.

Table 4.11-1
Project Consistency with City of Los Angeles General Plan

Goal, Objectives, Policies	Analysis of Project Consistency
Framework Element Land Use Chapter	
3.2.2 Establish, through the Framework Long-Range Land Use Diagram, community plans, and other implementing tools, patterns and types of development that improve the integration of housing with commercial uses and the integration of public services and various densities of residential development within neighborhoods at appropriate locations.	**Consistent.** The Project includes development of self-storage facility building to serve the needs of the community.
3.2.3 Provide for the development of land use patterns that emphasize pedestrian/bicycle access and use in appropriate locations.	**Consistent.** The Project is an infill development on a site that already served by existing roadways and nearby transit facilities. The Project includes development of a self-storage facility building to serve the needs of the community. The area is developed with a variety of commercial and residential uses in close proximity to the Project Site. Additionally, the Project includes long-term bicycle parking spaces and short-term parking spaces, which would encourage bicycle use.
3.4.1 Conserve existing stable residential neighborhoods and lower-intensity commercial districts and encourage the majority of new commercial and mixed-use (integrated commercial and residential) development to be located (a) in a network of neighborhood districts, community, regional, and downtown centers, (b) in proximity to rail and bus transit stations and corridors, and (c) along the City's major boulevards, referred to as districts, centers, and mixed-use boulevards, in accordance with the Framework Long-Range Land Use Diagram.	**Consistent.** The Project is an infill development on a site that already served by existing roadways and nearby transit facilities. The Project includes development of a self-storage facility building to serve the needs of the community. The area is developed with a variety of commercial and residential uses in close proximity to the Project Site. Additionally, the Project includes long-term bicycle parking spaces and short-term parking spaces, which would encourage bicycle use.
Mobility Element	
Policy 3.1: Recognize all modes of travel, including pedestrian, bicycle, transit, and vehicular modes – including goods movement – as integral components of the City's transportation system.	**Consistent**. The Project would promote this policy by providing adequate vehicular access. The Project Site is also served by a variety of transit options provided by Metro.
Policy 3.2: Accommodate the needs of people with disabilities when modifying or installing infrastructure in the public right-of-way.	**Consistent**. The Project would be designed to provide accessibility and accommodate the needs of people with disabilities as required by the American with Disabilities Act (ADA) and the City's applicable related building code regulations.
Policy 3.3: Promote equitable land use decisions that result in fewer vehicle trips by providing greater proximity and access to jobs,	**Consistent**. The Project would promote equitable land use decisions that result in fewer vehicle trips by providing a new self-storage development in close

Table 4.11-1
Project Consistency with City of Los Angeles General Plan

Goal, Objectives, Policies	Analysis of Project Consistency
destinations, and other neighborhood services.	proximity to transit. The Project is located in an area with ample transit within walking distance.
Policy 3.4: Provide all residents, workers and visitors with affordable, efficient, convenient, and attractive transit services.	**Consistent**. The Project would promote equitable land use decisions that result in fewer vehicle trips by providing a new self-storage development in close proximity to transit. The Project is located in an area with ample transit within walking distance.
Policy 3.8: Provide bicyclists with convenient, secure and well-maintained bicycle parking facilities.	**Consistent**. The Project would provide secure bicycle parking and bicycle accessibility mobility for employees and visitors to the Project Site. The Project would also provide 36 bicycle parking spaces (18 short-term and 18 long-term) in accordance with LAMC requirements.
Policy 3.9: Discourage the vacation of public rights-of-way	**Consistent**. The Project would not vacate any public rights-of-way, and all associated public rights-of-way would be maintained as part of the Project.
Policy 3.10: Discourage the use of cul-de-sacs that do not provide access for active transportation options.	**Consistent**. The Project would not include the development of a cul-de-sac.
Policy 4.8 Encourage greater utilization of Transportation Demand Management (TDM) strategies to reduce dependence on single-occupancy vehicles.	**Consistent.** The LADOT's requirement for a transportation assessment is if a development is estimated to generate a net increase of 250 or more daily vehicle trips and requires discretionary action. Based on the land use and size of the existing and proposed uses, the trip generation determined that the Project would generate a net increase of 205 trips. Therefore, based on the City threshold to trigger further traffic analysis of 250 new daily vehicle trips, the Project is presumed to have a less-than-significant impact related to VMT.
Policy 5.2 Support ways to reduce vehicle miles traveled (VMT) per capita.	**Consistent**. The Project would include self-storage uses located in a commercial corridor characterized by a high degree of pedestrian activity. The Project would provide greater proximity to neighborhood services, jobs, and residences and would be well-served by existing public transportation. Therefore, the Project would support VMT reductions.
Policy 5.4 Continue to encourage the adoption of low and zero emission fuel sources, new mobility technologies, and supporting infrastructure.	**Consistent**. This policy applies to large-scale goals relative to fuel sources, technologies and infrastructure. The Project would also comply with the City's EV charging requirements.
Policy 5.5 Maximize opportunities to capture and infiltrate stormwater within the City's public rights-of-way.	**Consistent**. The Project would comply with the City's LID Ordinance. A capture and use system of approximately 2,510 cubic feet is proposed for the site, per LID requirements.[32]

32 Peak Flow Hydrologic Analysis, DRC Engineering, August 2025.

Table 4.11-1
Project Consistency with City of Los Angeles General Plan

Goal, Objectives, Policies	Analysis of Project Consistency
Conservation Element	
15.1 Objective: Protect and reinforce natural and scenic vistas as irreplaceable resources and for the aesthetic enjoyment of present and future generations.	**Consistent.** The Project Site and surrounding area are characterized by dense urban development. Due to existing buildings in the area, views are generally obstructed, and no scenic vistas exist. Therefore, the Project would not have any adverse effect on a scenic vista for the enjoyment of present and future generations.
15.1 Policy: Continue to encourage and/or require property owners to develop their properties in a manner that will, to the greatest extent practical, retain significant existing land forms (e.g., ridge lines, bluffs, unique geologic features) and unique scenic features (historic, ocean, mountains, unique natural features) and/or make possible public view or other access to unique features or scenic views.	**Consistent.** The Project Site does not contain any significant existing landforms (e.g., ridge lines, bluffs, unique geologic features) or unique scenic features (historic, ocean, mountains, unique natural features). The Project Site is located in an urbanized portion of the City and topographically relatively flat. The Project Site is not a part of a scenic resource and would not obstruct any scenic views.
Infrastructure and Public Services Chapter	
Objective 9.10: Ensure that water supply, storage, and delivery systems are adequate to support planned development.	**Consistent**. Based on LADWP demand projections provided in its 2020 Urban Water Management Plan, LADWP would be able to meet the water demand of the Project, as well as the existing and planned future water demands of its service area for development that is consistent with the General Plan and other growth plans. As the Project's water demand is accounted for in the City's future projected demands (the 2020-2045 RTP/SCS includes growth throughout the Los Angeles subregion and informs the LADWP 2020 UWMP), the Project would not require the construction or expansion of new water treatment facilities that could cause a significant environmental effect. In general, projects that conform to SCAG's 2020-2045 RTP/SCS demographic projections and are in the City's service area are considered to have been included in LADWP's water supply planning efforts in the UWMP. The Project is consistent with the General Plan designation and Community Plan and zoning. In terms of the City's overall water supply condition, the water requirement for any project that is consistent with the City's General Plan has been taken into account in the planned growth of the water system. Furthermore, the Project would not exceed the available capacity within the distribution infrastructure that would serve the Project Site.

Table 4.11-1
Project Consistency with City of Los Angeles General Plan

Goal, Objectives, Policies	Analysis of Project Consistency
Goal 9P: Appropriate lighting required to: (1) provide for nighttime vision, visibility, and safety needs on streets, sidewalks, parking lots, transportation, recreation, security, ornamental, and other outdoor locations; (2) provide appropriate and desirable regulation of architectural and information lighting such as building façade lighting or advertising lighting; and (3) protect and preserve the nighttime environment, views, driver visibility, and otherwise minimize or prevent light pollution, light trespass, and glare.	**Consistent.** The Project would introduce new sources of artificial light to the Project Site, including low-level exterior lights for security and way-finding purposes, as well as general accent lighting. The Project would not include electronic lighting or signs with flashing or strobe lights. All exterior lighting would be shielded or directed toward the areas to be lit to limit spill-over onto off-site uses. The Project would comply with the City's lighting and signage ordinances and would have signage approved by LADBS.
General Plan, Chapter 3-Land Use: https://planning.lacity.org/cwd/framwk/chapters/03/03205.htm City of Los Angeles, Conservation Element of the General Plan, March 2001. Housing Element: http://planning.lacity.org/HousingInitiatives/HousingElement/Text/Ch6.pdf City of Los Angeles, Health and Wellness Element of the General Plan, March 2015. General Plan, http://cityplanning.lacity.org/cwd/framwk/fwhome0.htm Note: This table includes only the policies that are applicable to the Project.	

Land Use Chapter

The Framework Element Land Use Chapter identifies districts, centers, and mixed-use boulevards, which are described in terms of ranges of intensity/density, heights, and lists of typical uses. Additionally, the Project would support and would be consistent with the Land Use Chapter as it would contribute to the City's goal for a physically balanced distribution of land uses that facilitates conservation of natural resources, provision of adequate infrastructure and public services, reduction of traffic congestion and improvement of air quality, enhancement of recreation and open space opportunities, and assurance of environmental justice and a healthful living environment.

In particular, the Project would promote a more balanced distribution of land uses with the replacement of an underutilized site with a new self-storage building. These proposed uses would be developed in an area well served by public transit provided by Metro and the City of Glendale.

Furthermore, the Project would provide secure bicycle parking and EV charging infrastructure on-site. In addition, development of the Project in an area with convenient access to public transit and opportunities for walking and biking would promote an improved quality of life by facilitating a reduction of vehicle trips, VMT, and air pollution. Therefore, the Project would not conflict with the applicable goals, objectives, and policies set forth in the Framework Element's Land Use Chapter adopted for the purpose of avoiding or mitigating an environmental effect.

Urban Form and Neighborhood Design Chapter

The Urban Form and Neighborhood Design Chapter of the Framework Element establishes a goal of creating a livable City for existing and future residents. This chapter defines "urban form" as the City's general pattern of building height, development intensity, activity centers, focal

elements, and structural elements, such as natural features, transportation corridors, open space, and public facilities. “Neighborhood design” is defined as the physical character of neighborhoods and communities.

The Framework Element does not directly address the design of individual neighborhoods or communities but embodies general neighborhood design and implementation programs that guide local planning efforts and lay a foundation for updating the community plans. The Urban Form and Neighborhood Design Chapter encourages growth in areas that have a sufficient base of both commercial and residential development to support transit service.

The Project’s consistency with the relevant objectives and policies that support the goals of the Urban Form and Neighborhood Design Chapter of the Framework Element is discussed under Checklist Section 1, Aesthetics, of this MND (**Table 4.1-1**). As concluded therein, the Project would be generally consistent with the applicable objectives and policies that support the goals set forth in the Framework Element’s Urban Form and Neighborhood Design Chapter.

Open Space and Conservation Chapter

The Open Space and Conservation Chapter of the Framework Element contains goals, objectives, and policies to guide the provision, management, and conservation of public open space resources, address the outdoor recreational needs of the City’s residents, and guide amendments to the General Plan Open Space Element and Conservation Element. This chapter also includes policies to resolve the City’s open space issues. Specifically, this chapter contains open spaces goals, objectives, and policies regarding resource conservation and management, outdoor recreation, public safety, community stability, and resources development.

The Project’s consistency with the Framework Element’s Open Space and Conservation Chapter is discussed in **Table 4.11-1**. As described therein, the Project would be consistent with the relevant objectives and policies that support the goals of the Open Space and Conservation Chapter of the Framework Element.

Furthermore, the Project would not conflict with or encroach upon the public and private open space system. Therefore, the Project would be generally consistent with the applicable objectives and policies that support the goals set forth in the Framework Element’s Open Space and Conservation Chapter that seek to avoid or mitigate an environmental effect.

Infrastructure and Public Service Chapter

The Infrastructure and Public Services Chapter of the Framework Element addresses infrastructure and public service systems, including wastewater, stormwater, water supply, solid waste, police, fire, libraries, parks, power, schools, telecommunications, street lighting, and urban forest and two traffic signals at the project driveways. For each of the public services and infrastructure systems, basic policies call for monitoring service demands and forecasting the future need for improvements, maintaining an adequate system/service to support the needs of population and employment growth, and implementing techniques that reduce demands on utility infrastructure or services. Generally, these techniques encompass a variety of conservation programs (e.g., reduced use of natural resources, increased site permeability, watershed

management, and others). Attention is also placed on the establishment of procedures for the maintenance and/or restoration of service after emergencies, including earthquakes.

The Project's consistency with the Framework Element's Infrastructure and Public Services Chapter is discussed in **Table 4.11-1**. As described therein, the Project would comply with the City's grading permit regulations, which require the preparation of an erosion control plan. The Project would also be required to comply with the City's LID Ordinance, which would require the implementation of BMPs to collect, detain, and treat runoff on-site. As discussed under Checklist Section 19, Utilities and Service Systems, of this MND, LADWP would be able to meet the water demand for the Project as well as existing and planned water demands of its future service area. Furthermore, the Project would not exceed the available capacity within the water distribution infrastructure that would serve the Project Site, and no system upgrades would be required as a result of the Project. Thus, the Project would be generally consistent with the applicable objectives and policies that support the goals set forth in the Framework Element's Infrastructure and Public Services Chapter that seek to avoid or mitigate an environmental effect.

Conservation Element

The Conservation Element primarily addresses the preservation, conservation, protection, and enhancement of the City's natural resources, including agricultural lands, archaeological and paleontological resources, endangered species, habitat areas, and mineral resources. The Conservation Element also recognizes the City's responsibility for identifying and protecting its cultural and historical heritage. As previously described, the Project Site is developed and paved and does not contain any natural resources other than ornamental planted grass. As discussed throughout this MND, the Project would have no significant impact on agricultural lands, endangered species, habitat areas, or mineral resource areas. In addition, as discussed under Checklist Section 4, Biological Resources, above, the trees and landscaping within the Project Site are not subject to the City's Protected Tree and Shrub Ordinance.

With respect to historic resources, as discussed under Checklist Section 5, Cultural Resources, of this MND, none of the potential historical resources in the vicinity of the Project Site would be directly or indirectly affected by the Project as they are physically separated from the Project Site and the primary public views and general character of these resources would remain unchanged by the Project. The Project would also implement standard measures to ensure that potential impacts to archaeological, paleontological, and tribal cultural resources would remain less than significant.

Furthermore, as analyzed under Checklist Section 1, Aesthetics, of this MND, the Project would not obstruct or remove access to natural and scenic vistas. Thus, the Project would not conflict with Section 15 of the Conservation Element, which encourages protection of scenic vistas and the preservation of public views of visual resources. Overall, as outlined above, the Project would not conflict with the Conservation Element.

Housing Element

The 2021–2029 Housing Element (Housing Element), which was adopted on November 24, 2021, and subsequently amended by the City Council on June 14, 2022, identifies the City's housing conditions and needs; establishes the goals, objectives, and policies that are the foundation of

the City's housing and growth strategy; and provides the array of programs the City intends to implement to create sustainable, mixed-income neighborhoods across the City. The goals of the Housing Element are as follows:

- Goal 1: A City where housing production results in an ample supply of housing to create more equitable and affordable options that meet existing and projected needs;
- Goal 2: A City that preserves and enhances the quality of housing and provides greater housing stability for households at all income levels;
- Goal 3: A City in which housing creates healthy, livable, sustainable, and resilient communities that improve the lives of all Angelenos;
- Goal 4: A City that fosters racially and socially inclusive neighborhoods and corrects the harms of historic racial, ethnic, and social discrimination of the past and present; and
- Goal 5: A City that is committed to preventing and ending homelessness.

There is no existing housing on the site. The Project is not a housing development.

Transportation Element/Mobility Plan 2035

The Mobility Plan, adopted on January 20, 2016 and readopted September 7, 2016, is a comprehensive update of the General Plan Transportation Element. Accordingly, the goals of the Transportation Chapter of the Framework Element are now implemented through the Mobility Plan. The overarching goal of the Mobility Plan is to achieve a transportation system that balances the needs of all road users. The Mobility Plan incorporates "complete streets" principles. In 2008, the California State Legislature adopted Assembly Bill (AB) 1358, The Complete Streets Act, which requires local jurisdictions to "plan for a balanced, multimodal transportation network that meets the needs of all users of streets, roads, and highways, defined to include motorists, pedestrians, bicyclists, children, persons with disabilities, seniors, movers of commercial goods, and users of public transportation, in a manner that is suitable to the rural, suburban or urban context." The Mobility Plan includes the following five main goals that define the City's high-level mobility priorities:

- Safety First;
- World Class Infrastructure;
- Access for All Angelenos;
- Collaboration, Communication, and Informed Choices; and
- Clean Environments and Healthy Communities.

Each of the goals contains objectives and policies to support the achievement of those goals. The Project would be consistent with the relevant objectives and policies that support the goals of the Mobility Plan, as detailed in **Table 4.11-1**.

The Project would improve pedestrian accessibility within and around the Project Site by providing new landscaping, walkways, and sidewalks that meet their designated width. The access points on Allesandro Street would require new curb cuts to accommodate ingress and egress maneuvers, thereby reducing the total vehicle conflict points with pedestrians. Each driveway would be designed to provide safe access for pedestrians. Also, the Project's proximity to a variety of public transit options would provide residents, workers, and visitors convenient access to transit services. Therefore, the Project would be generally consistent with the applicable policies that support the goals and objectives set forth in the Mobility Plan.

Wilshire Community Plan

The Wilshire Community Plan (Community Plan) is one of 34 Community Plans established for different areas of the City to implement the policies of the General Plan Framework Element. There are four main areas designated as Community Commercial Centers in the Wilshire Community Plan. These include: the Crenshaw Community Center; the Pico Community Center; the Beverly-Fairfax Community Center, and the Vermont Community Center. The Pico Community Center is approximately 34 acres in size. It is centered around Pico, San Vicente and Venice Boulevards in the south-central portion of the Plan Area and is generally bounded by Pico Boulevard on the north; Venice Boulevard on the south; West Boulevard on the east; and Mansfield Avenue on the west. The Community Center includes a supermarket and shopping area, and the Santa Monica-Metro Bus Customer Service Center Station. The area has been developed with commercial land uses ranging from one- and two-story retail to high-rise office buildings and large shopping centers. The entire length of Pico Boulevard is designated as a Mixed Use Boulevard.

The Project would preserve and enhance the positive characteristics of existing residential and commercial neighborhoods while providing a new self-storage use that will improve the function, design and economic vitality of the adjacent commercial corridors. The Project will also advance a number of other objectives, goals and policies of the Community Plan, as evidenced by the consistency analysis in **Table 4.11-2**. As set forth therein, the Project would be consistent with the applicable goals, objectives, and policies set forth in the Community Plan.

Los Angeles Zoning Code

The City of Los Angeles Zoning Code (Chapter 1 of the LAMC) regulates development through zoning designations and development standards. The LAMC establishes objective zoning and development standards but was not adopted to avoid or mitigate environmental impacts. Therefore, no consistency analysis is required for purposes of determining potential impacts under this threshold. However, a brief discussion of the Project's consistency with the LAMC requirements for the Project Site is provided below for informational purposes.

Table 4.11-2
Project Consistency with the Wilshire Community Plan

Goals, Objectives, Policies	Analysis of Project Consistency
Goal 2 Encourage strong and competitive commercial sectors which promote economic vitality and serve the needs of the Wilshire community through well-designed, safe and accessible areas, while preserving historic and cultural character.	**Consistent.** The Project supports this goal by enhancing the utility and productivity of an underutilized, commercially zoned site through a use that is consistent with existing land use designations and zoning regulations. The development will not displace existing neighborhood-serving businesses and will not compromise historic or cultural resources. The project's design will meet applicable safety and accessibility standards, contributing to a well-maintained and functional commercial environment.
Objective 2-1 Preserve and strengthen viable commercial development and provide additional opportunities for new commercial development and services within existing commercial areas.	**Consistent.** The Project maintains and enhances viable commercial land by improving an existing site located within a designated commercial corridor. It does not propose a conversion to residential use or remove commercial capacity, and therefore directly supports the preservation and reinvestment in the community's commercial base
Policy 2-1.1 New commercial uses should be located in existing established commercial areas or shopping centers.	**Consistent.** The Project is sited within an established commercial corridor (San Vicente Boulevard) and is surrounded by a mix of commercial, public, and institutional uses. As such, the project fully aligns with this policy by reinforcing the role of an existing commercial area.
Policy 2-1.2 Protect existing and planned commercially zoned areas, especially in Regional Commercial Centers, from encroachment by stand-alone residential development by adhering to the community plan land use designations.	**Consistent.** The Project does not introduce stand-alone residential uses and adheres to the site's existing commercial zoning and land use designation. Therefore, it protects and reinforces the planned commercial function of the area, in accordance with the Wilshire Community Plan.
Policy 2-1.3 Enhance the viability of existing neighborhood stores and businesses which support the needs of local residents and are compatible with the neighborhood.	**Consistent.** While not a retail use, the Project is compatible with surrounding land uses and does not displace or conflict with neighborhood-serving businesses. Its redevelopment may improve foot traffic and visibility along the corridor, indirectly supporting nearby commercial activity and enhancing area vitality.
Wilshire Community Plan: https://planning.lacity.gov/odocument/3333424a-21b9-4f7b-86db-064926b9dcb9/Wilshire_Community_Plan.pdf	

The site is zoned C2-1-O (Commercial Zone, Height District 1, Oil Drilling Overlay) and Community Commercial land use designation. As discussed in Section 3, Project Description, of this MND, the proposed self-storage commercial uses would be consistent with the types of uses surrounding the Project Site. The City requires a Class 2 Conditional Use Permit (CU2) for a self-storage building for household goods within 500 feet or less from an A or R Zone or residential use. In addition to the requested CUP to permit the proposed storage uses within 500 feet of a R zone, the Applicant also requests a Zone and Height District Change to permit additional floor area up to a maximum Floor Area Ratio of 6:1 in lieu of 1.5:1 permitted in Height District 2 of the

C2 Zone. As discussed in Table 4.11-2, the Project would be consistent with the goals and policies of the Wilshire Community Plan. With the approval of the requests, the Project would not conflict with the LAMC. The Project further complies with landscaping, trash, and loading areas standards as required by the Zoning Code. Lighting for the project will be shielded and oriented on-site.

Overall, based on the above, the Project would not conflict with the RTP/SCS, LAMC, Community Plan, or the City of Los Angeles General Plan. Therefore, the Project would not cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect, and impacts would be less than significant.

Cumulative Impacts

There are three (3) related projects identified by the City within 0.5 miles of the Project (see **Table 4.21-1**). As discussed previously, the Project would be substantially consistent with the applicable plans, policies, or regulations associated with development of the Project Site. The City assesses the consistency of all development in the City with all applicable plans, policies, and regulations associated with those projects, on a project-by-project basis. Regardless of any potential inconsistencies the related projects may result in, because the Project would not result in any inconsistencies, the Project would not have the potential to contribute to any cumulative inconsistency impacts.

4.12 Mineral Resources

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a. Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	☐	☐	☐	☒
b. Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	☐	☐	☐	☒

Impact Analysis

a) Would the project result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?

No Impact. The Project Site is not located within a City-designated Mineral Resource Zone (MRZ) or Surface Mining District where significant mineral deposits are known to be present or within a mineral producing area as classified by the California Geologic Survey.[33,34,35] Much of the area within the MRZ sites in Los Angeles was developed with structures prior to the MRZ classification and, therefore, are unavailable for extraction.[36] The site is not within an MRZ. Neither the Project site nor the surrounding area is identified as an area containing mineral deposits of regional or statewide significance. Thus, the Project would not result in the loss of availability of a known mineral resource. Therefore, no impacts related this issue would occur as a result of the Project.

b) Would the project result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?

No Impact. As stated above, the Project would not result in the loss of availability of a mineral resource or a mineral resource recovery site. The Project Site is not located within a City-designated MRZ or Surface Mining District where significant mineral deposits are known to be present or within a mineral producing area as classified by the California Geologic Survey. Therefore, no impacts related to this issue would occur as a result of the Project.

33 City of Los Angeles, Department of City Planning, Los Angeles Citywide General Plan Framework, Draft Environmental Impact Report, January 19, 1995. Figure GS-1.

34 State of California Department of Conservation, California Geologic Survey, Aggregate Sustainability in California, 2018.

35 City of Los Angeles, Conservation Element of the Los Angeles City General Plan, January 2001, Exhibit A, p. 86.

36 City of Los Angeles Department of City Planning, Conservation Element, adopted September 2001, page II-58.

Cumulative Impacts

There are three (3) related projects identified by the City within 0.5 miles of the Project (see **Table 4.21-1**). As discussed previously, the Project would not result in any impacts related to mineral resources. Regardless of what degree the related projects could result in impacts related to mineral resources, because the Project would not result in any impacts related to mineral resources, the Project would not have the potential to contribute to any cumulative impacts.

4.13 Noise

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project result in:				
a. Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	☐	☐	☒	☐
b. Generation of excessive groundborne vibration or groundborne noise levels?	☐	☐	☒	☐
c. For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	☐	☐	☐	☒

The information and analysis presented below is largely based on the following source (refer to Appendix G):

G Noise and Vibration Impact Report, LSA, October 2025.

Impact Analysis

a) Would the project result in generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

Less Than Significant Impact. As discussed in detail below, the Project would not generate noise levels in excess of applicable thresholds, and Project impacts related to this issue would be less than significant.

Regulatory Setting

The applicable regulatory setting is summarized below. These regulations establish the framework for evaluating potential noise impacts associated with the Project and include applicable federal, state, and local standards governing environmental noise levels. For a detailed presentation and comprehensive discussion of the applicable regulatory setting, the reader is referred to the *Noise and Vibration Impact Report* prepared for the Project, included in Appendix G of this document.

City of Los Angeles Noise Element of the General Plan

In California, cities and counties are required to adopt noise elements as part of their general plans. The purpose of a noise element is to establish a land use pattern that minimizes the exposure of residents of the community to excessive noise. The Noise Element of the City's General Plan provides planning guidance related to noise. It identifies goals, objectives, and an implementation program to ensure that Los Angeles residents will be protected from noise that may be detrimental to their physical and mental health and general welfare. In the noise element, the City has established an acceptable limit of noise exposure for various land use categories. The purpose of these criteria is to provide a guideline for the City to locate appropriate land uses within acceptable noise environments. Table C included on page 11 of the *Noise and Vibration Impact Report* in Appendix G shows the City's land use compatibility standards for noise. Noise levels of 50 and 55 dBA CNEL are identified as being "normally acceptable" for single-family and multifamily residential land uses, respectively. Noise levels of 65 dBA CNEL are identified as being "normally acceptable" for office uses.

LAMC

Chapter XI of the LAMC establishes noise standards to limit noise affecting various land uses in the city. These standards apply to noise generated by "any machinery equipment, pump, fan, air-conditioning apparatus, or similar mechanical device." Table D included on page 11 of the *Noise and Vibration Impact Report* in Appendix G summarizes the presumed ambient noise levels for various land use types as specified in LAMC Section 111.03.

Where the ambient noise level is less than the presumed ambient noise level designated, the presumed ambient noise level shall be deemed to be the minimum ambient noise level. At the boundary line between two zones, the presumed ambient noise level of the quieter zone shall be used. In accordance with the Noise Regulation, a noise level increase of 5 dBA over the existing average ambient noise level at an adjacent property line represents a noise violation.

Thresholds of Significance

Construction Noise

- For construction activities that occur between 7:00 a.m. and 7:00 p.m. Monday through Friday, and between 8:00 a.m. and 6:00 p.m. on Saturdays, there is no numerical threshold above ambient noise levels.

- On- and off-site construction noise during daytime hours (7:00 a.m. and 7:00 p.m. Monday through Friday, and 8:00 a.m. to 6:00 p.m. on Saturdays) are limited to a maximum 80 dBA Leq (8-hour) absolute threshold at sensitive uses (at the property line or at the exterior of the building), including outdoor public recreational areas owned or maintained by a public agency. This standard does not apply to private residential balconies which may or may not extend past the exterior of a building, or to private residential recreational areas.

Mat concrete pour activities (and other types of concrete pour, which require an extended continuous pour beyond the allowable construction house) that are required to occur during nighttime hours for less than five days are exempt from this threshold.

Operational Noise

A project could have a significant noise impact if the following occurs:

- The Project causes the ambient noise levels measured at the property line of affected noise-sensitive uses to increase by 3 dBA in CNEL to or within the "normally unacceptable" or "clearly unacceptable" category (refer to Table C included on page 11 of the *Noise and Vibration Impact Report* in Appendix G); or

- The Project causes the ambient noise levels measured at the property line of affected noise-sensitive uses to increase by 5 dBA in CNEL or greater and remain within the "normally acceptable" or "conditionally acceptable" category; or

- Project-related on-site operational (noise sources, such as outdoor building mechanical/electrical equipment, loading dock, parking facilities, increase the ambient noise level (hourly Leq) at noise-sensitive uses by 5 dBA or more.

Impact Analysis

Construction Noise

Two main types of short-term construction noise would occur. The first is traffic-related noise from worker commutes and material deliveries. Although individual heavy trucks can generate loud, momentary noise (up to 84 dBA Lmax at 50 feet), the added construction traffic, equivalent to about 442 adjusted trips per day, would increase noise along San Vicente Boulevard by only about 0.1 dBA, which is far below the 3 dBA threshold of perceptibility. Therefore, traffic-related construction noise would be less than significant. A brief nighttime concrete pour would occur but would last fewer than five days and is exempt.

The second type of noise comes from on-site construction activities such as demolition, grading, building construction, trenching, and paving. Each construction phase uses different equipment and as a result, generates different noise levels. Using Federal Highway Administration reference noise levels and equipment usage factors, hourly and composite noise levels were calculated. Typical equipment produces 55 to 95 dBA Lmax at 50 feet, depending on type. Composite noise levels for the Project would range from 76 to 90 dBA Leq at 50 feet, with the loudest phases occurring during paving and building construction. Noise levels decrease by about 6 dBA for every doubling of distance. Sensitive receptors and phase-specific noise levels were then estimated based on these calculations (refer to **Table 4.13-1**).

Table 4.13-1
Estimated Construction Noise Levels at Nearest Receptors

Receptor (Location)	Composite Noise Level (dBA Leq at 50 ft)	Distance (ft)	Composite Noise Level (dBA Leq))
Commercial (South)	90	65	87
Residential (North)	90	215	77
Commercial (East)	90	220	77
Commercial (West)	90	250	76

ft = feet

Source: LSA, 2025. Refer to **Appendix G.**

While construction noise would vary, it is expected that composite noise levels during construction would reach 87 dBA Leq at the nearest commercial uses to the south and 77 dBA Leq at the nearest residential uses to the north during daytime hours. These predicted noise levels would only occur when all construction equipment is operating simultaneously and are assumed to be rather conservative in nature. While construction-related short-term noise levels have the potential to be higher than existing ambient noise levels in the Project Site area under existing conditions, the noise impacts would no longer occur once Project construction is completed.

As stated above, the City's Noise Ordinance regulates noise impacts associated with construction activities. The proposed project would comply with the construction hours specified in the City's Noise Ordinance, which states that construction activities are not allowed between the hours of 9:00 p.m. and 7:00 a.m. on any given day. The LAMC also prohibits noise from construction equipment within 500 ft of a residential zone before 8 a.m. or after 6 p.m. on any Saturday or national holiday nor at any time on any Sunday.

As it relates to off-site uses, construction-related noise levels would remain below the 80 dBA construction noise level criteria for daytime construction noise level criteria as established by the City for residential uses. Therefore, the Project's construction-related noise impacts would be less than significant.

Operational Noise

As a result of the implementation of the Project, off-site traffic volumes on surrounding roadways have the potential to increase. The Project is estimated to generate approximately 194 net daily trips.[37] According to the LADOT Traffic Counts Summary, the existing average daily traffic (ADT) on San Vicente Boulevard is approximately 26,266 ADT in the vicinity of the Project Site. The results of the calculations show that an increase of approximately 0.1 dBA CNEL is expected along San Vicente Boulevard. A noise level increase of less than 1 dBA would not be perceptible to the human ear. Therefore, the Project's traffic noise impact would be less than significant.

The Project would have various rooftop mechanical equipment, including HVAC units on the proposed self-storage building. Based on the Project Site plan, the Project is assumed to have three (3) rooftop HVAC units and assumed to operate 24 hours per day. The HVAC equipment would generate sound power levels (Lw) of up to 87 dBA Lw or a sound pressure level of 72 dBA

[37] Level of Service (LOS) Screening Analysis, EPD Solutions, September 16, 2025. Refer to Appendix H.

Leq at 5 feet, based on manufacturer data. This level is used as a reference level and is not indicative of the level at surrounding receptors.

Tables 4.13-2 and **4.13-3** show the hourly noise levels generated by HVAC equipment at the closest offsite land uses. The results indicate that operational noise levels would be below the daytime hourly noise level standard of 50 dBA Leq for residential uses. Additionally, operational noise levels would be below the lowest nighttime ambient noise level at the nearest residential uses to the north. Therefore, the Project's operational noise impacts related to HVAC equipment would be less than significant.

Table 4.13-2
Estimated Daytime and Nighttime Exterior Noise Levels

Receptor	Direction	Existing Lowest Daytime/Nighttime Noise Levels (dBA Leq)	Project Generated Noise Levels (dBA Leq)	Significant Impact?
Residential	North	67.1/54.8	45.3	No
Source: LSA, 2025. Refer to **Appendix G**.				

b) Would the project result in generation of excessive groundborne vibration or groundborne noise levels?

Less Than Significant Impact. As discussed below, the Project would not generate excessive groundborne vibration or groundborne noise levels. Therefore, Project impacts related to this issue would be less than significant.

Thresholds of Significance

- For construction activities that occur between 7:00 a.m. and 7:00 p.m. Monday through Friday, and between 8:00 a.m. and 6:00 p.m. on Saturdays, there is no numerical threshold related to human annoyance.
- During nighttime hours (between 7:00 p.m. and 7:00 a.m. Monday through Friday, and between 6:00 p.m. and 8:00 a.m. on Saturdays), and anytime on Sundays or national holidays, construction activities shall not generate groundborne vibration levels that exceed 80 VdB at the exterior of a sensitive use building.
- Architectural Building Damage—Construction activities shall not exceed the following building damage thresholds for the identified structures:
    - Fragile Buildings: 0.1 peak particle velocity (PPV) (inches/second [in/sec])
    - Historic Buildings: 0.25 PPV (in/sec)
    - Older Residential Structures: 0.3 PPV (in/sec)
    - New Residential Structures: 0.5 PPV (in/sec)
    - Modern Industrial/Commercial Buildings: 0.5 PPV (in/sec)

For vibration building damage, a threshold of 0.5 PPV (in/sec) has been used as the criterion.

Impact Analysis

Construction Vibration

This construction vibration impact analysis discusses the level of human annoyance using vibration levels in root-mean-square RMS) vibration velocity decibels (VdB) and assesses the potential for building damages using vibration levels in PPV (in/sec). This is because vibration levels calculated in RMS are best for characterizing human response to building vibration, while vibration level in PPV is best for characterizing potential for damage.

Table 4.13-3 shows the PPV and VdB values at 25 feet from the construction vibration source. As shown, bulldozers, and other heavy-tracked construction equipment (expected to be used for this project) generate approximately 0.089 PPV in/sec or 87 VdB of ground-borne vibration when measured at 25 feet, based on the Federal Transportation Administration (FTA) Manual. The distance to the nearest buildings for vibration impact analysis is measured between the nearest off-site buildings and the Project construction boundary (assuming the construction equipment would be used at or near the project setback line).

Table 4.13-3
Vibration Source Amplitudes for Construction Equipment

Equipment	Reference PPV/L_V at 25 ft	
	PPV (in/sec)	L_V (VdB)[1]
Pile Driver (Impact), Typical	0.644	104
Pile Driver (Sonic), Typical	0.170	93
Vibratory Roller	0.210	94
Hoe Ram	0.089	87
Large Bulldozer[2]	**0.089**	**87**
Caisson Drilling	0.089	87
Loaded Trucks[2]	**0.076**	**86**
Jackhammer	0.035	79
Small Bulldozer	0.003	58

µin/sec = microinches per second ft = foot/feet FTA = Federal Transit Administration
in/sec = inch/inches per second LV = velocity in decibels PPV = peak particle velocity
RMS = root-mean-square VdB = vibration velocity decibels

1 RMS vibration velocity in decibels (VdB) is 1 µin/sec.
2 Equipment shown in bold is expected to be used on site.

Source: Transit Noise and Vibration Impact Assessment Manual (FTA 2018).

As shown in **Table 4.13-4**, the Project's vibration levels are estimated to approach 76 VdB at the closest commercial uses to the south and 59 VdB at the nearest residential use to the north and would not exceed the annoyance threshold of 80 VdB. As shown in **Table 4.13-5**, vibration levels are estimated to approach 0.191 in/sec PPV at the nearest surrounding structures to the south and would not exceed the 0.5 PPV in/sec damage threshold considered safe for modern commercial buildings. Therefore, the Project's vibration impacts would be less than significant.

Table 4.13-4
Estimated Construction Vibration Annoyance Levels at Nearest Receptor

Receptor (Location)	Reference Vibration Level (VdB) at 25 feet	Distance (Feet)	Vibration Level (VdB)

Commercial (South)	0.089	15	0.191
Residential (North)		165	0.005
Commercial (East)		70	0.019
Commercial (West)		100	0.011
PPV = peak particle velocity Source: Transit Noise and Vibration Impact Assessment Manual (FTA 2018).			

Operational Vibration

During operation of the self-storage facility, there would be no significant stationary sources of groundborne vibration, such as heavy equipment or industrial operations. Operational groundborne vibration in the Project Site's vicinity would be generated by its related vehicle travel on local roadways. However, road vehicles rarely create vibration levels perceptible to humans unless road surfaces are poorly maintained and have potholes or bumps. As a result, the Project's long-term vibration impacts would not be significant.

c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

No Impact. The Project Site is not located within the vicinity of a private airstrip or an airport land use plan. The nearest airport is Los Angeles International Airport (LAX) located 7.15 miles southwest of the site. Thus, the Project would not expose people residing or working in the project area to excessive airport-related noise levels. Therefore, no impacts related to this issue would occur as a result of the Project.

Cumulative Impacts

There are three (3) related projects identified by the City within 0.5 miles of the Project (see **Table 4.21-1**). None of the related projects are within 1,000 feet of the Project Site. Due to distance and intervening development, the related projects do not share a noise environment with the Project. Noise generated at the sites of the related projects would not be audible to the sensitive receptors near the Project Site. Therefore, cumulative noise impacts would be less than significant.

4.14 Population and Housing

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a. Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	☐	☐	☒	☐
b. Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?	☐	☐	☐	☒

Impact Analysis

a) Would the project induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?

Less Than Significant Impact. The Project includes infill-development of the Project Site and redevelopment of the site with a 161,645-square-foot self-storage facility, which would employ approximately 11 people. The types of jobs that would be made available by the Project could be filled by the existing workforce in the Project Site area, and the Project would not cause a substantial number of new residents to move to the Project Site area and surrounding communities to fill the employment positions. Also, the Project does not include the development of housing and would be served by existing roadways and utility infrastructure. For these reasons, the Project would not induce substantial population growth, and impacts related to this issue would be less than significant.

b) Would the project displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?

No Impact. The Project Site contains a single-story, 22,706-square-foot warehouse building. As no housing currently exists on the Project Site, the Project would not cause the displacement of any persons, housing, or require the construction of housing elsewhere. Therefore, no impacts related to displacement of people or housing would occur.

Cumulative Impacts

There are three (3) related projects identified by the City within 0.5 miles of the Project (see **Table 4.21-1**). The related projects are residential projects, while collectively introducing approximately 178 new housing units, represent infill development consistent with the Los Angeles General Plan and regional growth forecasts. The related projects are located within an urbanized area well-

served by infrastructure and public services, and do not require the extension of new infrastructure that could induce unplanned growth. New housing projects in Los Angeles help the City meet its housing goals and needs by increasing the total housing stock and directly addressing the region's long-standing quantitative housing shortage. Adding new residential units, both market-rate and affordable, also helps ensure that lower-income households have meaningful access to housing through the provision of affordable and mixed-income opportunities. In addition, locating new housing in infill areas and near transit supports sustainable, transit-oriented development patterns that reduce VMT and advance the City's climate and mobility goals. Importantly, new housing projects do not necessarily induce population growth beyond what is already projected in regional planning forecasts; rather, they help accommodate the population that already exists and is expected to grow under adopted demographic projections. By providing needed capacity for existing and anticipated residents, new housing development improves housing availability, reduces overcrowding, and supports the City's ability to meet its Housing Element and Regional Housing Needs Assessment (RHNA) obligations. As discussed above, the Project would not generate residential population or displace existing housing or residents. Additionally, the Project's employment could be filled by the existing workforce in the Project Ste area. Thus, would not contribute to population growth or housing demand. For all of these reasons, cumulative population and housing impacts would be less than significant.

4.15 Public Services

Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a. Fire protection?	☐	☐	☒	☐
b. Police protection?	☐	☐	☒	☐
c. Schools?	☐	☐	☒	☐
d. Parks?	☐	☐	☐	☒
e. Other public facilities?	☐	☐	☐	☒

Impact Analysis

a) Fire Protection?

Less Than Significant Impact. The Project Site is served by the Los Angeles Fire Department (LAFD), which provides fire suppression, emergency medical response, and life-safety services throughout the City. Fire Station #68 is the station closest to the Project Site (refer to Table 4.15-1) and is capable of responding to incidents at the site within the City's established response standards.

The Project involves demolition of an existing single-story warehouse and construction of a new seven-story, approximately 161,645-square-foot self-storage facility with approximately 11 employees and low daily occupancy. Self-storage facilities typically generate substantially fewer emergency calls than residential, commercial office, or retail uses due to the low-intensity nature of the use and the absence of activities involving elevated fire risk.

Table 4.15-1
Fire Stations

No.	Address	Distance	Equipment	Operational Response Time	Incident Counts
68	5023 W. Washington Boulevard	0.9 miles	Engine Paramedic Ambulance Brush Control	EMS: 7:20 min Non-EMS: 7:20 min	EMS: 2,330 Non-EMS: 345
Response Time: (January to June 2025) average time (turnout time + travel time) in the station area. Incident counts: (January to June 2025). Non-EMS is fire emergency. EMS is emergency medical service. http://lafd.org/sites/default/files/pdffiles/11-03-2014AllStations.pdf Light Force: Truck company and single engine. Task Force: Truck company and two fire engines. LAFD November 2022 Fire Station Directory.					

The Project would be required to comply with all applicable provisions of the Los Angeles Fire Code, including requirements for fire-flow, fire hydrant spacing, emergency vehicle access, automatic fire sprinkler systems, fire alarm and detection systems, standpipes, and other life-safety measures. All fire/life-safety systems and site access features would be reviewed and approved by LAFD during plan check, ensuring that the building incorporates adequate fire protection measures.

In addition, the Project includes a comprehensive security program that would further support life-safety conditions on site. The building would feature premium, professionally managed security systems, including internally accessed storage units; a unique passcode required for building entry and elevator usage; logged entry and exit times; and maximum parking-lot lighting consistent with security best practices. Access to the building would occur through the ground-floor lobby, with elevators and stairwells located at the southwestern and northeastern corners of the structure. The Project would include 24/7 digital security-camera monitoring of the parking area, loading zones, elevator lobbies, and all internal corridors, with no blind spots. Storage-unit locks would be provided by USSC to ensure consistent, high-grade security standards. Customer access hours would be limited between 6:00 AM and 11:00 PM, and passcodes would not permit access outside of those hours. The security program would also include controlled access points, monitored entrances and exits, monitoring of fire/life-safety systems, and security lighting, all of which reduce opportunities for unsafe conditions and minimize the potential need for emergency response.

Construction activities would be temporary, would occur in an existing urban setting already served by LAFD, and would not require specialized fire-service resources beyond typical construction oversight. Construction staging would be reviewed to maintain emergency access along San Vicente Boulevard, Longwood Avenue, and Tremaine Avenue.

Given the Project's low-intensity use; its location within an area already served by LAFD; the incorporation of compliant fire/life-safety systems and secured-access features; and the fact that the Project would not introduce substantial population or hazardous operations, the Project would not necessitate new or expanded fire protection facilities. Therefore, Project impacts related to fire protection services would be less than significant.

Cumulative Impacts

There are three (3) related projects identified by the City within 0.5 miles of the Project (see **Table 4.21-1**). Cumulative conditions consider implementation of the Project together with these three (3) residential related projects, which together would add a total of 178 new dwelling units in the Project Site area. Residential developments typically generate the highest demand for fire protection services because they introduce new long-term population, increased emergency medical service needs, and 24-hour occupancy patterns. In contrast, the Project is a low-intensity self-storage facility with minimal staffing, limited customer presence, and restricted operating hours. The Project would not introduce residential population or substantial on-site activity that would cumulatively contribute to increased emergency call volumes. The Project also incorporates extensive fire/life-safety measures, including automatic sprinklers, controlled access, monitored security systems, and full compliance with the Los Angeles Fire Code, which

minimize fire-related risks. The related projects' incremental increase in residential population would be served by existing LAFD stations operating within the City's response standards and funded through standard development fees. The Project itself would not generate demand for new or expanded fire facilities and would not combine with the related projects to create a cumulatively considerable fire-service impact. Therefore, cumulative impacts related to fire protection services would be less than significant.

b) Police Protection?

Less Than Significant Impact. Police protection services in the Project area are provided by the Los Angeles Police Department (LAPD), Wilshire Division. The Project Site is located in a fully urbanized area currently served by existing patrol routes, response infrastructure, and established emergency service networks. The Project would replace an existing single-story warehouse with a new, seven-story self-storage facility, a land use that typically generates very low levels of on-site activity and minimal police-service calls when compared to residential, retail, or entertainment uses.

The Project includes a robust security program that would further reduce potential demand for police services. Security features include a controlled-access building with internally accessed storage units; a unique passcode required for building entry, elevator use, and after-hours restrictions; logged entry and exit times; maximum parking-lot security lighting; and high-grade USSC-provided storage-unit locks. The building would be monitored 24 hours a day through digital surveillance cameras covering all parking areas, loading zones, elevator lobbies, and interior corridors with no blind spots. Customer access would be limited to 6:00 AM to 11:00 PM, and pin codes would not function outside of those hours. These features substantially limit unauthorized access, discourage loitering, and reduce opportunities for theft or vandalism.

The Project would employ minimal staff and experience low on-site occupancy throughout the day. The security program would also include monitoring of entrances and exits, controlled access points, and interior/exterior security lighting that conforms to industry best practices. As a result, the Project would not generate substantial new demand for police protection services or necessitate the construction or expansion of police facilities. Therefore, Project impacts related to police protection services would be less than significant.

Cumulative Impacts

There are three (3) related projects identified by the City within 0.5 miles of the Project (see **Table 4.21-1**). These three (3) residential related projects Could introduce new long-term population to the Project Site area, potentially increasing demand for police protection services as residential uses typically generate higher call volumes, greater 24-hour activity, and a broader range of service needs. However, these incremental population increases are associated with needed housing in the City, are within regional growth projections and would be supported by the LAPD Wilshire Division's existing patrol districts and response infrastructure. The Project would not include residential population, does not involve uses typically associated with elevated police demand, and incorporates extensive security features that reduce opportunities for crime. These include controlled access; individualized passcodes; time-restricted customer access; 24/7 digital surveillance with no blind spots; monitored entry/exit logs; and security lighting. Such measures substantially reduce the likelihood of theft, vandalism, or unauthorized entry and reduce the need

for LAPD response. Because the Project would not meaningfully add to long-term population or service demand, and because its security program minimizes potential site-specific incidents, the Project's incremental contribution to cumulative police service needs would be negligible. The related projects' residential uses would generate police-service demand consistent with normal growth levels, and LAPD funding mechanisms remain in place to support such incremental demand. Therefore, cumulative impacts related to police protection services would be less than significant.

c) Schools?

Less Than Significant Impact.

The Project Site is located within the boundaries of the Los Angeles Unified School District (LAUSD), which is divided into six local districts. The Project is located within the West Local District. The Project is served by the following LAUSD schools:

- Alta Loma Elementary School (grades K-5), 1745 Vineyard Avenue, 1,800 feet south of the site
- Johnnie L. Cochran Jr Middle School (grades 6-8), 4066 Johnnie Cochran Vista, 4,400 feet southeast of the site
- Los Angeles High School (grades 9-12), 4650 Olympic Boulevard, 2,775 feet northeast of the site

As shown in **Table 4.15-2**, the Project would generate approximately 3 students.

Table 4.15-2
Estimated Student Generation

Land Use	Project Amount	Student Generation			
		Elementary	Middle	High	Total
Multi-Family Dwelling Units	0	-	-	-	**-**
Commercial	175,047 sf	1	1	1	**3**
Total		**1**	**1**	**1**	**3**

Los Angeles Unified School District (LAUSD), 2024 Developer Fee Justification Study, February 2024, https://www.lausd.org/domain/921, accessed June 17, 2024.
Table 3, Student Generation Factors, Students per household: 0.19142 elementary (grades TK-6), 0.05279 middle (grades 7-8); 0.10504 high (grades 9-12).
Table 15, Summary of Commercial and Industrial Uses, Students per 1,000 sf: 0.489 for neighborhood shopping centers, 0.204 for lodging, 0.011 for rental self-storage.
Since the Study does not specify the grade levels of students that are generated from non-residential land uses, such students are assumed to be divided among the residential generation factors (i.e. approximately 55 percent for elementary, 15 percent for middle, and 30 percent for high school.

Pursuant to SB 50, the Applicant would be required to pay development fees for schools to LAUSD prior to the issuance of the Project's building permit. Pursuant to Government Code Section 65995, the payment of these fees fully addresses Project-related school impacts. Thus, the Project would not result in substantial adverse physical impacts associated with the provision

of new or physically altered government facilities (i.e., schools), need for new or physically altered governmental facilities, the construction of which would cause significant environmental impacts, in order to maintain acceptable service ratios or other performance objectives for schools. The Project would not result in the need for new or expanded school facilities. Therefore, Project impacts related to schools would be less than significant.

Cumulative Impacts

There are three (3) related projects identified by the City within 0.5 miles of the Project (see **Table 4.21-1**). These related projects are located within the LAUSD service boundaries and include development of a total of 178 new residential units, which could incrementally increase school enrollment. LAUSD collects statutory developer school fees to address incremental school facility demand from new housing. However, similar to the Project Applicant, the applicants of all the related projects would be required to pay the state-mandated applicable school fees to the LAUSD to ensure that no significant impacts on school services would occur. Therefore, the cumulative impact on school services would be less than significant.

d) Parks?

No Impact. The Project includes development of a self-storage facility that would employ a small number of staff responsible for facility management, customer service, and security oversight. These employees would be present on-site primarily during daytime business hours and would not constitute a new residential population within the service area of local parks. Employee presence at a workplace does not generate demand for park space in the same manner as residential development, which increases long-term population, household occupancy, and recreational needs. Any employees of the self-storage facility would already reside in the region and utilize parks and recreational facilities near their existing homes, not near the Project Site. Their presence at the site would be limited to work hours and would not create new or permanent park-serving population. As a result, employees associated with the Project would not increase demand for public parks or require new or expanded park facilities. Therefore, no impacts related to parks would occur as a result of the Project.

Cumulative Impacts

There are three (3) related projects identified by the City within 0.5 miles of the Project (see **Table 4.21-1**). These three (3) related projects include development of a total of 178 new residential units, which could incrementally increase demand for parks. This increase would be partially offset through the City's park impact fee programs (e.g., the Quimby Act and the City's Park Fee Ordinance), which require residential developers to contribute funding for park improvements, expansion, or acquisition. As discussed above, the Project is non-residential and does not generate population or create new demands on park facilities. Customers visit briefly and do not use park amenities. Employee counts would be minimal and would not meaningfully affect recreational demand. Therefore, cumulative impacts related to parks would be less than significant.

e) Other Public Facilities?

No Impact. The Project includes development of a self-storage facility with minimal staffing and no residential component. Library service demands are closely tied to increases in permanent population because residential uses generate long-term demand for library resources, including borrowing materials, attending programs, and utilizing on-site study spaces and computer facilities. Non-residential, employment-based projects like the proposed self-storage facility do not generate comparable demand for library services. The Project would employ only a small number of workers who would be on site during daytime business hours. These employees would already reside within the region and would continue to utilize library services near their existing homes, not near the Project Site. Customer visits to the self-storage facility would be brief, intermittent, and service-oriented and would not increase demand for library materials or programs. The Project would not introduce residents, schools, or other uses that traditionally increase library demand. Because the Project would not generate new population and would not create or indirectly stimulate long-term use of the Los Angeles Public Library system, the Project would not result in the need for new or expanded library facilities. Therefore, Project impacts related to library services would be less than significant.

Cumulative Impacts

There are three (3) related projects identified by the City within 0.5 miles of the Project (see **Table 4.21-1**). These three (3) related projects include development of a total of 178 new residential units, which could incrementally increase demand for library services, given that library service demand is primarily population-based. However, this increase is within projected regional growth and consistent with projected growth forecasts. As discussed above, the Project would not introduce new residents, would not include uses that would increase library demand, and would only employ a small number of staff. Customers of the self-storage facility are intermittent and do not use library services as part of the Project's operations. Therefore, cumulative impacts related to library services would be less than significant.

4.16 Recreation

		Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a.	Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	☐	☐	☐	☒
b.	Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?	☐	☐	☐	☒

Impact Analysis

a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facilities would occur or be accelerated?

No Impact. The Project includes development of a self-storage facility that would employ a small number of staff responsible for facility management, customer service, and security oversight. These employees would be present on-site primarily during daytime business hours and would not constitute a new residential population within the service area of local parks and recreational facilities. Employee presence at a workplace does not generate demand for parks and recreational facilities in the same manner as residential development, which increases long-term population, household occupancy, and recreational needs. Any employees of the self-storage facility would already reside in the region and utilize parks and recreational facilities near their existing homes, not near the Project Site. Their presence at the site would be limited to work hours and would not create new or permanent park-serving population. As a result, employees associated with the Project would not increase demand for public parks or require new or expanded park facilities. Thus, the Project would not increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facilities would occur or be accelerated. Therefore, no impacts related to this issue would occur as a result of the Project.

b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?

No Impact. The Project does not include the development of any parks and recreational facilities. Thus, the Project would not require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment. Therefore, no impacts related to this issue would occur as a result of the Project.

Cumulative Impacts

There are three (3) related projects identified by the City within 0.5 miles of the Project (see **Table 4.21-1**). These three (3) related projects include development of a total of 178 new residential units, which could incrementally increase demand for parks and recreational facilities. This increase would be partially offset through the City's park impact fee programs (e.g., the Quimby Act and the City's Park Fee Ordinance), which require residential developers to contribute funding for park improvements, expansion, or acquisition. As discussed above, the Project is non-residential and does not generate population or create new demands on park and recreational facilities. Customers visit briefly and do not use park amenities. Employee counts would be minimal and would not meaningfully affect recreational demand. Therefore, cumulative impacts related to parks and recreational facilities would be less than significant.

4.17 Transportation

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a. Conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle, and pedestrian facilities?	☐	☐	☒	☐
b. Conflict or be inconsistent with CEQA Guidelines Section 15064.3, subdivision (b)?	☐	☐	☒	☐
c. Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	☐	☐	☒	☐
d. Result in inadequate emergency access?	☐	☐	☒	☐

The information and analysis presented below is largely based on the following source (refer to Appendix H):

H VMT Screening Analysis, EPD Solutions, September 16, 2025

Impact Analysis

a) Would the project conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle, and pedestrian facilities?

Less Than Significant Impact. Pursuant to the LADOT August 2022 *Transportation Assessment Guidelines* (TAG), projects should be analyzed to identify potential conflicts with programs, policies, plans, or ordinances that are adopted to protect the environment. Pursuant to the TAG, in general, transportation policies or standards adopted to protect the environment are those that support multimodal transportation options and a reduction in VMT. Each of the documents listed in the TAG (Table 2.1-1) was reviewed for applicability to the Project, and the relevant transportation-related policies are summarized below, along with the Project's conformance or non-conformance with each.

Mobility Plan 2035

The Mobility Plan combines "complete street" principles with the following five goals that define the City's mobility priorities:

1. Safety First: Design and operate streets in a way that enables safe access for all users, regardless of age, ability, or transportation mode of choice.

2. World Class Infrastructure: A well-maintained and connected network of streets, paths, bikeways, trails, and more provides Angelenos with the optimum variety of mode choices.

3. Access for All Angelenos: A fair and equitable system much be accessible to all and must pay particularly close attention to the most vulnerable users.

4. Collaboration, Communication, and Informed Choices: The impact of new technologies on our day-to-day mobility demands will continue to become increasingly important to the future. The amount of information made available by new technologies must be managed responsibly in the future.

5. Clean Environments and Healthy Communities: Active transportation modes such as bicycling and walking can significantly improve personal fitness and create new opportunities for social interaction, while lessening impacts on the environment.

The Mobility Plan identifies key corridors within the Project's transportation study area as components of various "mobility-enhanced networks." Though no new specific improvements have been identified and there is no schedule for implementation, the mobility-enhanced networks represent a focus on improving a particular aspect of urban mobility, including transit, neighborhood connectivity, bicycles, pedestrians, and vehicles. The Project would be designed consistent with the mobility-enhanced networks and would not impede the City's ability to implement improvements along the streets surrounding the Project Site.

The Mobility Plan also designates street and sidewalk width standards based on the functional classification. LAMC Section 12.37 states that a project must dedicate and improve adjacent streets to half-right of way standards consistent with the Mobility Plan. The Project is not required to make additional dedications to the public rights-of-way.

The Project also supports initiatives of the Mobility Plan to create transit-oriented developments as it results in the construction of a residential mixed-use development on an infill site served by transit, supporting Metro ridership goals and enhancing transportation mobility. The Project is located in an urbanized area within proximity to transit stops that would encourage use of alternative transportation modes. The Project includes pedestrian enhancements surrounding the Project Site, such as landscaping, sidewalk improvements, and pedestrian access to the Project Site. The Project's proposed land use and design features including site access; pedestrian, bicycle, and transit accessibility; and loading areas, would not conflict with the policies of the Mobility Plan 2035.

Wilshire Community Plan

The Project does not conflict with the transportation components of the Wilshire Community Plan. As previously discussed, the Project incorporates bicycle parking that would improve mobility for visitors and promote the use of alternative transportation modes.

2020–2045 RTP/SCS

Objective 6 of the 2020–2045 RTP/SCS calls for a circulation system that is coordinated with land uses and densities and adequate to accommodate traffic, and for the expansion and improvement of public transportation service. The Project Site is located in an urbanized area and designated PGAs, including an HQTA, NMA, and Livable Corridor, that is well served by public transit. The Project would include various streetscape improvements and ground level commercial uses that would activate the surrounding pedestrian environment and enhance walkability. Furthermore, the Project would provide bicycle parking per LAMC requirements. Thus, the Project would coordinate land use and circulation by promoting opportunities for the use of alternative modes of transportation, including use of public transportation, walking, and bicycling.

b) Would the project conflict or be inconsistent with CEQA Guidelines Section 15064.3, subdivision (b)?

Less Than Significant. SB 743, which went into effect in January 2014, requires the Governor's Office of Planning and Research to change the way public agencies evaluate transportation impacts of projects under CEQA. Under SB 743, the focus of transportation analysis has shifted from driver delay, which is typically measured by traffic level of service (LOS), to a new measurement that better addresses the State's goals on reduction of greenhouse gas emissions, creation of multi-modal transportation, and promotion of mixed-use developments. CEQA Guidelines Section 15064.3 states that VMT is the most appropriate measure of transportation impacts, replacing LOS.

On July 30, 2019, the City adopted the CEQA Transportation Analysis Update, which sets forth the revised thresholds of significance for evaluating transportation impacts as well as screening and evaluation criteria for determining impacts. The CEQA Transportation Analysis Update establishes VMT as the City's formal method of evaluating a project's transportation impacts. In conjunction with this update, LADOT adopted its TAG, which defines the methodology for analyzing a project's transportation impacts in accordance with SB 743. The TAG identifies distinct thresholds regarding significant VMT impacts for the seven Area Planning Commission (APC) areas in Los Angeles.

According to the LADOT TAG, daily vehicle trips should be estimated using either the City's VMT Calculator tool or the most recent edition of the ITE Trip Generation Manual. For this analysis, the most recent edition of the ITE Trip Generation Manual (12th Edition) was used. The Project is estimated to generate 194 net new daily passenger vehicle trips, which is below the 250-daily-trip threshold. As a result, the Project can be presumed to have a less-than-significant impact on VMT. Thus, the Project would not conflict or be inconsistent with CEQA Guidelines Section 15064.3, subdivision (b). Therefore, Project impacts related to this issue would be less than significant.

c) Would the project substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?

Less Than Significant Impact. Pursuant to LADOT's TAG (Threshold T-3) the determination of significance regarding hazards due to a geometric design feature or incompatible uses should be based on commonly-accepted traffic engineering design standards (while considering the amount of pedestrian and bicycle activity crossing vehicular access points, sight distance and physical conditions such as curves or grade changes, and the project's proximity to streets identified in the High Injury Network or the Safe Routes to School program.

The Project's vehicular driveways would be designed to City standards and would provide adequate sight distance. They would not require the removal or relocation of existing public transit stops. Loading would be provided on-site. The new driveways would be designed in accordance with the regulatory standards and subject to the approval of LADOT and Bureau of Engineering.

Pedestrian and bicycle volumes are expected to increase to and from the Project Site. Nonetheless, the Project is designed to encourage and accommodate the increases in pedestrian and bicycle activity to and from the Project Site, though not in sufficient quantities to result in a significant conflict with the vehicles using the access points. Further, with the reduction of three existing driveways to two, the Project would be designed to minimize vehicle/pedestrian conflicts.

Currently, the sidewalks along the Project frontages provide a continuous pedestrian connection to the Project Site. The Project includes pedestrian enhancements surrounding the Project Site, such as landscaping and sidewalk improvements. Pedestrian access to the Project would be provided via street-facing entrances along Longwood Avenue. This would allow easy access to the public right-of-way and other destinations. The Project's pedestrian access locations would be designed to the City standards and would not increase hazards by introducing entrances that would cause visibility issues or conflicts between vehicles and pedestrians.

Further, pedestrian and bicycle access to the Project Site would be separated from vehicular traffic. The Project improvements would not preclude or interfere with the implementation of any other future roadway improvements benefiting pedestrians or bicycles. The Project driveway would be designed and placed to provide adequate sight distance and pedestrian refuge areas to limit potential vehicular-bicycle or vehicular-pedestrian conflicts. Based on the above, the Project does not present geometric design hazards related to mobility or pedestrian accessibility. Thus, the Project would not substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment). Therefore, Project impacts related to this issue would be less than significant.

d) Would the project result in inadequate emergency access?

Less Than Significant Impact. The Project would not result in inadequate emergency access. The Project Site is located along San Vicente Boulevard, a major arterial roadway that provides direct and unobstructed access for emergency vehicles. Additional access is available via Longwood Avenue and Tremaine Avenue along the western and eastern edges of the block, respectively. During construction, all activities would be required to comply with standard City conditions ensuring that emergency access is maintained at all times, including keeping adjacent

rights-of-way clear, maintaining unobstructed travel lanes, and coordinating any temporary closures with the LAFD.

During operation, the Project has been designed to meet all applicable LAFD access requirements, including fire-lane clearances, on-site maneuvering, and fire/life-safety provisions that would be reviewed and approved during LAFD plan check. Emergency personnel would have direct access to the ground-floor lobby, elevators, stairwells located at the southwestern and northeastern corners of the building, and all interior corridors. The Project would include controlled access, security monitoring, and adequate lighting that would assist responders in locating and entering the building quickly if needed.

The Project would not alter the surrounding street network, obstruct emergency routes, or introduce any physical design feature that would impede emergency response. Given the site's urban location, maintained roadway access, and compliance with Fire Code and LAFD plan-review requirements, the Project would not result in inadequate emergency access. Therefore, Project impacts related to this issue would be less than significant.

Cumulative Impacts

OPR's *Technical Advisory on Evaluating Transportation Impacts in CEQA* states the following regarding cumulative traffic impacts:

> *Cumulative Impacts. A project's cumulative impacts are based on an assessment of whether the "incremental effects of an individual project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects." (Pub. Resources Code, § 21083, subd. (b)(2); see CEQA Guidelines, § 15064, subd. (h)(1).) When using an absolute VMT metric, i.e., total VMT (as recommended below for retail and transportation projects), analyzing the combined impacts for a cumulative impacts analysis may be appropriate. However, metrics such as VMT per capita or VMT per employee, i.e., metrics framed in terms of efficiency (as recommended below for use on residential and office projects), cannot be summed because they employ a denominator. A project that falls below an efficiency-based threshold that is aligned with long-term goals and relevant plans has no cumulative impact distinct from the project impact. Accordingly, a finding of a less-than-significant project impact would imply a less than significant cumulative impact, and vice versa. This is similar to the analysis typically conducted for greenhouse gas emissions, air quality impacts, and impacts that utilize plan compliance as a threshold of significance. (See Center for Biological Diversity v. Department of Fish & Wildlife (2015) 62 Cal.4th 204, 219, 223; CEQA Guidelines, § 15064, subd. (h)(3).)*

As discussed above, the Project is screened out from further VMT analysis, as it is presumed the Project would cause less-than-significant transportation impacts. For this reason, the Project's cumulative contribution to traffic impacts would also be less than significant.

4.18 Tribal Cultural Resources

Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a. Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or	☐	☒	☐	☐
b. A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision I of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision I of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.	☐	☒	☐	☐

Impact Analysis

a) Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:

i) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1 (k), or

ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision I of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision I of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.

Less Than Significant Impact With Mitigation Incorporated. The City issued a Tribal Consultation on November 20, 2025. Subsequently the Gabrieleño Band of Mission Indians – Kizh Nation (Kizh Nation) requested government-to-government consultation with the City pursuant to Assembly Bill 52 and CEQA. The Kizh Nation did not indicate that known tribal cultural resources exist at the site but requested that the Project incorporate tribal monitoring and associated measures into the Project that are standard for infill development in the City. These

measures are outlined below. As a result, with mitigation, the Project would not result in any significant impacts related to tribal cultural resources.

Mitigation Measures

The following mitigation measures are required to be implemented by the Project to ensure that Project impacts related to unknown tribal cultural resources would be less than significant:

MM-TCR-1: Retain a Native American Monitor Prior to Commencement of Ground-Disturbing Activities

A. The Applicant shall retain a Native American Monitor from or approved by the Gabrieleño Band of Mission Indians – Kizh Nation. The monitor shall be retained prior to the commencement of any "ground-disturbing activity" for the Project at all Project locations (i.e., both on-site and any off-site locations that are included in the project description/definition and/or required in connection with the project, such as public improvement work). "Ground-disturbing activity" shall include, but is not limited to, demolition, pavement removal, potholing, auguring, grubbing, tree removal, boring, grading, excavation, drilling, and trenching.

B. A copy of the executed monitoring agreement shall be submitted to the lead agency prior to the earlier of the commencement of any ground-disturbing activity, or the issuance of any permit necessary to commence a ground-disturbing activity.

C. The monitor will complete daily monitoring logs that will provide descriptions of the relevant ground-disturbing activities, the type of construction activities performed, locations of ground-disturbing activities, soil types, cultural-related materials, and any other facts, conditions, materials, or discoveries of significance to the Tribe. Monitor logs will identify and describe any discovered tribal cultural resources, including but not limited to, Native American cultural and historical artifacts, remains, places of significance, etc., as well as any discovered Native American (ancestral) human remains and burial goods. Copies of monitor logs will be provided to the City upon written request to the Tribe.

D. On-site tribal monitoring shall conclude upon the latter of the following (1) written confirmation to the Gabrieleño Band of Mission Indians – Kizh Nation from a designated point of contact for the Project Applicant that all ground-disturbing activities and phases that may involve ground-disturbing activities on the Project site or in connection with the Project are complete; or (2) a determination and written notification by the Gabrieleño Band of Mission Indians – Kizh Nation to the City that no future, planned construction activity and/or development/construction phase at the Project Site possesses the potential to impact Gabrieleño Band of Mission Indians – Kizh Nation tribal cultural resources.

MM-TCR-2: Unanticipated Discovery of Tribal Cultural Resource Objects (Non-Funerary/Non-Ceremonial)

A. Upon discovery of any tribal cultural resources, all construction activities in the immediate vicinity of the discovery shall cease (i.e., not less than the surrounding 50 feet) and shall not resume until the discovered tribal cultural resource has been fully assessed by the Gabrieleño Band of Mission Indians – Kizh Nation monitor and/or archaeologist. The Gabrieleño Band of

Mission Indians – Kizh Nation will recover and retain all discovered tribal cultural resources in the form and/or manner the Tribe deems appropriate, in the Tribe's sole discretion, and for any purpose the Tribe deems appropriate, including for educational, cultural and/or historic purposes.

MM-TCR-3: Unanticipated Discovery of Human Remains and Associated Funerary or Ceremonial Objects

A. Native American human remains are defined in PRC 5097.98 (d)(1) as an inhumation or cremation, and in any state of decomposition or skeletal completeness. Funerary objects, called associated grave goods in Public Resources Code Section 5097.98, are also to be treated according to this statute.

B. If Native American human remains and/or grave goods are discovered or recognized on the project site, then Public Resource Code 5097.9 as well as Health and Safety Code Section 7050.5 shall be followed.

C. Human remains and grave/burial goods shall be treated alike per California Public Resources Code section 5097.98(d)(1) and (2).

D. Preservation in place (i.e., avoidance) is the preferred manner of treatment for discovered human remains and/or burial goods.

Any discovery of human remains/burial goods shall be kept confidential to prevent further disturbance.

Cumulative Impacts

Impacts related to tribal cultural resources tend to be site-specific and are assessed on a site-by-site basis. The City requires the applicants of all development in the City that are subject to CEQA to assess, determine, and mitigate any potential impacts related to tribal cultural resources that could occur as a result of development, as necessary. As discussed previously, the Project would implement Mitigation Measures MM-TCR-1 through -3 that require monitoring and associated measures required in the event that resources are encountered that are standard for infill development in the City and not result in any impacts to tribal cultural resources. As such, the Project would not contribute to any potential cumulative impacts related to tribal cultural resources. Therefore, cumulative impacts related to cultural resources would be less than significant.

4.19 Utilities and Service Systems

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a. Require or result in the relocation or construction of new or expanded water, wastewater treatment, or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?	☐	☐	☒	☐
b. Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?	☐	☐	☒	☐
c. Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	☐	☐	☒	☐
d. Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?	☐	☐	☒	☐
e. Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?	☐	☐	☒	☐

Impact Analysis

a) Would the project require or result in the relocation or construction of new or expanded water, wastewater treatment, or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?

Less Than Significant Impact. As discussed below, Project impacts related to water facilities, wastewater treatment, storm water drainage, electric power, natural gas, and telecommunications facilities would be less than significant.

Water Facilities

Water conveyance infrastructure in the vicinity of the Project Site is owned and maintained by the Los Angeles Department of Water and Power (LADWP) and includes an 8-inch water line in San Vicente Boulevard. As shown in **Table 4.19.1**, the Project operation would result in a net increase water consumption of approximately 4,556 gpd (0.005 mgd) of water. It should be noted that this

does not account for the effectiveness of water conservation measures required in accordance with the City's Green Building Code, which would likely reduce the Project's water consumption (and wastewater generation).

Table 4.19-1
Estimated Project Water Consumption and Wastewater Generation

Land Use	Size	Rates	Total (gpd)
Existing Consumption			
Warehouse	23,151 sf	30 gallons/1,000 sf	695
Project Consumption			
Self-storage	175,047 sf	30 gallons/1,000 sf	5,251
		Less Existing	*(695)*
		Net Total	4,556

Note: sf = square feet; gpd = gallons per day
Rates: Los Angeles Bureau of Sanitation, Sewage Generation Factor, effective date April 6, 2012. https://permitmanual.engineering.lacity.gov/sites/default/files/documents/Sewage%20Generation%20Factors%20Chart.pdf
Wastewater generation is assumed to equal water consumption. Per the LADWP: "For estimating a project's indoor water demand, we use applicable sewer generation factors (sgf)."

During the Project's permitting process, the Applicant would be required to coordinate with LADWP to assess the Project's water needs and install appropriately sized infrastructure to serve the Project. Further, the Applicant would be required to file an encroachment application with LADWP to ensure no conflicts related to the water line that crosses the Project Site and the proposed development. The Project would not require or result in relocation or the construction of new water conveyance infrastructure. Therefore, Project impacts related to water facilities would be less than significant.

Cumulative Impacts

There are three (3) related projects identified by the City within 0.5 miles of the Project (see **Table 4.21-1**). These three (3) related projects include development of a total of 178 new residential units, which could increase the need for water conveyance infrastructure. As shown in **Table 4.19-2**, cumulative development would result in water consumption of approximately 31,256 gpd (0.03 mgd). It should be noted that this does not account for the net reduction of water consumption associated with the removal of existing uses associated with the related projects or the effectiveness of water conservation measures required in accordance with the City's Green Building Code, which would likely reduce cumulative water consumption (and wastewater generation).

Table 4.19-2
Estimated Cumulative Water Consumption and Wastewater Generation

Land Use	Size	Rates	Total (gpd)
Multi-Family Residential	178 du	150 gpd/du	26,700
		Plus Project	***4,556***
		Cumulative Total	31,256

du = dwelling unit gpd = gallons per day
Rates: Los Angeles Bureau of Sanitation, Sewage Generation Factor, effective date April 6, 2012. https://permitmanual.engineering.lacity.gov/sites/default/files/documents/Sewage%20Generation%20Factors%20Chart.pdf
Wastewater generation is assumed to equal water consumption. Per the LADWP: "For estimating a project's indoor water demand, we use applicable sewer generation factors (sgf)."

The sites of the related projects are located in a highly urban area of the City and are more than 0.25 miles from the Project Site. The related projects do not share any water conveyance infrastructure in common with the Project. Similar to the Project, the applicants of the related projects would be required to coordinate with LADWP to determine the water needs of each respective related project and install appropriately sized infrastructure for the related project. Cumulative development would not require or result in relocation or the construction of new water conveyance infrastructure. Therefore, cumulative impacts related to water facilities would be less than significant.

Wastewater Treatment

LASAN operates and maintains the wastewater treatment, reclamation, and collection facilities serving most of the City incorporated areas, including the Project Site, as well as several other cities and unincorporated areas in the Los Angeles basin and San Fernando Valley. Wastewater generated by the Project would be conveyed via the existing wastewater conveyance system for treatment at the Hyperion Treatment Plant (HTP) System.

The Project Site is located within the service area of the Hyperion Treatment Plant (HTP), which has been designed to treat 450 million gallons per day (mgd) to full secondary treatment. Full secondary treatment prevents virtually all particles suspended in effluent from being discharged into the Pacific Ocean and is consistent with the LARWQCB discharge policies for the Santa Monica Bay. The HTP currently treats an average daily flow of approximately 275 mgd.[38] Thus, there is approximately 175 mgd available capacity.

The sewer infrastructure in the vicinity of the Project includes an existing 8-inch line on the alley directly south of the site between Longwood Avenue and Tremaine Avenue.[39]

As shown in **Table 4.19-1**, the Project would generate a net increase of approximately 4,556 gpd (0.005 mgd) of wastewater. The Project's average daily wastewater flow of 0.005 mgd would

38 LA Sanitation, Hyperion Treatment Plant: https://sanitation.lacity.gov/san/faces/wcnav_externalId/s-lsh-wwd-cw-p-hwrp-tp?_adf.ctrl-state=zjgdf4yhg_10&_afrLoop=16488136506800672#!, accessed August 4, 2025.

39 NavigateLA with Sewer layer: http://navigatela.lacity.org/index01.cfm.

represent substantially less than one percent of the available capacity of the HTP. As such, there would be adequate wastewater treatment capacity to accommodate the Project. Therefore, Project impacts related to wastewater treatment would be less than significant.

Cumulative Impacts

There are three (3) related projects identified by the City within 0.5 miles of the Project (see **Table 4.21-1**). These three (3) related projects include development of a total of 178 new residential units, which could increase the need for wastewater treatment. As shown in **Table 4.19-2**, cumulative development would result in wastewater generation of approximately 31,256 gpd (0.03 mgd) It should be noted that this does not account for the net reduction of water consumption (and wastewater generation) associated with the removal of existing uses associated with the related projects or the effectiveness of water conservation measures required in accordance with the City's Green Building Code, which would likely reduce cumulative water consumption (and wastewater generation). As noted above, the HTP has a remaining daily treatment capacity of 175 mgd. Thus, there is adequate capacity to accommodate cumulative wastewater treatment needs. Therefore, cumulative impacts related to wastewater treatment would be less than significant.

Storm Drainage

As discussed in Checklist Section 10, Hydrology and Water Quality, the Project's storm drain needs could be accommodated by the existing storm drain infrastructure near the Project Site. The Project would not create the need for new or upgraded storm drain infrastructure. Therefore, Project impacts related to storm water drainage would be less than significant.

Cumulative Impacts

There are three (3) related projects identified by the City within 0.5 miles of the Project (see **Table 4.21-1**). The sites of the related projects are located in a highly urban area of the City and are more than 0.25 miles from the Project Site. The related projects do not share any storm drainage infrastructure in common with the Project. Similar to the Project, the applicants of the related projects would be required to coordinate with the City to determine the storm drain requirements of the respective related projects and install appropriately sized infrastructure for the related project. Therefore, cumulative impacts related to storm drainage would be less than significant.

Electricity

As discussed in Checklist Section 7, Energy, the Project's demand for electrical power could be accommodated by existing sources. The Project would not require the need for new or expanded electricity supplies. Therefore, Project impacts related to electrical power would be less than significant.

Cumulative Impacts

As discussed in the cumulative analysis provided in Checklist Section 7, Energy, cumulative development could be served by existing sources of electricity supply and would not create a

need for new or expanded electricity supplies. Therefore, cumulative impacts related to electrical power would be less than significant.

Natural Gas

As discussed in Checklist Section 7, Energy, the Project's demand for natural gas could be accommodated by existing sources. The Project would not require the need for new or expanded natural gas supplies. Therefore, Project impacts related to natural gas would be less than significant.

Cumulative Impacts

As discussed in the cumulative analysis provided in Checklist Section 7, Energy, cumulative development could be served by existing sources of natural gas supply and would not create a need for new or expanded natural gas supplies. Therefore, cumulative impacts related to natural gas would be less than significant.

Telecommunications

In the Project Site area, existing telephone service is typically provided by AT&T, and existing cable television/internet is typically provided by Spectrum (formerly Time Warner Cable). The Project Site could be served by existing telecommunications facilities that are available in the Project Site area and would not require new or expanded facilities. Therefore, Project impacts related to telecommunications facilities would be less than significant.

Cumulative Impacts

There are three (3) related projects identified by the City within 0.5 miles of the Project (see **Table 4.21-1**). The sites of the related projects are located in a highly urban area of the City and are served by existing telecommunications infrastructure. The related projects are located more than 0.25 miles from the Project Site and do not share any telecommunications infrastructure in common with the Project. The related projects would likely require project- or site-specific infrastructure to connect to the existing infrastructure and would not require new or expanded facilities. Therefore, cumulative impacts related to telecommunications infrastructure would be less than significant.

b) Would the project have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?

Less Than Significant Impact. LADWP provides water service to the Project Site. LADWP's water supply sources include the Los Angeles Aqueduct (LAA), local groundwater, the SWP (supplied by the Metropolitan Water District [MWD]), the Colorado River Aqueduct (also supplied by MWD), and recycled water.

The California Urban Water Management Planning Act of 1984 requires every municipal water supplier who serves more than 3,000 customers or provides more than 3,000 acre-feet per year (AFY) of water to prepare an Urban Water Management Plan (UWMP) every five years to identify short-term and long-term water resources management measures to meet growing water

demands during normal, single-dry, and multiple-dry years. In the UWMP, the water supplier must describe the water supply projects and programs that may be undertaken to meet the total water use of the service area. The UWMP that is applicable to the Project is LADWP's 2020 UWMP.

The 2020 UWMP provides historical and forecasted water demands for the City. Total water demand varies annually and is contingent on various factors including population growth, weather, water conservation, drought, and economic activity. **Table 4.19-3** shows a breakdown of historical water demand for the LADWP service area. **Table 4.19-4** provides LADWP's projected water demand from 2025 to 2045 for average-year, single-dry-year, and multi-dry-year hydrological conditions.

More frequent and longer-lasting dry periods, regulatory constraints, and seismic risks that can result in water delivery system outages are causing increased stress on water supply reliability for LADWP. As such, in preparation to take reasonable actions to balance water demands with limited water supplies, LADWP has prepared a Water Shortage Contingency Plan (WSCP) that outlines a set of actions that the City can take in the event of a declared water supply shortage or emergency situation. The City has six standard water shortage levels and response actions, as summarized in **Table 4.19-5**. Under state law, LADWP has the authority to implement the water shortage actions outlined in the WSCP. In all water shortage cases, shortage response actions to be implemented are at the discretion of LADWP based on an assessment of the supply shortage, customer response, and the need for demand reductions. Upon proclamation by the Governor of a state of emergency under the California Emergency Services Action based on extended dry conditions, the state will defer to implementation of locally adopted water shortage contingency plans to the extent practicable. LADWP will coordinate with regional and local water suppliers for which it provided water supply services for possible proclamation of a local emergency, as necessary.

The Project would connect to the existing water conveyance infrastructure near the Project Site. As shown in **Table 4.19-1**, the Project would result in a net water consumption of approximately 4,556 gpd (0.005 mgd). Based on its 2020 UWMP, LADWP has supply capabilities that would be sufficient to meet expected demands from 2025 through 2045 under single dry-year and multiple dry-year hydrologic conditions. The Project Applicant would be required to comply with the water efficiency standards outlined in Los Angeles City Ordinance No. 180,822 and in the LAGBC to conserve water usage. Additionally, the Project would be subject to any water shortage response actions identified by LADWP to ensure water service availability. Further, prior to issuance of a building permit, the Project Applicant would be required to consult with LADWP to determine Project-specific water supply service needs and all water conservation measures that shall be incorporated into the Project. As such, the Project would not require new or additional water supply or entitlements. Therefore, Project impacts related to water supply would be less than significant.

Table 4.19-3
Breakdown of Historical Water Demand for LADWP's Service Area

Fiscal Year Ending Average	Single Family		Multi-Family		Commercial		Industrial		Government		Non-Revenue		Total
	AF	%	AF	%	AF	%	AF	%	AF	%	AF	%	AF

Table 4.19-5
Water Shortage Response Actions

Water Shortage Level	Percent Shortage	Shortage Response Actions
Level 1: No Shortage	≤10%	Water Shortage Level 1 constitutes a consumer demand reduction of up to 10%. Shortage response actions under this level include the permanent water use restrictions listed below. **Phase I Restrictions** - No LADWP customer shall use a water hose to wash any paved surfaces, except to alleviate immediate safety or sanitation hazards. - No LADWP customer shall use water to clean, fill or maintain levels in decorative fountains, ponds, lakes, or similar structures used for aesthetic purposes, unless such water is part of a recirculating system. - No restaurant, hotel, cafe, cafeteria, or other public place where food is sold, served, or offered for-sale, shall serve drinking water to any person unless expressly requested. - No LADWP customer shall permit water to leak from any pipe or fixture on the customer's premises.
Level 2: Moderate Shortage	≤20%	Water Shortage Level 2 is implemented when there is a reasonable probability of supply shortage from LADWP-controlled supplies in the long-term and a demand reduction of up to 20% is necessary to mitigate this long-term shortage risk. Conservation Ordinance Phase 2 will be implemented to achieve the necessary demand reduction. Additionally, to reduce consumption during this phase and all higher levels of conditions, LADWP may increase its public education and outreach efforts and enforcement measure to build awareness of voluntary water conservation practices and all permanent water waste prohibitions. **Actions** Mandatory Conservation Phase 2 - Restrictions on landscape irrigation watering days (Monday, Wednesday, or Friday for odd-numbered street

Table 4.19-5
Water Shortage Response Actions

Water Shortage Level	Percent Shortage	Shortage Response Actions
		addresses and Tuesday, Thursday, or Sunday for even-numbered street addresses). - Irrigation of Sports Fields may deviate from the non-watering days to maintain play areas and accommodate event schedules. - Irrigation of large landscape areas may deviate from the non-watering days under certain conditions. - Provisions do not apply to drip irrigation supplying water to a food source or to hand-held hose watering of vegetation. - Increase outreach efforts for high-volume customers and provide one on one assessments. - Expand enforcement of unreasonable use of water. - Increase water conservation rebates and incentives. - Increase conservation messaging (radio, TV, social media, educational events).
Level 3: Significant Shortage	≤30%	A Water Shortage Level 3: Significant Shortage is implemented when demand must be reduced up to 30% to ensure sufficient supplies. During a Significant Shortage, a new set of mandatory water conservation practices takes effect, in addition to all Permanent Water Waste Prohibitions and Level 1 and Level 2 conservation practices. Beginning with Water Shortage Level 3, LADWP may elect to withdraw from available emergency storage along the LAA system and from local groundwater basins. Emergency storage along the LAA may come in the form of emergency reservoir storage and/or emergency groundwater pumping in the Owens Valley with the approval of the LA/Inyo Standing Committee. Emergency storage from local groundwater basin may come in the form of storied water credits. Withdrawals from emergency supplies may provide only short-term relief and the extent of withdrawals will be determined based on assessments of long-term shortage risk. **<u>Actions</u>**

Table 4.19-5
Water Shortage Response Actions

Water Shortage Level	Percent Shortage	Shortage Response Actions
		Mandatory Conservation Phase 3 - Further restrictions on landscape irrigation watering days (Monday or Friday for odd-numbered street addresses and Sunday or Thursday for even-numbered street addresses) - Recommend use of pool covers to decrease water loss from evaporation. - Recommend washing of vehicles at commercial car wash facilities. - Irrigation of sports fields may deviate from the non-watering days to maintain play areas and accommodate event schedules. - Irrigation of large landscape areas may deviate from the non-watering days under certain conditions. - Provisions do not apply to drip irrigation supplying water to a food source or to hand-held hose watering of vegetation. - Withdraw from available emergency storage along the LAA System and local groundwater basins.
Level 4: Severe Shortage	≤40%	Water Shortage Level 4: Severe Shortage is implemented when demand must be reduced up to 40% to ensure sufficient supplies. During a Severe Shortage, a new set of mandatory water conservation practices takes effect, in addition to all Permanent Water Waste Prohibitions and additional restriction practices that became mandatory under Water Shortage Level 1, Level 2, and Level 3. LADWP may also elect to increase withdrawals from available emergency storage along the LAA system and from local groundwater basins. **Actions** Mandatory Conservation Phase 4 - Further restrictions on landscape irrigation watering days (Monday for odd-numbered street addresses and Tuesday for even-numbered street addresses). - Mandate use of pool covers on all residential swimming pools when not in use.

Table 4.19-5
Water Shortage Response Actions

Water Shortage Level	Percent Shortage	Shortage Response Actions
		- No washing of vehicles allowed except at commercial car wash facilities. - No filling of decorative fountains, ponds, lakes, or similar structures used for aesthetic purposes, with potable water. - Irrigation of sports fields may deviate from the non-watering days to maintain play areas and accommodate event schedules. - Irrigation of large landscape areas may deviate from the non-watering days under certain conditions. - Provisions do not apply to drip irrigation supplying water to a food source or to hand-held hose watering of vegetation. - Withdraw from available emergency storage along the LAA System and local groundwater basins.
Level 5: Critical Shortage	≤50%	Water Shortage Level 5: Critical Shortage is implemented when a water shortage emergency requires that demand be reduced up to 50% to ensure sufficient supplies. Mandatory conservation practices imposed under Water Shortage Levels 1 through 4 remain in effect and LADWP may elect to further increase withdrawals from available emergency storage along the LAA system and from local groundwater basins. **<u>Actions</u>** <u>Mandatory Conservation Phase 5</u> - No landscape irrigation allowed. - No filling of residential swimming pools and spas with potable water. - No washing of vehicles allowed except at commercial car wash facilities. - No filling of decorative fountains, ponds, lakes, or similar structures used for aesthetic purposes, with potable water. - Golf courses and professional sports fields may apply water to sensitive areas, such as greens and tees, during non-daylight hours and only to the extent necessary to maintain minimum levels of biological viability.

Table 4.19-5
Water Shortage Response Actions

Water Shortage Level	Percent Shortage	Shortage Response Actions
		- Provisions do not apply to drip irrigation supplying water to a food source or to hand-held hose watering of vegetation. - Withdraw from available emergency storage along the LAA System and local groundwater basins.
Level 6: Super Critical Shortage	> 50%	Water Shortage Level 6: Supercritical Shortage is implemented when a water shortage emergency requires that demand be reduced greater than 50% to ensure sufficient supplies. During a Supercritical Shortage, a new set of mandatory conservation measures takes effect, in addition to all Permanent Water Waste Prohibitions. Mandatory conservation practices that were imposed Levels 1 through 5 remain in effect. LADWP may elect maximize withdrawals from available emergency storage along the LAA system and from local groundwater basins for supply augmentation. **<u>Actions</u>** Mandatory Conservation Phase 6 - No landscape irrigation allowed. - No filling of residential swimming pools and spas with potable water. - No washing of vehicles allowed except at commercial car wash facilities. - No filling of decorative fountains, ponds, lakes, or similar structures used for aesthetic purposes, with potable water. - Golf courses and professional sports fields may apply water to sensitive areas, such as greens and tees, during non-daylight hours and only to the extent necessary to maintain minimum levels of biological viability. - Provisions do not apply to drip irrigation supplying water to a food source or to hand-held hose watering of vegetation. - The Board is hereby authorized to implement additional prohibited uses of water based on the water supply situation. Any additional prohibition shall be published at least once in a daily newspaper of general circulation and shall

Table 4.19-5
Water Shortage Response Actions

Water Shortage Level	Percent Shortage	Shortage Response Actions
		become effective immediately upon such publication and shall remain in effect until cancelled. - Withdraw from available emergency storage along the LAA and local groundwater basin. - Additional measures authorized by the Board.
Source: 2020 UWMP, Appendix I, LADWP.		

Cumulative Impacts

There are three (3) related projects identified by the City within 0.5 miles of the Project (see **Table 4.21-1**). These three (3) related projects include development of a total of 178 new residential units, which could increase the need for water supply. As shown in **Table 4.19-2**, cumulative development would result in water consumption of approximately 31,256 gpd (0.03 mgd). It should be noted that this does not account for the net reduction of water consumption associated with the removal of existing uses associated with the related projects or the effectiveness of water conservation measures required in accordance with the City's Green Building Code, which would likely reduce cumulative water consumption (and wastewater generation). As discussed previously, LADWP's 2020 UWMP anticipates meeting projected water supplies through the year 2045, through conservation measures for drought years, and LADWP's water shortage response actions identified (refer to **Table 4.19-5**). Similar to the Project, the related project would be required to comply with conservation programs for both water supply and infrastructure. For these reasons, cumulative impacts related to water supply would be less than significant.

c) Would the project result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

Less Than Significant Impact. As discussed in response to Checklist Question 19(a), with a remaining daily capacity of 275 mgd, the HTP would have adequate capacity to serve the Project. Therefore, Project impacts related to wastewater treatment would be less than significant.

Cumulative Impacts

Refer to the cumulative impacts discussion included in response to Checklist Question 19(a) (Utilities and Service Systems – Wastewater Treatment).

d) Would the project generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?

Less Than Significant Impact. Based on the information provided in the 2023 Countywide Disposal Rate and Assessment of Disposal Capacity Report, the remaining disposal capacity for the County's Class III landfills is estimated at approximately 131.14 million tons.[40] In 2023, the total amount of solid waste disposed of at in-county Class III landfills, transformation facilities, and out-of-County landfills was approximately 11.3 million tons and 317,601 tons of inert waste at the County's inert landfill, for a grand total of 11.6 million tons.[41]

Of the remaining Class III landfill capacity in the County, approximately 71.59 million tons are available to the City (Antelope Valley, Lancaster, Sunshine Canyon).[42]

The 2023 Annual Report indicates that the countywide cumulative need for Class III landfill disposal capacity, approximately 140.48 million tons in 2034, would exceed the 2023 remaining permitted Class III landfill capacity of 131.14 million tons.[43]

As is the case with solid waste haulers, landfills operate in a free-enterprise system. Their operating funds and profits are obtained by collecting disposal fees from the haulers on a per ton basis. Landfill capacity is regulated primarily through the amount of solid waste that each particular facility is permitted to collect on a daily basis relative to its capacity.

Wasteshed boundaries, geographic barriers, weather, and natural disasters could place further constraints on accessibility of Class III landfill capacity. Therefore, the Annual Report evaluated four scenarios to increase capacity. Demand can be met for each year during the 15-year planning period. No new landfills are expected to be permitted in the County during the planning period.[44] The Annual Report also concluded that in order to maintain adequate disposal capacity, individual jurisdictions must continue to pursue strategies to maximize waste reduction and recycling, expand existing landfills, promote and develop alternative technologies, expand transfer and processing infrastructure, and use out of county disposal, including waste by rail.

The County's unclassified landfill generally does not currently face capacity issues. The remaining disposal capacity for Azusa Land Reclamation is estimated at approximately 44.80 million tons.

---

40 County of Los Angeles, Department of Public Works; Los Angeles Countywide Disposal Rate and Assessment of Disposal Capacity, 2023, page 16: https://dpw.lacounty.gov/epd/swims/ShowDoc.aspx?id=18154&hp=yes&type=PDF, August 4, 2025.

41 County of Los Angeles, Department of Public Works; Countywide Disposal Rate and Assessment of Disposal Capacity, 2023, Table 1: 2023 Disposal Tonnage Breakdown, page 8: https://dpw.lacounty.gov/epd/swims/ShowDoc.aspx?id=18154&hp=yes&type=PDF, accessed August 4, 2025.

42 Total excludes Class III landfills that are not open to the City of Los Angeles for disposal (i.e., Scholl Canyon, Whittier, Burbank, Pebbly Beach, and San Clemente). In addition, total excludes the Calabasas Landfill, as its wasteshed does not include the Project Site. The Chiquita Canyon Landfill Expansion permits the facility to operate until it reaches 60 million tons, or after 30 years, whichever comes first. However, since the current volume of the facility's wasteshed is unknown, the volume of waste that it would take to reach 60 million tons cannot be determined. As such, for a conservative analysis, the Chiquita Canyon Landfill Expansion is excluded from the total.

43 County of Los Angeles, Department of Public Works; Countywide Disposal Rate and Assessment of Disposal Capacity, 2023, page 2: https://dpw.lacounty.gov/epd/swims/ShowDoc.aspx?id=18154&hp=yes&type=PDF, accessed August 4, 2025.

44 County of Los Angeles, Department of Public Works; Countywide Disposal Rate and Assessment of Disposal Capacity, 2023, page 22: https://dpw.lacounty.gov/epd/swims/ShowDoc.aspx?id=18154&hp=yes&type=PDF, accessed August 4, 2025.

In 2023, approximately 0.403 million tons of inert waste (e.g., soil, concrete, asphalt, and other construction and demolition debris) were disposed of at this unclassified landfill. Given the remaining permitted capacity, this capacity would be exhausted in 22 years.[45] Thus, the unclassified landfill serving the County has adequate long-term capacity.

While the City's Bureau of Sanitation (BOS) generally provides waste collection services to single-family and some small multi-family developments, private haulers permitted by the City provide waste collection services for most multi-family residential and commercial developments within the City. Solid waste transported by both public and private haulers is either recycled, reused, or transformed at a waste-to-energy facility, or disposed of at a landfill.

In 2022, the City disposed of approximately 4 million tons of solid waste at the County's Class III landfills, approximately 2,000 tons at transformation facilities, and 214 million tons at the inert landfill.[46] The 3.3 million tons of solid waste accounts for approximately 5.5 percent of the total remaining capacity (71.59 million tons) for the County's Class III landfills open to the City.[47]

The landfills that serve the City and the capacity of these landfills are shown on **Table 4.19-6**. As shown, the landfills have an approximate available daily intake of 10,242 tons.

Table 4.19-6
Landfill Capacity

Landfill Facility	2023 Average Daily Disposal (tons/day)	Maximum Daily Disposal (tons/day)	Remaining Daily Capacity (tons/day)	Remaining Capacity (million tons)	Remaining Life (years)
Class III Landfills (Open to the City)					
Antelope Valley	2,314	5,548	3,234	7.79	7
Lancaster	367	5,100	4,733	10.79	18
Sunshine Canyon	7,561	12,100	4,539	53.01	14
Total	**10,242**	**22,748**	**12,506**	**71.59**	
Inert Landfill (Open to the City)					
Azusa	1,018	8,000	6,982	44.80	22
County of Los Angeles, Department of Public Works; Countywide Disposal Rate and Assessment of Disposal Capacity, 2023, Appendix B, Table 1: https://dpw.lacounty.gov/epd/swims/ShowDoc.aspx?id=18154&hp=yes&type=PDF, accessed June 26, 2025.					

As shown in **Table 4.19-7**, the Project would result in approximately 2,390 tons of construction and demolition waste, not accounting for any mandatory recycling.

45 County of Los Angeles, Department of Public Works; Countywide Disposal Rate and Assessment of Disposal Capacity, 2023, page 17: https://dpw.lacounty.gov/epd/swims/ShowDoc.aspx?id=18154&hp=yes&type=PDF, accessed August 4, 2025.

46 These numbers represent waste disposal, not generation, and thus do not reflect the amount of solid waste that was diverted via source reduction and recycling programs within the City

47 4 million tons ÷ 71,59 million tons x 100% = 5.5%.

Table 4.19-7
Project Demolition and Construction Waste Generation

Building	Size	Rate	Total (tons)
Demolition Waste			
Residential	0 sf	127 pounds / sf	0
Non-residential	23,151 sf	158 pounds / sf	1,830
Asphalt	~4,800 sf	75 pounds / sf	180
		Demolition Total	**2,010**
Construction Waste			
Residential	0 sf	4.39 pounds / sf	
Non-residential	175,047 sf	4.34 pounds / sf	380
		Construction Total	**380**
		Total	**2,390**

Over the entire total schedule of construction. Numbers have been rounded.
sf = square feet, 1 ton = 2,000 lbs
U.S. Environmental Protection Agency, Report No. EPA530-R-09-002, Estimating 2003 Demolition and Materials Amounts, March 2009, Table 2-1, Table 2-2, Table 2-3, Table 2-4: https://www.epa.gov/smm/estimating-2003-building-related-construction-and-demolition-materials-amounts
1 cubic foot of asphalt weighs 150 pounds. The asphalt at the site is assumed to be 6 inches thick.

Pursuant to the requirements of Senate Bill 1374, the Project would implement a construction waste management plan to recycle and/or salvage a minimum of 75 percent of non-hazardous demolition and construction debris. Materials that could be recycled or salvaged include asphalt, glass, and concrete. Debris not recycled could be accepted at the unclassified landfill (Azusa Land Reclamation) within Los Angeles County and within the Class III landfills open to the City.

In addition, pursuant to LAMC Sections 66.32 through 66.32.5 (Ordinance No. 181,519), the Project's construction contractor would be required to deliver all remaining construction and demolition waste generated by the Project to a certified construction and demolition waste processing facility. As discussed above, non-hazardous municipal solid waste is disposed of in Class III landfills, while inert waste, such as construction waste, yard trimmings, and earthlike waste, is disposed of in inert waste landfills. Thus, although the total diversion rate may ultimately exceed 75 percent, this analysis conservatively assumes a diversion rate of 75 percent.

Pursuant to the requirements of SB 1374, the Project would implement a construction waste management plan to recycle and/or salvage a minimum of 75 percent of its nonhazardous demolition and construction debris.

After accounting for mandatory recycling, the Project would result in approximately 578 tons of construction-related waste in the County's permitted inert landfill (i.e., Azusa Land Reclamation Landfill) throughout the construction period. This amount of construction and debris waste would represent approximately 0.002 percent of the Azusa Land Reclamation Landfill's existing remaining disposal capacity of 44.80 million tons.

Given the remaining permitted capacity, the Azusa Land Reclamation facility, as well as the remaining capacity at the Class III landfills open to the City, the landfills serving the Project Site

would have sufficient capacity to accommodate the Project's construction solid waste disposal needs.

It should be noted that soil export is not included in the calculation of construction waste since soil is not disposed of as waste but, rather, is typically used as a cover material or fill at other construction sites requiring soils import. As reported above, the Azusa Land Reclamation landfill, the County's inert waste landfill, would be able to accommodate waste from the Project's construction activities.

Based on the above, Project construction would not generate solid waste in excess of state or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals and strategies identified in the ColWMP or by the City (refer to Response to Question No. 19(e) regarding consistency with City solid waste planning goals). Therefore, the Project's potential construction-related impacts on solid waste facilities would be less than significant, and no mitigation measures would be required.

As shown on **Table 4.19-4**, the Project would generate a net total of approximately 8 tons per year of solid waste. While this estimate accounts for recycling and other waste diversion measures consistent with the Citywide diversion rate of 76.4 percent, it does not include implementation of the City's Zero Waste Plan, which is expected to result in a reduction of landfill disposal Citywide with a goal of reaching a Citywide recycling rate of 90 percent by the year 2025.[48]

Table 4.19-8
Project Estimated Solid Waste Generation

Land Use	Size	Rates	Total (Tons per year)
Proposed Project			
Commercial	11 employees	2.98 tons / employee	33
		Proposed Total	**33**
		(76.4% diversion)	**(25)**
		Total Net Disposal	**8**
Note: 1 ton = 2,000 pounds. Non-residential yearly solid waste generation factors from Los Angeles Bureau of Sanitation, City Waste Characterization and Quantification Study, Table 4, July 2002. https://www2.calrecycle.ca.gov/WasteCharacterization/General/Rate			

Likewise, the analysis does not include implementation of the City's Zero Waste Plan, which is expected to result in a reduction of landfill disposal Citywide with a goal of reaching a Citywide recycling rate of 90 percent by the year 2025, 95 percent by 2035, and zero waste by 2030.[49]

48 City of Los Angeles, Solid Waste Integrated Resource Plan FAQ; www.lacitysan.org/san/faces/home/portal/s-lsh-wwd/s-lsh-wwd-s/s-lsh-wwd-s-zwswirp?adf.ctrl-state=102i43tjdg1&afrLoop=15884281038430535&afrWindowMode=0&afrWindowId=null#!%40%40%3FafrWindowId%3Dnull%26afrLoop%3D15884281038430535%26afrWindowMode%3D0%26adf.ctrl-state%3D102i43tjdg5, accessed August 4, 2025.

49 The recycLA program divides the City into 11 zones and designates a waste collection company for each zone. Source: LA Sanitation, recycLA, Your Plan, and City of Los Angeles, L.A.'s Green New Deal, Sustainable City pLAn 2019. https://plan.lamayor.org/sites/default/files/pLAn2019final.pdf, accessed August 4, 2025.

The Project's estimated annual net increase of 8tons represents approximately 0.0002 percent of the remaining capacity (71.59 million tons) for the County's Class III landfills open to the City. The Project's estimated solid waste generation would therefore represent a nominal percentage of the remaining daily disposal capacity of those landfills. The landfills that serve the Project Site have sufficient permitted capacity to accommodate the solid waste generated by the construction and operation of the Project. Therefore, no Project impacts related to solid waste would occur and the Project would adequately be served by existing facilities.

As such, Project operation would not generate solid waste in excess of state or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals or strategies identified in the CoIWMP or by the City (refer to Response to Question No. 19(e) regarding consistency with City solid waste planning goals). Therefore, the Project's potential construction impacts to solid waste facilities would be less than significant, and no mitigation measures would be required.

Furthermore, as described in the 2023 Annual Report, the County will continue to address landfill capacity through the preparation of CoIWMP annual reports. The preparation of each annual report provides sufficient lead time (15 years) to address potential future shortfalls in landfill capacity. Solid waste disposal is an essential public service that must be provided without interruption in order to protect public health and safety, as well as the environment. Jurisdictions in the County of Los Angeles continue to implement and enhance the waste reduction, recycling, special waste, and public education programs identified in their respective planning directives. These efforts, together with countywide and regional programs implemented by the County and the cities, acting in concert or independently, have achieved significant, measurable results, as documented in the 2023 Annual Report.

Construction and operation of the Project would not generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals. Thus, Project impacts related to solid waste disposal would be less than significant.

Cumulative Impacts

Given the level of urbanization present throughout the Project vicinity, it is anticipated that other projects would similarly represent a minor percentage of the remaining capacity of the County's Class III landfills open to the City. The demand for landfill capacity is continually evaluated by the County through preparation of the CoIWMP annual reports. Each annual CoIWMP report assesses future landfill disposal needs over a 15-year planning horizon. Based on the 2023 CoIWMP, the County anticipates that future disposal needs can be adequately met for the next 15 years (i.e., 2038) with implementation of strategies to maximize waste reduction and recycling, expand existing landfills, promote and develop alternative technologies, expand transfer and processing infrastructure, and use out of county disposal, including waste by rail. The preparation of each annual CoIWMP provides sufficient lead time (15 years) to address potential future shortfalls in landfill capacity. Therefore, cumulative impacts related to solid waste disposal would be less than significant.

e) Would the project comply with federal, state, and local management and reduction statutes and regulations related to solid waste?

Less Than Significant Impact. Solid waste management in the State is primarily guided by the California Integrated Waste Management Act of 1989 (AB 939), which emphasizes resource conservation through reduction, recycling, and reuse of solid waste. AB 939 establishes an integrated waste management hierarchy consisting of (in order of priority): (1) source reduction; (2) recycling and composting; and (3) environmentally safe transformation and land disposal. In addition, AB 1327 provided for the development of the California Solid Waste Reuse and Recycling Access Act of 1991, which requires the adoption of an ordinance by any local agency governing the provision of adequate areas for the collection and loading of recyclable materials in development projects.

Furthermore, AB 341, which became effective on July 1, 2012, requires businesses and public entities that generate 4 cubic yards or more of waste per week and multi-family dwellings with five or more units, to recycle. The purpose of AB 341 is to reduce GHG emissions by diverting commercial solid waste from landfills and expand opportunities for recycling in California. In addition, in March 2006, the Los Angeles City Council adopted RENEW LA, a 20-year plan with the primary goal of shifting from waste disposal to resource recovery within the City, resulting in "zero waste" by 2030. The plan also calls for reductions in the quantity and environmental impacts of residue material disposed in landfills. In October 2014, Governor Jerry Brown signed AB 1826, requiring businesses to recycle their organic waste[50] on and after April 1, 2016, depending on the amount of waste generated per week. Specifically, beginning April 1, 2016, businesses that generate eight cubic yards of organic waste per week were required to arrange for organic waste recycling services. In addition, beginning January 1, 2017, businesses that generate four cubic yards of organic waste per week were required to arrange for organic waste recycling services.

The Project would be consistent with the applicable regulations associated with solid waste. Specifically, the Project would provide adequate storage areas in accordance with the City's Space Allocation Ordinance (Ordinance No. 171,687), which requires that development projects include an on-site recycling area or room of specified size.[51] The Project would also comply with AB 939, AB 341, AB 1826 and City waste diversion goals, as applicable, by providing clearly marked, source-sorted receptacles to facilitate recycling.

Additionally, the Project's construction contractor would deliver all construction and demolition waste generated by the Project to a Certified Construction and Demolition Waste Processing Facility in accordance with City Ordinance No. 181,519. Furthermore, the Project would implement a construction waste management plan to divert a minimum of 75 percent waste from landfills, thus exceeding state requirements. As such, the Project would promote source reduction and recycling, consistent with AB 939 and the City's Solid Waste Integrated Resources Plan, Source Reduction and Recycling Element, Solid Waste Management Policy Plan, General Plan Framework Element, RENEW LA Plan, Green LA Plan, and Sustainable City pLAn/L.A.'s Green New Deal.

50 Organic waste refers to food waste, green waste, landscape and pruning waste, nonhazardous wood waste, and food-soiled paper waste that is mixed in with food waste.

51 Ordinance No. 171,687, adopted by the Los Angeles City Council on August 6, 1997.

Overall, the Project would comply with federal, state, and local management and reduction statutes and regulations related to solid waste. Therefore, Project impacts related to this issue would be less than significant.

Cumulative Impacts

As with the Project, the related projects would be required to comply with applicable regulations related to solid waste, including those pertaining to waste reduction and recycling. Detailed components regarding waste reduction and recycling would be finalized for each Related Project on a project-by-project basis at the time of plan submittal to the City for the necessary building permits and reviews conducted pursuant to the City's Green Building Code, as applicable. Specifically, the Project and related projects would be required to promote source reduction and recycling, consistent with AB 939 and the City's Solid Waste Integrated Resources Plan, General Plan Framework Element, RENEW LA Plan, Green LA Plan, and Sustainable City pLAn/L.A.'s Green New Deal. Thus, construction and operation of the Project and the related projects would comply with applicable state or City solid waste regulations and would not result in significant cumulative impacts. Therefore, cumulative impacts related to this issue would be less than significant.

4.20 Wildfire

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:				
a. Substantially impair an adopted emergency response plan or emergency evacuation plan?	☐	☐	☐	☒
b. Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?	☐	☐	☐	☒
c. Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?	☐	☐	☐	☒
d. Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?	☐	☐	☐	☒

Impact Analysis

a) Would the project substantially impair an adopted emergency response plan or emergency evacuation plan?

b) Due to slope, prevailing winds, and other factors, would the project exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?

c) Would the project require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?

d) Would the project expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?

No Impact. Neither the Project Site nor the sites of the related projects are located in or near a state responsibility area.[52] Also, the Project Site is not located in a Very High Fire Hazard Severity Zone (VHFHSZ).[53] Therefore, no Project-specific or cumulative impacts would occur.

52 Cal Fire, State Responsibility Area Viewer: https://bof.fire.ca.gov/projects-and-programs/state-responsibility-area-viewer/, accessed June 17, 2024.

53 City of Los Angeles Department of City Planning, Zone Information and Map Access System (ZIMAS), Parcel Profile Report for 4828 San Vicente Boulevard, https://zimas.lacity.org/, accessed August 4, 2025.

4.21 Mandatory Findings of Significance

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
a. Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	☐	☒	☐	☐
b. Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)	☐	☐	☒	☐
c. Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	☐	☐	☒	☐

a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?

Less Than Significant Impact With Mitigation Incorporated. As discussed in Checklist Section 5, Cultural Resources, and Checklist Section 18, Tribal Cultural Resources, with implementation of Mitigation Measures MM-TCR-1 through -3, the Project would not eliminate important examples of the major periods of California or prehistory.

b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?

Less Than Significant Impact. The list of related projects is based on information provided by LADOT, and other recent studies, and include developments within a 0.5-mile radius of the Project

Site, as suggested in the Transportation Assessment Guidelines.[54] The cumulative analysis in this document takes into consideration the related projects listed in **Table 4.21-1**.

Table 4.21-1
Related Projects

#	Address	Distance	Use	Size	Status
1	5101 Pico Boulevard	2,225 feet west	Residential	136 units	To be constructed
2	1749 La Brea Avenue	2,600 feet southwest	Residential	15 units	To be constructed
3	1327 West Boulevard	1,975 feet east	Residential	27 units	To be constructed

Distance is measured from the Related Project's closest property line to the closest portion of the Project Site.
Related Projects List, Related Projects Summary from Case Logging and Tracking System, Los Angeles Department of Transportation (LADOT), June 27, 2025.

No. 2: DIR-2021-8818-TOC-HCA
No. 3: ADM-2023-733-TOC-VHCA-ED1

For the reasons stated in this Initial Study, the Project would not have the potential to contribute to significant cumulative impacts.

c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?

Less Than Significant Impact. For the reasons stated in this Initial Study, the Project would not have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly.

TITLE INFORMATION

THE TITLE INFORMATION SHOWN HEREON IS PER PRELIMINARY REPORT FOR TITLE INSURANCE NO. 932404187 DATED OCTOBER 31, 2024 AS PREPARED BY COMMONWEALTH LAND TITLE COMPANY, LOS ANGELES, CALIFORNIA [TITLE OFFICER: ERIC GILE, TELEPHONE: (213) 330-3055] NO RESPONSIBILITY OF CONTENT, COMPLETENESS OR ACCURACY OF SAID PRELIMINARY REPORT IS ASSUMED BY THIS MAP OR THE SURVEYOR.

RECORD OWNER

PACIFIC TITLE ARCHIVES, A CALIFORNIA CORPORATION

LEGAL DESCRIPTION

THE LAND REFERRED TO HEREIN BELOW IS SITUATED IN THE CITY OF LOS ANGELES, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA AND IS DESCRIBED AS FOLLOWS:

LOTS 660 TO 671 INCLUSIVE OF TRACT NO. 4604, IN THE CITY OF LOS ANGELES, COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AS PER MAP RECORDED IN BOOK 51, PAGES 34 TO 38 INCLUSIVE OF MAPS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY.
EXCEPT FROM SAID LOTS THAT PORTION THEREOF, DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT IN THE NORTHWESTERLY LINE OF SAID LOT 660, DISTANT SOUTHWESTERLY 10 FEET, MEASURED ALONG SAID NORTHWESTERLY LINE FROM THE INTERSECTION THEREOF WITH THE SOUTHWESTERLY LINE OF THE NORTHEASTERLY 10 FEET OF SAID LOTS;

THENCE NORTHEASTERLY ALONG SAID NORTHWESTERLY LINE, TO THE NORTHWESTERLY CORNER OF SAID LOT 660;

THENCE SOUTHEASTERLY ALONG THE NORTHEASTERLY LINES OF SAID LOTS TO THE NORTHEASTERLY CORNER OF LOT 671;

THENCE SOUTHWESTERLY ALONG THE SOUTHEASTERLY LINE OF SAID LOT TO A POINT DISTANT SOUTHWESTERLY 10 FEET, MEASURED ALONG SAID SOUTHEASTERLY LINE FROM THE INTERSECTION THEREOF WITH THE SAID SOUTHWESTERLY LINE OF THE NORTHEASTERLY 10 FEET OF SAID LOTS;

THENCE NORTHERLY ALONG A DIRECT LINE 14.77 FEET TO A POINT IN SAID SOUTHWESTERLY LINE OF THE NORTHEASTERLY 10 FEET OF SAID LOTS DISTANT 10 FEET NORTHWESTERLY, MEASURED ALONG SAID SOUTHWESTERLY LINE FROM THE SAID SOUTHEASTERLY LINE OF SAID LOT 671;

THENCE NORTHWESTERLY ALONG SAID SOUTHWESTERLY LINE TO A POINT DISTANT SOUTHEASTERLY 10 FEET, MEASURED ALONG SAID LINE FROM THE SAID NORTHWESTERLY LINE OF SAID LOT 660;

THENCE SOUTHWESTERLY 13.48 FEET ALONG A STRAIGHT LINE TO THE ***POINT OF BEGINNING***.

ALTA/NSPS TABLE "A" ITEM NOTES

ITEM 2 THE SITE ADDRESS OBSERVED WHILE CONDUCTING THE SURVEY IS:
4800 SAN VICENTE BOULEVARD
LOS ANGELES, CA 90019

ITEM 3 THE LAND SHOWN ON THIS SURVEY LIES PARTIALLY WITHIN FLOOD ZONE "X" (SHADED), BEING DESCRIBED AS "0.2% ANNUAL CHANCE FLOOD HAZARD, AREAS OF 1% ANNUAL CHANCE FLOOD WITH AVERAGE DEPTH LESS THAN ONE FOOT OR WITH DRAINAGE AREAS OF LESS THAN ONE SQUARE MILE", PARTIALLY WITHIN FLOOD ZONE "X" (UNSHADED), BEING DESCRIBED AS "AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN" AND PARTIALLY WITHIN FLOOD ZONE "AO", BEING DESCRIBED AS "SPECIAL FLOOD HAZARD AREAS WITH BASE FLOOD ELEVATION (BFE) DEPTH OF 2 FEET" PER FLOOD INSURANCE RATE MAP (FIRM) - COMMUNITY PANEL NUMBER 06037C1612G, DATED DECEMBER 21, 2018.

ITEM 4 THE GROSS LAND AREA IS: 30,612 SF / 0.703 ACRES

ITEM 5 THE CONTOURS AND ELEVATIONS SHOWN HEREON ARE BASED ON THE FOLLOWING BENCHMARK:

BM No.: 13-03105 ELEV.: 136.983' (CITY OF LOS ANGELES BENCHMARK)
DATUM: NAVD 88
DESCRIPTION: WIRE SPK IN W CURB LA BREA AVE; 9FT S OF BC CURB RETURN OF SAN VICENTE BLVD.

CONTOUR INTERVAL=1'

ITEM 6(a) ***THE CURRENT ZONING CLASSIFICATION IS _____ PER THE CITY OF ...***

(INSERT ZONING INFORMATION HERE - INDICATE SOURCE AND DATE OF INFO)

ITEM 6(b) ***SEE THE SURVEY PLAT FOR THE LOCATION OF SETBACK LINES.***

ITEM 7(a) SEE THE SURVEY PLAT FOR EXTERIOR DIMENSIONS OF ALL BUILDINGS AT GROUND LEVEL.

ITEM 7(b)(1) SEE THE SURVEY PLAT FOR THE SQUARE FOOTAGE OF THE EXTERIOR FOOTPRINT OF ALL BUILDINGS AT GROUND LEVEL.

ITEM 7(c) SEE THE SURVEY PLAT FOR THE MEASURED HEIGHT ABOVE GRADE OF ALL BUILDINGS.

ITEM 8 SEE THE SURVEY PLAT FOR ANY SUBSTANTIAL FEATURES OBSERVED IN THE PROCESS OF CONDUCTING THE SURVEY.

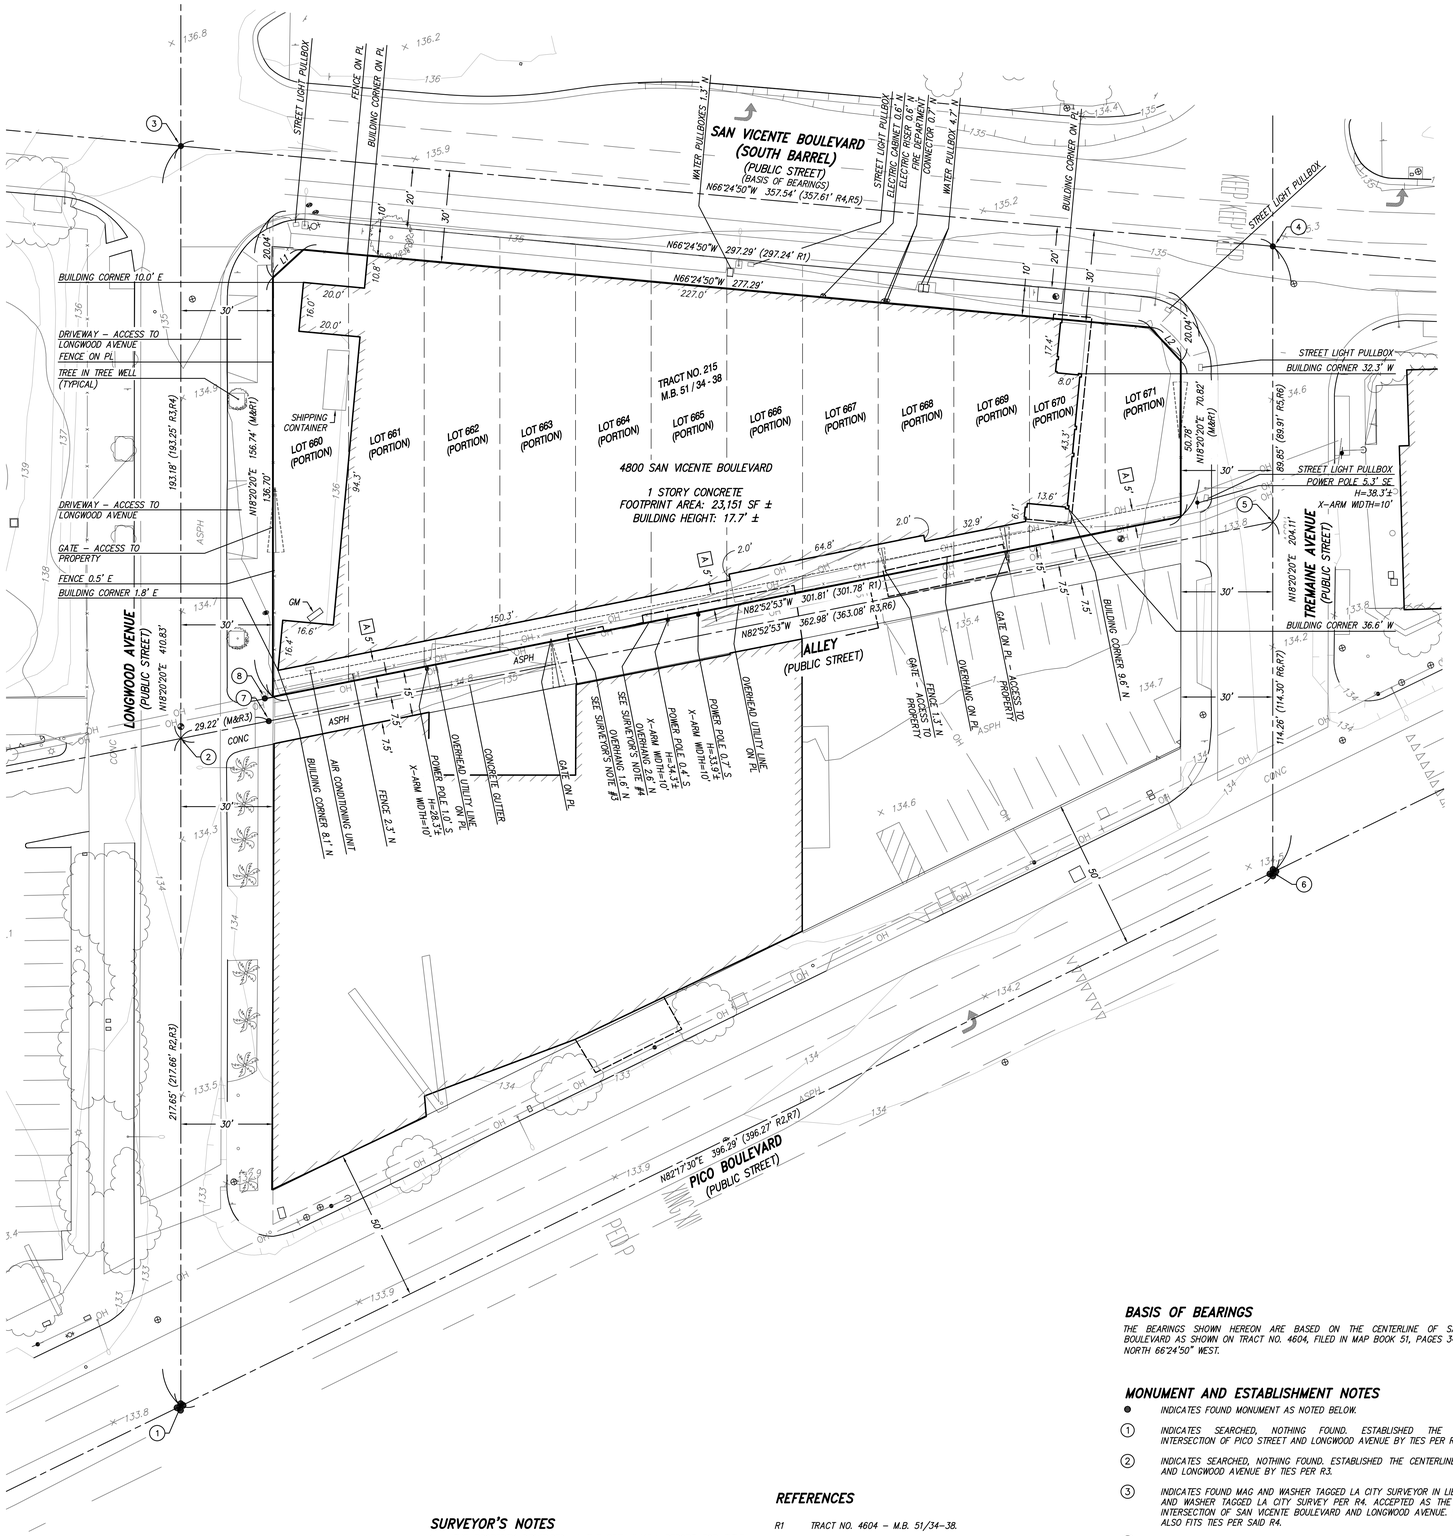

ITEM 9 NO PARKING STRIPING WAS OBSERVED ON THE SUBJECT PROPERTY.

ITEM 13 SEE THE SURVEY PLAT FOR THE NAMES OF ADJOINING OWNERS, IF ANY.

ITEM 14 SEE THE SURVEY PLAT FOR THE DISTANCE TO THE NEAREST INTERSECTING STREET.

ITEM 15 THE TOPOGRAPHIC INFORMATION SHOWN HEREON WAS COMPILED PHOTOGRAMMETRICALLY FROM AERIAL PHOTOGRAPHY DATED JANUARY 15, 2025 BY INLAND AERIAL SURVEYS INC AND SUPPLEMENTED BY A FIELD SURVEY COMPLETED IN FEBRUARY, 2025.

THE PHOTOGRAMMETRIC MAPPING SHOWN HEREON HAS BEEN CHECKED FOR ACCURACY AND MEETS OR EXCEEDS THE UNITED STATES NATIONAL MAP ACCURACY STANDARDS FOR HORIZONTAL [AND VERTICAL IF ITEM 5 IS SELECTED] ACCURACY AS ISSUED BY THE NATIONAL GEOSPATIAL PROGRAM EXCEPT IN AREAS OBSCURED BY SHADOWS, DENSE TREES OR BRUSH, CANOPIES, ROOF OVERHANGS, AND OTHER OVERHEAD OBSTRUCTIONS.

***SUBJECT**:*
Updated Los Angeles City Planning Form CP-4068 Tree Report for Westport – San Vicente at 4802-4828 W San Vicente Blvd, Los Angeles, CA 90019

EXECUTIVE SUMMARY

The project owner, applicant, and representative (hereafter "the project team") are proposing to construct a self-storage facility at the project site located at 4802-4828 W San Vicente Blvd in the Wilshire area in Council District 10 of the City of Los Angeles.

In accordance with LA City Street Tree Ordinance #153500, LA City Protected Tree Ordinance #186873, and LA City Planning Form CP-4068 Tree Report Template, I completed a tree inventory at the project site on 7/15/25 and found 5 qualifying trees on or near the site – all are street trees of non-protected tree or shrub species.

On 9/24/25 I wrote a Tree Report discussing the project team's proposed site plan design and how it would result in removal of one of the street trees plus minor to moderate construction impacts to the remaining 4 street trees.

Now in November 2025, the project team requested an updated report to account for an additional proposed street tree removal.

Thus, the following Tree Report documents 2 proposed street tree removals, required replacement planting with 4 new trees, and Best Management Practices for minimizing construction impacts to the remaining 3 street trees, including instructions for required protective fencing and recommendations for other specific and general tree protection measures.

PROJECT OVERVIEW

Purpose of Tree Report

This Tree Report is based upon the findings of my tree inventory visit, the proposed site plan design that was provided to me by the project team, and discussion with the project team regarding specific project and construction details. It documents the expected removal of 2 street trees, as well as expected construction impacts to 3 other street trees, and is intended for use by the project team in obtaining tree permits and environmental clearances accordingly. This Tree Report also provides Best Management Practices for construction around the remaining street trees, including suggestions for new street tree replacement planting, instructions for required protective fencing, and recommendations for other specific and general tree protection measures.

Project Information

The following project information was provided to me by the project team:

Project Name: Westport – San Vicente
Project APN: 5070004026 – 4802-4828 W San Vicente Blvd, Los Angeles, CA 90019
Project Entitlement(s) and/or Environmental Case Numbers:
CPC-2025-5194-HD-CU2-PR and ENV-2025-5195-EAF
Project Team Names and Contact:

Owner

Project Location

The project site is a developed commercial property located at 4802-4828 W San Vicente Blvd in the Wilshire area in Council District 10 of the City of Los Angeles. It measures 30,610 square feet, is triangular in shape, and is bordered by W San Vicente Blvd to the north, Longwood Avenue to the west, alleyway and commercial property to the south, and Tremaine Avenue at its shortest end to the east. The existing commercial building is a single-story warehouse measuring 23,151 square feet. It has an asphalt parking lot at the east end, asphalt storage and trash area along the west side, and asphalt walkway along the south side. The property is enclosed with wrought-iron and chainlink perimeter fencing. Vegetation on the site consists of non-native vines along the south perimeter fence and non-native weeds sprouting along the west and south sides.

TABLE 1. Project APN Square Footage

Project APN	Square Footage of Parcel
5070-004-026 – 4802-4828 W San Vicente Blvd	30,610 square feet
Combined Square Footage Total	**30,610 square feet**

A Project Location Map and Aerial Map of Project Site were provided to me by the project team and have been attached to this Tree Report as **FIGURE 1** and **FIGURE 2**.

Proposed Development
The proposed project consists of complete demolition of the entire project site followed by construction of a self-storage facility. The building will be 7 stories tall, spanning most of the buildable area between setbacks for a total square footage of 175,047, with the following features:

- 3-foot street widening along Longwood Avenue
- Office at the northwest corner of the site at the intersection of W San Vicente Blvd and Longwood Avenue
- Parking garage at the west side of the site with a new driveway entrance plus loading and trash areas
- Lobby room with 18 long term bike parking spaces and 2 elevators
- Stairways at the southwest and east corners of the site and a secondary entryway along W San Vicente Blvd
- Transformer pad with 18'x30' staging area at the southwest corner of the site
- 18 short term bike parking spaces in the parkway along Longwood Avenue

A Grading Plan was not available at the time of writing this Tree Report. Once the project team has a Grading Plan, they can attach it in the correct place at the end of this Tree Report as **FIGURE 3**.

A Protected Tree Plan [Landscape Plan, Plot Plan] showing existing trees has been created by Alison Lancaster Consulting Arborists LLC and attached to this Tree Report as **FIGURE 4**.

Tree Retention/Preservation Efforts
The project team's proposed site plan design avoids or minimizes impacts to street trees as follows[1]:

- There will not be any changes to street, curbs, or sidewalks on W San Vicente Blvd.
- New landscape with drought tolerant plants will be installed around the remaining street trees on W San Vicente Blvd and is only expected to be a minor root zone impact to them.

A Project Schedule was provided to me by the project team and has been attached to this Tree Report as **FIGURE 5**.

[1] I have provided my observations of how the project team's proposed site plan design avoids or minimizes tree impacts. However, it is not the role of Tree Experts to "justify" or "advocate for" their client's proposed projects. Tree Experts are independent, objective observers who analyze and report on expected tree impacts based on our client's proposed site plan designs, and may make recommendations to clients for avoiding or minimizing those impacts, but are not responsible for the final proposed site plan design nor for justifying or advocating for the client's design.

TREE ASSESSMENT

Field Methodology

I completed a tree inventory at the project site on 7/15/25. The tree inventory visit began at 12:00PM and took 45 minutes. Weather during the tree inventory visit was sunny.

The tree inventory involved ground-level visual assessment of trees and shrubs on and near the site to the extent possible given site topography, walls and fences, and other obstructions, and was completed as follows per my agreement with the project team:

1. The tree inventory will include the following trees and shrubs that are located on or near[2] the project site:
   - **street trees** located in the parkway in front of the project site regardless of size
   - **protected native tree and shrub species** that are at least 4 inches diameter
   - **other tree species** that are at least 8 inches diameter

2. Place a round, numbered aluminum tag on each tree or shrub located on the project site.

3. Identify trees and shrubs by assigned number on a topographic survey provided by the project team.

4. Create tree inventory tables with the following information about each tree and shrub:
   Tree #
   Status – Street Tree, Protected Native Tree or Shrub, Other On-Site Tree, Other Off-Site Tree
   Species – scientific and common names
   Diameter at Standard Height (DSH) – measured in inches with a diameter tape
   Height – visually estimated in feet
   Canopy – measured in feet with a 3-foot walking stride
   Physical Condition – visually evaluated health and structure ratings
   Natural or Ornamental –opinion based on tree or shrub species and site context
   Expected Disposition – no impact, preserve, encroach, remove
   Disposition Reason – based on final site plan design provided by project team
   Tree Replacement Ratio and Species – based on last known replacement tree policies from LA City Urban Forestry Division and LA City Planning Department, subject to change

5. Photograph each tree and shrub.

Note on Tree Safety

Even though I have gathered physical condition ratings for the inventoried trees and shrubs, I have not evaluated any of them for safety. Without a thorough and focused "risk assessment," it is difficult to estimate the likelihood that a tree may fail and cause damage to life or property. Even with such an assessment, there are no guarantees that a tree will not fail unexpectedly. Trees are dynamic living organisms subject to many influencing factors. All trees are potentially hazardous, regardless of their apparent health and vigor. It is impossible to be certain that a tree is absolutely safe.

[2] A tree or shrub was considered "near" the project site if its canopy overhangs the project site, or if it is otherwise at risk of being impacted by the proposed project.

Data Analysis
There are 5 qualifying trees on or near the site – all are street trees of non-protected tree or shrub species as follows:

- 2 southern magnolias (*Magnolia grandiflora*) on Longwood Avenue
- 1 purple orchid tree (*Bauhinia variegata*) on W San Vicente Blvd
- 2 glossy privets (*Ligustrum lucidum*) on W San Vicente Blvd

There are no qualifying native or non-native trees or shrubs directly on the site, and no protected native trees or shrubs off-site on surrounding properties that could be impacted by the project team's proposed project.

Photos of the inventoried street trees have been attached to this Tree Report as a **PHOTO INDEX**.

Required information about all inventoried street trees can be reviewed on the Tree Inventory Table that has been attached to this Tree Report as **TABLE 2**.

Inventoried street tree locations and canopies can be reviewed on the Protected Tree Plan that has been attached to this Tree Report as **FIGURE 4**.

Expected Tree Impacts
The following section describes expected street tree removals and impacts as a result of the project team's proposed site plan design.

Impact Assumptions
The impact analysis that follows is based on several assumptions. Should these assumptions prove to be incorrect, additional impacts could result from the project.

1. I have correctly identified where the property lines are.
2. All street trees are mapped correctly.
3. I have a complete and correct understanding of the proposed project.
4. The proposed project design will not change significantly.
5. There will not be any changes to street, curbs, or sidewalks on W San Vicente Blvd.

Findings for Protected Tree Removal
The project team's proposed site plan design will result in removal of[3]:

- Tree ST1 to accommodate the required 18'x30' transformer staging area at the southwest corner of the site along Longwood Avenue.
- Tree ST2 to accommodate the 3-foot street widening along Longwood Avenue.

[3] I have provided "explanations" for proposed street tree removals that are based on my discussion with the project team. However, it is not the role of Tree Experts to "justify" proposed tree removals as described in LA City Planning Form CP-4068 Tree Report Template. Tree Experts are independent, objective observers who analyze and report on expected tree impacts based on our client's proposed site plan designs, and may make recommendations to clients for avoiding or minimizing those impacts, but are not responsible for the final proposed site plan design nor for justifying the client's design.

It is my finding that:

X The removal of any tree will not result in undesirable, irreversible soil erosion through diversion or increased flow of surface waters that cannot be mitigated to the satisfaction of the City;

AND

X It is necessary to remove the tree(s) because its continued existence at said location prevents the proposed[4] development of the subject property;

OR

□ The tree shows a substantial decline from a condition of normal health and vigor, and restoration through appropriate and economically reasonable preservation procedures and practices is not advisable;

OR

□ Because of an existing and irreversible adverse condition of the tree, the tree is in danger of falling or failing;

OR

□ The presence of the tree interferes with utility services and/or roadways within or without the subject property and the only reasonable alternative to the interference is the removal of the tree;

OR

□ The tree has no apparent aesthetic value that will contribute to the appearance and design of the surrounding properties, or is not located with reference to other trees or Historical-Cultural Monuments in such a way as to acquire a distinctive significance at said location.

Tree Impacts

I expect minor construction impacts to Trees ST3, ST4, and ST5 as a result of the proposed project. These impacts should be minimized if all Required and Recommended Practices outlined under Best Management Practices later in this Tree Report are followed carefully.

[4] It is beyond the purview of arborists to determine the “reasonableness” of a development.

PROJECTS WITHIN OVERLAYS

There are no applicable specific plans for the project site.

HABITAT INTEGRITY ANALYSIS

I am a qualified Tree Expert, but I am not a qualified biologist, therefore I cannot provide a habitat integrity analysis of the project site.

If a habitat integrity analysis is required for the proposed project, then the project team must hire a qualified biologist to complete the analysis of the project site according to LA City Planning Form CP-4068 Tree Report Template requirements, including designation of sensitive natural communities on and near the site, delineation of woodland boundaries, and analysis of potential project impacts to habitat integrity.

BEST MANAGEMENT PRACTICES

Required Practices

Tree Protection Zone (TPZ) and Protective Fencing

The TPZ is defined by LA City Planning Form CP-4068 Tree Report Template as the ground-level, circular zone around street tree trunks whose radius is equivalent in distance to 12 times the trunk diameter as measured at standard height of 4.5 feet above grade.

The best possible means of securing TPZs, thus minimizing root impacts to street trees as a result of construction-related activities, is with proper protective fencing that is installed before any demolition, excavation, grading, or other construction activities begin. ***Protective fencing shall be chain-link, at least 5 feet high, and held in place by steel stakes driven directly into the ground***. Orange snow fencing, even when held by stakes in the ground, is not sufficient as protective fencing during construction.

A durable sign shall be securely affixed to the fencing that reads:

STREET TREE
This fence shall not be moved or entered without authorization
[insert appropriate project contact information]

There shall be no access for workers or other personnel into protective fencing areas. No storage, waste disposal, equipment clean-out, outhouse, or vehicle parking is allowed within the protective fencing area. If a gate in the protective fencing is necessary, such as for project team access, it shall be padlocked during all working hours with limited, authorized access only.

All protective fencing shall remain in place throughout all demolition, excavation, grading, and other construction activities, and shall only be removed near the end of the project when landscape and other activities inside protective fencing areas will begin.

TPZs and recommended protective fencing locations[5] are shown on the Protected Tree Plan that has been attached to this Tree Report as **FIGURE 4**. The project team shall consult with LA City Department of Public Works to ensure the recommended protective fencing locations satisfy their requirements for parkway visibility and pedestrian safety. In addition, the project team shall consult the ***Project Arborist*** if modifications to protective fencing locations are needed for site access or any other reasons.

LA City Planning Form CP-4068 Tree Report Template requires that all recommended protective fencing be installed and photographed, and that those photos be attached to this Tree Report, in order for the Tree Report submittal to be complete. Since protective fencing photos are outside my agreed scope of work, the project team is responsible for contracting installation and photographing of the recommended protective fencing, then attaching those photos in the correct place at the end of this Tree Report as **FIGURE 6**.

[5] The project team and the City should be aware that the recommended protective fencing locations shown on the Protected Tree Plan are based on the project site topography and features, the project team's proposed site plan design, and the expected construction activities. Therefore, the protective fencing areas are as close as possible to, but may not always align with or fully encompass, the street tree TPZs.

Monetary Bonding
Requirements for monetary bonding, if applicable to the proposed project, shall be determined by the project team in coordination with the appropriate LA City departments.

Tree Monitoring and Inspection
Contractor responsibility- The project team shall ensure that all project contractors have read, are familiar with, and will adhere to all required and recommended practices laid out in this entire Best Management Practices section. A copy of this Tree Report and all of its associated attachments shall be kept on the project site at all times.

Project Arborist- There are certain situations where the ***Project Arborist is required or recommended to be on the site***. It is the project team's responsibility to engage a ***Project Arborist*** that can be present for construction monitoring and project milestones as described in this Best Management Practices section. I can provide a ***Project Arborist*** agreement if requested by the project team, but they may hire any qualified arborist of their choosing to fulfill this role.

72-hour notice- It is the project team's responsibility to notify the ***Project Arborist*** when those milestones recommended for arborist presence are reached. The ***Project Arborist*** shall be notified at least 72 hours before:

- the project site is to be demolished;
- excavation, grading, or construction within the TPZ of a street tree commences;
- pruning of a street tree's canopy or roots takes place;
- commencement of any other activity within the TPZ of a street tree.

Monitoring during and after construction- It is the project team's responsibility to ensure that all construction and post-construction monitoring requirements, as outlined by LA City Protected Tree Ordinance #186873, relevant project permits, and project conditions of approval, are satisfied. This means hiring a ***Project Arborist*** for construction monitoring and notifying them of relevant dates and project milestones in a timely manner so they may be present on the site.

Recommended Practices
New Tree Planting
The project team's proposed site plan design will result in removal of 2 street trees – Trees ST1 and ST2. LA City Urban Forestry Division requires a replacement planting ratio of 2:1 for street tree removals, meaning 4 replacement street trees are required.

I suggest that the project team include 4 new street tree plantings, of City-approved species and sizes, along W San Vicente Blvd in their landscape design.

Please note that final determination of all New Tree Planting details (species, sizes, locations) shall be made by the project team in coordination with the appropriate LA City departments and then reflected on the project landscape plan.

Specific Tree Protection Measures

The following tree protection measures should be applied whenever they are relevant to construction activities around all remaining street trees.

Mechanical damage prevention at all stages of work- All demolition, construction, landscape, and other contractors working within the canopy dripline or TPZ of a street tree should take extra care not to damage their trunks, canopies, or roots during all activities and phases of their work. No equipment, tools, or materials should be allowed to bump, cut, or otherwise damage a street tree. There should not be dumping or spillage of concrete, paint, or other chemicals into the soil inside a TPZ, nor should there be equipment and tool clean-out inside a TPZ. ***If for some reason damage to a street tree occurs, or is unavoidable, work should stop and the Project Arborist should be consulted on how to proceed.***

Clearance pruning- If clearance pruning of a street tree is necessary for demolition, construction, equipment access, etc, then the pruning should only be scheduled once the project team is certain what clearance is actually required for the work to continue; and then, only the minimum amount of clearance required for work to continue should be applied. ***The Project Arborist should be consulted prior to any pruning.*** All pruning should be carried out by an ISA Certified Arborist, or under the oversight of the ***Project Arborist***, and should conform to ANSI A-300 standards at a minimum.

Utility trenching- No utility work is shown on the site plan design that was provided to me. However, in the event that trenching for underground utilities becomes necessary in the parkways in front of the site, then efforts should be made to route utility trenches outside of street tree TPZs. Whenever a utility trench must pass within a TPZ, the ***Project Arborist*** should be consulted before that work begins. Utility trenching within a TPZ should be done using ***hand tools only*** – no machinery – and efforts should be made to tunnel under tree roots. ***No roots measuring two inches diameter or larger should be cut or removed without first consulting the Project Arborist.*** Smaller roots should be cut cleanly with a sharp saw or pruning tool, at right angles to the root, and far enough behind any damage that all split and cracked portions are removed. Do not apply wound treatment to cuts.

Landscape- When designing and installing landscape and irrigation around all street trees, the following guidelines should be followed:

- Brush and trash removal within a TPZ should be completed using ***hand tools only*** – no machinery.
- There should not be any tilling, ripping, or amending of soil within street tree TPZs without first consulting the ***Project Arborist***.
- No planting of any type, irrigation, or irrigation overspray should occur within 5 feet of any street tree trunk.
- Planting holes within a TPZ should be ***dug manually***. If any roots measuring two inches diameter or larger are encountered, the planting hole should be moved. Smaller roots should be cut at the edge of the planting hole with sharp, clean pruning tools.
- Underground irrigation lines should be kept out of TPZs to the extent possible, or otherwise should be installed using ***hand tools only*** and without doing any root damage to the street trees.

General Tree Protection Measures

The following tree protection measures should be applied whenever they are relevant to construction activities around all street trees. If there is conflict between the Specific Tree Protection Measures described above, and any of these General Tree Protection Measures, then the Specific Tree Protection Measures supersede.

1. All work conducted in the ground within a TPZ should be accomplished with hand tools only.

2. Where structural footings are required and major roots will be impacted, the footing depth should be reduced to a maximum of 12". This may require additional "rebar" for added strength. An alternative would involve bridging footings over roots and covering each root with plastic cloth and 2-4" of Styrofoam matting before pouring concrete.

3. Any required trenching which has multiple trench path options should be routed in such a manner as to minimize root damage. Radial trenching is less harmful than tangential trenching because it runs parallel to roots, rather than diagonal or perpendicular to them. Whenever possible, trenching should work around roots rather than cutting them. Place pipes and cables below uncut roots, and utilize the same trench for as many utilities as possible.

4. "Natural" or pre-construction grade should be maintained for as great a distance from the trunk of all trees as construction permits. At no time during or after construction shall soil be in contact with the trunk of a tree above natural grade.

5. Whenever root pruning is necessary, the root pruning cuts should be made cleanly with a sharp saw or pruning tool, far enough behind any damage that all split and cracked portions are removed. The cuts should be made at right angles to the roots so that the wound is no larger than necessary. When practical, cut roots back to a branching lateral root. Do not apply any pruning wound treatment to cuts.

6. When removing hardscapes, as little disruption of soil as necessary should be attempted. This will mean using hand tools for all work within TPZs. It may also mean removing the hardscape in a backwards direction away from the trunks of trees, while keeping personnel and equipment on the hardscape as it is removed.

7. Pruning should be limited to the removal of dead wood and the correction of potentially hazardous conditions, as evaluated by a qualified arborist. Removal or reduction of major structural limbs should be done only as required for actual building clearance or safety. If limbs must be removed, pruning cuts should be made perpendicular to the branch to limit the size of the cut face. The branch bark collar should be preserved (i.e. no “flush cuts”), and cuts should be made in such a way as to prevent the tearing of bark from the tree. All pruning should be done in accordance with ANSI A300 pruning standards. Do not apply any pruning wound treatment to cuts.

8. To minimize soil compaction, keep all activity and traffic to a minimum within TPZs.

9. It is important that TPZs not be subjected to flooding incidental to the construction work, or to disposal of construction debris such as paints, plasters, or chemical solutions. No equipment fueling or chemical mixing should be done within TPZs.

10. In general, it is best to minimize the amount of environmental change that trees will be subjected to. This includes drastic changes in watering practices from historic conditions, such as increases or decreases in the amount or frequency of water applied.

11. Care should be exercised not to allow equipment to physically damage tree trunks, root crowns, or lower limbs during construction. This includes but is not limited to 1) impact damage by scrapers, buckets, or hoes; or 2) damage by tires, wheels, or tracks from operating in close proximity to trees.

CONCLUSION AND RECOMMENDATIONS

There are 5 qualifying trees on or near the site – all are street trees of non-protected tree or shrub species as follows:

- 2 southern magnolias
- 1 purple orchid tree
- 2 glossy privets

The project team's proposed site plan design will result in removal of 2 of the street trees, and I expect will result in minor construction impacts to the remaining 3 street trees.

To replace for the street tree removals, I suggest 4 new street tree plantings in the parkway on W San Vicente Blvd. And if the Best Management Practices outlined in this Tree Report are followed carefully, then I expect construction impacts to the remaining street trees will be minimized.

In order to complete this Tree Report for submittal, the project team should address the following items:

- Once available, attach a Grading Plan in the correct place at the end of this Tree Report as **FIGURE 3**
- Contract the installation and photographing of recommended protective fencing, then attach those photos in the correct place at the end of this Tree Report as **FIGURE 6**.

In addition, if a habitat integrity analysis is required for the proposed project, then the project team must hire a qualified biologist to complete the analysis of the project site according to LA City Planning Form CP-4068 Tree Report Template requirements.

Please let me know if I can be of further assistance or if you have additional questions.

Sincerely,

Alison Lancaster
ASCA Registered Consulting Arborist #770
ISA Board Certified Master Arborist #WE-12464B

GLOSSARY OF TERMS AND ACRONYMS

Terms

Diameter at Standard Height (DSH) – Tree or shrub trunk diameter as measured at 4.5 feet above grade (or at other height as indicated).

Protected Native Tree or Shrub – Defined in LA City Protected Tree Ordinance #186873 as trees and shrubs of the following species which measure 4 inches or more cumulative DSH: all southern California native oaks (*Quercus species*) except scrub oak (*Quercus berberidifolia*); southern California black walnut (*Juglans californica*); western sycamore (*Platanus racemosa*); California bay laurel (*Umbellularia californica*); Mexican elderberry (*Sambucus mexicana*); and toyon (*Heteromeles arbutifolia*).

Other Off-Site Tree – A tree of any species which is not identified as a Protected Native Tree or Shrub, whose trunk measures 8 inches or more DSH, and that is growing on a neighboring property surrounding the project site.

Other On-Site Tree – A tree of any species which is not identified as a Protected Native Tree or Shrub, whose trunk measures 8 inches or more DSH, and that is growing on the project site.

Street Tree – Defined in LA City Street Tree Ordinance #153500 as a tree of any species which is not identified as a Protected Native Tree or Shrub, whose trunk measures any size, and that is growing in a City-owned parkway or other City-owned public space.

Tree Expert – Defined in LA City Protected Tree Ordinance #186873 as an individual who is an ISA Certified Arborist and holds any of the following licenses or qualifications: licensed as an agriculture pest control advisor; licensed as a landscape architect; qualified as an ASCA Registered Consulting Arborist.

Tree Protection Zone (TPZ) – Defined in LA City Planning Form CP-4068 Tree Report Template as the ground-level, circular zone around protected tree and shrub trunks whose radius is equivalent in distance to 12 times the trunk DSH. For protected trees and shrubs with multiple trunks, the TPZ is based on the diameter of the largest trunk.

Acronyms

A300 – American National Standard for Tree Care Operations

PROJECT SCHEDULE

Provided by the project team

Phase	Schedule	Days Per Week	Duration
Example	July 1, 2026 – July 31, 2026	5 days (M-F)	1 month
Demolition	December 1, 2026-December 30, 2026 1	5 days (M-F)	1 month
Site Preparation	January 01, 2027-January 15, 2027	5 days (M-F)	.5 month
Grading	January 15, 2027-February 07, 2027	5 days (M-F)	.75 month
Trenching	February 01, 2027-February 21,2027	5 days (M-F)	.75 month
Construction	February 01, 2027-April 01, 2028	5 days (M-F)	14 months
Architectural Coatings	February 01, 2028- April 30, 2028	5 days (M-F)	3 months

Demolition involves removing buildings or structures.
Site Preparation involves clearing vegetation (grubbing and tree/stump removal) and removing stones and other unwanted material or debris prior to grading.
Grading involves the cut and fill of land to ensure that the proper base and slope is created for the foundation.
Building Construction involves the construction of the foundation, structures, and buildings.
Trenching is associated with underground utilities, including gas, water, electricity, telecommunications.
Paving involves the laying of concrete or asphalt such as in parking lots, roads, driveways, or sidewalks.
Architectural Coating involves the application of coatings to both the interior and exterior of buildings or structures, the painting of parking lot or parking garage striping, associated signage and curbs, and the painting of the walls or other components such as stair railings inside parking structures.

Construction schedule, including start, end, and duration dates is estimate only.
Some overlap of phasing may occur.

ARBORIST DISCLOSURE STATEMENT

Arborists are tree specialists who use their education, knowledge, training and experience to examine trees, recommend measures to enhance their health and structure, and attempt to reduce the risk of living near trees. Clients may choose to accept or disregard the recommendations of the arborist, or seek additional advice.

Arborists cannot detect every condition that could possibly lead to the structural failure of a tree. Trees are living organisms that fail in ways we do not fully understand. Conditions are often hidden within trees and below ground. Arborists cannot guarantee that a tree will be healthy or safe under all circumstances, or for a specified period of time. Likewise, remedial treatments cannot be guaranteed.

Treatment, pruning, and removal of trees may involve considerations beyond the scope of the arborist's services such as property boundaries, property ownership, site lines, disputes between neighbors, landlord-tenant matters, etc. Arborists cannot take such issues into account unless complete and accurate information is given to the arborist. Even with complete and accurate information, arborists are not attorneys and cannot provide legal guidance on these issues. The person hiring the arborist accepts full responsibility for authorizing recommended treatment or remedial measures.

Trees can be managed, but they cannot be controlled. To live near a tree is to accept some degree of risk. The only way to eliminate all risks is to eliminate all trees.

Please note the following important considerations:

- You should never authorize or do any work on any tree unless you are certain of that tree’s ownership, and you have confirmed that you solely own the tree, or that anyone else having a claim to the tree has given you permission in writing authorizing your proposed action.
- Before removing a tree, be sure it is your tree to remove.
- Trees on property lines belong to both properties.
- Working on trees hanging into or over your yard that belong to a neighbor may result in “unreasonable damage” to their tree and could expose you to litigation.

Re:	Air Quality, Energy, and Greenhouse Gas Impact Analysis for the 4802-4828 San Vicente Boulevard Self Storage Project, EPD Project Number 25-080

Project Overview

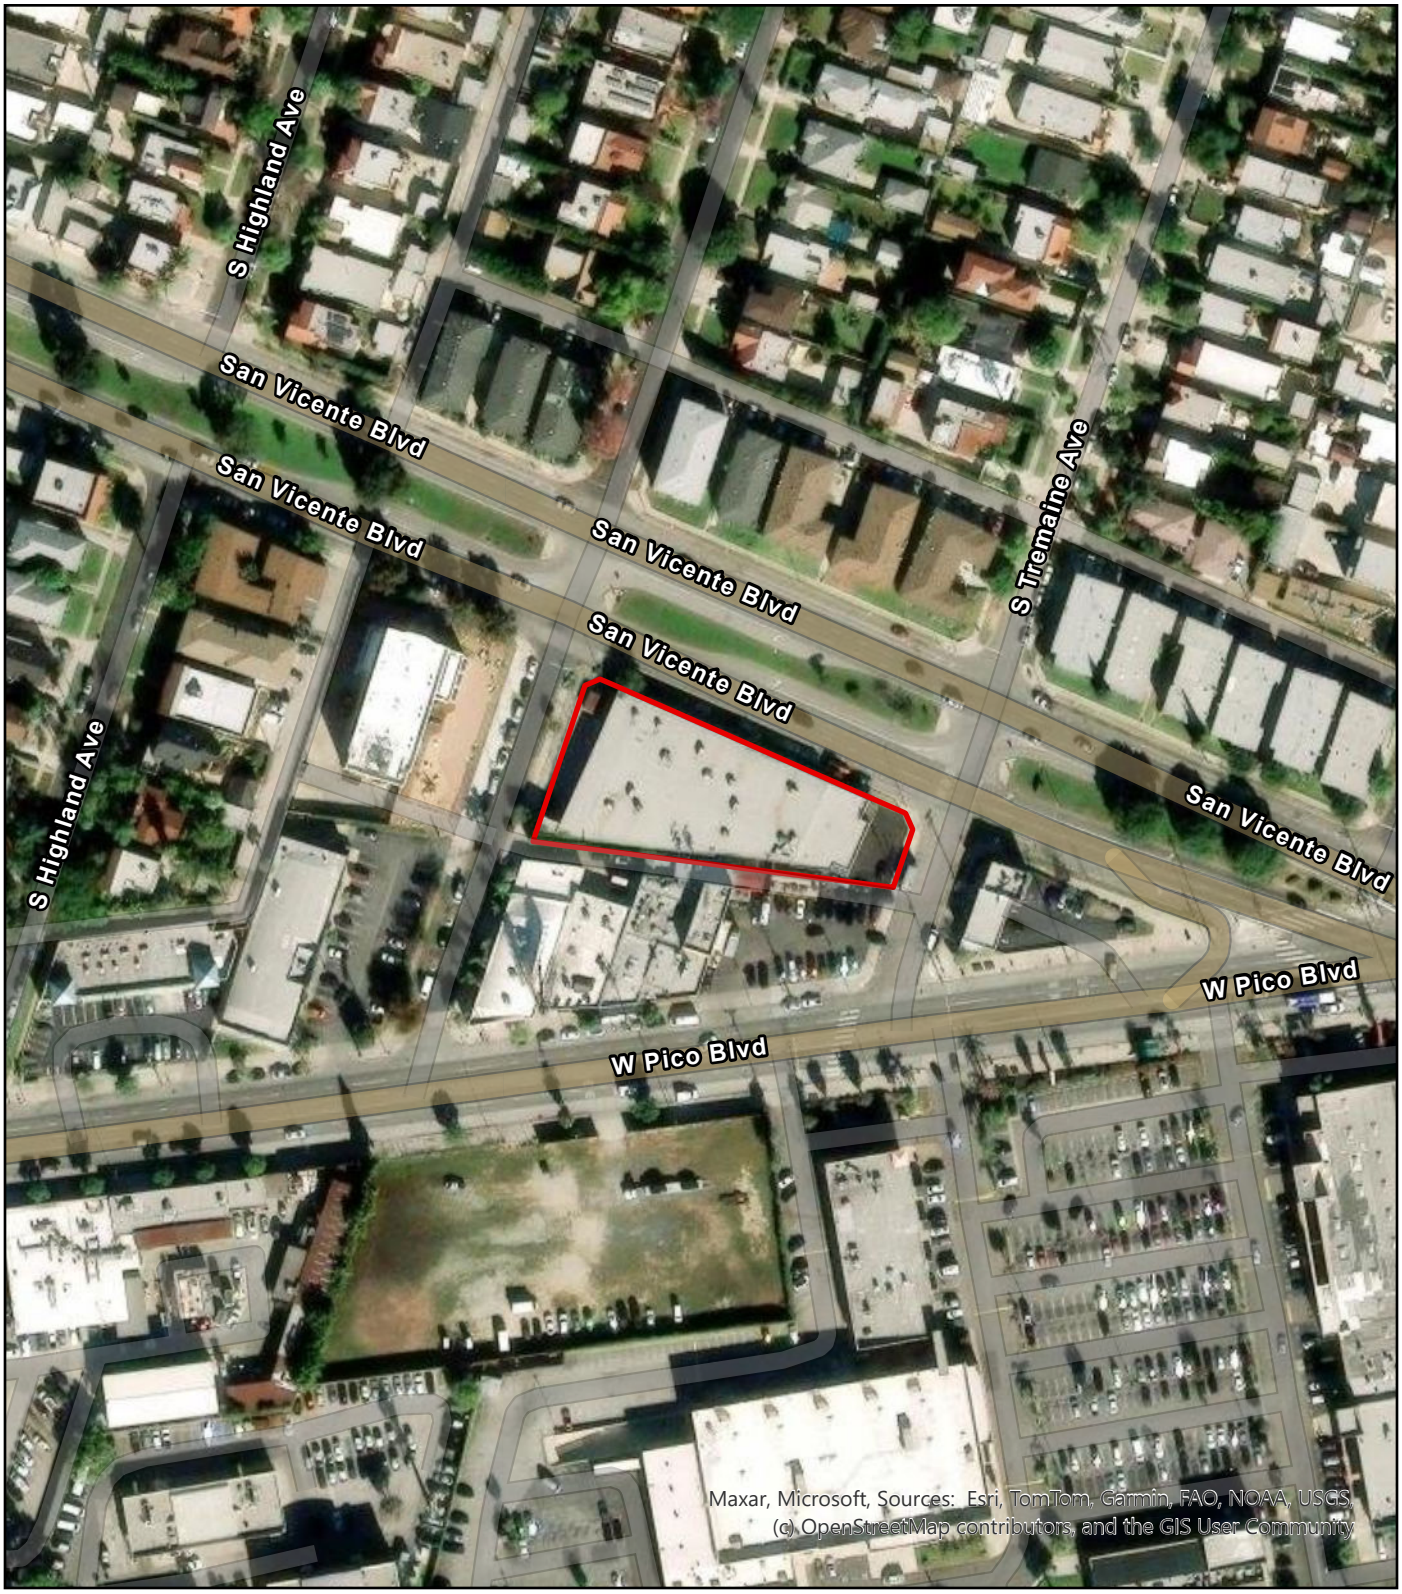

This technical memorandum presents an analysis of the air quality, energy, and greenhouse gas (GHG) impacts for the 4802-4828 San Vicente Boulevard Self Storage Project (proposed Project). The Project site is situated in the central portion of the City of Los Angeles (City) within Los Angeles County. The Project is located at 4802 San Vicente Boulevard. Regional access to the site is provided via Interstate Route 10 (I-10). Local access to the site is provided via West Pico Boulevard and Western Avenue.

The Project site encompasses approximately 0.70 acres, inclusive of one parcel identified by Assessor's Parcel Number (APN) 5070-004-026. The site is currently developed with a 23,151-square-foot (SF) warehouse. The site also contains existing parking spaces and landscaping.

The Project site has a land use designation of Community Commercial under the Wilshire Community Plan and a zoning designation of Commercial (C2-1-O). The Project applicant proposes to construct a seven-story, 175,047 SF self-storage facility. The proposed Project would also include associated improvements such as landscaping, parking, and related site improvements. The site aerial and site plan are shown in Figure 1, *Project Site Aerial*, and Figure 2, *Conceptual Site Plan*.

To support the California Environmental Quality Act (CEQA) document for the Project, this report analyzes the proposed Project's construction and operational impacts to air quality (emission of criteria pollutants), energy usage, and GHG emissions using the California Emissions Estimator Model (CalEEMod Version 2022.1) land use emission model and Emission Factor (EMFAC Version 2021) model. The Project site is within the jurisdiction of the South Coast Air Quality Management District (SCAQMD). Therefore, significance thresholds from SCAQMD are used were applicable.

Figure 2: Conceptual Site Plan

Summary of Air Quality, Energy, and GHG Impacts

Air Quality

The proposed Project's maximum daily emissions for construction would not exceed SCAQMD's regional or local thresholds of significance for any criteria pollutants. Operation of the Project would not exceed SCAQMD's regional thresholds of significance. Projects that do not exceed regional thresholds are assumed not to have a significant impact on both a project level and a cumulative level. The proposed Project also aligns with SCAQMD'S 2022 Air Quality Management Plan (AQMP), reflecting adherence to regional air quality management goals and standards. Furthermore, odors produced by the construction and operation of the proposed Project would be minimal. Additionally, all construction activities would comply with applicable SCAQMD rules and regulations, including Rule 402, Rule 403, and Rule 1113 as further described in the air quality analysis section. Impacts on air quality would therefore be less than significant.

Energy

The proposed Project's energy consumption for construction activities would be conditioned to require compliance with existing fuel standards, machinery efficiency standards, and California Air Resources Board (CARB) requirements that limit idling of construction trucks and equipment. There are no unusual Project characteristics that would cause the use of construction equipment that would be less energy efficient compared with other similar construction sites in other parts of the state. Additionally, through compliance with existing standards, operation of the Project would not result in an energy demand on a per-development basis that is greater than other development projects in Southern California. Additionally, the proposed Project would be required to meet the California Code of Regulations (CCR) Title 24 energy efficiency standards and comply with all applicable City energy codes. Thus, the Project would result in less-than-significant impacts related to inefficient, wasteful, or unnecessary consumption of energy as well as growth of future renewable energy.

GHG Emissions

The proposed Project's construction and gross operational GHG emissions would total 863 metric tons of carbon dioxide equivalent ($MTCO_2e$). Accounting for the existing site's operations, the Project's net emissions would total 602 $MTCO_2e$ per year. The proposed Project is consistent with the actions and measures of CARB's 2022 Scoping Plan, Connect SoCal 2024, and the Los Angeles Green New Deal. Therefore, the Project would have a less-than-significant impact on GHG emissions.

Methodology

To calculate the construction and operational impacts, air quality emissions, energy consumption, and GHG emissions were estimated using CalEEMod v. 2022.1, EMFAC v. 2021, and EMFAC v. 2025. The existing warehouse was also modeled and compared to the proposed Project to determine net operational air quality and GHG emissions and energy consumption.

The most recent version of CalEEMod uses emission factors from EMFAC v. 2021 for off-road and on-road vehicles. However, a more recent version of EMFAC was released in May 2025. Therefore, the energy analysis uses the most recent data available from MFAC v. 2025. CalEEMod outputs have been included as Appendix A. The passenger vehicles were analyzed using the CalEEMod default trip distance information.[1] Table 1, *Construction Schedule*, shows the CalEEMod default construction schedule that was modeled.

Table 1: Construction Schedule

Activity	Start Date	End Date	Total Working Days
Demolition	1/15/2027	2/15/2027	22
Site Preparation	2/15/2027	2/28/2027	10
Grading	3/1/2027	3/21/2027	15
Trenching	3/15/2027	4/30/2027	35
Building Construction	3/1/2027	5/1/2028	306
Paving	3/1/2027	3/5/2027	5
Architectural Coating	3/1/2028	5/30/2028	65

Source: CalEEMod Output Sheets (see Appendix A).

The following non-default assumptions and adjustments were used in the CalEEMod emission model for the analysis of the proposed Project:

- **Land Use:** The building square footage was adjusted to match the site plan. Lot acreage was adjusted to total the proposed landscaping and building footprint square footage. The garage was included in the warehouse square footage to be consistent with the Vehicle Miles Traveled (VMT) Screening Analysis prepared for the Project. In addition, the garage and self-storage building comprise one building.
- **Construction, Off-Road Equipment:** It was conservatively assumed that all equipment would be used for 8 hours per workday. Tractors/loaders/backhoes were replaced with crawler tractors in the site preparation and grading phases to accurately measure acres disturbed.
- **Construction, Dust from Material Movement:** Based on information provided by the Project Applicant, the grading phase is expected to result in approximately a net import of 950 cubic yards of soil.
- **Construction, Demolition:** Based on information provided by the Project Applicant, demolition of the existing building, hardscape, and landscaping material would result in approximately 2,080 tons of demolition debris.
- **Operations, Vehicle Data:** Weekday, Saturday, and Sunday trip rates were adjusted to match the Institute of Transportation Engineers (ITE) *Trip Generation Manual, 12th Edition,* auto trip rates for mini-warehousing (Land Use Code 151).

[1] EPD utilized the Metropolitan Planning Organization (MPO) default data provided in CalEEMod, as it provides more accurate trip length data than the region-wide CSTDM trip length data.

The following non-default assumptions and adjustments were used in the CalEEMod emission model for the analysis of the existing warehouse:

- **Land Use:** The lot acreage and building square footage was adjusted to match the parcel map.
- **Operations, Vehicle Data:** Adjusted trip rate to match ITE 12th edition trip rate for unrefrigerated warehousing trips. Truck trips were applied to the User Defined Industrial land use, with 2-axle trucks applied to Non Residential Home-Work (length and percentage), 3-axle trucks applied to Non Residential Work-Other, and 4+ axle trucks applied to Non Residential Other-Other.
- **Operations, Fleet Mix:** Vehicle splits were normalized using CalEEMod defaults and the Project's operational trip generation, User Defined Industrial was utilized to analyze 100% of trucks (HHDT, MHDT, LHDT1, LHDT2), and unrefrigerated warehousing trips were normalized using the CalEEMod defaults to analyze 100% passenger vehicles only (LDA, LDT1, LDT2, MCY, MDV).

Air Quality

Regional Emissions

SCAQMD has adopted maximum daily emission thresholds (pounds/day) for the criteria pollutants during construction and operation of a project.[2] While incremental regional air quality impacts of an individual project are generally very small and difficult to measure, SCAQMD's regional maximum emission thresholds set standards to reduce the burden of SCAQMD to attain and maintain ambient air quality standards. The CalEEMod Project emissions along with regional construction and operational thresholds for each of the criteria pollutants are listed in Table 2, *Regional Construction Emission Estimates*, and Table 3, *Regional Operational Emission Estimates*, respectively. These emission thresholds include the Project emissions generated both from on-site sources (such as off-road construction equipment and fugitive dust) and off-site sources (vehicle travel arriving to and leaving from the site). In addition, Project construction would be required to comply with several SCAQMD rules and regulations which would further reduce impacts to air quality emissions. These rules include: (1) Rule 402, *Public Nuisance*, which prohibits the discharge of air contaminants that cause injury, nuisance, or annoyance to the public or damage to property; (2) Rule 403, *Fugitive Dust,* which aims to minimize fugitive particulate matter dust from construction activities; and (3) Rule 1113, *Architectural Coatings,* which only allows low VOC paints to be used.

The CalEEMod output sheets for the proposed Project can be found in Appendix A. As noted in Table 2, the Project's emissions would not exceed any regional construction thresholds. Therefore, the Project would result in less-than-significant regional construction impacts. Detailed tables which provide maximum daily emissions for each construction phase are provided in Appendix B.

Table 2: Regional Construction Emission Estimates

Construction Year	Maximum Daily Regional Emissions (pounds/day)					
	ROG	NOx	CO	SO_2	PM_{10}	$PM_{2.5}$
Year 1 (2027)	3.1	26.2	34.6	0.1	4.8	2.3
Year 2 (2028)	26.1	8.5	15.9	<0.1	1.6	0.6
Maximum Daily Emissions (2027-2028)	**26.1**	**26.2**	**34.6**	**0.1**	**4.8**	**2.3**
SCAQMD Significance Thresholds	*75*	100	*550*	150	150	*55*
Threshold Exceeded?	**No**	**No**	**No**	**No**	**No**	**No**

Notes: ROG = reactive organic gases, NOx = nitrogen oxides, CO = carbon monoxide, SO_2 = sulfur dioxide, PM_{10} = particulate matter 10 microns in diameter, $PM_{2.5}$ = particulate matter 2.5 microns in diameter
Numbers may slightly vary due to rounding
Source: CalEEMod Output Sheets (Appendix A) and Detailed Air Quality Calculation Tables (Appendix B).

The Project's estimated maximum daily regional operational emissions estimates are provided in Table 3, *Regional Operational Emission Estimates*. Operation of the Project would not exceed any of SCAQMD's regional thresholds. In addition, the existing land use was modeled to calculate the net emissions between the proposed Project and the existing warehouse. Operational emissions from the existing land use and net

[2] SCAQMD. (March 2023). *South Coast AQMD Air Quality Significance Thresholds*. Referenced at https://www.aqmd.gov/docs/default-source/ceqa/handbook/south-coast-aqmd-air-quality-significance-thresholds.pdf?sfvrsn=25.

emissions are also provided in Table 3 and continue to be less than SCAQMD's regional operational thresholds. Therefore, Project would result in less-than-significant regional operational impacts.

Table 3: Regional Operational Emission Estimates

Operational Activity	Maximum Daily Regional Emissions (pounds/day)					
	ROG	NOx	CO	SO_2	PM_{10}	$PM_{2.5}$
Mobile	0.8	0.6	6.4	<0.1	1.5	0.4
Area	5.4	0.1	7.6	<0.1	<0.1	<0.1
Energy	<0.1	0.7	0.6	<0.1	0.1	0.1
Total Operational Emissions	**6.2**	**1.4**	**14.7**	**<0.1**	**1.6**	**0.5**
Existing Operational Emissions	0.8	1.1	2.1	<0.1	0.5	0.1
Net Operational Emissions	**5.4**	**0.3**	**12.6**	**<0.1**	**1.2**	**0.3**
SCAQMD Significance Thresholds	*55*	*55*	*550*	150	150	*55*
Threshold Exceeded?	**No**	**No**	**No**	**No**	**No**	**No**

Notes: ROG = reactive organic gases, NOx = nitrogen oxides, CO = carbon monoxide, SO_2 = sulfur dioxide, PM_{10} = particulate matter 10 microns in diameter, $PM_{2.5}$ = particulate matter 2.5 microns in diameter
Net values may vary due to rounding
Source: CalEEMod Output Sheets (Appendix A) and Detailed Air Quality Calculation Tables (Appendix B).

Local Emissions

Localized significance thresholds (LSTs) were also adopted by the SCAQMD to evaluate projects which would not exceed the regional emission significance thresholds but may have the potential to exceed State and national air quality standards within a project's vicinity. These thresholds set the maximum rates of daily construction or operational emissions from a project site that would not exceed a national or State ambient air quality standard. [3] The differences between regional thresholds and LSTs are as follows:

1. Regional thresholds include all sources of project construction and operational emissions generated from on-site and off-site emission sources whereas the LSTs only consider the emissions generated from on-site emission sources.
2. LSTs only apply to carbon monoxide (CO), nitrogen oxides (NO_X), and particulate matter (PM_{10} and $PM_{2.5}$), while regional thresholds include both reactive organic gases (ROG) and sulfur dioxide (SO_2).
3. Regional thresholds apply to emission sources located anywhere within the SCAQMD whereas the LSTs are location dependent and rely on the size of the project and emission location relative to the nearest sensitive receptor. A sensitive receptor is defined as an individual who is most susceptible to negative health effects when exposed to air pollutants and includes children, the elderly, and adults with chronic health issues. Locations for sensitive receptors include residences, schools, elderly care centers, and hospitals.

SCAQMD provides screening tables (Appendix C of the SCAQMD *2008 Final Localized Significance Threshold Methodology*) for projects that disturb less than or equal to 5 acres in a day. [4] These tables were

[3] SCAQMD. (2008). *Final Localized Significance Threshold Methodology*. Referenced at http://www.aqmd.gov/docs/default-source/ceqa/handbook/localized-significance-thresholds/final-lst-methodology-document.pdf

[4] SCAQMD. (2008). *Final Localized Significance Threshold Methodology Appendix C*. Referenced at http://www.aqmd.gov/docs/default-source/ceqa/handbook/localized-significance-thresholds/appendix-c-mass-rate-lst-look-up-tables.pdf?sfvrsn=2.

created to easily determine if the daily emissions of NOx, CO, PM_{10}, and $PM_{2.5}$ from a project could result in a significant impact to the local air quality. The thresholds are determined by:

- Source receptor area (SRA), which is the geographic area within the SCAQMD that can act as both a source of emissions and a receptor of emission impacts (the Project is located within SRA 1, Central Los Angeles County);
- Size of grading disturbance (construction)/size of the project (operation); and
- Distance to the nearest sensitive receptor.

Using SCAQMD's methodology to estimate acres of daily ground disturbance, the grading phase was determined to result in a maximum of 1.5 acres of ground disturbance per day. Therefore, pursuant to SCAQMD's methodology, the thresholds for a 1-acre site and 2-acre site were linearly interpolated to obtain thresholds for 1.5 acres of disturbance. Calculations for site disturbance can be found in Appendix B. Distance to the nearest sensitive receptor also determines the emission thresholds. There are existing residential homes in the vicinity of the Project site, with the closest apartment building approximately 50 meters (165 feet) northeast of the Project's northern boundary. Therefore, thresholds for a 50-meter distance were used.

Table 4, *Localized Construction Emission Estimates*, shows the thresholds and estimated maximum daily construction emissions for the proposed Project. As seen in the Project schedule, the grading, building construction, and paving phases would run concurrently. Therefore, in 2027, the highest potential emissions would occur during the combined grading, building construction, and paving duration. In 2028, the highest potential emissions would occur during the combined building construction and architectural coating duration. As shown in the table below, the proposed Project would not exceed the SCAQMD LST screening thresholds and would therefore have a less-than-significant localized construction air quality impact.

Table 4: Localized Construction Emission Estimates

Construction Year	Maximum Daily Regional Emissions (pounds/day)			
	NOx	**CO**	**PM_{10}**	**$PM_{2.5}$**
Year 1 (2027)	24.1	28.2	3.1	1.9
Year 2 (2028)	7.2	10.4	0.2	0.2
Maximum Daily Emissions (2027-2028)	**24.1**	**28.2**	**3.1**	**1.9**
SCAQMD LST Screening Thresholds	90	1125	20	6
Threshold Exceeded?	**No**	**No**	**No**	**No**

Notes: NOx = nitrogen oxides, CO = carbon monoxide, PM_{10} = particulate matter 10 microns in diameter, $PM_{2.5}$ = particulate matter 2.5 microns in diameter
Source: CalEEMod Output Sheets (Appendix A) and Detailed Air Quality Calculation Tables (Appendix B).

According to the SCAQMD LST methodology, LSTs apply to project-related stationary and mobile sources. Projects that involve mobile sources that spend long periods queuing and idling at a site, such as transfer facilities or warehousing and distribution buildings, have the potential to exceed the operational LSTs. Since the Project's site area is 0.70 acres, the threshold for 1 acre was utilized since it is the smallest threshold provided. These thresholds are listed below in Table 5, *Localized Operational Emission Estimates*, using the 1-acre threshold and a 50-meter distance from the nearest receptor. As shown below, the proposed Project would not exceed any operational LST thresholds.

Table 5: Localized Operational Emission Estimates

Operational Activity	Maximum Daily Regional Emissions (pounds/day)			
	NOx	CO	PM_{10}	$PM_{2.5}$
Mobile	0.2	1.5	<0.1	<0.1
Area	0.1	7.6	<0.1	<0.1
Energy	0.7	0.6	0.1	0.1
Total Operational Emissions	**1.0**	**9.7**	**0.1**	**0.1**
SCAQMD Significance Thresholds	74	882	4	2
Threshold Exceeded?	**No**	**No**	**No**	**No**

Notes: ROG = reactive organic gases, NOx = nitrogen oxides, CO = carbon monoxide, SO_2 = sulfur dioxide, PM_{10} = particulate matter 10 microns in diameter, $PM_{2.5}$ = particulate matter 2.5 microns in diameter
Net values may vary due to rounding
Source: CalEEMod Output Sheets (Appendix A) and Detailed Air Quality Calculation Tables (Appendix B).

Air Quality Management Plan Consistency

SCAQMD's CEQA Handbook provides the following two criteria to determine whether a project would be consistent with the 2022 AQMP:

1. The Project would not generate population and employment growth that would be inconsistent with Southern California Association of Governments (SCAG)'s growth forecasts from the 2020-2045 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) (C*onnect SoCal 2020*); and
2. The Project would not result in an increase in the frequency or severity of existing air quality violations or cause or contribute to new violations or delay the timely attainment of air quality standards or the interim emissions reductions specified in the AQMP.

Consistency Criterion No. 1 refers to the SCAG's growth forecasts, and associated assumptions included in the AQMP. The future air quality levels projected in the AQMP are based on SCAG's growth projections, which are based, in part, on the general plans of cities located within the SCAG region. Therefore, if the level of housing and employment growth related to the proposed Project is consistent with the applicable assumptions used in the development of the AQMP, the Project would not jeopardize attainment of the air quality levels identified in the AQMP. While SCAG has updated the Connect SoCal 2020 to the 2024-2050 RTP/SCS (Connect SoCal 2024), which provides growth and forecasting estimates for 2019 through 2050, this update was adopted after the 2022 AQMP. Therefore, the analysis below uses assumptions from Connect SoCal 2020 for consistency with the most recent AQMP.

The Project site is zoned C2-1-O and is within the Wilshire Community Plan area, designated as Community Commercial. The C2-1-O zone is a commercial zone which permits self-storage uses with approval of a Condition Use Permit if the site is within a 500-foot radius of a residential zone. The Project Applicant is requesting a zone change from C2-2-O to increase the allowable floor area and building height.

It is anticipated that the employment base for both the construction and operational phases of the proposed Project would come from the existing population in the region. The Project would result in an incremental increase in employment in the City, since self-storage uses do not require a substantial amount of employees for operation. In addition, the Project would not directly result in growth of the City's population, since it is not a residential project. Therefore, implementation of the Project would not exceed the growth assumptions for the SCAG region. As a result, the proposed Project would be consistent with Criterion 1.

Consistency Criterion No. 2 refers to the California Ambient Air Quality Standards. An impact would occur if the long-term emissions associated with the proposed Project exceed the SCAQMD's regional significance thresholds for construction and operational emissions. As presented in Tables 2 through 4, the proposed

Project would not result in emitting emissions that exceed SCAQMD-established thresholds. Therefore, the proposed Project would be consistent with Criterion No. 2.

Since the Project would be consistent with both Criterion No. 1 and 2, impacts related to consistency with the AQMP would be less than significant.

Odors

Odors would be produced during the construction of the proposed Project due to the operation of heavy-duty off-road equipment. The primary odor emitted would be diesel particulate matter from the vendor trucks and heavy-duty off-road equipment. This odor may be noticeable by nearby residents; however, these odors would be expected and not necessarily objectionable. These odors would also dissipate quickly and would be temporary. Therefore, due to the nature of the odor produced during construction as temporary and non-objectionable to a substantial number of people, the odor impact from construction of the proposed Project would be less than significant.

For operational odor emissions, SCAQMD's *CEQA Air Quality Handbook* describes odor complaints associated with the following land uses:

- Agricultural uses
- Chemical plants
- Composting activities
- Dairies
- Fiberglass molding
- Food processing plants
- Landfills
- Refineries
- Wastewater treatment plants

The Project does not propose any of the above land uses and is required to comply with SCAQMD Rule 402, Nuisance, which states:

> *A person shall not discharge from any source whatsoever such quantities of air contaminants or other material which cause injury, detriment, nuisance, or annoyance to any considerable number of persons or to the public, or which endanger the comfort, repose, health, or safety of any such persons or the public, or which cause, or have a natural tendency to cause, injury or damage to business or property. The provisions of this rule shall not apply to odors emanating from agricultural operations necessary for the growing of crops or the raising of fowl or animals.*

Thus, odor impacts associated with the Project's operation would be less than significant.

Conclusion

The proposed Project's maximum daily regional construction and operational emissions (gross and net) would not exceed SCAQMD's thresholds of significance. In addition, the proposed Project's maximum daily localized construction emissions would not exceed SCAQMD's thresholds of significance. All construction and operational activities would comply with the applicable SCAQMD rules and regulations, as described above. Additionally, the proposed Project is consistent with SCAQMD'S 2022 AQMP, reflecting adherence to regional air quality management goals and standards. Finally, odors produced during construction would be temporary and not significantly objectionable. During operation, the proposed Project involves land uses that typically do not generate significant odor complaints and the Project would comply with SCAQMD Rule 402. Therefore, the proposed Project would result in less-than-significant air quality impacts.

Energy

The State CEQA Guidelines do not have specific thresholds for energy consumption. Rather, the criteria in Appendix G: VI Energy ask (a) "[Would the proposed Project] Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources during project construction or operation?" or (b) "[Would the project] Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?"[5] Therefore, for the purpose of this analysis, a significant impact would occur if:

(a) The project design and/or location encourages wasteful, inefficient, and unnecessary consumption of energy, especially fossil fuels such as coal, natural gas, and petroleum, as well as the use of fuel by vehicles anticipated to travel to and from the project.
(b) The project design impedes the growth of future renewable energy developments.

The Los Angeles Department of Water and Power and the Southern California Gas Company would provide electricity and natural gas, respectively, for construction and operation of the proposed Project. The following assumptions were used to calculate the energy (electricity, natural gas, and petroleum) consumption of the proposed Project:

- Construction equipment fuel consumption was derived from CARB OffRoad2025 emission model.
- Fuel Consumption from vehicle travel was derived from CARB EMFAC2025 emission model.
- Electrical and natural gas usage was derived from the CalEEMod model Version 2022.1.

As previously described in the Methodology section, this analysis of energy consumption uses off-road and on-road fuel consumption estimates from the most recent version of EMFAC, v. 2025.

Construction

Electricity and Natural Gas Usage

Due to the Project size and the fact that construction is temporary, the electricity used during construction of the proposed Project would be substantially less than that required for Project operation and would have a negligible contribution to the Project's overall energy consumption. The electric power used during construction would be for as-necessary lighting and electronic equipment such as computers inside temporary construction trailers. Natural gas is not anticipated to be needed for construction activities. Any consumption of natural gas would be minor and negligible in comparison to the usage during the operation of the proposed Project. Since operation of the Project would result in a nominal increase of Countywide electricity and natural gas consumption, as described below, construction energy consumption would in turn result in a less-than-significant impact to energy.

Petroleum Fuel Usage

The equipment associated with construction activities (off-road/heavy duty vehicles) would rely on diesel fuel as would vendor and haul trucks involved in delivering building materials and importing soil material to the Project site. Construction workers would travel to and from the Project site throughout the duration of construction, and for a conservative analysis, it is assumed that construction workers would travel in gasoline-powered passenger vehicles. It should be noted that total fuel consumption is a conservative analysis and would likely overstate the amount of fuel usage, as specific construction equipment is not expected to operate

[5] California Energy Commission. (2023). *CEQA Statutes and Guidelines Attachment 10 Appendix G: Environmental Checklist Form*. Referenced at: https://www.energy.ca.gov/sites/default/files/2024-01/11_Attachment_10_-_Appendix_G_from_CEQA_Handbook_ada.docx

during the entire duration of the construction activity (e.g., crane). Vehicle trips included worker vehicles, vendor vehicles, and haul vehicles. Table 5, *Total Construction Fuel Usage*, shows the overall fuel consumption for Project construction, obtained from the CARB OffRoad 2025 emission model and the CARB EMFAC2025 model. Detailed tables of fuel consumption by construction equipment and on-road vehicles can be found in Appendix C.

Table 6: Total Construction Fuel Usage

Source	Diesel Fuel (Gallons)	Gasoline Fuel (Gallons)
Proposed Project On-Road Construction Vehicles	24,190	36,973
Proposed Project Off-Road Construction Equipment	31,466	13,302
Proposed Project Total Consumption	**55,655**	**50,275**
Los Angeles County On-Road Vehicles	453,803,068	2,790,024,407
Los Angeles County Off-Road Construction Equipment	32,583,332	1,791,131
On-Road Project Percentage (%)	0.005	0.002
Off-Road Project Percentage (%)	0.097	2.807

Source: Fuel Calculation Sheets (see Appendix C).

As shown in Table 5, the Project is estimated to consume a total of approximately 55,655 gallons of diesel fuel and approximately 50,275 gallons of gasoline fuel. According to the projected 2027 fuel consumption data obtained from EMFAC2025 for Los Angeles County, on-road vehicles would consume approximately 453,803,068 gallons of diesel fuel and 2,790,024,407 gallons of gasoline. The data for Los Angeles County can be found in Appendix C. On-road construction vehicles from the proposed Project would account for 0.005 percent of diesel fuel consumption and 0.002 percent gasoline fuel consumption within Los Angeles County in 2027. Off-road consumption within Los Angeles County in 2027 would total approximately 32,583,332 gallons of diesel fuel and 1,791,131 gallons of gasoline fuel. Off-road construction equipment from the proposed Project would account for 0.097 percent of diesel consumption and 2.807 percent of gasoline consumption within Los Angeles County in 2027. As such, Project construction would have a negligible effect on energy supplies within the County. Additionally, the Project would be required to comply with regulations implemented to reduce emissions from construction, such as CCR Title 13, Motor Vehicles, Section 2449(d)(3), *Idling*, which limits idling times of construction vehicles to no more than 5 minutes. Thus, the Project would not result in wasteful, inefficient, or unnecessary consumption of energy. The proposed Project would result in less-than-significant energy impacts during construction.

Operation

Operation of the proposed Project would consume electricity, natural gas, and petroleum. Electricity and natural gas consumption can be found in the CalEEMod Output Sheets attached (Appendix A). The gasoline consumption rates utilize the same assumptions that were used for the worker vehicles. Table 6, *Annual Project and Existing Operational Energy Consumption,* summarizes the Project's estimated net energy consumption.

Table 7: Annual Project and Existing Operational Energy Consumption

Electricity (Kilowatt-Hours)	
Proposed Project	818,664
Existing Site	108,278
Net Consumption Increase	710,386
Natural Gas (Thousands British Thermal Units)	
Proposed Project	2,772,055
Existing Site	366,636
Net Consumption Increase	2,405,419
Petroleum (Gasoline) Consumption (Gallons)	
Proposed Project	91,462
Existing Site	2,806
Net Consumption Increase	88,656

Notes: VMT = vehicle miles traveled
Source: CalEEMod Output Sheets (Appendix A) and Fuel Calculation Sheets (Appendix C).

Table 7, *Annual Project and County Operational Energy Consumption,* compares the Project's estimated net energy consumption to County levels. The most recent data available for electricity and natural gas usage from the California Energy Commission is from 2024. In 2024, electricity consumption in Los Angeles County was estimated at 64,896,000,000 kilowatt-hours [6] and natural gas consumption was estimated at 282,000,039,532 thousand British Thermal Units. [7] As shown in Table 7, the proposed Project's net consumption would result in a 0.001 percent increase in electricity consumption and a 0.001 percent increase in natural gas consumption within Los Angeles County. As previously shown in Table 5, gasoline consumption in Los Angeles County in 2027 is estimated at 2,790,024,407 gallons (see Appendix C). Therefore, the net Project consumption would account for 0.003 percent of gasoline fuel consumption in Los Angeles County. Thus, the Project would not result in wasteful, inefficient, or unnecessary consumption of energy. The proposed Project would result in less-than-significant energy impacts during operation.

[7] California Energy Commission. (2024). *Natural Gas Consumption by County*. Referenced at: https://www.energy.ca.gov/data-reports/energy-almanac/california-electricity-data/california-energy-consumption-dashboards-1

Table 8: Annual Project and County Operational Energy Consumption

Electricity (Kilowatt-Hours)	
Net Project	710,386
Los Angeles County (2024)	64,896,000,000
Project Percent Increase (%)	0.001
Natural Gas (Thousands British Thermal Units)	
Net Project	2,405,419
Los Angeles County (2024)	282,000,039,532
Project Percent Increase (%)	0.001
Petroleum (Gasoline) Consumption (Gallons)	
Net Project	88,656
Los Angeles County (2027)	2,790,024,407
Project Percentage (%)	0.003

Notes: VMT = vehicle miles traveled
Source: CalEEMod Output Sheets (Appendix A) and Fuel Calculation Sheets (Appendix C).

Future Renewable Energy Developments

The proposed Project would be required to meet the CCR Title 24 energy efficiency standards in effect during permitting of proposed Project and comply with all applicable City energy codes. The City's administration of the CCR Title 24 requirements includes review of design components and energy conservation measures that occurs during the permitting process, which ensures that all requirements are met. In addition, Project design and operation would comply with State Building Energy Efficiency Standards, appliance efficiency regulations, and green building standards. As such, the Project would not inhibit the use of and would allow for future flexibility relating to renewable energy.

Conclusion

The proposed Project's energy consumption for construction activities would be conditioned to require compliance with existing fuel standards, machinery efficiency standards, and CARB requirements that limit idling of construction trucks and equipment. There are no unusual Project characteristics that would cause the use of construction equipment that would be less energy efficient compared with other similar construction sites in other parts of the state. Additionally, through compliance with existing standards, operation of the Project would not result in an energy demand on a per-development basis that is greater than other development projects in Southern California. Additionally, the proposed Project would be required to meet the CCR Title 24 energy efficiency standards and comply with all applicable City energy codes. Therefore, the Project would not inhibit the use of, and would instead allow for future flexibility relating to, renewable energy. Additionally, the Project would result in a less-than-significant impact related to inefficient, wasteful, or unnecessary consumption of energy.

Greenhouse Gas Emissions

Regulatory Background and Thresholds

California State Executive Order S-3-05, issued by Governor Arnold Schwarzenegger in June 2005, established comprehensive GHG reduction targets for the state.[8] It mandated reducing GHG emissions to 2000 levels by 2010, to 1990 levels by 2020, and to 80% below 1990 levels by 2050. This Executive Order laid the foundation for subsequent climate change mitigation efforts in California, including the development of various policies and programs aimed at reducing emissions across sectors such as transportation, energy, and industry. The objective of the Executive Order is to contribute to capping worldwide CO_2 concentrations at 450 parts per million (ppm), stabilizing global climate change.

CEQA Guidelines Section 15064.4(b)(2) allows the lead agency to determine significance thresholds to be used across all development projects within its jurisdiction. The City of Los Angeles has not adopted a quantitative GHG threshold. Significance for GHG emissions impacts is determined by assessing the Project's consistency with applicable plans, policies and regulations intended to reduce GHG emissions. Specifically, the plans the Project's consistency will be evaluated against are the CARB 2022 Scoping Plan for Achieving Carbon Neutrality, SCAG's Connect SoCal 2024, and the City's Green New Deal, which are described in further detail below. Quantified Project emissions are provided for informational purposes only, per CEQA Guidelines Section 15064.4(a).

Project GHG Emissions

The Project's construction GHG emissions are shown in Table 8, *Project Construction GHG Emissions*, and the overall construction and operational emissions are shown in Table 9, *Total Project GHG Emissions*, below. These emissions were calculated using the CalEEMod model. The construction emissions are amortized over 30 years and added to the operational GHG emissions. As shown in Table 9, the Project's construction and gross operation GHG emissions would total 863 $MTCO_2e$ per year. Accounting for the existing site's emissions, the Project would have net annual emissions of 602 $MTCO_2e$.

Table 9: Project Construction GHG Emissions

Construction Year	Annual GHG Emissions ($MTCO_2e$)
Year 1 (2027)	458
Year 2 (2028)	158
Total Emissions	615
Total Emissions Amortized Over 30 Years	21

Source: CalEEMod Output Sheets (see Appendix A).

Table 10: Total Project GHG Emissions

Activity	Annual GHG Emissions ($MTCO_2e$)
Mobile	240
Area	4
Energy	405
Water	142
Waste	51
Refrigeration	<0.1
Gross Project Operation Emissions	842
Project Construction Emissions	21
Total Project Emissions	**863**
Existing Operational Emissions	261
Net Project Operational Emissions	**602**

Note: Numbers have been rounded to whole numbers.
Source: CalEEMod Output Sheets (see Appendix A).

Project Consistency with Plans, Policies, and Regulations

The following section describes the plans, policies, and regulations the Project is subject to which are intended to reduce GHG emissions. The plans discussed below are enforced on State, regional, and local levels. Each plan focuses on particular sectors to reduce GHG emissions from, such as transportation, building construction and operation, or utilities. These regulations include the CARB 2022 Scoping Plan for Achieving Carbon Neutrality, SCAG's Connect SoCal 2024, and Los Angeles's Green New Deal.

CARB 2022 Scoping Plan for Achieving Carbon Neutrality

Following Executive Order S-3-05, Executive Order B-55-18[9] was signed in 2018 in order to achieve carbon neutrality by 2045. This order mandated that the California 2017 Climate Scoping Plan was the guiding document which outlines actions for the State to achieve such GHG reduction goals. In 2020, CARB released a report titled "Achieving Carbon Neutrality in California"[10] which evaluated various scenarios needed to meet at least an 80 percent reduction in GHG levels from 1990 by 2045. This report was then used by CARB to inform the development of the 2022 Scoping Plan for Achieving Carbon Neutrality[11] (2022 Scoping Plan), an update to the 2017 Climate Scoping Plan. Broad goals discussed in the Achieving Carbon Neutrality in California report were incorporated into the 2022 Scoping Plan. CARB's 2022 Scoping Plan sets California's GHG emission reduction target for 2045 at 85 percent below 1990 levels, which was codified by SB 32. As shown below in Table 10, *2022 Scoping Plan Consistency Summary*, the Project would comply with all applicable plans and programs intended to reduce GHG emissions. The proposed Project

[9] Executive Department State of California. Executive Order B-55-18. Referenced at: https://archive.gov.ca.gov/archive/gov39/wp-content/uploads/2018/09/9.10.18-Executive-Order.pdf

[10] California Air Resources Board. (2020). *Achieving Carbon Neutrality in California*. Referenced at: https://ww2.arb.ca.gov/sites/default/files/2020-10/e3_cn_final_report_oct2020_0.pdf

[11] California Air Resources Board. (2022). *California's 2022 Climate Change Scoping Plan Table 2-1: Actions for the Scoping Plan Scenario: AB 32 GHG Inventory Sectors*. Referenced at: https://ww2.arb.ca.gov/sites/default/files/2023-04/2022-sp.pdf

would not conflict with any plan, policy, or regulation adopted for the purpose of reducing the emissions of GHGs within 2022 Scoping Plan.

Table 11: 2022 Scoping Plan Consistency Summary

Action	Consistency
GHG Emissions Reductions Relative to the SB 32 Target	
40% Below 1990 levels by 2030.	**Consistent.** The Project would comply with Title 24 Part 6 building energy requirements along with other local and State initiatives that aim to achieve GHG levels 40% below 1990 by 2030.
Smart Growth/Vehicle Miles Traveled (VMT)	
VMT per capita reduced 25% below 2019 levels by 2030, and 30% below 2019 levels by 2045.	**Consistent.** As previously discussed in the air quality section, the Project would be consistent with the growth assumptions in the 2024 Connect SoCal, so the Project would not interfere with the analysis completed for the Connect SoCal report outlining VMT reduction targets and measures.
New Residential and Commercial Buildings	
All electric appliances beginning 2026 (residential) and 2029 (commercial), contributing to 6 million heat pumps installed statewide by 2030.	**Consistent.** The proposed Project would comply with Title 24 Parts 6 and 11, which includes electric heat pumps installed during construction and electric hookups for all appliances.
Construction Equipment	
25% of energy demand electrified by 2030 and 75% electrified by 2045.	**No Conflict.** The proposed Project would be required to use construction equipment that is registered by CARB and meet CARB's standards. CARB sets its standards to be in line with the goal of reducing energy demand by 25 percent in 2030 and 75 percent in 2045.
Local Action - VMT Reduction	
Adopt and implement Complete Streets policies and investments, consistent with general plan circulation element requirements.	**No Conflict**. The Project does not propose any street improvements and would not interfere with the implementation of Complete Streets in the City.
Increase public access to shared clean mobility options (such as planning for and investing in electric shuttles, bike share, car share, transit).	**Consistent.** The Project site is located in a developed urban area with sidewalks available along all nearby roadways. The proposed on-site roadway system includes walkways throughout the Project site that would connect to the off-site sidewalks. The nearest bus stop from the existing Project driveway is the La Brea/San Vicente stop, located approximately 0.1 miles west. In addition, there are six other bus stops within 0.5 miles of the Project site.
Local Action - Building Decarbonization	
Adopt all-electric new construction reach codes.	**No Conflict**. The proposed Project would comply with Title 24 Parts 6 and 11, which includes electric heat pumps installed during construction and electric hookups for all appliances.
Adopt policies and incentive programs to reduce electrical loads from equipment plugged into outlets (such as purchasing Energy Star equipment for municipal buildings, occupancy sensors, smart power strips, equipment controllers, etc.).	**No Conflict.** The proposed Project would be constructed in accordance with Title 24 CALGreen requirements, which includes installation of Energy Star equipment and appliances in new buildings.
Facilitate deployment of renewable energy production and distribution and energy storage.	**No Conflict.** The proposed Project would be constructed in accordance with the California Energy Code (Title 24 Part

Action	Consistency
	6) to meet all requirements related to solar energy production and the CALGreen Building Energy Efficiency Standards (Title 24 Part 11) to meet efficiency standards. In addition, the Project would be built to be solar ready.

SCAG Connect SoCal 2024

On April 4, 2024, SCAG's Regional Council adopted Connect SoCal 2024, the 2024-2050 RTP/SCS, which includes long-range regional transportation plans, regional transportation improvement programs, regional housing needs allocations, and other plans for the region. SCAG's Connect SoCal 2024 policies focus largely on regional transportation and the efficiency of transportation, which are implemented by counties and cities within the SCAG region, as part of the overall planning and maintenance of the regional transportation system. However, these strategies are also intended to reduce GHG emissions from passenger vehicles. As an individual development, the policies are not directly applicable to the Project since the Project does not propose any changes to regional transportation systems or roadways. However, the proposed Project would not interfere with the implementation of these policies, since the Project would be consistent with the growth assumptions outlined in the Connect SoCal 2020 and 2024. In addition, the Project proposes to redevelop a site that is currently within the vicinity of several bus stops within a 0.5-mile radius. While a majority of SCAG's Implementation Strategies are related to transportation, the Project would be consistent with the Sustainable Development measures, which focus on a reduction of resource consumption, through compliance with energy efficacy measures from Title 24 standards. Therefore, the Project would be consistent with the Connect SoCal 2024 plan.

Los Angeles's (L.A.'s) Green New Deal

The City of Los Angeles released L.A.'s Green New Deal in 2019, a guidance document containing targets and measures to reduce GHG emissions within the City to 50% below 1990 levels by 2025; 73% below 1990 levels by 2035; and becoming carbon neutral by 2050[12]. The City has thirteen different sectors of focus, identified by the chapters of the plan, to reduce GHG emissions. The chapter targets and initiatives for each chapter are primarily intended for the City as an organization to implement. However, development of the Project would not inhibit the City's ability to meet these GHG reduction goals. The Project's consistency with the plan is discussed below in Table 12, *2019 L.A.'s Green New Deal Consistency Summary*.

Table 12: 2019 L.A.'s Green New Deal Consistency Summary

Action	Consistency
Renewable Energy	
LADWP will supply 55% renewable energy by 2025; 80% by 2036; and 100% by 2045.	**No Conflict.** These measures are initiatives for the City and for Los Angeles Department of Water and Power to implement. However, on an individual development scale, the Project would be constructed to be solar ready and would not inhibit the installation of future solar energy generation.
Increase cumulative MW by 2025; 2035; and 2050 of: • local solar to 900-1,500 MW; 1,500-1,800 MW; and 1,950 MW • Energy storage capacity to 1,654-1,750 MW; 3,000 MW; and 4,000 MW • Demand response (DR) programs to 234 MW (2025) and 600 MW (2035)	

[12] City of Los Angeles. (2019). *L.A.'s Green New Deal*. Referenced at: https://plan.mayor.lacity.gov/sites/g/files/wph2176/files/2022-12/pLAn_2019_final.pdf

Action	Consistency
Renewable Energy	
Local Water	
Reduce potable water use per capita by 22.5% by 2025; and 25% by 2035; and maintain or reduce 2035 per capita water use through 2050.	**No Conflict.** The proposed Project would be required to meet water efficiency standards for the flow rates of water fixtures, as outlined in Title 24 CALGreen measures.
Clean and Healthy Buildings	
All new buildings will be net zero carbon by 2030; and 100% of buildings will be net zero carbon by 2050.	**No Conflict.** The proposed Project would be constructed in accordance with Title 24 CALGreen requirements, which includes installation of Energy Star equipment and appliances in new buildings. In addition, the Project would be built to be solar ready.
Reduce building energy use per sq. ft. for all building types 22% by 2035; 34% by 2035; and 44% by 2050.	
Mobility and Public Transit	
Reduce VMT per capita by at least 13% by 2025; 39% by 2035; and 45% by 2050.	**No Conflict.** As previously discussed in the air quality section, the Project would be consistent with the growth assumptions in the 2024 Connect SoCal, so the Project would not interfere with the analysis completed for the Connect SoCal report outlining VMT reduction targets and measures.
Industrial Emissions & Air Quality Monitoring	
Reduce industrial emissions by 38% by 2035; and 82% by 2050.	**No Conflict.** The proposed Project would not exceed SCAQMD's air quality and GHG emissions thresholds, as detailed above. SCAQMD's regional maximum emission thresholds set standards to reduce the burden of SCAQMD to attain and maintain ambient air quality standards. Therefore, the Project would not result in a significant impact to air quality on both project levels and cumulative levels.

Source: City of Los Angeles. (2019). *L.A.'s Green New Deal*. Referenced at: https://plan.mayor.lacity.gov/sites/g/files/wph2176/files/2022-12/pLAn_2019_final.pdf

Conclusion

As described above, the proposed Project's annual construction and gross operational GHG emissions would total 863 $MTCO_2e$. Net operational emissions would total 602 $MTCO_2e$ per year. The Project is consistent with the actions and measures of CARB's 2022 Scoping Plan, SCAG Connect SoCal 2024, and the L.A. Green New Deal and would not interfere with the policies and goals set within those plans. Therefore, the Project would have a less-than-significant impact related to GHG emissions.

6. Climate Risk Detailed Report

6.1. Climate Risk Summary

Cal-Adapt midcentury 2040–2059 average projections for four hazards are reported below for your project location. These are under Representation Concentration Pathway (RCP) 8.5 which assumes GHG emissions will continue to rise strongly through 2050 and then plateau around 2100.

Climate Hazard	Result for Project Location	Unit
Temperature and Extreme Heat	5.47	annual days of extreme heat
Extreme Precipitation	5.55	annual days with precipitation above 20 mm
Sea Level Rise	—	meters of inundation depth
Wildfire	0.00	annual hectares burned

Temperature and Extreme Heat data are for grid cell in which your project are located. The projection is based on the 98th historical percentile of daily maximum/minimum temperatures from observed historical data (32 climate model ensemble from Cal-Adapt, 2040–2059 average under RCP 8.5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Extreme Precipitation data are for the grid cell in which your project are located. The threshold of 20 mm is equivalent to about ¾ an inch of rain, which would be light to moderate rainfall if received over a full day or heavy rain if received over a period of 2 to 4 hours. Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Sea Level Rise data are for the grid cell in which your project are located. The projections are from Radke et al. (2017), as reported in Cal-Adapt (Radke et al., 2017, CEC-500-2017-008), and consider inundation location and depth for the San Francisco Bay, the Sacramento-San Joaquin River Delta and California coast resulting different increments of sea level rise coupled with extreme storm events. Users may select from four scenarios to view the range in potential inundation depth for the grid cell. The four scenarios are: No rise, 0.5 meter, 1.0 meter, 1.41 meters
Wildfire data are for the grid cell in which your project are located. The projections are from UC Davis, as reported in Cal-Adapt (2040–2059 average under RCP 8.5), and consider historical data of climate, vegetation, population density, and large (> 400 ha) fire history. Users may select from four model simulations to view the range in potential wildfire probabilities for the grid cell. The four simulations make different assumptions about expected rainfall and temperature are: Warmer/drier (HadGEM2-ES), Cooler/wetter (CNRM-CM5), Average conditions (CanESM2), Range of different rainfall and temperature possibilities (MIROC5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.

6.2. Initial Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	1	0	0	N/A
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	0	0	N/A
Wildfire	1	0	0	N/A
Flooding	N/A	N/A	N/A	N/A
Drought	N/A	N/A	N/A	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	0	0	0	N/A

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.
The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.
The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores do not include implementation of climate risk reduction measures.

6.3. Adjusted Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	1	1	1	2
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	1	1	2
Wildfire	1	1	1	2
Flooding	N/A	N/A	N/A	N/A
Drought	N/A	N/A	N/A	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	1	1	1	2

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.

The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.
The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores include implementation of climate risk reduction measures.

6.4. Climate Risk Reduction Measures

7. Health and Equity Details

7.1. CalEnviroScreen 4.0 Scores

The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Exposure Indicators	—
AQ-Ozone	48.5
AQ-PM	78.9
AQ-DPM	31.0
Drinking Water	92.5
Lead Risk Housing	90.7
Pesticides	0.00
Toxic Releases	77.9
Traffic	68.0
Effect Indicators	—
CleanUp Sites	27.5
Groundwater	54.5
Haz Waste Facilities/Generators	84.4
Impaired Water Bodies	66.7
Solid Waste	72.4
Sensitive Population	—
Asthma	77.7
Cardio-vascular	51.3
Low Birth Weights	63.8

Socioeconomic Factor Indicators	—
Education	69.8
Housing	66.1
Linguistic	60.6
Poverty	57.3
Unemployment	23.8

7.2. Healthy Places Index Scores

The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Economic	—
Above Poverty	39.30450404
Employed	98.33183626
Median HI	38.85538304
Education	—
Bachelor's or higher	77.58244578
High school enrollment	100
Preschool enrollment	46.97805723
Transportation	—
Auto Access	20.21044527

Other Indices	—
Hardship	42.7
Other Decision Support	—
2016 Voting	25.7

7.3. Overall Health & Equity Scores

Metric	Result for Project Census Tract
CalEnviroScreen 4.0 Score for Project Location (a)	84.0
Healthy Places Index Score for Project Location (b)	54.0
Project Located in a Designated Disadvantaged Community (Senate Bill 535)	Yes
Project Located in a Low-Income Community (Assembly Bill 1550)	Yes
Project Located in a Community Air Protection Program Community (Assembly Bill 617)	No

a: The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.
b: The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

7.4. Health & Equity Measures

No Health & Equity Measures selected.

7.5. Evaluation Scorecard

Health & Equity Evaluation Scorecard not completed.

7.6. Health & Equity Custom Measures

No Health & Equity Custom Measures created.

8. User Changes to Default Data

Screen	Justification
Land Use	Adjusted per client input and aerial measurements.
Operations: Vehicle Data	Adjusted trip rate to match ITE 12th edition trip rate for unrefrigerated warehousing trips. Truck trips were applied to the User Defined Industrial land use, with 2 axle trucks applied to Non Res H-W (length and percentage), 3 axle trucks applied to Non Res W-O, and 4+ axle trucks applied to Non Res O-O.
Operations: Fleet Mix	Vehicle splits were normalized using CalEEMod defaults and the Project's operational trip generation, User Defined Industrial was utilized to analyze 100% of trucks (HHDT, MHDT, LHDT1, LHDT2), unrefrigerated warehousing trips were normalized using the CalEEMod defaults to analyze 100% passenger vehicles only (LDA, LDT1, LDT2, MCY, MDV).

6. Climate Risk Detailed Report

6.1. Climate Risk Summary

Cal-Adapt midcentury 2040–2059 average projections for four hazards are reported below for your project location. These are under Representation Concentration Pathway (RCP) 8.5 which assumes GHG emissions will continue to rise strongly through 2050 and then plateau around 2100.

Climate Hazard	Result for Project Location	Unit
Temperature and Extreme Heat	5.47	annual days of extreme heat
Extreme Precipitation	5.55	annual days with precipitation above 20 mm
Sea Level Rise	—	meters of inundation depth
Wildfire	0.00	annual hectares burned

Temperature and Extreme Heat data are for grid cell in which your project are located. The projection is based on the 98th historical percentile of daily maximum/minimum temperatures from observed historical data (32 climate model ensemble from Cal-Adapt, 2040–2059 average under RCP 8.5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Extreme Precipitation data are for the grid cell in which your project are located. The threshold of 20 mm is equivalent to about ¾ an inch of rain, which would be light to moderate rainfall if received over a full day or heavy rain if received over a period of 2 to 4 hours. Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Sea Level Rise data are for the grid cell in which your project are located. The projections are from Radke et al. (2017), as reported in Cal-Adapt (Radke et al., 2017, CEC-500-2017-008), and consider inundation location and depth for the San Francisco Bay, the Sacramento-San Joaquin River Delta and California coast resulting different increments of sea level rise coupled with extreme storm events. Users may select from four scenarios to view the range in potential inundation depth for the grid cell. The four scenarios are: No rise, 0.5 meter, 1.0 meter, 1.41 meters
Wildfire data are for the grid cell in which your project are located. The projections are from UC Davis, as reported in Cal-Adapt (2040–2059 average under RCP 8.5), and consider historical data of climate, vegetation, population density, and large (> 400 ha) fire history. Users may select from four model simulations to view the range in potential wildfire probabilities for the grid cell. The four simulations make different assumptions about expected rainfall and temperature are: Warmer/drier (HadGEM2-ES), Cooler/wetter (CNRM-CM5), Average conditions (CanESM2), Range of different rainfall and temperature possibilities (MIROC5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.

6.2. Initial Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	1	0	0	N/A
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	0	0	N/A
Wildfire	1	0	0	N/A
Flooding	N/A	N/A	N/A	N/A
Drought	N/A	N/A	N/A	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	0	0	0	N/A

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.
The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.
The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores do not include implementation of climate risk reduction measures.

6.3. Adjusted Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	1	1	1	2
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	1	1	2

Wildfire	1	1	1	2
Flooding	N/A	N/A	N/A	N/A
Drought	N/A	N/A	N/A	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	1	1	1	2

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.
The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.
The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores include implementation of climate risk reduction measures.

6.4. Climate Risk Reduction Measures

7. Health and Equity Details

7.1. CalEnviroScreen 4.0 Scores

The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Exposure Indicators	—
AQ-Ozone	48.5
AQ-PM	78.9
AQ-DPM	31.0
Drinking Water	92.5
Lead Risk Housing	90.7
Pesticides	0.00
Toxic Releases	77.9
Traffic	68.0
Effect Indicators	—
CleanUp Sites	27.5
Groundwater	54.5

Haz Waste Facilities/Generators	84.4
Impaired Water Bodies	66.7
Solid Waste	72.4
Sensitive Population	—
Asthma	77.7
Cardio-vascular	51.3
Low Birth Weights	63.8
Socioeconomic Factor Indicators	—
Education	69.8
Housing	66.1
Linguistic	60.6
Poverty	57.3
Unemployment	23.8

7.2. Healthy Places Index Scores

The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Economic	—
Above Poverty	39.30450404
Employed	98.33183626
Median HI	38.85538304
Education	—
Bachelor's or higher	77.58244578
High school enrollment	100
Preschool enrollment	46.97805723
Transportation	—
Auto Access	20.21044527
Active commuting	85.11484666

Social	—
2-parent households	42.52534326
Voting	25.13794431
Neighborhood	—
Alcohol availability	14.56435262
Park access	81.35506224
Retail density	81.90683947
Supermarket access	74.104966
Tree canopy	15.37277044
Housing	—
Homeownership	10.09880662
Housing habitability	7.994353907
Low-inc homeowner severe housing cost burden	1.783651995
Low-inc renter severe housing cost burden	44.41165148
Uncrowded housing	26.88310022
Health Outcomes	—
Insured adults	41.30630053
Arthritis	53.0
Asthma ER Admissions	24.6
High Blood Pressure	31.6
Cancer (excluding skin)	55.0
Asthma	34.7
Coronary Heart Disease	57.7
Chronic Obstructive Pulmonary Disease	56.7
Diagnosed Diabetes	30.7
Life Expectancy at Birth	55.8
Cognitively Disabled	35.0
Physically Disabled	45.1

Heart Attack ER Admissions	41.6
Mental Health Not Good	45.5
Chronic Kidney Disease	55.3
Obesity	29.3
Pedestrian Injuries	97.6
Physical Health Not Good	42.8
Stroke	22.5
Health Risk Behaviors	—
Binge Drinking	65.1
Current Smoker	51.2
No Leisure Time for Physical Activity	50.7
Climate Change Exposures	—
Wildfire Risk	0.0
SLR Inundation Area	0.0
Children	51.6
Elderly	79.3
English Speaking	38.5
Foreign-born	57.8
Outdoor Workers	54.5
Climate Change Adaptive Capacity	—
Impervious Surface Cover	14.4
Traffic Density	64.3
Traffic Access	87.4
Other Indices	—
Hardship	42.7
Other Decision Support	—
2016 Voting	25.7

7.3. Overall Health & Equity Scores

Metric	Result for Project Census Tract
CalEnviroScreen 4.0 Score for Project Location (a)	84.0
Healthy Places Index Score for Project Location (b)	54.0
Project Located in a Designated Disadvantaged Community (Senate Bill 535)	Yes
Project Located in a Low-Income Community (Assembly Bill 1550)	Yes
Project Located in a Community Air Protection Program Community (Assembly Bill 617)	No

a: The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.
b: The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

7.4. Health & Equity Measures

No Health & Equity Measures selected.

7.5. Evaluation Scorecard

Health & Equity Evaluation Scorecard not completed.

7.6. Health & Equity Custom Measures

No Health & Equity Custom Measures created.

8. User Changes to Default Data

Screen	Justification
Land Use	Adjusted building and lot acreage per Project site plan and landscape plan. Included parking garage within warehouse SF to be consistent with the traffic study and because there is only one building proposed.
Construction: Construction Phases	Adjusted schedule per client input. A paving phase, separate from the building construction phase, has been added to client's provided schedule to account for paving-specific emissions.
Construction: Off-Road Equipment	Conservatively assumed all equipment would run for 8 hours a day. Replaced tractors/loaders/backhoe with crawler tractor for site prep and grading phases to accurate assess site disturbance. Input typical construction equipment for trenching phase
Operations: Vehicle Data	Adjusted trip rates to ITE 12th edition for mini-warehousing (land use code 151).

5.9. Operational Mobile Sources

5.9.1. Unmitigated

Land Use Type	Trips/Weekday	Trips/Saturday	Trips/Sunday	Trips/Year	VMT/Weekday	VMT/Saturday	VMT/Sunday	VMT/Year
Unrefrigerated Warehouse-No Rail	226	247	175	80,869	7.8	8.5	6.0	2,788

5.10. Operational Area Sources

5.10.1. Hearths

Land Use	Hearth Type	Unmitigated (number)	Mitigated (number)
Unrefrigerated Warehouse-No Rail	Wood Fireplaces	0	0
Unrefrigerated Warehouse-No Rail	Gas Fireplaces	0	0
Unrefrigerated Warehouse-No Rail	Propane Fireplaces	0	0
Unrefrigerated Warehouse-No Rail	Electric Fireplaces	0	0
Unrefrigerated Warehouse-No Rail	No Fireplaces	0	0

Unrefrigerated Warehouse-No Rail	Conventional Wood Stoves	0	0
Unrefrigerated Warehouse-No Rail	Catalytic Wood Stoves	0	0
Unrefrigerated Warehouse-No Rail	Non-Catalytic Wood Stoves	0	0
Unrefrigerated Warehouse-No Rail	Pellet Wood Stoves	0	0

5.10.2. Architectural Coatings

—	Residential Interior Area Coated (sq ft)	Residential Exterior Area Coated (sq ft)	Non-Residential Interior Area Coated (sq ft)	Non-Residential Exterior Area Coated (sq ft)	Parking Area Coated (sq ft)
undefined	0.00	0.00	262,571	87,524	—

5.10.3. Landscape Equipment

Season	Unit	Value
Snow Days	day/yr	0.00
Summer Days	day/yr	250

5.11. Operational Energy Consumption

5.11.1. Unmitigated

Electricity (kWh/yr) and CO2 and CH4 and N2O and Natural Gas (kBTU/yr)

Land Use	Electricity (kWh/yr)	CO2	CH4	N2O	Natural Gas (kBTU/yr)
Unrefrigerated Warehouse-No Rail	818,664	690	0.0489	0.0069	2,772,055

5.12. Operational Water and Wastewater Consumption

5.12.1. Unmitigated

Land Use	Indoor Water (gal/year)	Outdoor Water (gal/year)
Unrefrigerated Warehouse-No Rail	40,479,619	61,989

5.13. Operational Waste Generation

5.13.1. Unmitigated

Land Use	Waste (ton/year)	Cogeneration (kWh/year)
Unrefrigerated Warehouse-No Rail	165	0.00

5.14. Operational Refrigeration and Air Conditioning Equipment

5.14.1. Unmitigated

5.15. Operational Off-Road Equipment

5.15.1. Unmitigated

5.16. Stationary Sources

5.16.1. Emergency Generators and Fire Pumps

5.16.2. Process Boilers

5.17. User Defined

5.18. Vegetation

5.18.1. Land Use Change

5.18.1.1. Unmitigated

Vegetation Land Use Type	Vegetation Soil Type	Initial Acres	Final Acres

5.18.1. Biomass Cover Type

5.18.1.1. Unmitigated

Biomass Cover Type	Initial Acres	Final Acres

5.18.2. Sequestration

5.18.2.1. Unmitigated

Tree Type	Number	Electricity Saved (kWh/year)	Natural Gas Saved (btu/year)

6. Climate Risk Detailed Report

6.1. Climate Risk Summary

Cal-Adapt midcentury 2040–2059 average projections for four hazards are reported below for your project location. These are under Representation Concentration Pathway (RCP) 8.5 which assumes GHG emissions will continue to rise strongly through 2050 and then plateau around 2100.

Climate Hazard	Result for Project Location	Unit
Temperature and Extreme Heat	5.5	annual days of extreme heat
Extreme Precipitation	5.5	annual days with precipitation above 20 mm
Sea Level Rise	—	meters of inundation depth
Wildfire	0.00	annual hectares burned

Temperature and Extreme Heat data are for grid cell in which your project are located. The projection is based on the 98th historical percentile of daily maximum/minimum temperatures from observed historical data (32 climate model ensemble from Cal-Adapt, 2040–2059 average under RCP 8.5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Extreme Precipitation data are for the grid cell in which your project are located. The threshold of 20 mm is equivalent to about ¾ an inch of rain, which would be light to moderate rainfall if received over a full day or heavy rain if received over a period of 2 to 4 hours. Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.
Sea Level Rise data are for the grid cell in which your project are located. The projections are from Radke et al. (2017), as reported in Cal-Adapt (Radke et al., 2017, CEC-500-2017-008), and consider inundation location and depth for the San Francisco Bay, the Sacramento-San Joaquin River Delta and California coast resulting different increments of sea level rise coupled with extreme storm events. Users may select from four scenarios to view the range in potential inundation depth for the grid cell. The four scenarios are: No rise, 0.5 meter, 1.0 meter, 1.41 meters
Wildfire data are for the grid cell in which your project are located. The projections are from UC Davis, as reported in Cal-Adapt (2040–2059 average under RCP 8.5), and consider historical data of climate, vegetation, population density, and large (> 400 ha) fire history. Users may select from four model simulations to view the range in potential wildfire probabilities for the grid cell. The four simulations make different assumptions about expected rainfall and temperature are: Warmer/drier (HadGEM2-ES), Cooler/wetter (CNRM-CM5), Average conditions (CanESM2), Range of different rainfall and temperature possibilities (MIROC5). Each grid cell is 6 kilometers (km) by 6 km, or 3.7 miles (mi) by 3.7 mi.

6.2. Initial Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	1	0	0	N/A
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	0	0	N/A
Wildfire	1	0	0	N/A
Flooding	N/A	N/A	N/A	N/A
Drought	N/A	N/A	N/A	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	0	0	0	N/A

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.
The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.
The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores do not include implementation of climate risk reduction measures.

6.3. Adjusted Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	1	1	1	2
Extreme Precipitation	N/A	N/A	N/A	N/A
Sea Level Rise	1	1	1	2
Wildfire	1	1	1	2
Flooding	N/A	N/A	N/A	N/A
Drought	N/A	N/A	N/A	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	1	1	1	2

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.
The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.

The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores include implementation of climate risk reduction measures.

6.4. Climate Risk Reduction Measures

7. Health and Equity Details

7.1. CalEnviroScreen 4.0 Scores

The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Exposure Indicators	—
AQ-Ozone	48
AQ-PM	79
AQ-DPM	31
Drinking Water	93
Lead Risk Housing	91
Pesticides	0.00
Toxic Releases	78
Traffic	68
Effect Indicators	—
CleanUp Sites	27
Groundwater	55
Haz Waste Facilities/Generators	84
Impaired Water Bodies	67
Solid Waste	72
Sensitive Population	—
Asthma	78
Cardio-vascular	51
Low Birth Weights	64
Socioeconomic Factor Indicators	—

Education	70
Housing	66
Linguistic	61
Poverty	57
Unemployment	24

7.2. Healthy Places Index Scores

The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

Indicator	Result for Project Census Tract
Economic	—
Above Poverty	39.30450404
Employed	98.33183626
Median HI	38.85538304
Education	—
Bachelor's or higher	77.58244578
High school enrollment	100
Preschool enrollment	46.97805723
Transportation	—
Auto Access	20.21044527
Active commuting	85.11484666
Social	—
2-parent households	42.52534326
Voting	25.13794431
Neighborhood	—
Alcohol availability	14.56435262
Park access	81.35506224
Retail density	81.90683947
Supermarket access	74.104966

Tree canopy	15.37277044
Housing	—
Homeownership	10.09880662
Housing habitability	7.994353907
Low-inc homeowner severe housing cost burden	1.783651995
Low-inc renter severe housing cost burden	44.41165148
Uncrowded housing	26.88310022
Health Outcomes	—
Insured adults	41.30630053
Arthritis	53.0
Asthma ER Admissions	24.6
High Blood Pressure	31.6
Cancer (excluding skin)	55.0
Asthma	34.7
Coronary Heart Disease	57.7
Chronic Obstructive Pulmonary Disease	56.7
Diagnosed Diabetes	30.7
Life Expectancy at Birth	55.8
Cognitively Disabled	35.0
Physically Disabled	45.1
Heart Attack ER Admissions	41.6
Mental Health Not Good	45.5
Chronic Kidney Disease	55.3
Obesity	29.3
Pedestrian Injuries	97.6
Physical Health Not Good	42.8
Stroke	22.5
Health Risk Behaviors	—

Binge Drinking	65.1
Current Smoker	51.2
No Leisure Time for Physical Activity	50.7
Climate Change Exposures	—
Wildfire Risk	0.0
SLR Inundation Area	0.0
Children	51.6
Elderly	79.3
English Speaking	38.5
Foreign-born	57.8
Outdoor Workers	54.5
Climate Change Adaptive Capacity	—
Impervious Surface Cover	14.4
Traffic Density	64.3
Traffic Access	87.4
Other Indices	—
Hardship	42.7
Other Decision Support	—
2016 Voting	25.7

7.3. Overall Health & Equity Scores

Metric	Result for Project Census Tract
CalEnviroScreen 4.0 Score for Project Location (a)	84
Healthy Places Index Score for Project Location (b)	54
Project Located in a Designated Disadvantaged Community (Senate Bill 535)	Yes
Project Located in a Low-Income Community (Assembly Bill 1550)	Yes
Project Located in a Community Air Protection Program Community (Assembly Bill 617)	No

a: The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.
b: The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

7.4. Health & Equity Measures

No Health & Equity Measures selected.

7.5. Evaluation Scorecard

Health & Equity Evaluation Scorecard not completed.

7.6. Health & Equity Custom Measures

No Health & Equity Custom Measures created.

8. User Changes to Default Data

8.1. Justifications

Screen	Justification
Land Use	Adjusted building and lot acreage per Project site plan and landscape plan. Included parking garage within warehouse SF to be consistent with the traffic study and because there is only one building proposed.
Construction: Construction Phases	Adjusted schedule per client input. A paving phase, separate from the building construction phase, has been added to client's provided schedule to account for paving-specific emissions.
Construction: Off-Road Equipment	Conservatively assumed all equipment would run for 8 hours a day. Replaced tractors/loaders/backhoe with crawler tractor for site prep and grading phases to accurate assess site disturbance. Input typical construction equipment for trenching phase
Operations: Vehicle Data	Adjusted trip rates to ITE 12th edition for mini-warehousing (land use code 151). Adjusted non residential trips to be limited to the length of onsite travel within the garage to estimate operational LST impacts.

APPENDIX B: DETAILED AIR QUALITY CALCULATION TABLES

GREENHOUSE GAS EMISSIONS – REGULATORY BACKGROUND

Environmental Setting

Global climate change refers to changes in average climatic conditions on Earth as a whole, including changes in temperature, wind patterns, precipitation, and storms. Global warming, a related concept, is the observed increase in average temperature of Earth's surface and atmosphere. One identified cause of global warming is an increase of greenhouse gas (GHG) emissions in the atmosphere. GHG emissions are those compounds in Earth's atmosphere that play a critical role in determining Earth's surface temperature.

Earth's natural warming process is known as the "greenhouse effect." It is called the greenhouse effect because Earth and the atmosphere surrounding it are similar to a greenhouse with glass panes in that the glass allows solar radiation (sunlight) into Earth's atmosphere but prevents radiative heat from escaping, thus warming Earth's atmosphere. Some levels of GHG emissions keep the average surface temperature of Earth close to a hospitable 60 degrees Fahrenheit. However, it is believed that excessive concentrations of anthropogenic GHG emissions in the atmosphere can result in increased global mean temperatures, with associated adverse climatic and ecological consequences.

Scientists studying the particularly rapid rise in global temperatures have determined that human activity has resulted in increased emissions of GHG emissions, primarily from the burning of fossil fuels (from motor vehicle travel, electricity generation, consumption of natural gas, industrial activity, manufacturing), deforestation, agricultural activity, and the decomposition of solid waste. Scientists refer to the global warming context of the past century as the "enhanced greenhouse effect" to distinguish it from the natural greenhouse effect.

Global GHG emissions due to human activities have grown since pre-industrial times. As reported by the USEPA, global carbon emissions from fossil fuels increased by over 16 times between 1900 and 2008 and by about 1.5 times between 1990 and 2008. In addition, in the Global Carbon Budget 2014 report, published in September 2014, atmospheric CO_2 concentrations in 2013 were found to be 43 percent above the concentration at the start of the Industrial Revolution, and the present concentration is the highest during at least the last 800,000 years. Global increases in CO2 concentrations are due primarily to fossil fuel use, with land use change providing another significant but smaller contribution. With regard to emissions of non-CO_2 GHG, these have also increased significantly since 1990. In particular, studies have concluded that it is very likely that the observed increase in methane (CH_4) concentration is predominantly due to agriculture and fossil fuel use.

In August 2007, international climate talks held under the auspices of the United Nations Framework Convention on Climate Change (UNFCCC) led to the official recognition by the participating nations that global GHG emissions must be reduced. According to the "Ad Hoc Working Group on Further Commitments of Annex I Parties under the Kyoto Protocol," avoiding the most catastrophic events forecast by the United Nations Intergovernmental Panel on Climate Change (IPCC) would entail emissions reductions by industrialized countries in the range of 25

to 40 percent below 1990 levels. Because of the Kyoto Protocol's Clean Development Mechanism, which gives industrialized countries credit for financing emission-reducing projects in developing countries, such an emissions goal in industrialized countries could ultimately spur efforts to cut emissions in developing countries as well.

With regard to the adverse effects of global warming, as reported by SCAG, "Global warming poses a serious threat to the economic well-being, public health and natural environment in southern California and beyond. The potential adverse impacts of global warming include, among others, a reduction in the quantity and quality of water supply, a rise in sea level, damage to marine and other ecosystems, and an increase in the incidences of infectious diseases. Over the past few decades, energy intensity of the national and state economy has been declining due to the shift to a more service-oriented economy. California ranked fifth lowest among the states in CO_2 emissions from fossil fuel consumption per unit of Gross State Product. However, in terms of total CO_2 emissions, California is second only to Texas in the nation and is the 12th largest source of climate change emissions in the world, exceeding most nations. Southern California, with close to half of the state's population and economic activities, is also a major contributor to the global warming problem."

GHG Emissions Background. GHG emissions include CO_2, CH_4, nitrous oxide (N_2O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), sulfur hexafluoride (SF_6), and nitrogen trifluoride (NF_3). CO_2 is the most abundant GHG. Other GHG emissions are less abundant but have higher global warming potential than CO_2. Thus, emissions of other GHG emissions are frequently expressed in the equivalent mass of CO_2, denoted as CO_2e. Forest fires, decomposition, industrial processes, landfills, and consumption of fossil fuels for power generation, transportation, heating, and cooking are the primary sources of GHG emissions. A general description of the GHG emissions is provided in Table 1.

Global Warming Potential (GWP) is one type of simplified index based upon radiative properties used to estimate the potential future impacts of emissions of different gases on the climate system. The GWP is based on a number of factors, including the radiative efficiency (heat-absorbing ability) of each gas relative to that of CO_2, as well as the decay rate of each gas (the amount removed from the atmosphere over a given number of years) relative to that of CO_2. The larger the GWP, the more that a given gas warms the Earth compared to CO_2 over that time period. A summary of the atmospheric lifetime and GWP of selected gases is presented in Table 2. As indicated in the table, the GWP ranges from 1 to 22,800.

Table 1
Description of Identified GHG Emissions[a]

Greenhouse Gas	General Description
Carbon Dioxide (CO_2)	An odorless, colorless GHG, which has both natural and anthropocentric sources. Natural sources include the following: decomposition of dead organic matter; respiration of bacteria, plants, animals, and fungus; evaporation from oceans; and volcanic outgassing. Anthropogenic (human caused) sources of CO_2 are burning coal, oil, natural gas, and wood.
Methane (CH_4)	A flammable gas and is the main component of natural gas. When one molecule of CH_4 is burned in the presence of oxygen, one molecule of CO_2 and two molecules of water are released. A natural source of CH_4 is the anaerobic decay of organic matter. Geological deposits, known as natural gas fields, also contain CH_4, which is extracted for fuel. Other sources are from landfills, fermentation of manure, and cattle.
Nitrous Oxide (N_2O)	A colorless GHG. High concentrations can cause dizziness, euphoria, and sometimes slight hallucinations. N_2O is produced by microbial processes in soil and water, including those reactions which occur in fertilizer containing nitrogen. In addition to agricultural sources, some industrial processes (fossil fuel-fired power plants, nylon production, nitric acid production, and vehicle emissions) also contribute to its atmospheric load. It is used in rocket engines, racecars, and as an aerosol spray propellant.
Hydrofluorocarbons (HFCs)	Chlorofluorocarbons (CFCs) are gases formed synthetically by replacing all hydrogen atoms in CH_4 or ethane (C_2H_6) with chlorine and/or fluorine atoms. CFCs are non-toxic, non-flammable, insoluble, and chemically unreactive in the troposphere (the level of air at Earth's surface). CFCs were first synthesized in 1928 for use as refrigerants, aerosol propellants, and cleaning solvents. Because they destroy stratospheric ozone, the production of CFCs was stopped as required by the Montreal Protocol in 1987. HFCs are synthetic man-made chemicals that are used as a substitute for CFCs as refrigerants. HFCs deplete stratospheric ozone, but to a much lesser extent than CFCs.
Perfluorocarbons (PFCs)	PFCs have stable molecular structures and do not break down through the chemical processes in the lower atmosphere. High-energy ultraviolet rays about 60 kilometers above Earth's surface are able to destroy the compounds. PFCs have very long lifetimes, between 10,000 and 50,000 years. Two common PFCs are tetrafluoromethane and hexafluoroethane. The two main sources of PFCs are primary aluminum production and semi-conductor manufacturing.
Sulfur Hexafluoride (SF_6)	An inorganic, odorless, colorless, non-toxic, and non-flammable gas. SF_6 is used for insulation in electric power transmission and distribution equipment, in the magnesium industry, in semi-conductor manufacturing, and as a tracer gas for leak detection.
Nitrogen Trifluoride (NF_3)	An inorganic, non-toxic, odorless, non-flammable gas. NF_3 is used in the manufacture of semi-conductors, as an oxidizer of high-energy fuels, for the preparation of tetrafluorohydrazine, as an etchant gas in the electronic industry, and as a fluorine source in high power chemical lasers.

[a] *GHG emissions identified in this table are ones identified in the Kyoto Protocol and other synthetic gases recently added to the IPCC's Fifth Assessment Report.*

Source: Association of Environmental Professionals, Alternative Approaches to Analyze Greenhouse Gas Emissions and Global Climate Change in CEQA Documents, Final, June 29, 2007; Environmental Protection Agency, Acute Exposure Guideline Levels (AEGLs) for Nitrogen Trifluoride; January 2009.

Projected Impacts of Global Warming in California. The scientific community's understanding of the fundamental processes responsible for global climate change has improved over the past decade, and its predictive capabilities are advancing. However, there remain significant scientific uncertainties in, for example, predictions of local effects of climate change, occurrence, frequency, and magnitude of extreme weather events, effects of aerosols, changes in clouds, shifts in the intensity and distribution of precipitation, and changes in oceanic circulation. Due to the complexity of the Earth's climate system and inability to accurately model it, the uncertainty surrounding climate change may never be completely eliminated. Nonetheless, the IPCC's Fifth Assessment Report, Summary for Policy Makers states that, "it is extremely likely that more than half of the observed increase in global average surface temperature from 1951 to 2010 was caused by the anthropogenic increase in greenhouse gas concentrations and other anthropogenic forces together." A report from the National Academy of Sciences concluded that 97 to 98 percent of the climate researchers most actively publishing in the field support the tenets of the IPCC in that climate change is very likely caused by human (i.e., anthropogenic) activity.

Table 2
Atmospheric Lifetimes and Global Warming Potential

Gas	Atmospheric Lifetime (years)	Global Warming Potential (100-year time horizon)
Carbon Dioxide (CO_2)	50–200	1
Methane (CH_4)	12 (+/-3)	25
Nitrous Oxide (N_2O)	114	298
HFC-23: Fluoroform (CHF_3)	270	14,800
HFC-134a: 1,1,1,2-Tetrafluoroethane (CH_2FCF_3)	14	1,430
HFC-152a: 1,1-Difluoroethane ($C_2H_4F_2$)	1.4	124
PFC-14: Tetrafluoromethane (CF_4)	50,000	7,390
PFC-116: Hexafluoromethane (C_2F_6)	10,000	12,200
Sulfur Hexafluoride (SF_6)	3,200	22,800
Nitrogen Trifluoride (NF_3)	740	17,200
Source: IPCC, Climate Change 2007: Working Group I: The Physical Science Basis, Direct Global Warming Potentials		

According to CARB, the potential impacts in California due to global climate change may include loss in snowpack; sea level rise; more extreme heat days per year; more high ozone days; more large forest fires; more drought years; increased erosion of California's coastlines and sea water intrusion into the Sacramento and San Joaquin Deltas and associated levee systems; and increased pest infestation. Below is a summary of some of the potential effects that could be experienced in California as a result of global warming and climate change.

Air Quality. Higher temperatures, conducive to air pollution formation, could worsen air quality in California. Climate change may increase the concentration of ground-level ozone, but the magnitude of the effect and, therefore, its indirect effects, are uncertain. If higher temperatures are accompanied by drier conditions, the potential for large wildfires could increase, which, in turn, would exacerbate air quality. Additionally, severe heat accompanied by drier conditions and poor air quality could increase the number of heat-related deaths, illnesses, and asthma attacks throughout the state. However, if higher temperatures are accompanied by wetter, rather than drier conditions, the rains would temporarily clear the air of particulate pollution and reduce the incidence of large wildfires, thus ameliorating the pollution associated with wildfires.

In 2009, the California Natural Resources Agency (CNRA) published the California Climate Adaptation Strategy as a response to the Governor's Executive Order S-13-2008. The CNRA report lists specific recommendations for state and local agencies to best adapt to the anticipated risks posed by a changing climate. In accordance with the California Climate Adaptation Strategy, the California Energy Commission (CEC) was directed to develop a website on climate change scenarios and impacts that would be beneficial for local decision makers. The website, known as Cal-Adapt, became operational in 2011. The information provided on the Cal-Adapt website represents a projection of potential future climate scenarios. The data are comprised of the average values (i.e., temperature, sea-level rise, snowpack) from a variety of scenarios and models and are meant to illustrate how the climate may change based on a variety of different potential social and economic factors. According to the Cal-Adapt website, the portion of the city in which the Project Site is located could result in an average increase in temperature of approximately 5.4 to 8.0°F by 2070–2099, compared to the baseline 1961–1990 period.

Water Supply. Uncertainty remains with respect to the overall impact of global climate change on future water supplies in California. Studies have found that, "[c]onsiderable uncertainty about precise impacts of climate change on California hydrology and water resources will remain until we have more precise and consistent information about how precipitation patterns, timing, and intensity will change." For example, some studies identify little change in total annual precipitation in projections for California while others show significantly more precipitation. Warmer, wetter winters would increase the amount of runoff available for groundwater recharge; however, this additional runoff would occur at a time when some basins are either being recharged at their maximum capacity or are already full. Conversely, reductions in spring runoff and higher evapotranspiration because of higher temperatures could reduce the amount of water available for recharge.

The California Department of Water Resources report on climate change and effects on the State Water Project (SWP), the Central Valley Project, and the Sacramento-San Joaquin Delta, concludes that "climate change will likely have a significant effect on California's future water resources…[and] future water demand." It also reports that "much uncertainty about future water demand [remains], especially [for] those aspects of future demand that will be directly affected by climate change and warming. While climate change is expected to continue through at least the end of this century, the magnitude and, in some cases, the nature of future changes is uncertain." It also reports that the relationship between climate change and its potential effect on water demand is not well understood, but "[i]t is unlikely that this level of uncertainty will diminish

significantly in the foreseeable future." Still, changes in water supply are expected to occur, and many regional studies have shown that large changes in the reliability of water yields from reservoirs could result from only small changes in inflows. In its Fifth Assessment Report, the IPCC states "Changes in the global water cycle in response to the warming over the 21st century will not be uniform. The contrast in precipitation between wet and dry regions and between wet and dry seasons will increase, although there may be regional exceptions."

Hydrology and Sea Level Rise. As discussed above, climate change could potentially affect the amount of snowfall, rainfall and snowpack; the intensity and frequency of storms; flood hydrographs (flash floods, rain or snow events, coincidental high tide, and high runoff events); sea-level rise and coastal flooding; coastal erosion; and the potential for saltwater intrusion. Sea level rise can be a product of global warming through two main processes: expansion of seawater as the oceans warm and melting of ice over land. A rise in sea levels could result in coastal flooding and erosion and could jeopardize California's water supply. Increased storm intensity and frequency could affect the ability of flood-control facilities, including levees, to handle storm events.

Agriculture. California has a $30 billion agricultural industry that produces half the country's fruits and vegetables. Higher CO_2 levels can stimulate plant production and increase plant water-use efficiency. However, if temperatures rise and drier conditions prevail, water demand could increase; crop yield could be threatened by a less reliable water supply; and greater ozone pollution could render plants more susceptible to pest and disease outbreaks. In addition, temperature increases could change the time of year certain crops, such as wine grapes, bloom or ripen, and thus affect their quality.

Ecosystems and Wildlife. Increases in global temperatures and the potential resulting changes in weather patterns could have ecological effects on a global and local scale. Increasing concentrations of GHGs are likely to accelerate the rate of climate change. Scientists expect that the average global surface temperature could rise by 2-11.5°F (1.1-6.4°C) by 2100, with significant regional variation. Soil moisture is likely to decline in many regions, and intense rainstorms are likely to become more frequent. Sea level could rise as much as 2 feet along most of the United States coastline. Rising temperatures could have four major impacts on plants and animals: (1) timing of ecological events; (2) geographic range; (3) species' composition within communities; and (4) ecosystem processes such as carbon cycling and storage.

Regulatory Framework

In response to growing scientific and political concern with global climate change, federal and state entities have adopted a series of laws to reduce emissions of GHG emissions to the atmosphere.

Federal

Federal Clean Air Act. The U.S. Supreme Court ruled in *Massachusetts v. Environmental Protection Agency*, 127 S.Ct. 1438 (2007), that CO_2 and other GHG emissions are pollutants under the federal CAA, which the USEPA must regulate if it determines they pose an

endangerment to public health or welfare. The U.S. Supreme Court did not mandate that the USEPA enact regulations to reduce GHG emissions. Instead, the Court found that the USEPA could avoid taking action if it found that GHG emissions do not contribute to climate change or if it offered a "reasonable explanation" for not determining that GHG emissions contribute to climate change.

On April 17, 2009, the USEPA issued a proposed finding that GHG emissions contribute to air pollution that may endanger public health or welfare. On April 24, 2009, the proposed rule was published in the Federal Register under Docket ID No. EPA-HQ-OAR-2009-0171. The USEPA stated that high atmospheric levels of GHG emissions "are the unambiguous result of human emissions and are very likely the cause of the observed increase in average temperatures and other climatic changes." The USEPA further found that "atmospheric concentrations of greenhouse gases endanger public health and welfare within the meaning of Section 202 of the Clean Air Act." The findings were signed by the USEPA Administrator on December 7, 2009. The final findings were published in the Federal Register on December 15, 2009. The final rule was effective on January 14, 2010. While these findings alone do not impose any requirements on industry or other entities, this action is a prerequisite to regulatory actions by the USEPA, including, but not limited to, GHG emissions standards for light-duty vehicles.

On April 4, 2012, the USEPA published a proposed rule to establish, for the first time, a new source performance standard for GHG emissions. Under the proposed rule, new fossil fuel–fired electric generating units larger than 25 megawatts (MW) are required to limit emissions to 1,000 pounds of CO_2 per MW-hour (CO_2/MWh) on an average annual basis, subject to certain exceptions. Subsequently, on April 23, 2018, the USEPA issued a policy stating that CO_2 emissions from biomass-fired and other biogenic sources would be considered carbon neutral when used for energy production at stationary sources.

On April 17, 2012, the USEPA issued emission rules for oil production and natural gas production and processing operations, which are required by the CAA under Title 40 of the Code of Federal Regulations, Parts 60 and 63. The final rules include the first federal air standards for natural gas wells that are hydraulically fractured, along with requirements for several other sources of pollution in the oil and gas industry that currently are not regulated at the federal level.

Corporate Average Fuel Economy (CAFE) Standards. In response to the Massachusetts v. Environmental Protection Agency ruling, the George W. Bush Administration issued Executive Order 13432 in 2007, directing the USEPA, the United States Department of Transportation (USDOT), and the United States Department of Energy (USDOE) to establish regulations that reduce GHG emissions from motor vehicles, non-road vehicles, and non-road engines by 2008. In 2009, the National Highway Traffic Safety Administration (NHTSA) issued a final rule regulating fuel efficiency for and GHG emissions from cars and light-duty trucks for model year 2011; in 2010, the USEPA and the NHTSA issued a final rule regulating cars and light-duty trucks for model years 2012–2016.

In 2012, the Obama administration implemented ambitious targets requiring automakers to achieve a fleet-wide average of 54.5 mpg by 2025, aiming to reduce oil consumption and the

resulting GHG emissions. These standards were designed to encourage the production of more fuel-efficient vehicles, including hybrids and electric cars. However, the first Trump administration suggested freezing CAFE standards at 2020 levels and The Biden administration reversed these rollbacks and reinstated stricter fuel economy standards. In 2022, NHTSA finalized new CAFE standards requiring a fleet-wide average of approximately 49 mpg by model year 2026, with annual increases of eight percent for 2024-2025 and ten percent for 2026. The current Trump administration has proposed rollbacks of CAFÉ standards for light- and medium-duty vehicles for model year 2027 and later. Additionally, Congress is considering revoking California's waiver under the Clean Air Act, which allowed the state to set more stringent emissions standards.

In addition to the regulations applicable to cars and light-duty trucks described above, in 2011 the USEPA and the NHTSA announced fuel economy and GHG emissions standards for medium- and heavy-duty trucks for model years 2014–2018. The standards for CO_2 emissions and fuel consumption are tailored to three main vehicle categories: combination tractors, heavy-duty pickup trucks and vans, and vocational vehicles. According to the USEPA, this regulatory program would reduce GHG emissions and fuel consumption for the affected vehicles by 6 to 23 percent over the 2010 baselines.

Building on the success of the first phase of standards, in August 2016, the USEPA and the NHTSA finalized Phase 2 standards for medium and heavy-duty vehicles through model year 2027 that will improve fuel efficiency and cut carbon pollution. The Phase 2 standards were to lower CO_2 emissions by approximately 1.1 billion metric tons and save vehicle owners fuel costs of about $170 billion. On August 10, 2021, NHTA proposed new CAFE standards for 2024-2026 that would increase the stringency of standards by 8 percent per year rather than the previous 1.5 percent.

Energy Independence and Security Act. The Energy Independence and Security Act of 2007 (EISA) facilitates the reduction of national GHG emissions by requiring the following:

- Increasing the supply of alternative fuel sources by setting a mandatory Renewable Fuel Standard (RFS) that requires fuel producers to use at least 36 billion gallons of biofuel in 2022;

- Prescribing or revising standards affecting regional efficiency for heating and cooling products, procedures for new or amended standards, energy conservation, energy efficiency labeling for consumer electronic products, residential boiler efficiency, electric motor efficiency, and home appliances;

- Requiring approximately 25 percent greater efficiency for light bulbs by phasing out incandescent light bulbs between 2012 and 2014; requiring approximately 200 percent greater efficiency for light bulbs, or similar energy savings, by 2020; and

- While superseded by the USEPA and the NHTSA actions described above, (i) establishing miles per gallon targets for cars and light trucks, and (ii) directing the NHTSA to establish a fuel economy program for medium- and heavy-duty trucks and create a separate fuel economy standard for trucks.

Additional provisions of the EISA address energy savings in government and public institutions, promote research for alternative energy, additional research in carbon capture, international energy programs, and the creation of "green jobs." The current Trump administration is considering modifications of regulations for numerous products, including standards for household ovens.

2024 Fleet Rules. On March 20, 2024, the USEPA issued final rules mandating significant reductions in future light- and medium-duty vehicles from model years 2027 to 2032. These rules call for vehicle manufacturers to achieve an industry-wide average target of 85 grams of CO_2 per mile, a fifty-percent reduction compared to standards for model year 2026 vehicles. Similar regulations would reduce CO_2 emission 44 percent when compared to standards for model year 2026 vehicles. On March 29, 2024, the USEPA approved its "Greenhouse Gas Emissions Standards for Heavy-Duty Vehicles – Phase 3" regulations that sets more stringent standard for heavy-duty vehicles beginning in model year 2027. This regulation would accelerate the shift of heavy-duty vehicles to cleaner fuels and electric drivetrains. The current Trump administration may reconsider these standards and a 2022 regulation governing NOx emissions from heavy-duty trucks.

State

California Executive Order S-3-05 and Executive Order B-30-15. Executive Order S-3-05, issued by Governor Schwarzenegger in June 2005, established GHG emissions targets for the state, as well as a process to ensure the targets are met. The order directed the Secretary of the California Environmental Protection Agency (CalEPA) to report every two years on the state's progress toward meeting the Governor's GHG emission reduction targets. The statewide GHG emissions reduction targets are as follows:

- By 2010, reduce to 2000 emission levels;
- By 2020, reduce to 1990 emission levels;
- By 2030, reduce to 40 percent below 1990 levels; and
- By 2050, reduce to 80 percent below 1990 levels.

The State Legislature adopted equivalent 2020 and 2030 statewide targets in the California Global Warming Solutions Act of 2006 (also known as Assembly Bill [AB] 32) and Senate Bill 32, respectively, both of which are discussed below. However, the Legislature has not yet adopted a target for the 2050 horizon year.

As a result of Executive Order S-3-05, the California CAT, led by the Secretary of CalEPA, was formed. The CAT is made up of representatives from a number of state agencies and was formed to implement global warming emission reduction programs and to report on the progress made toward meeting statewide targets established under the Executive Order. The CAT reported several recommendations and strategies for reducing GHG emissions and reaching the targets established in the Executive Order. The CAT stated that smart land use is an umbrella term for

strategies that integrate transportation and land-use decisions. Such strategies generally encourage jobs/housing proximity, promote transit-oriented development (TOD), and encourage high-density residential/commercial development along transit corridors. These strategies develop more efficient land-use patterns within each jurisdiction or region to match population increases, workforce, and socioeconomic needs for the full spectrum of the population. "Intelligent transportation systems" is the application of advanced technology systems and management strategies to improve operational efficiency of transportation systems and the movement of people, goods, and service.

Executive Order B-30-15. Issued by Governor Brown in April 2015, established an additional statewide policy goal to reduce GHG emissions 40 percent below their 1990 levels by 2030. Reducing GHG emissions by 40 percent below 1990 levels in 2030 and by 80 percent below 1990 levels by 2050 (consistent with Executive Order S-3-05) aligns with scientifically established levels needed in the U.S. to limit global warming below 2 degrees Celsius.[1]

Executive Order B-55-18. Issued by Governor Jerry Brown in September 2018, this establishes a statewide goal to achieve carbon neutrality as soon as possible, but no later than 2045, and achieve and maintain net negative emissions thereafter. Based on this executive order, CARB would work with relevant state agencies to develop a framework for implementation and accounting that tracks progress towards this goal, as well as ensuring future scoping plans identify and recommend measures to achieve the carbon neutrality goal.

Executive Order S-1-07 (California Low Carbon Fuel Standard). Executive Order S-1-07, the LCFS (issued on January 18, 2007), requires a reduction of at least 10 percent in the carbon intensity of California's transportation fuels by 2020. Regulatory proceedings and implementation of the LCFS were directed to CARB. The LCFS has been identified by CARB as a discrete early action item in the adopted Climate Change Scoping Plan. The LCFS program was re-adopted in 2015 and will continue to complement other AB 32 measures, transform, and diversify the fuel pool, and is a key part of the State's petroleum reduction goals for 2030.

California Assembly Bill 32 (California Global Warming Solutions Act of 2006) and Senate Bill 32. The California Global Warming Solutions Act of 2006 (also known as AB 32) commits the state to achieving the following:

- By 2010, reduce to 2000 GHG emission levels, and
- By 2020, reduce to 1990 levels**

To achieve these goals, which are consistent with the California CAT GHG emissions reduction targets for 2010 and 2020, AB 32 mandates that CARB establish a quantified emissions cap, institute a schedule to meet the cap, implement regulations to reduce statewide GHG emissions from stationary sources consistent with the CAT strategies, and develop tracking, reporting, and enforcement mechanisms to ensure that reductions are achieved. In order to achieve the

[1] *California Air Resources Board, Frequently Asked Questions about Executive Order B-30-15, 2030 Carbon Target and Adaptation FAQs, April 29, 2015.*

reduction targets, AB 32 requires CARB to adopt rules and regulations in an open public process that achieve the maximum technologically feasible and cost-effective GHG emissions reductions.

Senate Bill (SB) 32, signed September 8, 2016, updates AB 32 (Global Warming Solutions Act) to include an emissions reductions goal for 2030. Specifically, SB 32 requires the state board to ensure that statewide GHG emissions are reduced to 40 percent below the 1990 level by 2030. The new plan, outlined in SB 32, involves increasing renewable energy use, imposing tighter limits on the carbon content of gasoline and diesel fuel, putting more electric cars on the road, improving energy efficiency, and curbing emissions from key industries.

Assembly Bill 197. Assembly Bill (AB) 197, signed September 8, 2016, is a bill linked to SB 32 that prioritizes efforts to cut GHG emissions in low-income or minority communities. AB 197 requires CARB to make available, and update at least annually, on its Internet Web site the emissions of greenhouse gases, criteria pollutants, and toxic air contaminants for each facility that reports to CARB and air districts. In addition, AB 197 adds two Members of the Legislature to the CARB board as ex officio, non-voting members and creates the Joint Legislative Committee on Climate Change Policies to ascertain facts and make recommendations to the Legislature and the houses of the Legislature concerning the state's programs, policies, and investments related to climate change.

Senate Bill 350. Senate Bill (SB) 350, signed October 7, 2015, is the Clean Energy and Pollution Reduction Act of 2015. SB 350 is the implementation of some of the goals of Executive Order B-30-15. The objectives of SB 350 are: (1) to increase the procurement of electricity from renewable sources from 33 percent to 50 percent by December 31, 2030; and (2) to double the energy efficiency savings in electricity and natural gas final end uses of retail customers through energy efficiency and conservation.[2]

Senate Bill 1368. Senate Bill (SB) 1368, signed September 29, 2006, is a companion bill to AB 32 that requires the CPUC and the CEC to establish GHG emission performance standards for the generation of electricity. These standards also generally apply to power that is generated outside of California and imported into the state. SB 1368 provides a mechanism for reducing the emissions of electricity providers, thereby assisting CARB to meet its mandate under AB32. On January 25, 2007, the CPUC adopted an interim GHG Emissions Performance Standard, which is a facility-based emissions standard requiring that all new long-term commitments for baseload generation to serve California consumers be with power plants that have GHG emissions no greater than a combined cycle gas turbine plant. That level is established at 1,100 pounds of CO_2 per MWh. Furthermore, on May 23, 2007, the CEC adopted regulations that establish and implement an identical Emissions Performance Standard of 1,100 pounds of CO_2 per MWh (see CEC Order No. 07-523-7).

Assembly Bill 1493 (Pavley I). Assembly Bill (AB) 1493, passed in 2002, requires the development and adoption of regulations to achieve "the maximum feasible reduction of greenhouse gases" emitted by noncommercial passenger vehicles, light-duty trucks, and other

[2] *Senate Bill 350 (2015–2016 Reg, Session) Stats 2015, ch. 547.*

vehicles used primarily for personal transportation in the state. CARB originally approved regulations to reduce GHG emissions from passenger vehicles in September 2004, with the regulations to take effect in 2009. On September 24, 2009, CARB adopted amendments to these "Pavley" regulations that reduce GHG emissions in new passenger vehicles from 2009 through 2016.[3] Although setting emission standards on automobiles is solely the responsibility of the USEPA, the federal CAA allows California to set state-specific emission standards on automobiles if the state first obtains a waiver from the USEPA. The USEPA granted California that waiver on July 1, 2009. A comparison between the AB 1493 standards and the Federal CAFE standards was completed by CARB and the analysis determined that California emission standards are 16 percent more stringent through the 2016 model year and 18 percent more stringent for 2020 model year.[4] California is also committed to further strengthening these standards beginning with 2020 model year vehicles to obtain a 45-percent GHG reduction in comparison to the 2009 model year.

Senate Bill 97. SB 97, passed in August 2007, is designed to work in conjunction with CEQA and AB 32. SB 97 requires the Office of Planning and Rules (OPR) to prepare and develop guidelines for the mitigation of GHG emissions or the effects thereof, including, but not limited to, the effects associated with transportation and energy consumption. The Draft Guidelines Amendments for Greenhouse Gas Emissions (Guidelines Amendments) were adopted on December 30, 2009 and address the specific obligations of public agencies when analyzing GHG emissions under CEQA to determine a project's effects on the environment.

However, neither a threshold of significance nor any specific mitigation measures are included or provided in the Guidelines Amendments.[5] The Guidelines Amendments require a lead agency to make a good-faith effort, based on the extent possible on scientific and factual data, to describe, calculate, or estimate the amount of GHG emissions resulting from a project. The Guidelines Amendments give discretion to the lead agency whether to: (1) use a model or methodology to quantify GHG emissions resulting from a project, and which model or methodology to use; or (2) rely on a qualitative analysis or performance- based standards. Furthermore, the Guidelines Amendments identify the following three factors that should be considered in the evaluation of the significance of GHG emissions:

1. The extent to which a project may increase or reduce GHG emissions as compared to the existing environmental setting;

[4] *California Air Resources Board, "Comparison of Greenhouse Gas Reductions for all Fifty United States under CAFE Standards and ARB Regulations Adopted Pursuant to AB 1493", January 23, 2008.*

[5] *See 14 Cal. Code Regs. §§ 15064.7 (generally giving discretion to lead agencies to develop and publish thresholds of significance for use in the determination of the significance of environmental effects), 15064.4 (giving discretion to lead agencies to determine the significance of impacts from GHG emissions).*

2. Whether the project emissions exceed a threshold of significance that the lead agency determines applies to the project; and

3. The extent to which the project complies with regulations or requirements adopted to implement a statewide, regional, or local plan for the reduction or mitigation of GHG emissions.[6]

The administrative record for the Guidelines Amendments also clarifies "that the effects of greenhouse gas emissions are cumulative and should be analyzed in the context of CEQA's requirements for cumulative impact analysis."[7]

In December 2018, the OPR approved a CEQA and Climate Change Advisory that updated the 2009 guidance for project-level analyses. It reaffirms the discretion that lead agencies have in establishing an appropriate methodology and determining significance.

Senate Bill 743. This 2013 legislation updates the way transportation impacts are measured in California, focusing on vehicle miles traveled (VMT) rather than level of service as the main measure of transportation impacts. It calls on decisionmakers throughout the State to focus on reducing overall VMT and the GHG emissions from such vehicle activity. Traffic studies in the City of Compton began formally analyzing projects in this fashion effective July 1, 2020.

Senate Bill 375. Acknowledging the relationship between land use planning and transportation sector GHG emissions, Senate Bill (SB) 375 was passed by the State Assembly on August 25, 2008 and signed by the Governor on September 30, 2008. This legislation links regional planning for housing and transportation with the GHG reduction goals outlined in AB 32. Reductions in GHG emissions would be achieved by, for example, locating employment opportunities close to transit. Under SB 375, each Metropolitan Planning Organization (MPO) would be required to adopt a Sustainable Community Strategy (SCS) to encourage compact development that reduce passenger VMT and trips so that the region will meet a target, created by CARB, for reducing GHG emissions. If the SCS is unable to achieve the regional GHG emissions reduction targets, then the MPO is required to prepare an alternative planning strategy that shows how the GHG emissions reduction target could be achieved through alternative development patterns, infrastructure, and/or transportation measures.

Assembly Bill 1279. This 2022 legislation creates a legally binding goal that California achieves carbon neutrality by 2045. It would also require the State to reduce GHG emissions by 85 percent below 1990 levels by 2045.

California Renewables Portfolio Standard. The California RPS program (2002, SB 1078) required that 20 percent of the available energy supplies are from renewable energy sources by 2017. In 2006, SB 107 accelerated the 20 percent mandate to 2010. These mandates apply directly to investor-owned utilities. On April 12, 2011, California Governor Jerry Brown signed into

---

[6] *14 Cal. Code Regs. § 15064.4(b).*

[7] *Letter from Cynthia Bryant, Director of the Governor's Office of Planning and Research to Mike Chrisman, California Secretary for Natural Resources, dated April 13, 2009.*

law SB 2X, which modified California's RPS program to require that both public and investor-owned utilities in California receive at least 33 percent of their electricity from renewable sources by the year 2020. California SB 2X also requires regulated sellers of electricity to meet an interim milestone of procuring 25 percent of their energy supply from certified renewable resources by 2016. These levels of reduction are consistent with the Southern California Edison's (SCE) commitment to achieve 35 percent renewables by 2020.

SCE indicates that 31 percent of its electricity came from renewable resources in 2018. Therefore, under SB 2X, SCE is required to increase its electricity from renewable resources by an additional two percent to comply with the RPS of 33 percent.[8]

Advanced Clean Cars Regulations. In 2012, CARB approved the Advanced Clean Cars (ACC) program, a new emissions-control program for model years 2015–2025.[9] The components of the Advance Clean Car program include the Low-Emission Vehicle (LEV) regulations that reduce criteria pollutants and GHG emissions from light- and medium-duty vehicles, and the Zero-Emission Vehicle (ZEV) regulation, which requires manufacturers to produce an increasing number of pure ZEVs (meaning battery electric and fuel cell electric vehicles), with provisions to also produce plug-in hybrid electric vehicles (PHEV) in the 2018 through 2025 model years.[10]

On September 23, 2020, Governor Gavin Newsom signed Executive Order No. N-79-20 that phases out sales of new gas-powered passenger cars by 2035 in California with an additional ten-year transition period for heavy vehicles. The state would not restrict used car sales, nor forbid residents from owning gas-powered vehicles. In accordance with the Executive Order, CARB is developing a 2020 Mobile Source Strategy, a comprehensive analysis that presents scenarios for possible strategies to reduce the carbon, toxic and unhealthy pollution from cars, trucks, equipment, and ships. The strategies will provide important information for numerous regulations and incentive programs going forward by conveying what is necessary to address the aggressive emission reduction requirements.

In November 2022, the ACC II regulations took effect, setting annual ZEV and plug-in hybrid vehicle sales requirements for model years 2026 to 2035 (ZEV program) and increasingly more stringent exhaust and evaporative emission standards (LEV program) to ensure automakers phase out new sales of internal combustion engine vehicles.

California Appliance Efficiency Regulations (Title 20, Sections 1601 through 1608). The 2014 Appliance Efficiency Regulations, adopted by the CEC, include standards for new appliances (e.g., refrigerators) and lighting, if they are sold or offered for sale in California. These

[10] *Ibid.*

standards include minimum levels of operating efficiency, and other cost- effective measures, to promote the use of energy- and water-efficient appliances.

California Building Energy Efficiency Standards (Title 24, Part 6). California's Energy Efficiency Standards for Residential and Nonresidential Buildings, located at Title 24, Part 6 of the California Code of Regulations and commonly referred to as "Title 24," were established in 1978 in response to a legislative mandate to reduce California's energy consumption. Title 24 requires the design of building shells and building components to conserve energy. The standards are updated periodically to allow consideration and possible incorporation of new energy efficiency technologies and methods.[11] The 2022 standards continue to improve upon previous standards for new construction of, and additions and alterations to, residential and non-residential buildings and became effective January 1, 2023. Compliance with Title 24 is enforced through the building permit process. Key changes included encouraging heat pump technology for space and water heating, setting electric-ready requirements for single-family homes, expanding solar photovoltaic system and battery storage standards, and strengthening ventilation standards to improve indoor air quality.

California Green Building Standards (CALGreen Code). The California Green Building Standards Code (California Code of Regulations, Title 24, Part 11) are mandatory green building standards for new structures. They focus on measures to reduce water consumption, GHG emissions, and materials and waste. These codes are updated every three years, with the 2022 CalGreen code updates effective January 1, 2023. New requirements address requirements for Level 2 electric vehicle chargers and use of solar photovoltaic shade structures instead of shade trees. Voluntary measures focus on higher EV charging requirements for parking facilities.

Scoping Plan for Achieving Carbon Neutrality (Scoping Plan). The Scoping Plan is a GHG emission reduction roadmap developed and updated by the California Air Resources Board (CARB) at least once every five years, as required by Assembly Bill (AB) 32. It lays out the transformations needed across various sectors to reduce GHG emissions and reach the State's climate targets. CARB published the Final 2022 Scoping Plan for Achieving Carbon Neutrality (2022 Scoping Plan Update) in November 2022, as the third update to the initial plan that was adopted in 2008. The initial 2008 Scoping Plan laid out a path to achieve the AB 32 target of returning to 1990 levels of GHG emissions by 2020, a reduction of approximately 15 percent below business as usual activities.[12] The 2008 Scoping Plan included a mix of incentives, regulations, and carbon pricing, laying out the portfolio approach to addressing climate change and clearly making the case for using multiple tools to meet California's GHG targets. The 2013 Scoping Plan Update (adopted in 2014) assessed progress toward achieving the 2020 target and

---

[11] *California Energy Commission, 2019 Building Energy Efficiency Standards, https://www.energy.ca.gov/programs-and-topics/programs/building-energy-efficiency-standards/2019-building-energy-efficiency, accessed April 2020.*

[12] *CARB. 2008. Climate Change Scoping Plan. https://ww2.arb.ca.gov/our-work/programs/ab-32-climate-change-scoping-plan/2008-scoping-plan-documents.*

made the case for addressing short-lived climate pollutants (SLCPs).[13] The 2017 Scoping Plan Update,[14] shifted focus to the newer Senate Bill (SB) 32 goal of a 40 percent reduction below 1990 levels by 2030 by laying out a detailed cost-effective and technologically feasible path to this target, and also assessed progress towards achieving the AB 32 goal of returning to 1990 GHG levels by 2020. The 2020 goal was ultimately reached in 2016, four years ahead of the schedule called for under AB 32.

The 2022 Scoping Plan Update is the most comprehensive and far-reaching Scoping Plan developed to date. It identifies a technologically feasible, cost-effective, and equity-focused path to achieve new targets for carbon neutrality by 2045 and to reduce anthropogenic GHG emissions to at least 85 percent below 1990 levels, while also assessing the progress California is making toward reducing its GHG emissions by at least 40 percent below 1990 levels by 2030, as called for in SB 32 and laid out in the 2017 Scoping Plan.[15] The 2030 target is an interim but important stepping stone along the critical path to the broader goal of deep decarbonization by 2045. The relatively longer path assessed in the 2022 Scoping Plan Update incorporates, coordinates, and leverages many existing and ongoing efforts to reduce GHGs and air pollution, while identifying new clean technologies and energy. Given the focus on carbon neutrality, the 2022 Scoping Plan Update also includes discussion for the first time of the natural and working lands sectors as sources for both sequestration and carbon storage, and as sources of emissions as a result of wildfires. Table 3 summarizes the potential scenarios to reduce emissions through 2045.

The 2022 Scoping Plan Update reflects existing and recent direction in the Governor's Executive Orders and State Statutes, which identify policies, strategies, and regulations in support of and implementation of the Scoping Plan. Among these include Executive Order B-55-18 and AB 1279 (The California Climate Crisis Act), which identify the 2045 carbon neutrality and GHG reduction targets required for the Scoping Plan.

[1] *312 – 260 = 52. 52 / 312 = 16.7%*

Source: CARB, Final 2022 Climate Change Scoping Plan, November 2022.

South Coast Air Quality Management District. The SCAQMD adopted a "Policy on Global Warming and Stratospheric Ozone Depletion" on April 6, 1990. The policy commits the SCAQMD to consider global impacts in rulemaking and in drafting revisions to the Air Quality Management Plan. In March 1992, the SCAQMD Governing Board reaffirmed this policy and adopted amendments to the policy to include the following directives:

- Phase out the use and corresponding emissions of chlorofluorocarbons, methyl chloroform (1,1,1-trichloroethane or TCA), carbon tetrachloride, and halons by December 1995;
- Phase out the large quantity use and corresponding emissions of hydrochlorofluorocarbons by the year 2000;
- Develop recycling regulations for hydrochlorofluorocarbons (e.g., SCAQMD Rules 1411 and 1415);
- Develop an emissions inventory and control strategy for methyl bromide; and
- Support the adoption of a California GHG emission reduction goal.

Southern California Association of Governments. To implement SB 375 and reduce GHG emissions by correlating land use and transportation planning, SCAG adopted the 2024-2050 RTP/SCS on April 4, 2024, to serve as the roadmap to fulfilling the region's compliance with GHG reduction targets. To this end, the 2024-2050 RTP/SCS recognizes that transportation

investments and future land use patterns are inextricably linked and acknowledges how this relationship can help the region make choices that sustain existing resources while expanding efficiency, mobility, and accessibility for people across the region.

The 2024-2050 RTP/SCS calls for $751.7 billion in investments, including $303.3 billion for transit projects and operations, $75.4 billion for state highway operations and maintenance, $62.6 billion for goods movement, and $38 billion for active transportation. These investments would aim to achieve several key objectives.

- A 11.6 percent reduction in overall vehicle miles traveled among passenger vehicles (from 2019).
- A 31.8 percent reduction in minutes of daily traffic delay per person (from 2019).
- Achievement of the region's targets for reducing greenhouse gases from autos and light-duty trucks by 19 percent per capita, from 2005 levels, by 2035.
- 465,000 new jobs supported by transportation investments or improved competitiveness each year.
- An overall return on investment of $2 for every $1 spent.

The 2024-2050 RTP/SCS land use pattern continues the trend of focusing new housing and employment growth in the region's Priority Development Areas (PDAs) and aims to enhance and build out the region's transit network. According to the 2024-2050 RTP/SCS, 66 percent of new households and 54 percent of new jobs between 2019–2050 will be located in PDAs, either near transit or in walkable communities.

Regulatory Framework: Local

City of Los Angeles Green Building Code. On December 15, 2011, the Los Angeles City Council approved Ordinance No. 181,481, which amended Chapter IX of the Los Angeles Municipal Code (LAMC), referred to as the Los Angeles Green Building Code, by adding a new Article 9 to incorporate various provisions of the 2010 CALGreen Code. On December 20, 2016, the Los Angeles City Council approved Ordinance No. 184,692, which further amended Chapter IX of the LAMC, by amending certain provisions of Article 9 to reflect local administrative changes and incorporating by reference portions of the 2016 CALGreen Code. The 2020 Los Angeles Green Building Code incorporates by reference the mandatory requirements of the 2019 California Green Building Standards Code.

On November 29, 2022, the City Council adopted Ordinance 187714, which requires new development to be all electric powered, with the few exceptions (e.g., cooking equipment associated with any restaurants or eating facilities, gas-powered emergency backup systems).

Local: Green New Deal

The City of LA Green New Deal (formerly Sustainable City pLAn 2019) identifies a number of measures to reduce VMT and associated GHG emissions. Such measures that would support the local reduction strategy include converting all city fleet vehicles to zero emission where technically feasible by 2028. Starting in 2021, all vehicle procurement followed a "zero emission first" policy for City fleets. The Green New Deal also establishes a target to increase the percentage of zero emission vehicles to 25 percent by 2025, 80 percent by 2035 and 100 percent by 2050. In order to achieve this goal, the City would build 20 Fast Charging Plazas throughout the City. The City would also install 28,000 publicly available chargers by 2028 to encourage adoption of ZEVs.

Local: General Plan Housing Element (Housing Needs Assessment)

The Housing Element of the General Plan is prepared pursuant to state law and provides planning guidance in meeting housing needs identified in the SCAG Regional Housing Needs Assessment (RHNA). The Housing Element identifies the City's housing conditions and needs, establishes the goals, objectives, and policies that are the foundation of the City's housing and growth strategy, and provides the array of programs the City intends to implement to create and preserve sustainable, mixed-income neighborhoods across the City.

The Housing Needs Assessment chapter of the Housing Element discusses the City's population and housing stock to identify housing needs for a variety of household types across the City. The current RHNA goal for affordable housing within the City is approximately forty percent of new construction. However, the City's projections show affordable housing comprising twenty percent of new construction, which falls short of the forty percent RHNA goal. In order to address this shortfall in affordable housing, the Housing Element provides measures to streamline and incentivize development of affordable housing. Such measures include revising density bonuses for affordable housing; identifying locations which are ideal for funding programs to meet low-income housing goals; and rezoning areas to encourage low-income housing. With implementation of such measures to increase affordable housing, the Housing Element predicts a significant increase in housing production at all income ranges compared to previous cycles.

The Housing Element also promotes sustainability and resilience, and environmental justice through housing, as well as the need to reduce displacement. It encourages the utilization of alternatives to current parking standards that lower the cost of housing, support GHG and VMT goals and recognize the emergence of shared and alternative mobility. The Element also identifies housing strategies for energy conservation, water conservation, alternative energy sources and sustainable development which support conservation and reduce demand.

Local: Mobility Plan 2035

In August 2015, the City Council adopted Mobility Plan 2035 (Mobility Plan), which serves as the City's General Plan circulation element. The City Council has adopted several amendments to the Mobility Plan since its initial adoption, including the most recent amendment on September 7,

2016.[16] The Mobility Plan incorporates "complete streets" principles and lays the policy foundation for how the City's residents interact with their streets. While the Mobility Plan 2035 mainly relates to transportation, certain components would serve to reduce VMT and mobile source GHG emissions. One component of the Mobility Plan is a GHG emission tracking program to establish compliance with SB 375, AB 32 and the region's Sustainable Community Strategy.

Local: City of Los Angeles All-Electric Buildings

Chapter IX of the LAMC also requires that all new buildings be all-electric buildings, with some exceptions. Equipment typically powered by natural gas such as space heating, water heating, cooking appliances and clothes drying would need to be powered by electricity for new construction. Exceptions are made for commercial restaurants, laboratory, and research and development uses. The LAMC is consistent with 2022 Title 24 goals of encouraging all-electric development which requires new residential uses to be electric-ready (wiring installed for all-electric appliances). Buildings in Los Angeles account for 43 percent of greenhouse gas emissions—more than any other sector in the City. These LAMC requirements ensure that new buildings being constructed are built to leverage the increasingly clean electric grid, which is anticipated to be carbon-free by 2035, rather than relying on fossil fuels.

Traffic Study Policies and Procedures. The City of Los Angeles Department of Transportation (LADOT) has developed the Transportation Assessment Guidelines (TAG) (July 2020) to provide the public, private consultants, and City staff with standards, guidelines, objectives, and criteria to be used in the preparation of a transportation impact study. The TAG is consistent with the City's goals to emphasize the importance of sustainability, smart growth, and reduction of GHG emissions in addition to traditional traffic flow considerations when evaluating and mitigating impacts to the transportation system because of land use policy decisions. The TAG prioritizes transportation demand management strategies and multi-modal strategies over automobile-centric solutions when mitigating project-related impacts to the City's transportation system. Through acknowledgement of an imminent update that will identify VMT reduction thresholds, the TAG stands as an implementing mechanism of the City's strategy to conform to the mandates and requirements of AB 32, SB 375, and SB 743.

16 Los Angeles Department of City Planning, Mobility Plan 2035: An Element of the General Plan, approved by City Planning Commission on June 23, 2016, and adopted by City Council on September 7, 2016.

MANAGEMENT SUMMARY

BCR Consulting LLC (BCR Consulting) is under contract to EPD Solutions, Inc. to conduct a Cultural Resources Assessment of the 4802 San Vicente Project (project) in the City of Los Angeles (City), Los Angeles County, California. The project proposes demolition of the existing 1956 commercial/industrial building and constructing a six-story self-storage project. The work is being performed pursuant to the California Environmental Quality Act (CEQA). A cultural resources records search, additional research, field survey, paleontological overview, and Sacred Lands File Search with the Native American Heritage Commission (NAHC) were conducted for the project. The records search revealed that 52 cultural resource studies have taken place resulting in 28 cultural resources identified within a one-mile radius of the project site. Of the 52 previous studies, none has assessed the project site for cultural resources, and no cultural resources have been previously identified within its boundaries.

During the additional research, and field survey, BCR Consulting archaeologists identified one historic-period (45 or more years old) industrial building that occupies the project site. BCR Consulting recommends that this resource does not meet eligibility criteria for the California Register of Historical Resources (California Register) and as such it is not recommended a historical resource under CEQA. Additional research showed that two locally significant cultural resources are within the “impact area” (an estimated 1,000 foot radius as defined by the City Planning Department) within which project activities may indirectly impact the character of historical resources. These resources include the Department of Water and Power Distributing Station No. 8 (adjacent to the west), and the San Vicente Boulevard Median (the street median directly to the north). The Department of Water and Power Distributing Station No. 8 was built in 1939 and most of the surrounding buildings and landscape features from that era have been removed or are not recognizable. Therefore, the neighborhood does not appear to possess any characteristics that convey this resource’s historical significance and development of the project will not result in a substantial adverse effect to this historical resource. The San Vicente Boulevard Median was constructed in the 1960s, when the neighborhood to the north and west were primarily residential, and the neighborhood to the south and east were commercial and industrial. Construction of the project will carry on the commercial/industrial character that the site currently occupies and will not create any visual impairment to or from the median that are not already present. Therefore, indirect impacts to the San Vicente Boulevard Median are not anticipated and development of the project will not result in a substantial adverse effect to this historical resource. Finally, disturbances associated with previous excavation and construction of the existing historic-period building at the project site have been severe and have disrupted soil beyond depths at which buried cultural resources are likely. And no significant buried cultural resources have been recorded in the vicinity of the project site. As a result, the potential to encounter in-situ remains associated with significant archaeological materials during project-related excavation is low. Based on these results no further cultural resource work is recommended for the current undertaking.

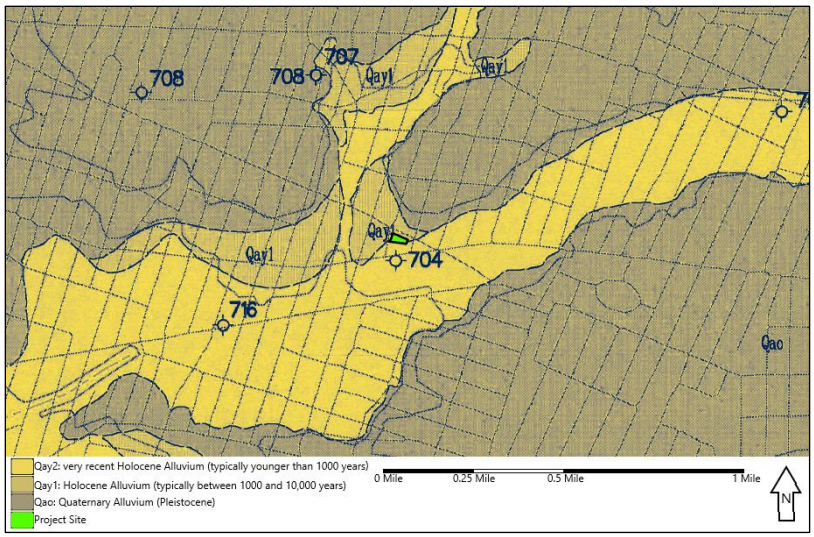

The current study attempted to determine whether significant archaeological deposits were present on the proposed project site. Although none were yielded during the field survey, record search results show historic-period resources are in close proximity to the project site and ground-disturbing activities have the potential to reveal buried deposits not observed on the surface. Prior to the initiation of ground-disturbing activities, field personnel should be alerted to the possibility of buried prehistoric or historic cultural deposits. In the event that field personnel encounter buried cultural materials, work in the immediate vicinity of the find should cease and a qualified archaeologist should be retained to assess the significance of the find.

The qualified archaeologist should have the authority to stop or divert construction excavation as necessary. If the qualified archaeologist finds that any cultural resources present meet eligibility requirements for listing on the California Register or the National Register of Historic Places (National Register), plans for the treatment, evaluation, and mitigation of impacts to the find will need to be developed. Prehistoric or historic cultural materials that may be encountered during ground-disturbing activities include:

- historic artifacts such as glass bottles and fragments, cans, nails, ceramic and pottery fragments, and other metal objects;
- historic structural or building foundations, walkways, cisterns, pipes, privies, and other structural elements;
- prehistoric flaked-stone artifacts and debitage (waste material), consisting of obsidian, basalt, and or cryptocrystalline silicates;
- groundstone artifacts, including mortars, pestles, and grinding slabs;
- dark, greasy soil that may be associated with charcoal, ash, bone, shell, flaked stone, groundstone, and fire affected rocks.

Results of the Sacred Lands File search were negative and the NAHC provided a list of Native American tribes who may have knowledge of cultural resources in the project area (see Appendix C). The City will initiate Assembly Bill (AB) 52 Native American Consultation for the project. Since the City will initiate and carry out the required Native American Consultation, the results of the consultation are not provided in this report. However, this report may be used during the consultation process, and BCR Consulting staff is available to answer questions and address concerns as necessary.

Paleontology. According to CEQA Guidelines, projects subject to CEQA must determine whether the project would "directly or indirectly destroy a unique paleontological resource". A Paleontological Resources Overview was requested from the Western Science Center in Hemet on July 15, 2025 and results are pending. BCR Consulting has consulted geological studies and maps for the project area, and the following information is summarized from a previous paleontological resources technical report completed at a nearby project with identical sediments (Bell 2019). The geologic units underlying the project area are mapped as alluvial deposits dating from the Holocene (Yerkes 1997). Holocene alluvial units are typically too young to preserve fossil resources. Based on this information, the project site has low potential for buried fossils. Therefore, no additional paleontological resource work or monitoring is recommended. However, if inadvertent fossil discoveries occur during project activities, a qualified paleontologist should be retained to recommend treatment.

Geological Exhibit. Sediments in the Project Area

If human remains are encountered during the undertaking, State Health and Safety Code Section 7050.5 states that no further disturbance shall occur until the County Coroner has made a determination of origin and disposition pursuant to Public Resources Code Section 5097.98. The County Coroner must be notified of the find immediately. If the remains are determined to be prehistoric, the Coroner will notify the Native American Heritage Commission (NAHC), which will determine and notify a Most Likely Descendant (MLD). With the permission of the landowner or his/her authorized representative, the MLD may inspect the site of the discovery. The MLD shall complete the inspection within 48 hours of notification by the NAHC.

INTRODUCTION

BCR Consulting LLC (BCR Consulting) is under contract to EPD Solutions, Inc., to complete a Cultural Resources Assessment of the 4802 San Vicente Project (project) in the City of Los Angeles (City), Los Angeles County, California. The project proposes demolition of the existing 1956 commercial/industrial building and construction of a six-story self-storage project. Please note that early building documents referenced the project site as 4800 San Vicente; it is also known as 4802 San Vicente. Both addresses refer to the same property. A cultural resources records search, additional research, intensive-level pedestrian field survey, paleontological overview, and Sacred Lands File search with the Native American Heritage Commission (NAHC) were conducted for the project in partial fulfillment of the California Environmental Quality Act (CEQA). The project site is located in a non-sectioned portion of Township 1 South, Range 14 West, San Bernardino Baseline and Meridian. It is depicted on the United States Geological Survey (USGS) *Hollywood, California* (1981) 7.5-minute topographic quadrangle (Figure 1).

Regulatory Setting

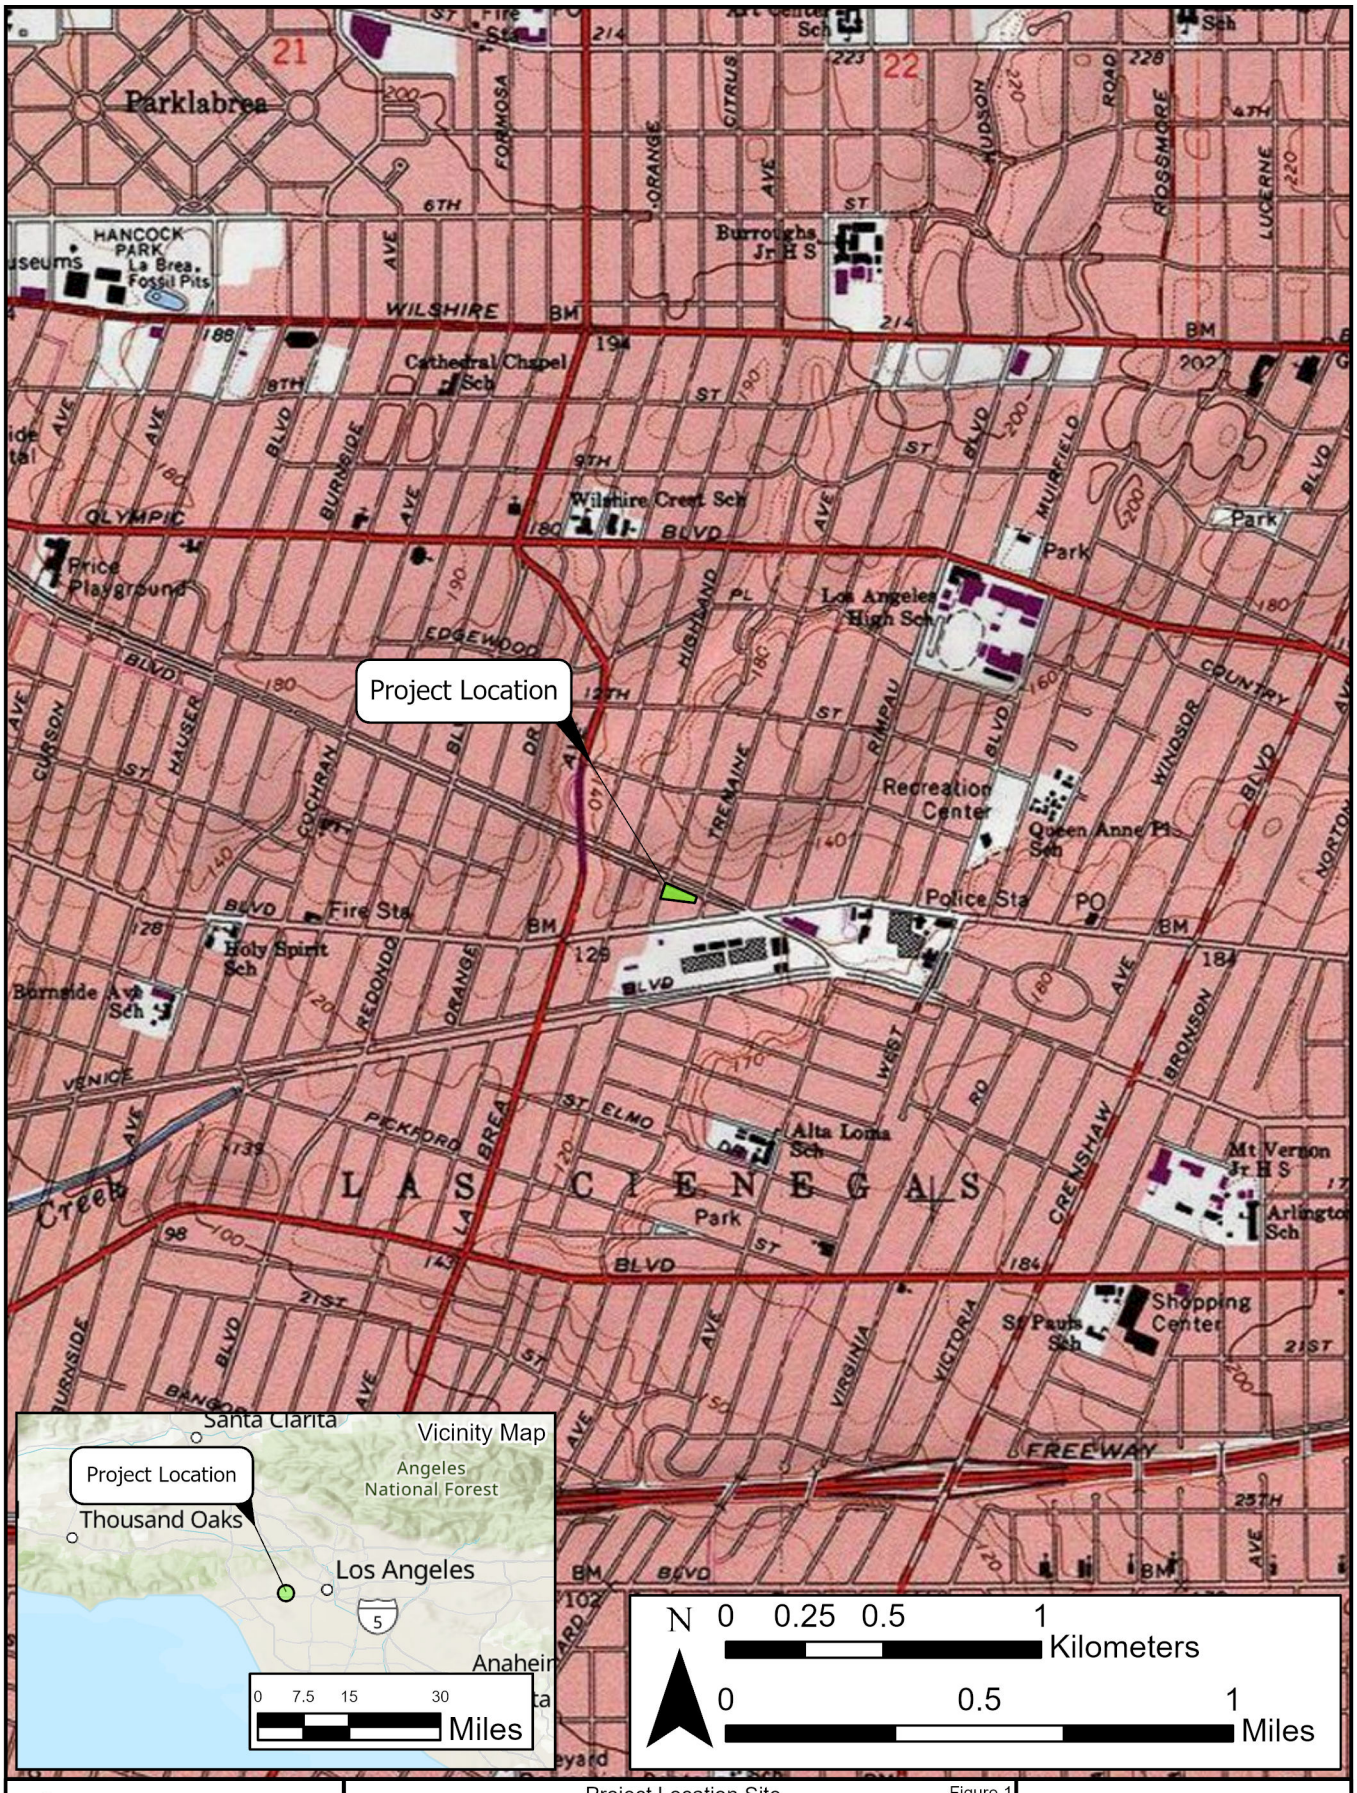

The California Environmental Quality Act. CEQA applies to all discretionary projects undertaken or subject to approval by the state's public agencies (California Code of Regulations 14(3), § 15002(i)). Under CEQA, "A project with an effect that may cause a substantial adverse change in the significance of a historical resource is a project that may have a significant effect on the environment" (Cal. Code Regs. tit. 14(3), § 15064.5(b)). State CEQA Guidelines section 15064.5(a) defines a "historical resource" as a resource that meets one or more of the following criteria:

- Listed in, or eligible for listing in, the California Register of Historical Resources (California Register)
- Listed in a local register of historical resources (as defined at Cal. Public Res. Code § 5020.1(k))
- Identified as significant in a historical resource survey meeting the requirements of § 5024.1(g) of the Cal. Public Res. Code
- Determined to be a historical resource by a project's lead agency (Cal. Code Regs. tit. 14(3), § 15064.5(a))

A historical resource consists of "Any object, building, structure, site, area, place, record, or manuscript which a lead agency determines to be historically significant or significant in the architectural, engineering, scientific, economic, agricultural, educational, social, political, military, or cultural annals of California…Generally, a resource shall be considered by the lead agency to be 'historically significant' if the resource meets the criteria for listing in the California Register of Historical Resources" (Cal. Code Regs. tit. 14(3), § 15064.5(a)(3)).

The significance of a historical resource is impaired when a project demolishes or materially alters in an adverse manner those physical characteristics of a historical resource that convey its historical significance and that justify its eligibility for the California Register. If an impact on a historical or archaeological resource is significant, CEQA requires feasible measures to minimize the impact (State CEQA Guidelines § 15126.4 (a)(1)). Mitigation of significant impacts must lessen or eliminate the physical impact that the project will have on the resource.

Section 5024.1 of the Cal. Public Res. Code established the California Register. Generally, a resource is considered by the lead agency to be "historically significant" if the resource meets the criteria for listing in the California Register (Cal. Code Regs. tit. 14(3), § 15064.5(a)(3)).

EPD Solutions, Inc.

The eligibility criteria for the California Register are similar to those of the National Register of Historic Places (National Register), and a resource that meets one or more of the eligibility criteria of the National Register will be eligible for the California Register. The California Register program encourages public recognition and protection of resources of architectural, historical, archaeological, and cultural significance, identifies historical resources for state and local planning purposes, determines eligibility for state historic preservation grant funding and affords certain protections under CEQA. Criteria for Designation:

1. Associated with events that have made a significant contribution to the broad patterns of local or regional history or the cultural heritage of California or the United States.
2. Associated with the lives of persons important to local, California or national history.
3. Embodies the distinctive characteristics of a type, period, region or method of construction or represents the work of a master or possesses high artistic values.
4. Has yielded, or has the potential to yield, information important to the prehistory or history of the local area, California or the nation.

In addition to meeting one or more of the above criteria, the California Register requires that sufficient time has passed since a resource's period of significance to "obtain a scholarly perspective on the events or individuals associated with the resources." (CCR 4852 [d][2]). Fifty years is normally considered sufficient time for a potential historical resource, and in order that the evaluation remain valid for a minimum of five years after the date of this report, all resources older than 45 years (i.e. resources from the "historic-period") will be evaluated for California Register listing eligibility, or CEQA significance. The California Register also requires that a resource possess integrity. This is defined as the ability for the resource to convey its significance through seven aspects: location, setting, design, materials, workmanship, feeling, and association.

Finally, CEQA requires that significant effects on unique archaeological resources be considered and addressed. CEQA defines a unique archaeological resource as any archaeological artifact, object, or site about which it can be clearly demonstrated that, without merely adding to the current body of knowledge, there is a high probability that it meets any of the following criteria:

1. Contains information needed to answer important scientific research questions and there is a demonstrable public interest in that information.
2. Has a special and particular quality such as being the oldest of its type or the best available example of its type.
3. Is directly associated with a scientifically recognized important prehistoric or historic event or person.

CEQA Guidelines Section 15064.5 Appendix G includes significance criteria relative to archaeological and historical resources. These have been utilized as thresholds of significance here, and a project would have a significant environmental impact if it would:

a) cause a substantial adverse change in the significance of a historical resource as defined in section 10564.5;
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to Section 10564.5;

c) Disturb any human remains, including those interred outside of formal cemeteries.

Historical resources thresholds of significance and methodology have been adopted by the Los Angeles City Planning Department and are summarized in the Department's CEQA Guide's *Chapter 4: Guide to Preparation of Impact Analyses, Cultural Resources-Historical Resources* and *Chapter 5: Technical Studies-Cultural Resources-Historical Resources*. The online versions of these documents have been used for this project and referenced when necessary (see Bertoni 2024).

Tribal Cultural Resources. The Legislature added requirements regarding tribal cultural resources for CEQA in Assembly Bill 52 (AB 52) that took effect July 1, 2015. AB 52 requires consultation with California Native American tribes and consideration of tribal cultural resources in the CEQA process. By including tribal cultural resources early in the CEQA process, the legislature intended to ensure that local and Tribal governments, public agencies, and project proponents would have information available, early in the project planning process, to identify and address potential adverse impacts to tribal cultural resources. By taking this proactive approach, the legislature also intended to reduce the potential for delay and conflicts in the environmental review process. To help determine whether a project may have such an effect, the Public Resources Code requires a lead agency to consult with any California Native American tribe that requests consultation and is traditionally and culturally affiliated with the geographic area of a Proposed Project. Since the City will initiate and carry out the required AB52 Native American Consultation, the results of the consultation are not provided in this report. However, this report may be used during the consultation process, and BCR Consulting staff are available to answer questions and address comments as necessary.

Paleontological Resources. CEQA provides guidance relative to significant impacts on paleontological resources, indicating that a project would have a significant impact on paleontological resources if it disturbs or destroys a unique paleontological resource or site or unique geologic feature. Section 5097.5 of the California Public Resources Code specifies that any unauthorized removal of paleontological remains is a misdemeanor. Further, California Penal Code Section 622.5 sets the penalties for damage or removal of paleontological resources. CEQA documentation prepared for projects would be required to analyze paleontological resources as a condition of the CEQA process to disclose potential impacts. Please note that as of January 2018 paleontological resources are considered in the geological rather than cultural category. Therefore, paleontological resources are not summarized in the body of this report.

NATURAL SETTING

The local geologic region coincides with the physiographic area known as the Los Angeles Basin. It is characterized as a transverse-oriented lowland basin and coastal plain approximately 50 miles long and 20 miles wide. The basin originated as a deep marine trough during the Pliocene (7-2 million years ago) that eventually filled with shallow water fossil bearing sediments. By the beginning of the Pleistocene (after 2 million years ago) uplifting created the series of plains and mesas along the coast that now characterize the area (Lambert 1994, Mendenhall 1905, Woodford et al. 1954). Local rainfall ranges from 5 to 15 inches annually (Jaeger and Smith 1971:36-37). The project region comprises a portion of the Ballona Creek flood plain, which (locally channelized and paved) flows from north to south. Although much of the native vegetation has been locally removed, chaparral, coastal sage scrub, and riparian vegetation communities dominate regional flora. Key native plants include black sage, California brittlebush, California buckwheat, California sagebrush, deerweed,

golden yarrow, laurel sumac, lemonadeberry, poison oak, purple sage, sticky monkeyflower, sugar bush, toyon, white sage, coastal century plant, coastal cholla, prickly-pear cactus, arroyo willow, and bulrush. These plants were utilized by local animal species, kangaroo rats, California horned lizard, orange-throated whiptail, horned lizard, brown-headed cowbird, California gnatcatcher, California quail, cactus wren, darkling beetle, harvester ant, and Palos Verdes blue butterfly (Williams et al. 2008:117,122). Peripheral species included deer, and various rodents, rabbits, and birds -many of which were utilized by prehistoric and historic inhabitants (see Lightfoot and Parrish 2009).

CULTURAL SETTING

Prehistoric Context

Two primary regional syntheses are commonly utilized in the archaeological literature for southern California. The first was advanced by Wallace in 1955, and defines four cultural horizons, each with characteristic local variations: Early Man Horizon, Milling Stone, Intermediate, and Late Prehistoric. Employing a more ecological approach, Warren and Crabtree (1986) defined five periods in southern California prehistory: Lake Mojave, Pinto, Gypsum, Saratoga Springs, and Protohistoric. Warren and Crabtree viewed cultural continuity and change in terms of various significant environmental shifts, defining the cultural ecological approach for archaeological research of the California deserts and coast. Many changes in settlement patterns and subsistence focus are viewed as cultural adaptations to a changing environment, beginning with the gradual environmental warming in the late Pleistocene, the desiccation of the desert lakes during the early Holocene, the short return to pluvial conditions during the middle Holocene, and the general warming and drying trend, with periodic reversals that continue to this day (Warren and Crabtree 1986).

Ethnography

Although no prehistoric sites have been locally recorded, in general the project site is situated within Gabrielino territory.

Gabrielino. The Gabrielino probably first encountered Europeans when Spanish explorers reached California's southern coast during the 15th and 16th centuries (Bean and Smith 1978; Kroeber 1925). The first documented encounter, however, occurred in 1769 when Gaspar de Portola's expedition crossed Gabrielino territory (Bean and Smith 1978). Other brief encounters took place over the years and are documented in McCawley 1996 (citing numerous sources). The Gabrielino name has been attributed by association with the Spanish mission of San Gabriel, and refers to a subset of people sharing speech and customs with other Cupan speakers (such as the Juaneño/Luiseño/Ajachemem) from the greater Takic branch of the Uto-Aztecan language family (Bean and Smith 1978). Gabrielino villages occupied the watersheds of various rivers (locally including the Santa Ana) and intermittent streams. Chiefs were usually descended through the male line and often administered several villages. Gabrielino society was somewhat stratified and is thought to have contained three hierarchically ordered social classes which dictated ownership rights and social status and obligations (Bean and Smith 1978:540-546). Plants utilized for food were heavily relied upon and included acorn-producing oaks, as well as seed-producing grasses and sage. Animal protein was commonly derived from rabbits and deer in inland regions, while coastal populations supplemented their diets with fish, shellfish, and marine mammals (Boscana 1933, Heizer 1968, Johnston 1962, McCawley 1996). Dog, coyote, bear, tree squirrel, pigeon, dove, mud hen, eagle, buzzard, raven, lizards, frogs, and turtles were specifically not utilized as a food source (Kroeber 1925:652).

History

Historic-era California is generally divided into three periods: the Spanish or Mission Period (1769 to 1821), the Mexican or Rancho Period (1821 to 1848), and the American Period (1848 to present). A local sequence for Los Angeles and, since the project was occupied by a clothing manufacturer during the historic period, a brief historical context of the local clothing industry is briefly explored following summaries of these periods.

Spanish Period. The first European to pass through the area is thought to be a Spaniard called Father Francisco Garces. Having become familiar with the area, Garces acted as a guide to Juan Bautista de Anza, who had been commissioned to lead a group across the desert from a Spanish outpost in Arizona to set up quarters at the Mission San Gabriel in 1771 near what today is Pasadena (Beck and Haase 1974). Garces was followed by Alta California Governor Pedro Fages, who briefly explored the region in 1772. Searching for San Diego Presidio deserters, Fages had traveled through Riverside to San Bernardino, crossed over the mountains into the Mojave Desert, and then journeyed westward to the San Joaquin Valley (Beck and Haase 1974).

Mexican Period. In 1821, Mexico overthrew Spanish rule and the missions began to decline. By 1833, the Mexican government passed the Secularization Act, and the missions lost their vast land holdings, and released their neophytes (Beattie and Beattie 1974).

American Period. The American Period, 1848–Present, began with the Treaty of Guadalupe Hidalgo. In 1850, California was accepted into the Union of the United States primarily due to the population increase created by the Gold Rush of 1849. The cattle industry reached its greatest prosperity during the first years of the American Period. Mexican Period land grants had created large pastoral estates in California, and demand for beef during the Gold Rush led to a cattle boom that lasted from 1849–1855. However, beginning about 1855, the demand for beef began to decline due to imports of sheep from New Mexico and cattle from the Mississippi and Missouri Valleys. When the beef market collapsed, many California ranchers lost their ranchos through foreclosure. A series of disastrous floods in 1861–1862, followed by a significant drought further diminished the economic impact of local ranching. This decline combined with agricultural and real estate developments of the late 19th century, set the stage for diversified economic pursuits that continue (Beattie and Beattie 1974; Cleland 1941).

Los Angeles. Modern-day Los Angeles began as a farming community named “El Pueblo de Nuestra Señora la Reina de los Ángeles de Porciúncula,” often referred to as Pueblo de Los Angeles (City of Los Angeles 2025). It was founded in 1781 as one of two Spanish pueblos in the state and was initially intended to support local garrisons (Samudio and Lee 2001). After Mexico gained independence from Spain in 1821, Los Angeles came under Mexican control. This period saw secularization of missions in 1833 and expansion of the rancho system. The ranchos were devoted primarily to cattle and sheep ranching, and established land-use patterns that would influence California's development for generations (California Missions Foundation 2025). In 1835, Los Angeles officially became a city under the Mexican government. The community remained relatively small and isolated, with social and economic life revolving around the expansive ranchos. In spite of its small size, the pueblo served as the principal urban center of southern Alta California during this period (Rolle and Gaines 1965). During the Mexican American War, American forces invaded and occupied the city, though Californio resistance led to several months of conflict. The Treaty of Cahuenga was signed on January 13, 1847, formally ending armed resistance. The Treaty of Guadalupe Hidalgo in February 1848 officially ended the war and transferred California to the U.S.

The California Gold Rush of 1848 to 1855 brought massive population growth to the state, leading to California's admission to the Union as the 31st state on September 9, 1850 (Rolle and Gaines 1965). The arrival of the railroad marked another turning point for Los Angeles. The Los Angeles and San Pedro Railroad was completed in 1869, providing the first rail connection between the city and its harbor, which was crucial for economic development (Lavender 1972). In 1876, the Southern Pacific Railroad connected Los Angeles to San Francisco and the eastern United States, though this required a $600,000 subsidy from the city (Caughey 1978). The 1880s marked the beginning of Los Angeles' transformation into a major American city. The region received an influx of settlers with the connection of the Southern Pacific Railroad to the Atchison, Topeka, and Santa Fe Railway and the Texas and Pacific Railway in 1881. The arrival of the Santa Fe Railroad in 1885 created direct transcontinental competition with the Southern Pacific, leading to a dramatic rate war that saw passenger fares drop from $125 to as low as $1 for a ticket from Kansas City to Los Angeles (Rolle, Gaines 1965). This triggered one of the most significant population booms in American history, and between 1880 and 1890 Los Angeles' population increased from 11,200 to 50,400 (Caughey 1978; Rolle 1978). In addition to the railroad competition, the boom was fueled by agricultural expansion and extensive advertising campaigns that promoted Southern California's Mediterranean climate and opportunities (Lavender 1972). In the 1890s major oil discoveries made the region one of the largest oil-producing areas in the country, while the development of refrigerated railroad cars enabled the citrus industry to flourish (Caughey 1978). Los Angeles also became a major tourist destination during this period, with the establishment of new transportation networks and hotels (Lavender 1972).

During the early 1900s, agriculture, oil, and real estate represented the dominant regional economic forces. Various economic and geographic factors converged allowing the motion picture industry to gain a foothold in Los Angeles after World War I, with Hollywood at the center (Rolle 1978). By the 1920s, more than 70 studios (80 percent of the global market) operated in Los Angeles and the industry has remained dominant there ever since (Buntin 2009:19). Like much of the U.S., 1920s Los Angeles experienced booming economic expansion as existing industries grew and new ones were founded. Eventually, profits ballooned disproportionately to wages and by the end of the decade businesses produced more goods than could be purchased by a growing working class. The stock market crash of 1929 punctuated a severe economic contraction known as the Great Depression of the 1930s. Economic indicators from the era show that California's farm income shrank by 50 percent between 1929 and 1932, and by 1933 building permits had contracted to 1/9th of the 1925 total. In 1932 unemployment reached 28 percent, and in 1934 20 percent of Californians relied on financial assistance from the government (California State University Northridge ND). Politicians were initially optimistic about a speedy economic recovery and public assistance was slow to develop.

Eventually, California developed emergency relief programs, including funding for the unemployed, and worker training and housing. The federal government also developed various worker programs and supports that were locally instrumental in recovery, and enacted Social Security to assist individuals with disabilities, people without jobs, and the elderly. Unions became increasingly popular for instituting some stability for workers. Through these developments improvements began to take shape and by World War II industries with foundations in government assistance such as aerospace and defense helped to re-establish economic growth in Los Angeles (Fiveable Inc. 2025). The city became a key player in the Allied strategy, with companies like Hughes Aircraft, Lockheed, Douglas, and Northrop expanding rapidly to meet wartime demands. During the height of the war Lockheed employed ninety thousand people in the Los Angeles area and combined aerospace manufacturers

produced about 300,000 airplanes (Lavender 1972; Rolle 1978). By the end of World War II, Los Angles and other parts of California were facing a peacetime economy with the threat of widespread business mortality. However, the post-war period brought unprecedented suburban, commercial, and industrial expansion, enabled by the GI Bill's loan guarantees for returning veterans (Rolle 1978). During this time, production homebuilders created massive suburban developments, and the city's population grew rapidly, in turn producing a workforce for burgeoning commercial and industrial business (Rolle and Gaines 1965). The development of the freeway system facilitated a sprawling growth pattern, creating the automobile-oriented landscape that has become synonymous with Los Angeles since World War II. The population of Los Angeles County grew from about 170,000 in 1900 to 7,000,000 in 1964, and over 10 million today, representing a quarter of California's population (United States Census Bureau 2025).

Clothing Manufacturing in Los Angeles. Los Angeles' clothing manufacturing industry was pioneered during the late 19th century by Morris Cohn & Company who manufactured men's overalls. As demand for their products grew, the company expanded and in 1909 moved to a new factory building on 12th Street in Los Angeles, which eventually became the center of Los Angeles' Garment District. Over the next decade, other clothing manufacturers began to set up shop and the ensuing development of Los Angeles' port and highway infrastructure made the area doubly attractive to the industry. In 1921, 130 garment factories and their associates formed the Associated Apparel Manufacturers of Los Angeles to centralize industry guidelines. The industry was initially set up to serve the growing southern California market but as Hollywood's influence globalized, Los Angeles became a highly publicized hub for media and consequently became a fashion epicenter. The Garment District proximity to studios blurred the line between costume and fashion, and custom clothing became a diversified concern, developing markets for fine clothing, sportswear, costumes, and swimwear. During World War II the industry again diversified to provide unforms to the military.

These factors combined to create an expansive and vibrant clothing manufacturing industry, all centered in Los Angeles' Garment District. In the 1950s and 1960s, the manufactures from the garment industry became more closely connected with retailers, and modernized factories and wholesale trade began to dominate the market. As local labor laws became stricter and wages continued to grow, competition from countries with less business impediments took its toll on the local clothing industry in the 1970s and 1980s. Although one researcher has asserted that over 45,000 garment makers were still working in the City's manufacturing sector in 2020, much of the labor formerly supplied by the Los Angeles industry has moved to places like China, Mexico, Bangladesh, and Ethiopia (Olalere 2024, Brothers 2025, Morse 2020).

PERSONNEL

David Brunzell, M.A., RPA acted as Principal Investigator and author for the current study. He also completed additional research for the project. Mr. Brunzell meets the U.S. Secretary of the Interior Professional Qualification Standards for Archaeology and Architectural History. Nick Shepetuk, M.A., RPA acted as Project Manager, completed the Department of Parks and Recreation (DPR) 523 forms, completed additional research, and co-authored the technical report with contributions from BCR Consulting Staff Archaeologists Eduardo Gutierrez, B.S., and BCR Consulting Staff Archaeologist/Historian John Defachelle, B.A., B.S. BCR Consulting Staff Archaeologist Douglas Kazmier, B.A., PGC completed the cultural resources records search at the South Central Coastal Information Center (SCCIC) at California State University, Fullerton. BCR Consulting Staff Archaeologist Kainoa Heskett, B.A., completed the intensive-level pedestrian survey.

METHODS

This work was completed pursuant to CEQA, the Public Resources Code (PRC) Chapter 2.6, Section 21083.2, and California Code of Regulations (CCR) Title 14, Chapter 3, Article 5, Section 15064.5. The pedestrian cultural resources survey was intended to locate and document previously recorded or new cultural resources, including archaeological sites, features, isolates, and historic-period buildings, that exceed 45 years in age within defined project boundaries. The project site was examined using 15-meter transect intervals, where accessible. This study is intended to determine whether cultural resources are located within the project boundaries, whether any cultural resources are significant pursuant to the above-referenced regulations and standards, and to develop specific mitigation measures that will address potential impacts to significant resources. Tasks pursued to achieve that end include:

- Cultural resources records search to review the results of any studies conducted within a one mile radius of the project boundaries;
- Additional research through local and regional resources to provide historical context and land use history;
- Systematic pedestrian survey of the entire accessible project site;
- California Register eligibility evaluation for resources identified;
- Development of recommendations for cultural resources, following CEQA;
- Completion of DPR 523 forms for any discovered cultural resources.

Research

Records Search. On July 16, 2025 (prior to the field survey) a records search was conducted at the South Central Coastal Information Center (SCCIC) at California State University, Fullerton. This archival research reviewed the status of all recorded historic and prehistoric cultural resources, and survey and excavation reports completed within one mile of the project site. In addition, a review of local listings and the Built Environment Resource Directory (BERD) were performed. The BERD comprises a list of official California Office of Historic Preservation (OHP) determinations of eligibility for historic-period built environment resources including listings of the National Register and the California Register.

Additional Research. BCR Consulting performed additional research through the Bureau of Land Management General Land Office Records, Los Angeles County Office of the Assessor, HistoricPlacesLA, historic aerial photographs, and various internet resources. This section also describes the neighborhood setting and how it has changed over the years.

Field Survey

An intensive-level cultural resources field survey of the project site was conducted on July 19, 2025. The survey was conducted by walking parallel transects spaced approximately 15 meters apart across the accessible project site. Cultural Resources were recorded on DPR 523 forms. Digital photographs were taken at various points within the project site. These included overviews as well as detail photographs of all cultural resources. Cultural resources were recorded per the California OHP *Instructions for Recording Historical Resources* in the field using:

- Detailed note taking for entry on DPR Forms (see Appendix B)
- Hand-held Garmin Global Positioning systems for mapping purposes
- Digital photographic overviews and photographs of all cultural resources (see Appendix B and D).

RESULTS

Research

Records Search. Data from the SCCIC revealed that 52 previous cultural resources studies have taken place, and 28 cultural resources have been recorded within one mile of the project site. None of the previous studies have assessed the project site for cultural resources resulting in no cultural resources recorded within its boundaries. The records search results are summarized in Table A, and the complete records search bibliography is provided in Appendix A.

Additional Research. Additional research was performed for the project site to provide the background for the historic-period building within its boundaries and the potential impact area surrounding it. According to an 1871 land grant, the project site was part of a property originally patented to Januario Abila, Louiza Garfias, Pedra Ramierz, and Francisca Rimpan (General Land Office [GLO] 1871). Research and fieldwork have not revealed any evidence that the early owners developed the project site, or that any physical evidence remains from that era, so personal histories of these individuals are not examined here. Los Angeles County Assessor records show that the project site at 4800 San Vicente Boulevard is occupied by a

22,706 square foot commercial/industrial building that was constructed in 1956 (Los Angeles County Assessor 2025). It was developed and operated under the direction of Charles Lyons, owner of Hollywood Clothes, Inc. Hollywood Clothes was a manufacturer of men's suits established by Mr. Lyons in the Los Angeles Garment District at 920 East 12th Street between 1929 and 1931. The business was initially 100 percent unionized but ended its affiliation with the Union of Amalgamated Clothing Workers of America in April of 1931 due to a dispute and walkout. In 1956 the company relocated to the project site at 4800 San Vicente to expand and modernize manufacturing and business operations. By 1961 Hollywood Clothes was also known as Charles Lyons Clothes. In 1965, the firm engaged the Koblitz Company to assist with marketing and began to advertise and ship to stores outside of Los Angeles on the west coast, in the south, and in the Midwest during the 1960s and 1970s. The business ceased operations in the early 1980s. Research did not reveal any other owners or businesses operating at the project site in the historic period. It was most recently occupied by Pacific Title Archives (Los Angeles Times [LAT] 7 September 1956:28; LAT 1931 18 April 1931:14; LAT 1 April 1956:122; Los Angeles Evening Citizen News 18 Jan 1965:8; LAT 20 Aug 1929:12; LAT 13 May, 1927).

Figure 2. Original Hollywood Clothes Factory Location at East 12th Street, 1931 (USC 2025)

Charles Lyons was born in Marshalltown, Iowa in 1886 and was living in Chicago, Illinois by the early 1920s. He and Chicago Resident Lillian Ogus were married in 1921. They had two daughters (Ruth and Louise) and moved to the Los Angeles area in the late 1920s, where their son Jerry was born in 1931. Charles worked as a clothing manufacturer, and by 1927 he was president of Shapiro Kenney, Inc. He established Hollywood Clothes at East 12th Street in the Garment District of Los Angeles between 1929 and 1931. Charles expanded the business and contracted with Donald R. Warren to design and construct the new factory on San Vicente (at the project site) in 1956. Lillian's occupation was listed as "housekeeper" in 1940 and their three children were raised at the family residence in Beverly Hills. Charles died in 1969 and Lillian died in 1978-about three years before Charles Lyons clothes disappeared

from advertising records (U.S. Bureau of Census 1950; U.S. Draft Board 1942; LAT 13 May, 1927; LAT 24 Oct 1926:78; LAT Oct 2021:B8).

The building that occupies the project site at 4800 and 4802 San Vicente Boulevard is described in in detail in the Field Survey section below. It was designed by engineer Donald R. Warren. Mr. Warren owned and operated Donald R. Warren Company, consulting electrical engineers and designers based on Sunset Boulevard in Los Angeles. He was born in 1897 and worked as an engineer from the early to mid-20th century. He did participate in design and construction of several high-profile projects during his career, including the San Francisco-Oakland Bay Bridge, Los Angeles International Airport, the Roosevelt Fleet Navy Base, and Kaiser Steel's Fontana plant. As a tilt-up design, the project site was not one of the more notable designs that his firm worked on. Donald and his wife Lara lived in La Canada where they raised a son, Donald F. Warran. Donald R. Warren died in 1973 (LAT 1 April 1956:122; LAT 18 Jan 1973:35).

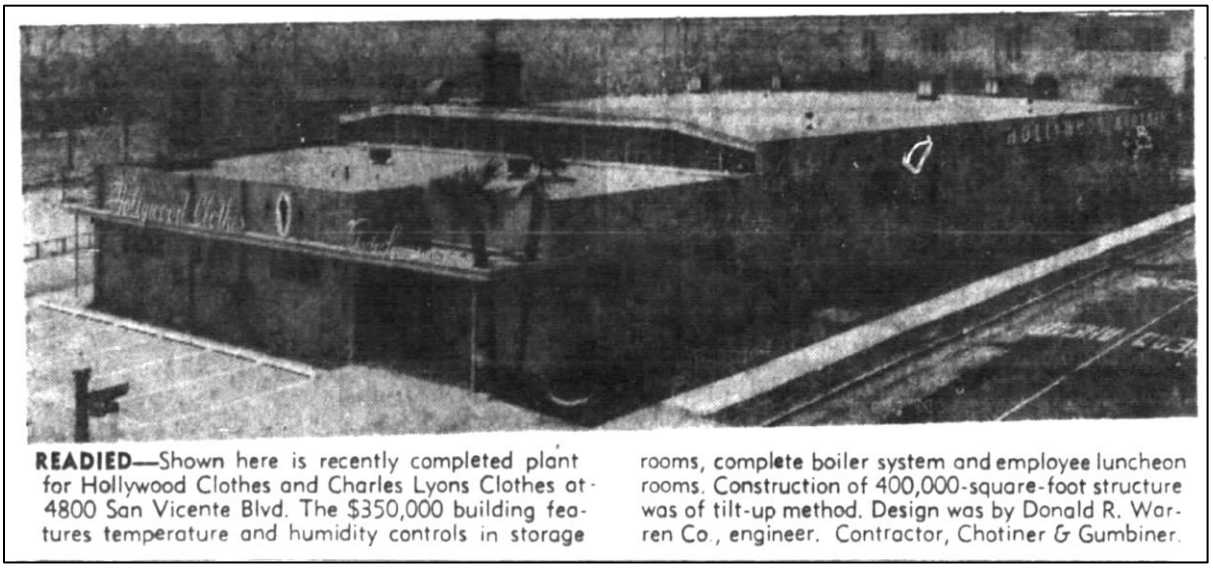

BEING BUILT—Shown above is new industrial plant now under construction at 4800 San Vicente Blvd. for Hollywood Clothes. Building contains 30,000 square feet of space and will cost, including land, approximately $300,000. Among the features is a complete boiler system for operation of steam pressing section. Project was designed by Donald R. Warren Co., engineers. Contractor is Chotiner & Gumbiner.

Figure 3. Hollywood Clothes Under Construction, 1956 (LAT 10 June 1956:154)

The building that occupies the project site exhibits features consistent with an architectural style known as Mid-Century Industrial, a sub-type of the Mid-Century Modern style which was an outgrowth of International Style. Henry Russell Hitchcock and Phillip Johnson proposed the International Style in 1932, using it to reference buildings constructed as early as 1922 and through the 1930s primarily in France and Germany. Its popularity spread through the 1930s and 1940s to the United Kingdom, North and South America, Scandinavia, and Japan. In the 1950s and 1960s the style was nearly ubiquitous in the design of skyscrapers in the United States. In the 1970s and 1980s the International Style had gone out of fashion as formulaic, and it gave way to updated forms of design and decoration as well as building materials that became known as postmodern. Major architects that utilized the International Style included Richard Neutra and Philip Johnson in the United States, Walter Gropius and Ludwig Mies van der Rohe in Germany and the U.S., J.J.P. Oud in the Netherlands, and Le

Corbusier in France. Characteristics include rectilinear forms with minimal decoration and ornament, open interior spaces, and use of cantilever construction intended to convey the illusion of weightlessness. Materials emphasize highly visible glass and steel and rely heavily on reinforced concrete that is usually less visible (Zelazko 2024). The term Mid-Century Modern was coined by Cara Greenberg to denote a style which included graphic design, interior design, architecture, and industrial design (Appalachian State University 2025). Today, it is most commonly used to refer to architecture that was designed between 1930 and 1970. In terms of architecture, some of the important hallmarks of the style include: simple designs; emphasis on function; strong horizontal and vertical lines; geometric shapes; large windows (Cvetković 2024).

READIED—Shown here is recently completed plant for Hollywood Clothes and Charles Lyons Clothes at 4800 San Vicente Blvd. The $350,000 building features temperature and humidity controls in storage rooms, complete boiler system and employee luncheon rooms. Construction of 400,000-square-foot structure was of tilt-up method. Design was by Donald R. Warren Co., engineer. Contractor, Chotiner & Gumbiner.

Figure 4. Newly Built Hollywood Clothes Factory at Project Site (LAT 16 Sept 1956:129; Note: the Square Foot Estimate in the Caption is Inaccurate)

The City Planning Department has emphasized addressing an impact area, or geographic area within which a project may directly or indirectly impact the character of historical resources. In general, the impact area does not exceed a one-block or 1,000 foot radius around the project site (City of Los Angeles 2024:3). Therefore, a brief discussion on neighborhood setting and surrounding historical resources is warranted to determine whether the project occupies a significant historical setting that could be affected by the proposed project. The project site occupies a commercial/industrial corridor bordered on the east by West Blvd., on the north by W. Pico Blvd., on the south by Venice Blvd., and on the west by Los Angeles Department of Water and Power Station No. 8. The commercial/industrial corridor is surrounded by residential developments that are mostly outside of the impact area. In 1948, the parcels in the impact area contained low density construction. By 1964 such developments were mostly replaced by large buildings and parking lots that were more built-out than their predecessors. San Vicente Blvd. was also reconfigured with a curve to the south at its terminus at Venice Boulevard. Construction of the building that occupies the project site was consistent with the trend of maximizing built industrial/commercial space on a parcels between 1948 and 1964. Between 2005 and the present, most of the 1960s developments in the impact area were replaced by large box stores and corporate businesses (United States Department of Agriculture 1948, 1964, 2005). Potential for indirect impacts to these resources are addressed in the Evaluation section. Please note, the newspapers cited in this section were accessed through newspapers.com.

Field Survey

During the field survey, Mr. Heskett carefully inspected the project site and identified one historic-period commercial building at 4800 San Vicente Blvd, described in detail below. No artifacts or potential for significant buried remains have been identified. DPR 523 Forms required to record the building are included in Appendix B, and photographs are provided in Appendix B and D. No other cultural resources (including prehistoric or historic-period archaeological or other historic-period architectural resources) were identified during the field survey. The entire project site has been paved and minimal sediment was visible.

Figure 5: 4800 San Vicente Boulevard Current Building Overview (Google Street View Image)

4800 San Vicente Blvd. The resource consists of a Mid-Century Industrial style (a sub-type of Mid-Century Modern), tilt-up building located at 4800 San Vicente Boulevard, Los Angeles. It was built in 1956 and as a clothing factory for Charles Lyons Clothes and Hollywood Clothes. It was most recently occupied by Pacific Title Archives. The building has a trapezoidal plan and flat roof with no overhanging eaves. The principal façade (east-southeast, or "east" elevation) has a structural awning that spans the width of the building and shelters a recessed office entry in the northeast corner. The awning features two roof apertures at the north edge of the recessed entry through which palm trees were originally growing. The exterior wall of the recessed entry is cladded with small square porcelain tiles. The eastern fifth of the building has a lower roofline, about 10 feet in height, and houses the offices section of the building. The rear (factory) portion rises to about 14 feet in height and becomes wider in the far end. The east elevation originally featured signage atop the roof at the entrance that read "Hollywood Clothes" and "Charles Lyons" in cursive, and an ornamental element with the business logo (a silhouette of a man in a suite). "Hollywood Clothes" was also painted at the top of the western end of the north wall. The original signage and logo ornament have been removed (see Figures 4 and 5). The concrete exterior walls are relatively featureless, smooth, and plain, with support beams spaced every 20 feet. Fenestration includes 11 windows on the north elevation; eight windows, a roll-up steel door, and an entry door on the south elevation; three windows and two entry doors on the east elevation; five windows and two steel double doors on the west elevation. A concrete-masonry unit structure measuring approximately 20 by 15 feet and eight feet tall projects from the north end of the west elevation. It features a

corrugated steel, slanted shed roof and a set of double doors constructed from corrugated steel on its south elevation. Cast-in lifting point covers are featured in the upper exterior walls. Windows and vents are covered with security bars. The property features steel fencing that encloses the parking lot adjacent to the building's east west elevations.

SIGNIFICANCE EVALUATIONS

During the field survey, one historic-period cultural resource was identified. CEQA calls for the evaluation and recordation of historic and archaeological resources. The criteria for determining the significance of impacts to cultural resources are based on Section 15064.5 of the *CEQA Guidelines* and Guidelines for the Nomination of Properties to the California Register. Properties eligible for listing in the California Register and subject to review under CEQA are those meeting the criteria for listing in the California Register, or designation under a local ordinance.

Significance Criteria

California Register of Historical Resources. The California Register criteria are based on National Register criteria. For a property to be eligible for inclusion on the California Register or as a City Landmark, one or more of the following criteria must be met:

1. It is associated with the events that have made a significant contribution to the broad patterns of local or regional history, or the cultural heritage of California or the U.S.;
2. It is associated with the lives of persons important to local, California, or U.S. history;
3. It embodies the distinctive characteristics of a type, period, region, or method of construction, represents the work of a master, possesses high artistic values; and/or
4. It has yielded, or has the potential to yield, information important to the prehistory or history of the local area, California, or the nation.

In addition to meeting one or more of the above criteria, the California Register requires that sufficient time has passed since a resource's period of significance to "obtain a scholarly perspective on the events or individuals associated with the resources." (CCR 4852 [d][2]). The California Register also requires that a resource possess integrity. This is defined as the ability for the resource to convey its significance through seven aspects: location, setting, design, materials, workmanship, feeling, and association.

Evaluations

4800 San Vicente. Criterion 1: The Hollywood Clothes business existed within the Great Depression and the post-World War II expansion years of the 1950s. It was established at its original location in the Garment District at the end of the 1920s, during a period of expansion for this industry, and remained viable through the Great Depression. It was notable for ending its union affiliation during an era when many unions were expanding. Although the early era of Hollywood Clothes is interesting, there is no physical connection between the project site and 1920s expansion of clothing manufacturers or the Great Depression. It therefore cannot be significantly associated with events from that time. Its expansion during the 1950s was typical of local clothing manufacturers' tendency to modernize and emphasize wholesale trade. Research has not revealed any evidence to suggest that the project site represents a significant contribution to this expansion. Therefore, it is not significantly associated with events that have made a contribution to the broad patterns of the area, California, or the U.S. and is recommended not eligible for listing on the California Register under Criterion 1. Criterion 2: The building was designed by a well-known engineer, Donald R. Warren. Warren

designed many more substantial and/or elaborate structures such as dams and bridges. A simple, small, utilitarian, tilt-up industrial building, a type of building which was very commonly constructed at the time, is not a unique or exceptional example of the work for which he was known. Charles Lyons, the owner of Hollywood Clothes, was a successful local businessman, but there is no evidence that he made important contributions within any historical contexts explored here. No other notable individuals were associated with the building. Therefore, the project site is recommended not eligible for listing on the California Register under Criterion 2. Criterion 3: This building was designed and built using a ubiquitous and utilitarian Mid-Century Modern style commonly utilized in industrial buildings of the period. Therefore, the building does not embody the distinctive characteristics of a type, period, region, or method of construction and it is recommended not eligible for listing on the California Register under Criterion 3. Criterion 4: This building has been thoroughly assessed during this study and has not and is not likely to yield information important to prehistory or history. The project site therefore is recommended not eligible for listing to the California Register under Criterion 4. Based on these results, the project site and its historic-period building are recommended not eligible under any of the four California Register criteria for listing and are, therefore, not considered historical resources under CEQA.

Potential for Impacts to Los Angeles Department of Water and Power Station No. 8. The Los Angeles Department of Water and Power Station No. 8 is located across the street to the west of the project site, in the impact area (as defined by the City of Los Angeles Planning). This building was constructed in 1939 and has been determined significant by the Los Angeles Historic Resources Inventory. It is therefore a historical resource under CEQA (Los Angeles City Planning 2024). Most of the surrounding buildings and landscape features from this era have been removed or are not recognizable. Therefore, the neighborhood does not appear to possess any characteristics that convey this resource's historical significance and development of the project will not result in a substantial adverse effect to this historical resource.

Potential for Impacts to the San Vicente Boulevard Median. The San Vicente Boulevard Median is located across the street to the north of the project site, in the impact area (as defined by the City of Los Angeles Planning). This is a landscaped median that was built between 1955 and 1961 within the alignment of the former streetcar tracks. It is a "prominent visual landmark" and has been determined eligible by the Los Angeles Historic Resources Inventory, and as such is a historical resource under CEQA (Los Angeles City Planning 2024). When the San Vicente Boulevard Median was constructed, the neighborhood to the north and west were primarily residential and the neighborhood to the south and east were commercial and industrial. Construction of the project will carry on the commercial/industrial character that the site currently occupies and will not create any visual impairment to or from the median that are not already present. Therefore, indirect impacts to the San Vicente Boulevard Median are not anticipated and development of the project will not result in a substantial adverse effect to this historical resource.

RECOMMENDATIONS

During the additional research, and field survey, BCR Consulting archaeologists identified one historic-period (45 or more years old) industrial building that occupies the project site. BCR Consulting recommends that this resource does not meet eligibility criteria for the California Register and as such it is not recommended a historical resource under CEQA. Additional research showed that two locally significant cultural resources are within the "impact area" (an estimated 1,000 foot radius as defined by the City Planning Department) within which project

activities may indirectly impact the character of historical resources. These resources include the Department of Water and Power Distributing Station No. 8 (adjacent to the west), and the San Vicente Boulevard Median (the street median directly to the north). The Department of Water and Power Distributing Station No. 8 was built in 1939 and most of the surrounding buildings and landscape features from that era have been removed or are not recognizable. Therefore, the neighborhood does not appear to possess any characteristics that convey this resource's historical significance and development of the project will not result in a substantial adverse effect to this historical resource. The San Vicente Boulevard Median was constructed in the 1960s, when the neighborhood to the north and west were primarily residential, and the neighborhood to the south and east were commercial and industrial. Construction of the project will carry on the commercial/industrial character that the site currently occupies and will not create any visual impairment to or from the median that are not already present. Therefore, indirect impacts to the San Vicente Boulevard Median are not anticipated and development of the project will not result in a substantial adverse effect to this historical resource. Finally, disturbances associated with previous excavation and construction of the existing historic-period building at the project site have been severe and have disrupted soil beyond depths at which buried cultural resources are likely. And no significant buried cultural resources have been recorded in the vicinity of the project site. As a result, the potential to encounter in-situ remains associated with significant archaeological materials during project-related excavation is low. Based on these results no further cultural resource work is recommended for the current undertaking.

The current study attempted to determine whether significant archaeological deposits were present on the proposed project site. Although none were yielded during the field survey, record search results show historic-period resources are in close proximity to the project site and ground-disturbing activities have the potential to reveal buried deposits not observed on the surface. Prior to the initiation of ground-disturbing activities, field personnel should be alerted to the possibility of buried prehistoric or historic cultural deposits. In the event that field personnel encounter buried cultural materials, work in the immediate vicinity of the find should cease and a qualified archaeologist should be retained to assess the significance of the find. The qualified archaeologist should have the authority to stop or divert construction excavation as necessary. If the qualified archaeologist finds that any cultural resources present meet eligibility requirements for listing on the California Register or the National Register of Historic Places (National Register), plans for the treatment, evaluation, and mitigation of impacts to the find will need to be developed. Prehistoric or historic cultural materials that may be encountered during ground-disturbing activities include:

- historic artifacts such as glass bottles and fragments, cans, nails, ceramic and pottery fragments, and other metal objects;
- historic structural or building foundations, walkways, cisterns, pipes, privies, and other structural elements;
- prehistoric flaked-stone artifacts and debitage (waste material), consisting of obsidian, basalt, and or cryptocrystalline silicates;
- groundstone artifacts, including mortars, pestles, and grinding slabs;
- dark, greasy soil that may be associated with charcoal, ash, bone, shell, flaked stone, groundstone, and fire affected rocks.

Results of the Sacred Lands File search were negative and the NAHC provided a list of Native American tribes who may have knowledge of cultural resources in the project area (see Appendix C). The City will initiate Assembly Bill (AB) 52 Native American Consultation for the

project. Since the City will initiate and carry out the required Native American Consultation, the results of the consultation are not provided in this report. However, this report may be used during the consultation process, and BCR Consulting staff is available to answer questions and address concerns as necessary.

Paleontology. According to CEQA Guidelines, projects subject to CEQA must determine whether the project would "directly or indirectly destroy a unique paleontological resource". A Paleontological Resources Overview was requested from the Western Science Center in Hemet on July 15, 2025 and results are pending. BCR Consulting has consulted geological studies and maps for the project area, and the following information is summarized from a previous paleontological resources technical report completed at a nearby project with identical sediments (Bell 2019). The geologic units underlying the project area are mapped as alluvial deposits dating from the Holocene (Yerkes 1997). Holocene alluvial units are typically too young to preserve fossil resources. Based on this information, the project site has low potential for buried fossils. Therefore, no additional paleontological resource work or monitoring is recommended. However, if inadvertent fossil discoveries occur during project activities, a qualified paleontologist should be retained to recommend treatment.

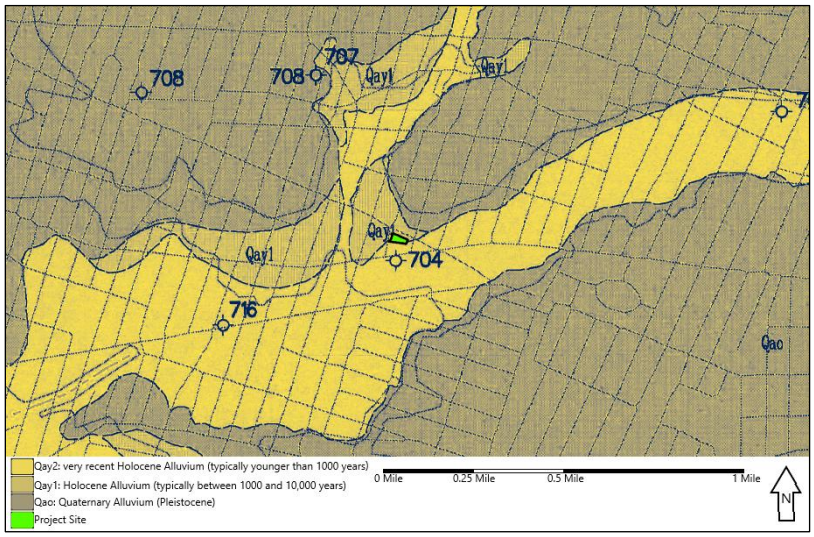

Figure 6: Geological Exhibit. Sediments in the Project Area

If human remains are encountered during any project activities, State Health and Safety Code Section 7050.5 states that no further disturbance shall occur until the County Coroner has made a determination of origin and disposition pursuant to Public Resources Code Section 5097.98. The County Coroner must be notified of the find immediately. If the remains are determined to be prehistoric, the Coroner will notify the NAHC, which will determine and notify a Most Likely Descendant (MLD). With the permission of the landowner or his/her authorized representative, the MLD may inspect the site of the discovery. The MLD shall complete the inspection within 48 hours of notification by the NAHC.

APPENDIX B

DEPARTMENT OF PARKS AND RECREATION 523 FORMS

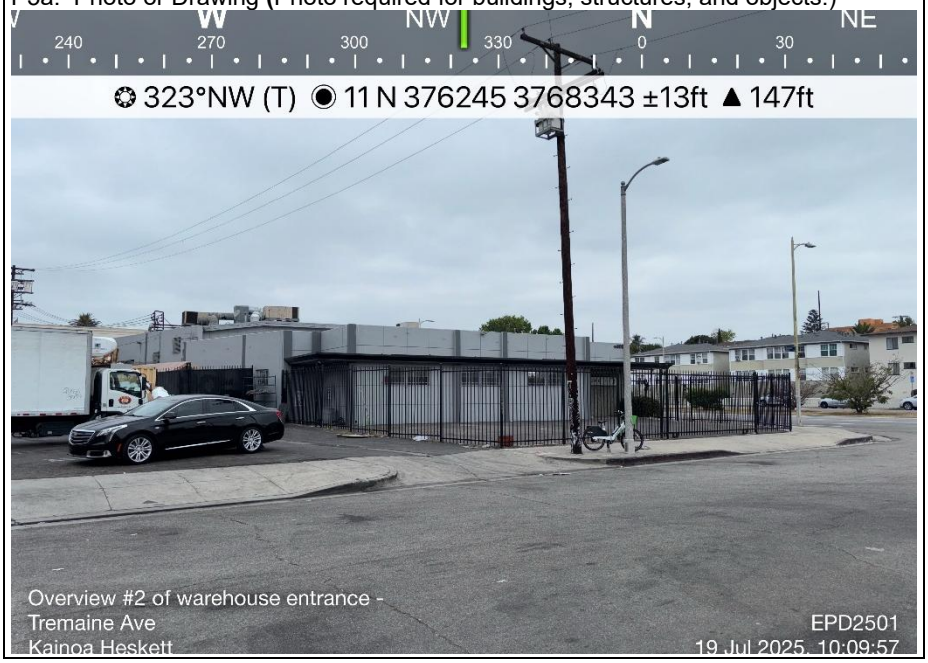

P1. Other Identifier: EPD2501-H-1

***P2. Location:** ☐ **Not for Publication** ☑ **Unrestricted** ***a. County:** Los Angeles
and (P2b and P2c or P2d. Attach a Location Map as necessary.)
***b. USGS 7.5' Quad:** *Hollywood, California* **Date:**1981 **T** 1 S; **R** 14 W; Non-sectioned**;** SBBM
c. Address: 4800 San Vicente Blvd. City: Los Angeles Zip: 90019
d. UTM: Zone: 11S 376147mE/3768372mN (SW corner; NAD83); Elevation: 140' AMSL
e. Other Locational Data: The resource is located approximately 300 feet northwest of the intersection of W Pico Blvd and San Vicente Blvd.

***P3a. Description:** The resource consists of a Mid-Century Industrial style (a sub-type of Mid-Century Modern), tilt-up building located at 4800 San Vicente Boulevard, Los Angeles. It was built in 1956 and as a clothing factory for Charles Lyons Clothes and Hollywood Clothes. It was most recently occupied by Pacific Title Archives. The building has a trapezoidal plan and flat roof with no overhanging eaves. The principal façade (east-southeast, or "east" elevation) has a structural awning that spans the width of the building and shelters a recessed office entry in the northeast corner. The awning features two roof apertures at the north edge of the recessed entry through which palm trees were originally growing. The exterior wall of the recessed entry is cladded with small square porcelain tiles. The eastern fifth of the building has a lower roofline, about 10 feet in height, and houses the offices section of the building. The rear (factory) portion rises to about 14 feet in height and becomes wider in the far end. The east elevation originally featured signage atop the roof at the entrance that read "Hollywood Clothes" and "Charles Lyons" in cursive, and an ornamental element with the business logo (a silhouette of a man in a suite). "Hollywood Clothes" was also painted at the top of the western end of the north wall. The original signage and logo ornament have been removed (see Figures in Continuation Sheet). The concrete exterior walls are relatively featureless, smooth, and plain, with support beams spaced every 20 feet. Fenestration includes 11 windows on the north elevation; eight windows, a roll-up steel door, and an entry door on the south elevation; three windows and two entry doors on the east elevation; five windows and two steel double doors on the west elevation. A concrete-masonry unit structure measuring approximately 20 by 15 feet and eight feet tall projects from the north end of the west elevation. It features a corrugated steel, slanted shed roof and a set of double doors constructed from corrugated steel on its south elevation. Cast-in lifting point covers are featured in the upper exterior walls. Windows and vents are covered with security bars. The property features steel fencing that encloses the parking lot adjacent to the building's east west elevations.

BUILDING, STRUCTURE, AND OBJECT RECORD

B1. Historic Name: Hollywood Clothes - Charles Lyons Suit Plant
B2. Common Name: Pacific Title Archives
B3. Original Use: Industrial B4. Present Use: Commercial
***B5. Architectural Style:** Mid-Century Modern (Mid-Century Industrial)
***B6. Construction History:** (Construction date, alterations, and date of alterations)
The building's construction was completed in 1956 (LAM 7 September 1956:28). Minimal alterations have been made to the exterior of the building since its construction.
***B7. Moved?** ☑**No** ☐**Yes** ☐**Unknown** **Date:** N/A **Original Location:** N/A
***B8. Related Features:** None
B9a. Architect: Donald R. Warren Co. b. Builder: Chotiner & Gumbiner

***B10. Significance: NRHP Evaluation.** Criterion 1: The Hollywood Clothes business existed within the Great Depression and the post-World War II expansion years of the 1950s. It was established at its original location in the Garment District at the end of the 1920s, during a period of expansion for this industry, and remained viable through the Great Depression. It was notable for ending its union affiliation during an era when many unions were expanding. Although the early era of Hollywood Clothes is interesting, there is no physical connection between the project site and 1920s expansion of clothing manufacturers or the Great Depression. It therefore cannot be significantly associated with events from that time. Its expansion during the 1950s was typical of local clothing manufacturers' tendency to modernize and emphasize wholesale trade. Research has not revealed any evidence to suggest that the project site represents a significant contribution to this expansion. Therefore, it is not significantly associated with events that have made a contribution to the broad patterns of the area, California, or the U.S. and is recommended not eligible for listing on the California Register under Criterion 1. Criterion 2: The building was designed by a well-known engineer, Donald R. Warren. Warren designed many more substantial and/or elaborate structures such as dams and bridges. A simple, small, utilitarian, tilt-up industrial building, a type of building which was very commonly constructed at the time, is not a unique or exceptional example of the work for which he was known. Charles Lyons, the owner of Hollywood Clothes, was a successful local businessman, but there is no evidence that he made important contributions within any historical contexts explored here. No other notable individuals were associated with the building. Therefore, the project site is recommended not eligible for listing on the California Register under Criterion 2. Criterion 3: This building was designed and built using a ubiquitous and utilitarian Mid-Century Modern style commonly utilized in industrial buildings of the period. Therefore, the building does not embody the distinctive characteristics of a type, period, region, or method of construction and it is recommended not eligible for listing on the California Register under Criterion 3. Criterion 4: This building has been thoroughly assessed during this study and has not and is not likely to yield information important to prehistory or history. The project site therefore is recommended not eligible for listing to the California Register under Criterion 4. Based on these results, the project site and its historic-period building are recommended not eligible under any of the four California Register criteria for listing and are, therefore, not considered historical resources under CEQA.

Theme: Post-War development of Los Angeles, California.
Area: Los Angeles, California **Period of Significance:** 1945 to 1970
Property Type: HP8. Industrial Building **Applicable Criteria:** N/A

***B10.** (continued from page 2)
Los Angeles. Modern-day Los Angeles began as a farming community named “El Pueblo de Nuestra Señora la Reina de los Ángeles de Porciúncula,” often referred to as Pueblo de Los Angeles. It was founded in 1781 as one of two Spanish pueblos in the state and was initially intended to support local garrisons. After Mexico gained independence from Spain in 1821, Los Angeles came under Mexican control. This period saw secularization of missions in 1833 and expansion of the rancho system. The ranchos were devoted primarily to cattle and sheep ranching, and established land-use patterns that would influence California's development for generations. In 1835, Los Angeles officially became a city under the Mexican government. The community remained relatively small and isolated, with social and economic life revolving around the expansive ranchos. In spite of its small size, the pueblo served as the principal urban center of southern Alta California during this period. During the Mexican American War, American forces invaded and occupied the city, though Californio resistance led to several months of conflict. The Treaty of Cahuenga was signed on January 13, 1847, formally ending armed resistance. The Treaty of Guadalupe Hidalgo in February 1848 officially ended the war and transferred California to the U.S.

The California Gold Rush of 1848 to 1855 brought massive population growth to the state, leading to California's admission to the Union as the 31st state on September 9, 1850. The arrival of the railroad marked another turning point for Los Angeles. The Los Angeles and San Pedro Railroad was completed in 1869, providing the first rail connection between the city and its harbor, which was crucial for economic development. In 1876, the Southern Pacific Railroad connected Los Angeles to San Francisco and the eastern United States, though this required a $600,000 subsidy from the city. The 1880s marked the beginning of Los Angeles' transformation into a major American city. The region received an influx of settlers with the connection of the Southern Pacific Railroad to the Atchison, Topeka, and Santa Fe Railway and the Texas and Pacific Railway in 1881. The arrival of the Santa Fe Railroad in 1885 created direct transcontinental competition with the Southern Pacific, leading to a dramatic rate war that saw passenger fares drop from $125 to as low as $1 for a ticket from Kansas City to Los Angeles. This triggered one of the most significant population booms in American history, and between 1880 and 1890 Los Angeles’ population increased from 11,200 to 50,400. In addition to the railroad competition, the boom was fueled by agricultural expansion and extensive advertising campaigns that promoted Southern California's Mediterranean climate and opportunities (Lavender 1972). In the 1890s major oil discoveries made the region one of the largest oil-producing areas in the country, while the development of refrigerated railroad cars enabled the citrus industry to flourish. Los Angeles also became a major tourist destination during this period, with the establishment of new transportation networks and hotels.

During the early 1900s, agriculture, oil, and real estate represented the dominant regional economic forces. Various economic and geographic factors converged allowing the motion picture industry to gain a foothold in Los Angeles after World War I, with Hollywood at the center. By the 1920s, more than 70 studios (80 percent of the global market) operated in Los Angeles and the industry has remained dominant there ever since. Like much of the U.S., 1920s Los Angeles experienced booming economic expansion as existing industries grew and new ones were founded. Eventually, profits ballooned disproportionately to wages and by the end of the decade businesses produced more goods than could be purchased by a growing working class. The stock market crash of 1929 punctuated a severe economic contraction known as the Great Depression of the 1930s. Economic indicators from the era show that California’s farm income shrank by 50 percent between 1929 and 1932, and by 1933 building permits had contracted to $1/9^{th}$ of the 1925 total. In 1932 unemployment reached 28 percent, and in 1934 20 percent of Californians relied on financial assistance from the government. Politicians were initially optimistic about a speedy economic recovery and public assistance was slow to develop.

Eventually, California developed emergency relief programs, including funding for the unemployed, and worker training and housing. The federal government also developed various worker programs and supports that were locally instrumental in recovery, and enacted Social Security to assist individuals with disabilities, people without jobs, and the elderly. Unions became increasingly popular for instituting some stability for workers. Through these developments improvements began to take shape and by World War II industries with foundations in government assistance such as aerospace and defense helped to re-establish economic growth in Los Angeles. The city became a key player in the Allied strategy, with companies like Hughes Aircraft, Lockheed, Douglas, and Northrop expanding rapidly to meet wartime demands. During the height of the war Lockheed employed ninety thousand people in the Los Angeles area and combined aerospace manufacturers produced about 300,000 airplanes. By the end of World War II, Los Angles and other parts of California were facing a peacetime economy with the threat of widespread business mortality. However, the post-war period brought unprecedented suburban, commercial, and industrial expansion, enabled by the GI Bill's loan guarantees for returning veterans (Rolle 1978). During this time, production homebuilders created massive suburban developments, and the city's population grew rapidly, in turn producing a workforce for burgeoning commercial and industrial business. The development of the freeway system facilitated a sprawling growth pattern, creating the automobile-oriented landscape that has become synonymous with Los Angeles since World War II. The population of Los Angeles County grew from about 170,000 in 1900 to 7,000,000 in 1964, and over 10 million today, representing a quarter of California's population (Continued on page 5).

***B10.** (continued from page 5)

Clothing Manufacturing in Los Angeles. Los Angeles' clothing manufacturing industry was pioneered during the late 19th century by Morris Cohn & Company who manufactured men's overalls. As demand for their products grew, the company expanded and in 1909 moved to a new factory building on 12th Street in Los Angeles, which eventually became the center of Los Angeles' Garment District. Over the next decade, other clothing manufacturers began to set up shop and the ensuing development of Los Angeles' port and highway infrastructure made the area doubly attractive to the industry. In 1921, 130 garment factories and their associates formed the Associated Apparel Manufacturers of Los Angeles to centralize industry guidelines. The industry was initially set up to serve the growing southern California market but as Hollywood's influence globalized, Los Angeles became a highly publicized hub for media and consequently became a fashion epicenter. The Garment District proximity to studios blurred the line between costume and fashion, and custom clothing became a diversified concern, developing markets for fine clothing, sportswear, costumes, and swimwear. During World War II the industry again diversified to provide unforms to the military. These factors combined to create an expansive and vibrant clothing manufacturing industry, all centered in Los Angeles' Garment District. In the 1950s and 1960s, the manufactures from the garment industry became more closely connected with retailers, and modernized factories and wholesale trade began to dominate the market. As local labor laws became stricter and wages continued to grow, competition from countries with less business impediments took its toll on the local clothing industry in the 1970s and 1980s. Although one researcher has asserted that over 45,000 garment makers were still working in the City's manufacturing sector in 2020, much of the labor formerly supplied by the Los Angeles industry has moved to places like China, Mexico, Bangladesh, and Ethiopia.

Additional Research. Additional research was performed for the project site to provide the background for the historic-period building within its boundaries and the potential impact area surrounding it. According to an 1871 land grant, the project site was part of a property originally patented to Januario Abila, Louiza Garfias, Pedra Ramierz, and Francisca Rimpan. Research and fieldwork have not revealed any evidence that the early owners developed the project site, or that any physical evidence remains from that era, so personal histories of these individuals are not examined here. Los Angeles County Assessor records show that the project site at 4800 San Vicente Boulevard is occupied by a 22,706 square foot commercial/industrial building that was constructed in 1956. It was developed and operated under the direction of Charles Lyons, owner of Hollywood Clothes, Inc. Hollywood Clothes was a manufacturer of men's suits established by Mr. Lyons in the Los Angeles Garment District at 920 East 12th Street between 1929 and 1931. The business was initially 100 percent unionized but ended its affiliation with the Union of Amalgamated Clothing Workers of America in April of 1931 due to a dispute and walkout. In 1956 the company relocated to the project site at 4800 San Vicente to expand and modernize manufacturing and business operations. By 1961 Hollywood Clothes was also known as Charles Lyons Clothes. In 1965, the firm engaged the Koblitz Company to assist with marketing and began to advertise and ship to stores outside of Los Angeles on the west coast, in the south, and in the Midwest during the 1960s and 1970s. The business ceased operations in the early 1980s. Research did not reveal any other owners or businesses operating at the project site in the historic period. It was most recently occupied by Pacific Title Archives.

Original Hollywood Clothes Factory Location at East 12th Street.

***B10.** (continued from page 6)

Charles Lyons was born in Marshalltown, Iowa in 1886 and was living in Chicago, Illinois by the early 1920s. He and Chicago Resident Lillian Ogus were married in 1921. They had two daughters (Ruth and Louise) and moved to the Los Angeles area in the late 1920s, where their son Jerry was born in 1931. Charles worked as a clothing manufacturer, and by 1927 he was president of Shapiro Kenney, Inc. He established Hollywood Clothes at East 12th Street in the Garment District of Los Angeles between 1929 and 1931. Charles expanded the business and contracted with Donald R. Warren to design and construct the new factory on San Vicente (at the project site) in 1956. Lillian's occupation was listed as "housekeeper" in 1940 and their three children were raised at the family residence in Beverly Hills. Charles died in 1969 and Lillian died in 1978-about three years before Charles Lyons clothes disappeared from advertising records.

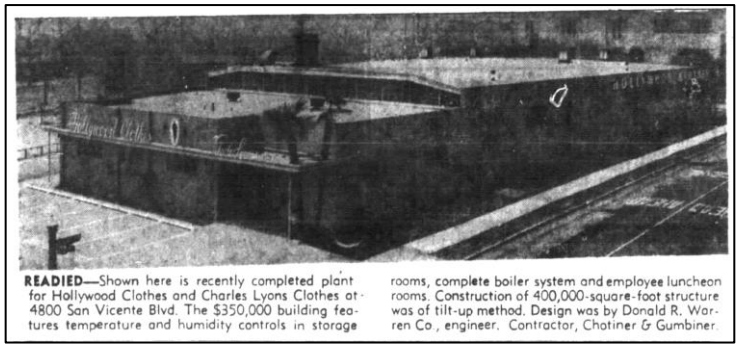

The building that occupies the project site at 4800 and 4802 San Vicente Boulevard is described in in detail in the Field Survey section below. It was designed by engineer Donald R. Warren. Mr. Warren owned and operated Donald R. Warren Company, consulting electrical engineers and designers based on Sunset Boulevard in Los Angeles. He was born in 1897 and worked as an engineer from the early to mid-20th century. He did participate in design and construction of several high-profile projects during his career, including the San Francisco-Oakland Bay Bridge, Los Angeles International Airport, the Roosevelt Fleet Navy Base, and Kaiser Steel's Fontana plant. As a tilt-up design, the project site was not one of the more notable designs that his firm worked on. Donald and his wife Lara lived in La Canada where they raised a son, Donald F. Warran. Donald R. Warren died in 1973.

The building that occupies the project site exhibits features consistent with an architectural style known as Mid-Century Industrial, a sub-type of the Mid-Century Modern style which was an outgrowth of International Style. Henry Russell Hitchcock and Phillip Johnson proposed the International Style in 1932, using it to reference buildings constructed as early as 1922 and through the 1930s primarily in France and Germany. Its popularity spread through the 1930s and 1940s to the UK, N. and S. America, Scandinavia, and Japan. In the 1950s and 1960s the style was nearly ubiquitous in the design of skyscrapers in the United States. In the 1970s and 1980s the International Style had gone out of fashion as formulaic, and it gave way to updated forms of design and decoration as well as building materials that became known as postmodern. Major architects that utilized the International Style included Richard Neutra and Philip Johnson in the United States, Walter Gropius and Ludwig Mies van der Rohe in Germany and the U.S., J.J.P. Oud in the Netherlands, and Le Corbusier in France. Characteristics include rectilinear forms with minimal decoration and ornament, open interior spaces, and use of cantilever construction intended to convey the illusion of weightlessness. Materials emphasize highly visible glass and steel and rely heavily on reinforced concrete that is usually less visible (Zelazko 2024). The term Mid-Century Modern was coined by Cara Greenberg to denote a style which included graphic design, interior design, architecture, and industrial design (Appalachian State University 2025). Today, it is most commonly used to refer to architecture that was designed between 1930 and 1970. In terms of architecture, some of the important hallmarks of the style include: simple designs; emphasis on function; strong horizontal and vertical lines; geometric shapes; large windows.

BEING BUILT—Shown above is new industrial plant now under construction at 4800 San Vicente Blvd. for Hollywood Clothes. Building contains 30,000 square feet of space and will cost, including land, approximately $300,000. Among the features is a complete boiler system for operation of steam pressing section. Project was designed by Donald R. Warren Co., engineers. Contractor is Chotiner & Gumbiner.

Hollywood Clothes Under Construction, 1956

READIED—Shown here is recently completed plant for Hollywood Clothes and Charles Lyons Clothes at 4800 San Vicente Blvd. The $350,000 building features temperature and humidity controls in storage rooms, complete boiler system and employee luncheon rooms. Construction of 400,000-square-foot structure was of tilt-up method. Design was by Donald R. Warren Co., engineer. Contractor, Chotiner & Gumbiner.

Newly Built Hollywood Clothes Factory at Project Site, 1956 (Please note: Square Foot Estimate is not Accurate)

Re: Tribal Consultation Under CEQA, 4802 San Vicente Project, Los Angeles County

To Whom It May Concern:

Pursuant to your request, attached is a consultation list of tribes that are traditionally and culturally affiliated with the geographic area of the above-listed project. Additionally, a search of the Native American Heritage Commission (NAHC) Sacred Lands File (SLF) was completed based on the information submitted for the above referenced project. The results were negative. Be aware that tribes do not always record their sacred sites in the SLF, nor are they required to do so. As such, an SLF search is not a substitute for consultation with all tribes that are traditionally and culturally affiliated with a project's geographic area. Please contact all of the listed tribes as they may have information about sacred sites within the project area that is not listed with the NAHC.

Additionally, the NAHC recommends that agencies include with their notification letters, information regarding any cultural resources assessment that has been completed on the area of potential effect (APE), such as:

1. The results of any record search that may have been conducted at an Information Center of the California Historical Resources Information System (CHRIS), including, but not limited to:

- A listing of any and all known cultural resources that have already been recorded on or adjacent to the APE, such as known archaeological sites;
- Copies of any and all cultural resource records and study reports that may have been provided by the Information Center as part of the records search response;
- Whether the records search indicates a low, moderate, or high probability that unrecorded cultural resources are located in the APE; and
- If a survey is recommended by the Information Center to determine whether previously unrecorded cultural resources are present.

2. The results of any archaeological inventory survey that was conducted, including:

- Any report that may contain site forms, site significance, and suggested mitigation measures.

All information regarding site locations, Native American human remains, and associated funerary objects should be in a separate confidential addendum, and not be made available for public disclosure in accordance with Government Code section 6254.10.

3. The result of the Sacred Lands File check conducted through the Native American Heritage Commission.

4. Any ethnographic studies conducted for any area including all or part of the APE; and

5. Any geotechnical reports regarding all or part of the APE.

Lead agencies should be aware that records maintained by the NAHC and CHRIS are not exhaustive and a negative response to these searches does not preclude the existence of a tribal cultural resource. A tribe may be the only source of information regarding the existence of a tribal cultural resource, which is why consultation is vital.

This information will aid tribes in determining whether to request formal consultation. If consultation is requested, having the information beforehand will help to facilitate the process.

If you receive notification of a change of address or phone number from a tribe, please inform the NAHC. With your assistance, we can assure that our consultation list remains current.

If you have any questions or require additional information, please contact me at Andrew.Green@nahc.ca.gov.

Sincerely,

Andrew Green

Attn.: Mr. Joseph Hubbard

RE: **Geotechnical Engineering Investigation** – Proposed Self-Storage Facility – Located at 4800 S. San Vicente Boulevard, in the City of Los Angeles, California

Dear Mr. Hubbard:

Pursuant to your request, this firm has conducted a Geotechnical Engineering Investigation into the above-mentioned project in accordance with your approval of our proposal dated May 13, 2025. The purpose of this investigation is to evaluate the geotechnical conditions of the subject site and to provide recommendations for the proposed development. The scope of work included the following: 1) site reconnaissance; 2) subsurface geotechnical exploration and sampling; 3) laboratory testing; 4) soil infiltration testing; 5) engineering analysis of field and laboratory data; 6) preparation of a geotechnical engineering report. It is the opinion of this firm that the proposed development is feasible from a geotechnical standpoint provided that the recommendations presented in this report are followed in the design and construction of the project.

1.0 Project Description

It is proposed to construct a new five to six-story self-storage building as shown in Figure 1. Additional improvements will include new pavement areas, hardscape, and landscaping. Final building plans shall be reviewed by this firm prior to submittal for city approval to determine the need for any additional study and revised recommendations pertinent to the proposed development, if necessary.

2.0 Site Description

The subject property is situated within the 4800 block and south side of San Vicente Boulevard, bordered by Longwood Avenue to the west and Tremaine Avenue to the east, in the City of Los Angeles, as shown in Figure 2. The generally triangular shaped parcel is elongated in an east to west direction with the majority of the site occupied by a one-story warehouse building. Small asphalt parking lots are situated at the east and west ends of the site as shown in Figure 3

3.0 Site Exploration

The investigation consisted of the placement of five (5) subsurface exploratory borings by a truckmounted hollow stem auger to depths ranging between 5 and 35 feet below current ground elevations. The explorations were visually classified and logged by a field engineer with locations of the subsurface explorations shown on Figure 1 and 3. The exploratory borings revealed the existing earth materials to consist of fill and natural soil. Detailed descriptions of the subsurface conditions are listed on the boring logs in Appendix A. It should be noted that the transition from one soil type to another as shown on the boring logs is approximate and may in fact be a gradual transition. The soils encountered are described as follows:

Fill: A fill soil classified as a brown, silty CLAY with occasional gravel was encountered across the site to a depth of 1 to 2 feet below ground surface. The fill soil was noted to be medium stiff and moist. The existing pavement section encountered in our exploratory borings consisted of approximately 2½ to 4 inches of asphalt over compacted fill soils, no base material was noted.

Natural: An undisturbed native soil classified as a dark brown to brown, silty CLAY with some sand was encountered directly beneath the fill soils. The native soil was observed to be medium stiff and moist to very moist. A fine to coarse grained silty SAND noted to be dense and damp to moist was encountered at 8 to 15 feet below ground surface.

Groundwater: Groundwater was not encountered to the depth of our bores (35 feet below ground surface). Historic high groundwater in the vicinity has been recorded near 20 feet, as shown on the Seismic Hazard Zone Report for the Hollywood 7.5- Minute Quadrangle (Figure 4).

4.0 Laboratory Tests

Relatively undisturbed samples of the subsurface soils were obtained to perform laboratory testing and analysis for direct shear, consolidation tests, and to determine in-place moisture/densities. These relatively undisturbed ring samples were obtained by driving a thin-walled steel sampler lined with one-inch-long brass rings with an inside diameter of 2.42 inches into the undisturbed soils. Bulk bag samples were obtained in the upper soils for expansion index tests and maximum density tests. All test results are included in Appendix B, unless otherwise noted.

4.1 **Field Moisture Content** (ASTM: D 2216) and the dry density of the ring samples were determined in the laboratory. This data is listed on the logs of explorations.

4.2 **Maximum Density tests** (ASTM: D 1557) were performed on typical samples of the upper soils. Results of these tests are shown on Table I.

4.3 **Expansion Index tests** (ASTM: D 4829) were performed on remolded samples of the upper soils to determine expansive characteristics. Results of these tests are provided on Table II.

4.4 **Atterberg Limits** (ASTM: D 4318) consisting of liquid limit, plastic limit and plasticity index were performed on representative soil samples. Results are shown on Table III.

4.5 **Corrosion tests** consisting of sulfate, pH, resistivity and chloride analysis to determine potential corrosive effects of soils on concrete and underground utilities. Test results are provided on Table IV.

4.6 **R-Value test** per California Test Method 301 was performed on a representative sample, which may be anticipated to be near subgrade to determine pavement design. Results are provided within the pavement design section of the report.

4.7 **Direct Shear tests** (ASTM: D 3080) were performed on undisturbed and/or remolded samples of the subsurface soils. The test is performed under saturated conditions at loads of 1,000 lbs./sq.ft., 2,000 lbs./sq.ft., and 3,000 lbs./sq.ft. with results shown on Plate A.

4.8 **Consolidation tests** (ASTM: D 2435) were performed on undisturbed samples to determine the differential and total settlement which may be anticipated based upon the proposed loads. Water was added to the samples at a surcharge of one KSF and the settlement curves are plotted on Plates B to F.

5.0 Seismicity Evaluation

The proposed development lies outside of any Alquist Priolo Special Studies Zone and the potential for damage due to direct fault rupture is considered unlikely. The Newport-Inglewood fault is located approximately 3.6 kilometers from the site and is capable of producing a Magnitude 7.1 earthquake. Ground shaking originating from earthquakes along other active faults in the region is expected to induce lower horizontal accelerations due to smaller anticipated earthquakes and/or greater distances to other faults.

The seismic design acceleration parameters for the project site are provided on the following page and are based upon the 2022 California Building Code (CBC) Standard ASCE/SEI 7-16. The data was obtained from the American Society of Civil Engineers (ASCE) website, https://asce7hazardtool.online/. The seismic design report is attached in Appendix C.

Seismic Design Acceleration Parameters

Latitude	34.048
Longitude	-118.341
Site Class	D
Risk Category	II
Mapped Spectral Response Acceleration	S_S = 1.991 S_1 = 0.707
Adjusted Maximum Acceleration	S_{MS} = 1.991
Design Spectral Response Acceleration Parameters	S_{DS} = 1.327
Peak Ground Acceleration	PGA_M = 0.936

Use of these values is dependent on requirements of Section 11-4.8, ASCE 7 exception 2 that requires the value of the seismic response coefficient C_s be determined by Equation 12.8.2 for values of $T \leq 1.5T_s$ and taken as equal to 1.5 times the value computed in accordance with either 12.8-3 for $T_L \geq T \geq 1.5T_s$ or Equation 12.8-4 for $T > T_L$. Computations and verification of these conditions is referred to the structural engineer.

6.0 Liquefaction Evaluation

The site is expected to experience ground shaking and earthquake activity that is typical of the Southern California area. It is during severe shaking that loose, granular soils below the groundwater table can liquefy. Based upon information on the ZIMAS website and the California Division of Mines and Geology "Seismic Hazard Zone Map – Hollywood Quadrangle" dated March 25, 1999, the subject site is *not* situated within an area of historic occurrence of liquefaction, or local geological, geotechnical and groundwater conditions to indicate a potential for permanent ground displacement. Therefore, the design of the proposed development in conformance with the latest Building Code provisions for earthquake design is expected to provide mitigation of ground shaking hazards that are typical to Southern California. A copy of the ZIMAS report and the Seismic Hazard Zone Map –Hollywood Quadrangle is attached in Appendix C.

7.0 Infiltration Characteristics

Infiltration tests within the site were performed to provide preliminary infiltration rates for the purpose of planning and design of an on-site water disposal system field testing per County of Los Angeles Department of Public Works (LADPW) – Guidelines for Geotechnical Investigation and Reporting Low Impact Development Stormwater Infiltration dated June 20, 2017.

A truck mounted Simco 2800 Drill Rig equipped with a hollow stem auger was used to excavate exploratory boring B-1 (located on the west side of site) to a depth of 5 feet below existing ground surface and exploratory borings B-2 and B-3 (located on the east and west sides of site) to depths of 20 feet below existing ground surface. The borings consisted of six-inch diameter test holes. A three-inch diameter perforated PVC casing with solid end cap was installed in the borings and then surrounded with gravel materials to prevent caving. The infiltration holes were carefully filled with clean water and refilled after two initial readings. Based upon the initial rates of infiltration at each location, test measurements were measured at selected maximum intervals thereafter. Measurements were obtained by using an electronic tape measure with 1/16-inch divisions and timed with a stopwatch. Field data sheets are provided in Appendix D.

Based upon the results of our testing, the soils encountered in the planned on-site drainage disposal system area exhibit field infiltration rates found on the following page. The drainage disposal system shall utilize design infiltration rates based on the safety factor required by the city/county standard.

Boring/Test No.	Depth	Soil Classification	Field Infiltration Rate
B-1/TH-1	5'	Silty CLAY	0.20 in/hr
B-2/TH-2	20'	Clayey SILT	0.16 in/hr
B-3/TH-3	20'	Silty SAND	18.0 in/hr

As previously discussed, groundwater was not encountered to the depth of our bores (35 feet below ground surface). Historic high groundwater in the vicinity has been recorded near 20 feet, as shown on the Seismic Hazard Zone Report for the Hollywood 7.5- Minute Quadrangle (Figure 4).

All systems must meet the latest city and/or county specifications and the California Regional Water Quality Control Board (CRWQCB) requirements. It is recommended that foundations be setback a minimum distance of 10 feet from the drainage disposal system and the bottom of footing shall be a minimum of 10 feet from the expected zone of saturation. The boundary of the zone of saturation may be assumed to project downward from the top of the permeable portion of the disposal system at an inclination of 1 to 1 or flatter, as determined by the geotechnical engineer.

8.0 Conclusions and Recommendations

Based upon our evaluations, the proposed development is acceptable from a geotechnical engineering standpoint. By following the recommendations and guidelines set forth in our report, the structures will be safe from excessive settlements under the anticipated design loadings and conditions. The proposed development shall meet all requirements of the City Building Ordinance and will not impose any adverse effect on existing adjacent structures.

The following recommendations are based upon soil conditions encountered in our field investigation; these near-surface soil conditions could vary across the site. Variations in the soil conditions may not become evident until the commencement of grading operations for the proposed development and revised recommendations from the soils engineer may be necessary based upon the conditions encountered. It is recommended that site inspections be performed by a representative of this firm during all grading and construction of the development to verify the findings and recommendations documented in this report. Any unusual conditions which may be encountered in the course of the project development may require the need for additional study and revised recommendations.

8.1 **Site Grading Recommendations**

All vegetation and demolition debris shall be removed and hauled prior to the start of grading operations. Existing vegetation shall not be mixed or disced into the soil. Any removed soils may be reutilized as compacted fill once any deleterious material or oversized materials (in excess of eight inches) is removed. Grading operations shall be performed in accordance with the attached "Specifications for Placement of Compacted Fill".

All disturbed soils and/or fill (about 1 to 2 feet below ground surface) shall be removed to competent native material, the exposed surface scarified to a depth of 12 inches, brought to within 2% of optimum moisture content and compacted to a minimum of 90% of the laboratory standard (ASTM: D 1557) prior to placement of any additional compacted fill soils, foundations, slabs-on-grade and pavement. Grading shall extend a minimum of five horizontal feet outside the edges of foundations or equidistant to the depth of fill placed, whichever is greater.

It is possible that isolated areas of undiscovered fill not described in this report are present on site; if found, these areas should be treated as discussed earlier. A diligent search shall also be conducted during grading operations to uncover any underground structures, irrigation, or utility lines. If encountered, these structures and lines shall be either removed or properly abandoned prior to the proposed construction.

Any imported fill material should preferably be soil similar to the upper soils encountered at the subject site. All soil shall be approved by this firm prior to importing at the site and will be subjected to additional laboratory testing to assure concurrence with the recommendations stated in this report. If placement of slabs-on-grade and pavement is not completed immediately upon completion of grading operations, additional testing and grading of the areas may be necessary prior to continuation of construction operations. Likewise, if adverse weather conditions occur which may damage the subgrade soils, additional assessment by the soils engineer as to the suitability of the supporting soils may be needed.

Care should be taken to always provide or maintain adequate lateral support for all adjacent improvements and structures during the grading operations and construction phase. Adequate drainage away from the structures, pavement and slopes should be always provided.

8.1.2 **Fill Blanket Recommendations**

Due to the potential for differential settlements, it is recommended that all foundations be underlain by a uniform compacted fill blanket at least three feet in thickness. This fill blanket shall extend a minimum of five horizontal feet outside the edges of foundations or equidistant to the depth of fill placed, whichever is greater, where possible.

8.2 **Temporary Excavations**

Temporary *unsurcharged* excavations in the existing site materials may be made at vertical inclinations up to 4 feet in height unless cohesionless soils are encountered. In areas where soils with little or no binder are encountered, where adverse geological conditions are exposed, or where excavations are adjacent to existing structures, shoring or flatter excavations may be required. *Site specific recommendations required during grading may be provided once foundation plans and typical detail sections are made available.*

The temporary cut slope gradients given above do not preclude local raveling and sloughing. All excavations shall be made in accordance with the requirements of the soils engineer, CAL-OSHA and other public agencies having jurisdiction. Care should be taken to always provide or maintain adequate lateral support for all adjacent improvements and structures during the grading operations and construction phase.

8.3 **Foundation Design**

As stated in Section 8.1.2, foundations shall be underlain by a uniform compacted fill blanket at least three feet in thickness. New foundations may be designed utilizing the following allowable bearing capacities for an embedded depth of 30 inches into approved engineered fill with the corresponding widths:

Allowable Bearing Capacity (psf)		
Width (feet)	Continuous Foundation	Isolated Foundation
1.5	2000	2500
2.0	2075	2575
4.0	2375	2875
6.0	2500	3000

The bearing value may be increased by 500 psf for each additional foot of depth in excess of the 30-inch minimum depth, up to a maximum of 4,000 psf. A one-third increase may be used when considering short-term loading and seismic forces. Any foundations located along property line where a fill blanket is installed below foundations but lateral overexcavation is not possible may utilize an allowable bearing capacity of 1,500 psf. Foundations shall be reinforced with a minimum of two No. 4 bars, top and bottom. Additional reinforcement due to proposed loadings may be necessary and shall be determined by the project engineers and/or architect. A representative of this firm shall inspect all foundation excavations prior to pouring concrete.

8.4 **Settlement Analysis**

Resultant pressure curves for the consolidation tests are shown on Plates B to F. Computations utilizing these curves and the recommended allowable soil bearing capacities reveal that the foundations will experience settlements on the order of ¾ inch and differential settlements of less than ¼ inch.

8.5 **Lateral Resistance**

The following values may be utilized in resisting lateral loads imposed on the structure. Requirements of the California Building Code should be adhered to when the coefficient of friction and passive pressures are combined.

Coefficient of Friction - 0.35

Equivalent Passive Fluid Pressure = 200 lbs./cu.ft.

Maximum Passive Pressure = 2,000 lbs./cu.ft.

The passive pressure recommendations are valid only for approved compacted fill soils or competent native materials.

8.6 **Retaining Wall Design Parameters**

Active earth pressures against retaining walls will be equal to the pressures developed by the following fluid densities. These values are for **granular backfill material** placed behind the walls at various ground slopes above the walls.

Surface Slope of Retained Materials (Horizontal to Vertical	Equivalent Fluid Density (lb./cu.ft.)
Level	30
5 to 1	35
4 to 1	38
3 to 1	40
2 to 1	45

Any applicable short-term construction surcharges and seismic forces should be added to the above lateral pressure values. An equivalent fluid pressure of 45 pcf may be utilized for the restrained wall condition with a level grade behind the wall.

The seismic-induced lateral soil pressure for walls greater than 6 feet may be computed using a triangular pressure distribution with the maximum value at the top of the wall. The maximum lateral pressure of (14 pcf) H where H is the height of the retained soils above the wall footing should be used in final design of retaining walls. Sliding resistance values and passive fluid pressure values may be increased by 1/3 during short-term wind and seismic loading conditions.

All walls shall be waterproofed as needed and protected from hydrostatic pressure by a reliable permanent subdrain system. The subsurface drainage system shall consist of a four-inch diameter perforated PVC pipe encased with gravel and wrapped with filter fabric. The granular backfill to be utilized immediately adjacent to retaining walls shall consist of an approved select granular soil with a sand equivalency greater than 30. This backfill zone of free draining material shall consist of a wedge beginning a minimum of one horizontal foot from the base of the wall extending upward at an inclination of no less than ¾ to 1 (horizontal to vertical).

8.7 **Slab Design**

All non-vehicular concrete slabs shall be a minimum of five inches in thickness reinforced a minimum of No. 4 bars, spaced 16 inches in each direction and placed on approved subgrade soils (>90% relative compaction). *Due to the expansive nature of the upper onsite soils, subgrade soils shall be moisture conditioned 3% over optimum moisture levels in the upper eighteen inches immediately prior to pouring concrete.* A modulus of subgrade reaction of 100 pci shall be used in the design of the new structure. Additional reinforcement requirements and an increase in thickness of the slabs-on-grade may be necessary based upon soils expansion potential and proposed loading conditions in the structures and should be evaluated further by the project engineers and/or architect.

A vapor retarder (10-mil minimum thickness) should be utilized in areas which would be sensitive to the infiltration of moisture. This retarder shall meet requirements of ASTM E 96, *Water Vapor Transmission of Materials* and ASTM E 1745, *Standard Specification for Water Vapor Retarders used in Contact with Soil or Granular Fill Under Concrete Slabs.*

The vapor retarder shall be installed in accordance with procedures stated in ASTM E 1643, *Standard practice for Installation of Water Vapor Retarders used in Contact with Earth or Granular Fill Under Concrete Slabs.* The moisture retarder may be placed directly upon compacted subgrade soils conditioned to near optimum moisture levels, although one to two inches of sand beneath the membrane is desirable. The subgrade upon which the retarder is placed shall be smooth and free of rocks, gravel or other protrusions which may damage the retarder. Use of sand above the retarder is under the purview of the structural engineer; if sand is used over the retarder, it should be placed in a dry condition.

8.8 Pavement Section Design

The table below provides a preliminary pavement design based upon an R-Value of 5 for the subgrade soils for the proposed pavement areas. Final pavement design may need to be based on R-Value testing of the subgrade soils near the conclusion of site grading to ensure that these soils are consistent with those assumed in this preliminary design. *The recommendations are based upon estimated traffic loads. Client should submit any other anticipated traffic loadings to the geotechnical engineer, if necessary, so that pavement sections may be reviewed to determine adequacy to support the proposed loadings.*

Type of Traffic	Traffic Index	Asphalt (in.)	Base Material (in.)
Automobile Parking Stalls	4.0	4.0	8.0
Light Vehicle Circulation Areas	6.0	4.5	11.0
Heavy Truck Access	7.0	5.0	14.5

All pavement areas shall have positive drainage toward an approved outlet from the site. Drain lines behind curbs and/or adjacent to landscape areas should be considered by the client and the appropriate design engineers to prevent water from infiltrating beneath pavement. If such infiltration occurs, damage to pavement, curbs and flow lines, especially on sites with expansive soils, may occur during the life of the project.

Any approved base material shall consist of a Class II aggregate or equivalent and should be compacted to a minimum of 95% relative compaction. All pavement materials shall conform to the requirements set forth by the City of Los Angeles. The base material: and asphaltic concrete should be tested prior to delivery to the site and during placement to determine conformance with the project specifications. A pavement engineer shall designate the specific asphalt mix design to meet the required project specifications.

8.9 **Utility Trench and Excavation Backfill**

Trenches from installation of utility lines and other excavations may be backfilled with on-site soils or approved imported soils compacted to a minimum of 90% relative compaction. All utility lines shall be properly bedded with clean sand having a sand equivalency rating of 30 or more. This bedding material shall be thoroughly water jetted around the pipe structure prior to placement of compacted backfill soils.

8.10 **Corrosion Design Criteria**

Representative samples of the surficial soils, typical of the subgrade soils expected to be encountered within foundation excavations and underground utilities were tested for corrosion potential. The minimum resistivity value obtained for the samples tested is representative of an environment that may be severely corrosive to metals. The soil pH value was considered mildly alkaline and may not have a significant effect on soil corrosivity. Consideration should be given to corrosion protection systems for buried metal such as protective coatings, wrappings or the use of PVC where permitted by local building codes.

According to Table 4.3.1 of ACI 318 Building Code and Commentary, these contents revealed negligible sulfate concentrations. Therefore, a Type II cement according to latest CBC specifications may be utilized for building foundations at this time. It is recommended that additional sulfate tests be performed at the completion of site grading to assure that the as graded conditions are consistent with the recommendations stated in this design. Corrosion test results may be found on the attached Table IV.

8.11 **Expansive Soil**

The on-site soils are moderate in expansion potential (EI 51-90). When soils have an expansion index (EI) of 20 or more, special attention should be given to the project design and maintenance. The attached *Expansive Soil Guidelines* should be reviewed by the engineers, architects, owner, maintenance personnel and other interested parties and considered during the design of the project and future property maintenance. Expansion test results may be found on the attached Table II.

Because the site is underlain by expansive soil, the following recommendation will be required. New foundations are to be a minimum of 30 inches in depth embedded into approved material and reinforced with a minimum of two No. 4 bars, top and bottom. All concrete slabs shall be a minimum of five inches in thickness and reinforced with a minimum of No. 4 bars, spaced 16-inches in each direction and placed on approved subgrade soils. Any new concrete slabs should be placed on approved subgrade soils with a relative compaction of 90% or greater and moisture conditioned to 3% above optimum moisture content to a depth of eighteen inches below finished subgrade elevations prior to pouring slabs.

In accordance with section 1804.4 of the current California Building Code (CBC), impervious surfaces within 10 feet of the building foundation shall be sloped not less than 2 percent away from the building. Existing drainage patterns that may be altered due to new development shall also be redesigned to provide a minimum 2% slope away from the residence. In addition, roof drains should be considered by the homeowner to divert water away from the residence to an approved discharge device.

9.0 Closure

The recommendations and conclusions contained in this report are based upon the soil conditions uncovered in our test excavations. No warranty of the soil condition between our excavations is implied. NorCal Engineering should be notified for possible further recommendations if unexpected to unfavorable conditions are encountered during construction phase. It is the responsibility of the owner to ensure that all information within this report is submitted to the Architect and appropriate Engineers for the project.

A preconstruction conference should be held between the developer, general contractor, grading contractor, city inspector, architect, and soil engineer to clarify any questions relating to the grading operations and subsequent construction. Our representative should be present during the grading operations and construction phase to certify that such recommendations are complied with within the field.

This geotechnical investigation has been conducted in a manner consistent with the level of care and skill exercised by members of our profession currently practicing under similar conditions in the Southern California area. No other warranty expressed or implied is made.

We appreciate this opportunity to be of service to you. If you have any further questions, please do not hesitate to contact the undersigned.

Respectfully submitted,

SPECIFICATIONS FOR PLACEMENT OF COMPACTED FILL

Excavation

Any existing low-density soils and/or saturated soils shall be removed to competent natural soil under the inspection of the Geotechnical Engineering Firm. After the exposed surface has been cleansed of debris and/or vegetation, it shall be scarified until it is uniform in consistency, brought to the proper moisture content and compacted to a minimum of 90% relative compaction (in accordance with ASTM: D 1557).

In any area where a transition between fill and native soil or between bedrock and soil are encountered, additional excavation beneath foundations and slabs will be necessary in order to provide uniform support and avoid differential settlement of the structure.

Material for Fill

The on-site soils or approved import soils may be utilized for the compacted fill provided they are free of any deleterious materials and shall not contain any rocks, brick, asphaltic concrete, concrete or other hard materials greater than eight inches in maximum dimensions. Any imported soil must be approved by the Geotechnical Engineering firm a minimum of 72 hours prior to importation of site.

Placement of Compacted Fill Soils

The approved fill soils shall be placed in layers not in excess of six inches in thickness. Each lift shall be uniform in thickness and thoroughly blended. The fill soils shall be brought to within 2% of the optimum moisture content, unless otherwise specified by the Soils Engineering firm. Each lift shall be compacted to a minimum of 90% relative compaction (in accordance with ASTM: D 1557) and approved prior to the placement of the next layer of soil. Compaction tests shall be obtained at the discretion of the Geotechnical Engineering firm but to a minimum of one test for every 500 cubic yards placed and/or for every 2 feet of compacted fill placed.

The minimum relative compaction shall be obtained in accordance with accepted methods in the construction industry. The final grade of the structural areas shall be in a dense and smooth condition prior to placement of slabs-on-grade or pavement areas. No fill soils shall be placed, spread or compacted during unfavorable weather conditions. When the grading is interrupted by heavy rains, compaction operations shall not be resumed until approved by the Geotechnical Engineering firm.

Grading Observations

The controlling governmental agencies should be notified prior to commencement of any grading operations. This firm recommends that the grading operations be conducted under the observation of a Geotechnical Engineering firm as deemed necessary. A 24-hour notice must be provided to this firm prior to the time of our initial inspection.

Observation shall include the clearing and grubbing operations to assure that all unsuitable materials have been properly removed; approve the exposed subgrade in areas to receive fill and in areas where excavation has resulted in the desired finished grade and designate areas of overexcavation; and perform field compaction tests to determine relative compaction achieved during fill placement. In addition, all foundation excavations shall be observed by the Geotechnical Engineering firm to confirm that appropriate bearing materials are present at the design grades and recommend any modifications to construct footings.

EXPANSIVE SOIL GUIDELINES

The following expansive soil guidelines are provided for your project. The intent of these guidelines is to inform you, the client, of the importance of proper design and maintenance of projects supported on expansive soils. ***You, as the owner or other interested party, should be warned that you have a duty to provide the information contained in the soil report including these guidelines to your design engineers, architects, landscapers and other design parties in order to enable them to provide a design that takes into consideration expansive soils.***

In addition, you should provide the soil report with these guidelines to any property manager, lessee, property purchaser or other interested party that will have or assume the responsibility of maintaining the development in the future.

Expansive soils are fine-grained silts and clays which are subject to swelling and contracting. The amount of this swelling and contracting is subject to the amount of fine-grained clay materials present in the soils and the amount of moisture either introduced or extracted from the soils. Expansive soils are divided into five categories ranging from "very low" to "very high". Expansion indices are assigned to each classification and are included in the laboratory testing section of this report. *If the expansion index of the soils on your site, as stated in this report, is 21 or higher, you have expansive soils.* The classifications of expansive soils are as follows:

Classification of Expansive Soil*

Expansion Index	Potential Expansion
0-20	Very Low
21-50	Low
51-90	Medium
91-130	High
Above 130	Very High

*From Table 18A-I-B of California Building Code (1988)

When expansive soils are compacted during site grading operations, care is taken to place the materials at or slightly above optimum moisture levels and perform proper compaction operations. Any subsequent excessive wetting and/or drying of expansive soils will cause the soil materials to expand and/or contract. These actions are likely to cause distress of foundations, structures, slabs-on-grade, sidewalks and pavement over the life of the structure. ***It is therefore imperative that even after construction of improvements, the moisture contents are maintained at relatively constant levels, allowing neither excessive wetting or drying of soils.***

Evidence of excessive wetting of expansive soils may be seen in concrete slabs, both interior and exterior. Slabs may lift at construction joints producing a trip hazard or may crack from the pressure of soil expansion. Wet clays in foundation areas may result in lifting of the structure causing difficulty in the opening and closing of doors and windows, as well as cracking in exterior and interior wall surfaces. In extreme wetting of soils to depth, settlement of the structure may eventually result. Excessive wetting of soils in landscape areas adjacent to concrete or asphaltic pavement areas may also result in expansion of soils beneath pavement and resultant distress to the pavement surface.

Excessive drying of expansive soils is initially evidenced by cracking in the surface of the soils due to contraction. Settlement of structures and on-grade slabs may also eventually result along with problems in the operation of doors and windows.

Projects located in areas of expansive clay soils will be subject to more movement and "hairline" cracking of walls and slabs than similar projects situated on non-expansive sandy soils. There are, however, measures that developers and property owners may take to reduce the amount of movement over the life the development. The following guidelines are provided to assist you in both design and maintenance of projects on expansive soils:

- Drainage away from structures and pavement is essential to prevent excessive wetting of expansive soils. Grades should be designed to the latest building code and maintained to allow flow of irrigation and rainwater to approved drainage devices or to the street. Any "ponding" of water adjacent to buildings, slabs and pavement after rains is evidence of poor drainage; the installation of drainage devices or regrading of the area may be required to assure proper drainage. The installation of rain gutters is also recommended to control the introduction of moisture next to buildings. Gutters should discharge into a drainage device or onto pavement which drains to roadways.

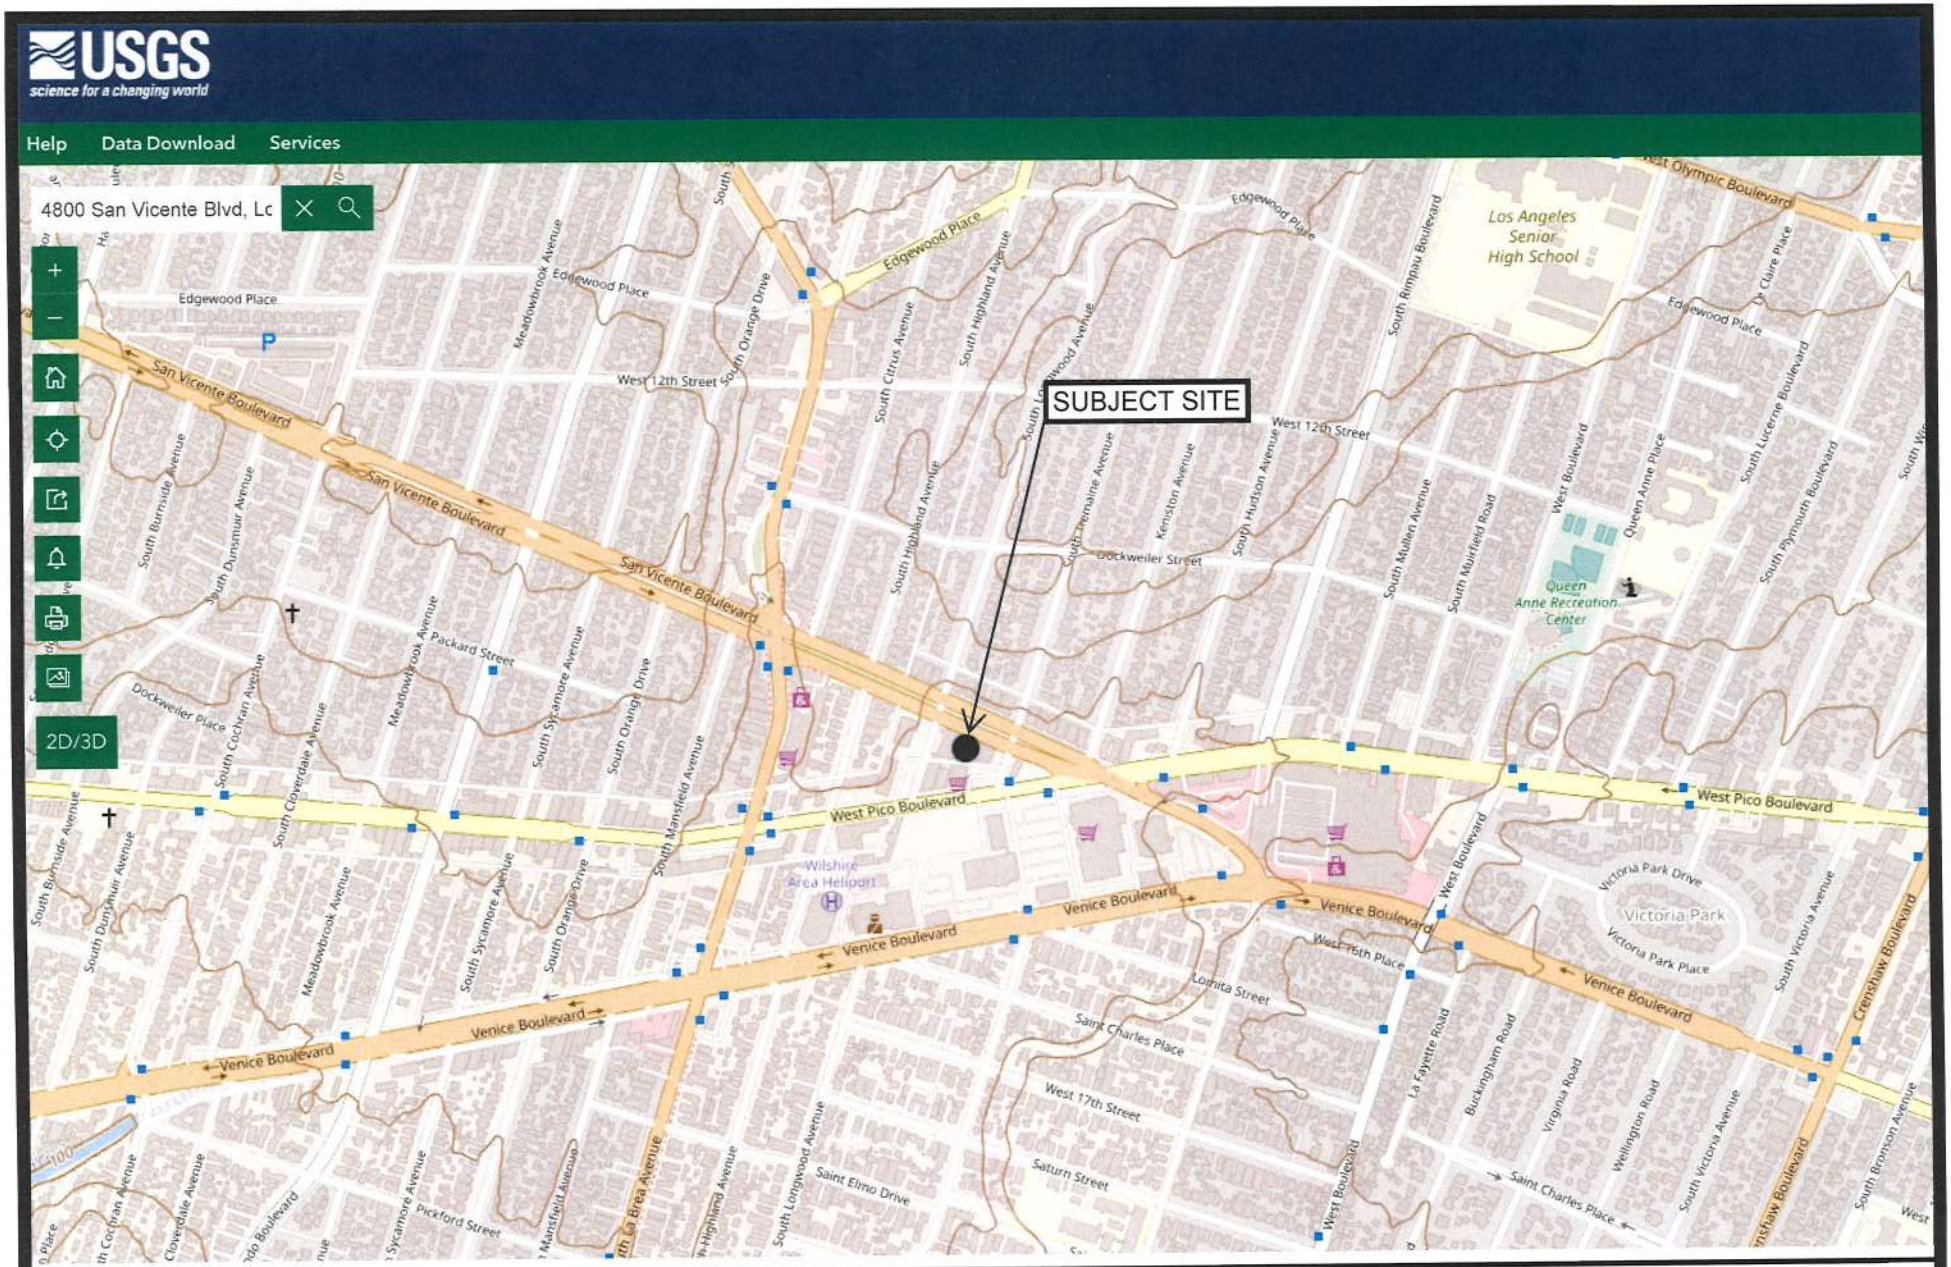

- Irrigation should be strictly controlled around building foundations, slabs and pavement and may need to be adjusted depending upon season. This control is essential to maintain a relatively uniform moisture content in the expansive soils and to prevent swelling and contracting. Over-watering adjacent to improvements may result in damage to those improvements. NorCal Engineering makes no specific recommendations regarding landscape irrigation schedules.

- Planting schemes for landscaping around structures and pavement should be analyzed carefully. Plants (including sod) requiring high amounts of water may result in excessive wetting of soils. Trees and large shrubs may actually extract moisture from the expansive soils, thus causing contraction of the fine-grained soils.

- Thickened edges on exterior slabs will assist in keeping excessive moisture from entering directly beneath the concrete. A six-inch thick or greater deepened edge on slabs may be considered. Underlying interior and exterior slabs with 6 to 12 inches or more of non-expansive soils and providing presaturation of the underlying clayey soils as recommended in the soil report will improve the overall performance of on-grade slabs.

- Increase the amount of steel reinforcing in concrete slabs, foundations and other structures to resist the forces of expansive soils. The precise amount of reinforcing should be determined by the appropriate design engineers and/or architects.

- Recommendations of the soil report should always be followed in the development of the project. Any recommendations regarding presaturation of the upper subgrade soils in slab areas should be performed in the field and verified by the Soil Engineer.

Earthquake Zones of Required Investigation
Hollywood Quadrangle

California Geological Survey

This Map Shows Both Alquist-Priolo Earthquake Fault Zones And Seismic Hazard Zones Issued For The Hollywood Quadrangle

This map shows the location of Alquist-Priolo (AP) Earthquake Fault Zones and Seismic Hazard Zones, collectively referred to here as Earthquake Zones of Required Investigation. The Geographic Information System (GIS) digital files of these regulatory zones released by the California Geological Survey (CGS) are the "Official Maps." GIS files are available at the CGS website http://maps.conservation.ca.gov/cgs/informationwarehouse/. These zones will assist cities and counties in fulfilling their responsibilities for protecting the public from the effects of surface fault rupture and earthquake-triggered ground failure as required by the AP Earthquake Fault Zoning Act (Public Resources Code Sections 2621-2630) and the Seismic Hazards Mapping Act (Public Resources Code Sections 2690-2699.6). For information regarding the general approach and recommended methods for preparing these zones, see CGS Special Publication 42, *Earthquake Fault Zones: a Guide for Government Agencies, Property Owners/Developers, and Geoscience Practitioners for Assessing Fault Rupture Hazards in California*, Appendix C, and CGS Special Publication 118, *Recommended Criteria for Delineating Seismic Hazard Zones in California*.

For information regarding the scope and recommended methods to be used in conducting required site investigations refer to CGS Special Publication 42, and CGS Special Publication 117A, *Guidelines for Evaluating and Mitigating Seismic Hazards in California*. For a general description of the AP and Seismic Hazards Mapping acts, the zonation programs, and related information, please refer to the website at www.conservation.ca.gov/cgs/.

MAP EXPLANATION

EARTHQUAKE FAULT ZONES

Earthquake Fault Zones
Zone boundaries are delineated by straight-line segments; the boundaries define the zone encompassing active faults that constitute a potential hazard to structures from surface faulting or fault creep such that avoidance as described in Public Resources Code Section 2621.5(a) would be required.

Active Fault Traces
Faults considered to have been active during Holocene time and to have potential for surface rupture. Solid Line in Black or Red where Accurately Located; Long Dash in Black or Solid Line in Purple where Approximately Located; Short Dash in Black or Solid Line in Orange where Inferred; Dotted Line in Black or Solid Line in Rose where Concealed; Query (?) indicates additional uncertainty. Evidence of historic offset indicated by year of earthquake-associated event or C for displacement caused by fault creep.

SEISMIC HAZARD ZONES

Liquefaction Zones
Areas where historical occurrence of liquefaction, or local geological, geotechnical and ground water conditions indicate a potential for permanent ground displacements such that mitigation as defined in Public Resources Code Section 2693(c) would be required.

Earthquake-Induced Landslide Zones
Areas where previous occurrence of landslide movement, or local topographic, geological, geotechnical and subsurface water conditions indicate a potential for permanent ground displacements such that mitigation as defined in Public Resources Code Section 2693(c) would be required.

OVERLAPPING ALQUIST-PRIOLO AND SEISMIC HAZARD ZONES

Overlap of Earthquake Fault Zone and Liquefaction Zone
Areas that are covered by both Earthquake Fault Zone and Liquefaction Zone.

Overlap of Earthquake Fault Zone and Earthquake-Induced Landslide Zone
Areas that are covered by both Earthquake Fault Zone and Earthquake-Induced Landslide Zone.

Note: Mitigation methods differ for each zone – AP Act only allows avoidance; Seismic Hazard Mapping Act allows mitigation by engineering/geotechnical design as well as avoidance.

Delineated in compliance with Chapter 7.8
Division 2 of the California Public Resources Code
(Seismic Hazards Mapping Act)

OFFICIAL MAP

Released: March 25, 1999

STATE GEOLOGIST

IMPORTANT

PLEASE NOTE THE FOLLOWING FOR ZONES SHOWN ON THIS MAP

1) This map may not show all faults that have the potential for surface fault rupture, either within the Earthquake Fault Zones or outside their boundaries. Additionally, this map may not show all areas that have the potential for liquefaction, landsliding, strong earthquake ground shaking or other earthquake and geologic hazards. Also, a single earthquake capable of causing liquefaction or triggering landslide failure will not uniformly affect the entire area zoned.

2) Boundaries of Earthquake Fault Zones, if included on this map, are based on interpreted Holocene-active fault traces.

3) The identification and location of those faults are based on the best available data. However, the quality of data used is varied. Traces have been depicted as accurately as possible at a map scale of 1:24,000.

4) Liquefaction zones may also contain areas susceptible to the effects of earthquake-induced landslides. This situation typically exists at or near the toes of existing landslides, downslope from rock fall or debris flow source areas, or adjacent to steep stream banks.

5) Landslide zones on this map were determined, in part, by adapting methods first developed by the U.S. Geological Survey (USGS). Landslide hazard maps prepared by the USGS typically use experimental approaches to assess earthquake-induced and other types of landslide hazards. Although aspects of these new methodologies may be incorporated in future CGS seismic hazard zone maps, USGS maps should not be used as substitutes for these Official SEISMIC HAZARD ZONES maps.

6) USGS base map standards provide that 90 percent of cultural features be located within 40 feet (horizontal accuracy) at the scale of this map. The identification and location of liquefaction and earthquake-induced landslide zones are based on available data. However, the quality of data used is varied. The zone boundaries depicted have been drawn as accurately as possible at this scale.

7) Information on this map is not sufficient to serve as a substitute for the geologic and geotechnical site investigations required under Chapters 7.5 and 7.8 of Division 2 of the California Public Resources Code.

8) Seismic Hazard Zones identified on this map may include developed land where delineated hazards have already been mitigated to city or county standards. Check with your local building/planning department for information regarding the location of such mitigated areas.

9) **DISCLAIMER:** The State of California and the Department of Conservation make no representations or warranties regarding the accuracy of the data from which these maps were derived. Neither the State nor the Department shall be liable under any circumstances for any direct, indirect, special, incidental or consequential damages with respect to any claim by any user or any third party on account of or arising from the use of this map.

Executive Summary

Hazard Management Consulting, Inc. (HMC) is pleased to submit this Environmental Site Assessment (ESA) for the Subject Property (Site) referenced above in Los Angeles, California (Site) (Figures 1 & 2). This ESA was prepared to evaluate the Site for potential Recognized Environmental Conditions (RECs) that may be present and was conducted as part of your due diligence efforts to acquire the Site. The Site measures approximately 0.7-acres and contains one commercial building occupied by Pacific Title Archives, an audio, film, and digital media storage and preservation facility.

Historical uses at the Site included a gas station in the late 1920's and residential in the late 1940's. The Site was first seen to have been developed with the warehouse that is present today in the late 1950's. Since this time the Site has been occupied by Hollywood Clothes Manufacturers (1958-1976) and Pacific Title Archives (1981-Present Day).

The Site is bound:

- to the north by San Vicente Boulevard across which are residential properties.
- on the east by South Tremaine Avenue across which is Jiffy Lube (4777 W Pico Blvd.).
- to the south by Western Kosher Supermarket - Pico Branch (4817 W Pico Blvd.), Mutt Film (4829 W Pico Blvd.), and an unlisted commercial building (4823 and 4831 W Pico Blvd.).
- to the west by South Longwood Avenue across which is Los Angeles Department of Water & Power Distributing Station 8 (4858 San Vicente Blvd.).

Key findings of this Phase I ESA are as follows:

- The was historically noted to be vacant until first listed to be occupied by a gas station in 1929. From at least 1948 to 1952, the Site was developed with two residential buildings. The Site was first seen to have been developed with the warehouse that is present today in the late 1950's. Since this time the Site has been occupied by Hollywood Clothes Manufacturers (1958-1976) and Pacific Title Archives (1981-Present Day). The former use of the Site as a gas station as well as uncertainty of the uses by Hollywood Clothes Manufacturers in Site information were considered RECs.

- The Site vicinity was observed with vacant land giving way to residential and commercial/industrial uses through much of the 20th century. Throughout the years, the area was developed primarily with residential uses to the north as well as commercial/ industrial developments to the south, as observed since the 1920's. The Site vicinity remains in these uses today.

- During the Site Reconnaissance, there were no RECs identified at the Site. There were no stains or evidence of spills at the Site. Chemical uses and storage include maintenance quantities of paint, household cleaners, and heptafluoropropane gas as a part of a fire suppression system for the humidity controlled vault.

- The EDR Radius Report as well as the City Directory records listed a gas station being present at the Site in 1929. HMC considers this to be a REC. Although it is likely that any tanks or soil contamination were removed during historic development, the possibility of these features remaining at the Site cannot be ruled out.

- According to the Sanborn and City Directory records, Hollywood Clothing Manufacturing occupied the Site for at least 20 years during the 1950's through the 1970's. Aside from records of their occupation, there no regulatory, disposal, or other records to provide insight into the operations conducted at this facility. Clothing manufacturers sometimes include dry cleaning operations as part of their process. Due to the lack of records, HMC considers this facility to be a REC and recommends additional investigation.

- Based on the review of the available regulatory information, the Site is located in an area with a history of industrial uses. Various facilities in the Site vicinity were indicated to currently or historically use hazardous chemicals. Additional investigation was performed for the Unocal 5843 gas and oil station as it was located immediately east of the Site, primarily for releases of petroleum hydrocarbons. This facility was closed in 1992 after it was destroyed during civil unrest during that time. The case file was indicated to have been closed with the City of Los Angeles and the RWQCB in 2014.

- The records in the Unocal case file state closure was granted with residual contamination left in place as additional investigation was deemed too dangerous due to methane and hydrogen sulfide concentrations. In our assessment, any

residual soil contamination would not likely pose a threat to the Site based on the cross and slightly down gradient orientation to the Site as well as the southwestern groundwater gradient. However, the indication that methane and hydrogen sulfide are present in the subsurface at this adjacent property and could be a vapor intrusion concern and prompts HMC to recommend investigation at the Site for these gases.

- Upon further investigation, adjacent or suspect facilities were found not to pose a risk based on lack of records for releases, their closure status, orientation to the Site, and/or the nature and extent of the release. We note that the Site is in the LA Methane Zone and there could be methane gas present as a regional condition.

- Given the finding this Phase I ESA, there is a moderate potential for a vapor intrusion condition at the Site.

- Suspect asbestos containing materials were observed at the Site in intact and damaged conditions.

- The Site has not been assessed as a likely source of PFAS contamination however certain types of clothing manufacturing may have used PFAS containing chemicals for stain resistance.

Conclusions

HMC has conducted a Phase I ESA Update for the Site located at 4800 San Vicente, Los Angeles, California 90019 in accordance with the ASTM E1527-21 guidelines. The findings and conclusion of HMC's investigation are as follows:

- REC – Former gas station facility in 1929.
- REC – Former clothing manufacturing facility in the 1950's through 1970's.
- REC – The Site's location in the Los Angeles Methane Zone. Potential for the presence of elevated methane and hydrogen sulfide in the subsurface.
- Non-Scope items included observations of suspect asbestos containing materials.

Recommendations

Based on the findings of this ESA, we recommend the following:

- Conduct a Phase II ESA for both soil and soil vapor analysis including methane. If the Site is planned for redevelopment, the City will require a methane survey as

well. If there are plans for redevelopment, the soil gas survey component of the Phase II can be designed to satisfy the Los Angeles Department of Building and Safety level methane survey protocols.

- Conduct an asbestos survey prior to demolition or any other activity that may disturb suspect materials.

PHASE I ENVIRONMENTAL SITE ASSESSMENT
4800 San Vicente Boulevard Los Angeles, California 90019

1. INTRODUCTION

Hazard Management Consulting, Inc. (HMC) is pleased to submit this Environmental Site Assessment (ESA) for the Subject Property (Site) referenced above in Los Angeles, California (Site) (Figures 1 & 2). This ESA was prepared to evaluate the Site for potential Recognized Environmental Conditions (RECs) that may be present and was conducted as part of your due diligence efforts to acquire the Site. The Site measures approximately 0.7-acres and contains one commercial building occupied by Pacific Title Archives, an audio, film, and digital media storage and preservation facility.

Historical uses at the Site included a gas station in the late 1920's and residential in the late 1940's. The Site was first seen to have been developed with the warehouse that is present today in the late 1950's. Since this time the Site has been occupied by Hollywood Clothes Manufacturers (1958-1976) and Pacific Title Archives (1981-Present Day).

The Site is located on the southwest corner of San Vicente Boulevard and South Tremaine Avenue. The Site is relatively flat with an elevation of approximately 140 feet above mean sea level (msl) and a regional slope to the west southwest.

1.1. Objective

In accordance with the ASTM E 1527-21 Standard Practice for Environmental Site Assessments, the objective of the ESA is to assess, to the extent feasible under the standard, the likelihood that Recognized Environmental Conditions (RECs), as defined by ASTM, are present at the Site.

A Recognized Environmental Condition "means (1) the presence of hazardous substances or petroleum products in, on, or at the Site due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Site due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Site under conditions that pose a material threat of a future release to the environment" (ASTM Standard Practice E1527-21). The term REC is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Performance of a Phase I ESA is intended to reduce,

but not eliminate, uncertainty regarding the potential for RECs in connection with a property, within reasonable limits of time and cost.

All Appropriate Inquires (AAI) as defined in the Final Rule (40 CFR, Part 312), must be conducted by persons seeking the landowner liability protections under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) prior to acquiring a property or seeking or receiving federal brownfields grants under the authorities of CERCLA. The purpose of AAI, as defined in the AAI Final Rule, is to identify releases and threatened releases of hazardous substances, which cause or threaten to cause the incurrence of response costs.

1.2. Scope of Services, Methodology and Limitations

The findings of this ESA must be viewed in recognition of certain limiting conditions. The scope of work commissioned for this project does not represent an exhaustive study, but rather a reasonable inquiry, consistent with good commercial practice, in general accordance with ASTM Practice E-1527-21.

The scope of work for this ESA included the following activities:

- A reconnaissance walk to document the current condition of the Site and neighboring facilities.
- Review of previously prepared reports for the Site.
- Review of a regulatory database report.
- Interviews with the current Owner and purchaser of the Site.
- Review of historical references including aerial photographs, city directories, Sanborn Maps and topographic maps.
- Online research and/or submission of public records requests (PRRs) concerning the Site and suspect sources in the Site vicinity at the State of California Department of Toxic Substances Control, State of California Regional Water Quality Control Board, Los Angeles County Fire Department, Los Angeles County Department of Public Works, Los Angeles Fire Department, Los Angeles County Building and Safety, and South Coast Air Quality Management District.
- Preparation of this report of findings.

In the course of this assessment, HMC has relied on information provided by outside parties, such as regulatory agencies, previous reports and interview sources. For the purpose of this assessment, such third-party information is assumed to be accurate unless

contradictory evidence is noted, and HMC does not express or imply any warranty regarding information provided by third-party sources.

2. SITE DESCRIPTION

2.1. Site Setting

The Site measures approximately 0.7-acres and contains one commercial building. The Site is located on the southwest corner of San Vicente Boulevard and South Tremaine Avenue. The Site is relatively flat with an elevation of approximately 140 feet above mean sea level (msl) and a regional slope to the west southwest.

The Site is bound:

- to the north by San Vicente Boulevard across which are residential properties.
- on the east by South Tremaine Avenue across which is Jiffy Lube (4777 W Pico Blvd.).
- to the south by Western Kosher Supermarket - Pico Branch (4817 W Pico Blvd.), Mutt Film (4829 W Pico Blvd.), and an unlisted commercial building (4823 and 4831 W Pico Blvd.).
- to the west by South Longwood Avenue across which is Los Angeles Department of Water & Power Distributing Station 8 (4858 San Vicente Blvd.).

Utilities in the Site vicinity are provided by:

- Electricity: Southern California Edison
- Natural Gas: So. Cal Gas
- Water: Los Angeles Department of Water and Power
- Sewer: Los Angeles County

2.2. Regional Geology and Hydrogeology

The Site lies within the Central Subbasin which occupies a large portion of the southeastern part of the Coastal Plain of the Los Angeles Groundwater Basin. This subbasin is commonly referred to as the “Central Basin” and is bound on the north by a surface divide called the La Brea high, and on the northeast and east by emergent less permeable Tertiary rocks of the Elysian, Repetto, Merced and Puente Hills. The southeast boundary between Central Basin and Orange County Groundwater Basin roughly follows

Coyote Creek, which is a regional drainage province boundary. The southwest boundary is formed by the Newport Inglewood fault system and the associated folded rocks of the Newport Inglewood uplift. The Los Angeles and San Gabriel Rivers drain inland basins and pass across the surface of the Central Basin on their way to the Pacific Ocean.

The main productive freshwater-bearing sediments are contained within Holocene alluvium and the Pleistocene Lakewood and San Pedro Formations. Throughout most of the subbasin, the near surface Bellflower aquiclude restricts vertical percolation into the Holocene age Gaspur aquifer and other underlying aquifers and creates local semi-perched groundwater conditions. The main additional productive aquifers in the subbasin are the Gardena and Gage aquifers within the Lakewood Formation and the Silverado, Lynwood and Sunnyside aquifers within the San Pedro Formation.

Groundwater was reported between 42 and 44 feet below ground surface (bgs) and to flow to the southwest in a groundwater report for a nearby facility. Local groundwater gradient may vary, and perched layers may be encountered.

2.3. User Information

The Users of this report are Westport Properties and their affiliates, joint ventures, investors, lenders, and assigns. Westport Properties is considered the “User” of the report per ASTM definitions. We requested all available information from the User.

2.4. Title Records

A Preliminary Title Report for the Site dated October 31, 2024, was provided to HMC for review. Title was reported to vested in PACIFIC TITLE ARCHIVES, a California corporation. The Title Report discussed taxes, easements, and other matter but did not contain any information of an environmental nature.

2.5. User Knowledge

A User Questionnaire was not returned to HMC for review.

2.6. Owner/Operator Knowledge

Mr. Henry Aubry of Pacific Title Archives was present and granted HMC access to the Site during the Site Reconnaissance. However, Mr. Aubry was unaware of any environmental history or conditions at the Site.

2.7. Environmental Liens or Activity and Use Limitations

HMC is unaware of any lien or use limitations recorded against the Site.

3. SITE USE AND HISTORY

Past usage of the Site was assessed through a review of historical aerial photographs, Sanborn maps, topographic maps, an EDR search of city directories, and/or prior reports.

3.1. Aerial Photograph Review

Aerial photographs covering the Site were obtained from Environmental Data Resources, Inc. (EDR). Photographs were available from the period 1928 through 2020. Copies of the aerial photographs are included in Appendix B. A summary of the observations noted from the aerial photographs are as follows:

1928 The Site first appeared to be undeveloped however the poor quality of the aerial photograph made discerning finer details impossible. The Site vicinity was noted with vacant land as well as commercial/industrial development primarily south of the Site while vacant land a residential development was primarily seen north of the Site.

1938 A cleared area was seen near the western border of the Site with what appeared to be a small structure or covered area. This may have been the gas station facility listed at the Site. No significant developments in the Site vicinity were observed.

1948-1952 The Site was first seen to have been developed with two large structures, residential buildings according to the permit history. City directories and other sources do not have occupants listed for the Site during this time. Several industrial structures were first seen in the immediate vicinity of the Site. Additional residential development was seen during this time period.

1964-1989 The Site was first seen to have been developed with the structure that is located at the Site today with parking and drive aisles with observed west and east of the structure. The Site vicinity was observed with a significant amount of commercial development as well as additional residential structures north across San Vicente Boulevard.

1994 No significant changes were seen in the Site or Site vicinity with the exception of the property immediately east of the Site being seen as vacant

land. Approximately 700 feet southeast of the Site, a large portion of vacant land was observed that was previously developed; noted in the Sandborn Maps to have been the former Midtown Center containing retail businesses.

2002 No significant changes were seen in the Site or Site vicinity with the exception of the property immediately east of the Site being developed with the structures present today. The Midtown Center was observed to have been developed with commercial buildings in the general orientation it is seen in today.

2005-2020 No significant change to the Site or Site vicinity were observed.

3.2. Topographic Maps

Historical topographic maps available from 1894 through 2022 were also reviewed as part of this effort and aided in interpreting the overall Site history. The Site appeared to be first mapped as vacant land in 1894. There were no observations made providing information of an environmental nature in the review of topographic maps.

3.3. Sanborn Maps

Sanborn maps are maps that were created for the insurance industry to document site activities in metropolitan areas of the country and were used in underwriting. They often times contain detailed information about a site. While they were prepared for insurance underwriting and were not environmental maps per se, they often times contain information that is useful in evaluating the historical use of a site. The following observations were made during the review of Sanborn map coverage reported for the Site.

1927 The Site was mapped as vacant parcels of land. The land to the north, across San Vicente Boulevard and the Pacific Electric Railway Right of Way, was mapped with vacant parcels. Land immediately east of the Site was mapped with vacant parcels. The land immediately south of the Site was mapped with vacant land. The land to the west of the Site, across Longwood Avenue, was mapped with the Bureau of Water & Power Distributing Station Number 8.

1950 The Site was first mapped with two, two story buildings with a platform at each. The buildings were labeled to contain 14 flats each. The land to the north, across San Vicente Boulevard and the Pacific Electric Railway Right of Way, was mapped with vacant parcels. Land immediately east of the Site was mapped with an auto auction facility and a steel door manufacturer. The land immediately south of the Site was mapped with vacant land, a store, and a garage door manufacturer. The land to the west of the Site, across Longwood Avenue, was mapped with the Bureau of Water & Power Distributing Station Number 8.

1969 The Site was first mapped with the building present today. The Site was indicated to be a clothing manufacturing facility. The land to the north, across San Vicente Boulevard and the Pacific Electric Railway Right of Way, was mapped with residential developments. Land immediately east of the Site was mapped as a filling station. The land immediately south of the Site was mapped with vacant land, a gas and oil facility, a poultry store, an unspecified store, and a garage door manufacturer. The land to the west of the Site, across Longwood Avenue, was mapped with the Bureau of Water & Power Distributing Station Number 8.

3.4. EDR City Directory Review

EDR performed a search of the City Directory records for the Site addresses provided at the initiation of this Phase I ESA and nearby properties at approximately five-year intervals. In addition, to the 4800 San Vicente Boulevard address, other addresses have been associated with the Site based on historical records.

4800 San Vicente Blvd.	
1981-2020	Pacific Title Archives
1971	Charles Lyons of California Hollywood Clothes Mfrs.
1958	Hollywood Clothes Mfrs.

4816 San Vicente Blvd.	
1929	Bittner Frank Mathilda gas sta.

3.5. Summary

The was historically noted to be vacant until first listed to be occupied by a gas station in 1929. From at least 1948 to 1952, the Site was developed with two residential buildings. The Site was first seen to have been developed with the warehouse that is present today in the late 1950's. Since this time the Site has been occupied by Hollywood Clothes Manufacturers (1958-1976) and Pacific Title Archives (1981-Present Day). The former use of the Site as a gas station as well as uncertainty of the uses by Hollywood Clothes Manufacturers in Site information were considered RECs.

The Site vicinity was observed with vacant land giving way to residential and commercial/industrial uses through much of the 20th century. Throughout the years, the area was developed primarily with residential uses to the north as well as commercial/ industrial developments to the south, as observed since the 1920's. The Site vicinity remains in these uses today.

4. PRIOR INVESTIGATIONS

There previously prepared environmental documents were provided to HMC for review.

5. SITE RECONNAISSANCE

Mr. Troy Taylor of HMC conducted a Site and Site vicinity reconnaissance on January 28, 2025. The reconnaissance was conducted in order to identify visible evidence of RECs at the Site and to assess possible conditions off-Site that may impact the Site. Mr. Taylor was granted access to the Site by Mr. Aubry of Pacific Title Archives but was otherwise unescorted during the Site reconnaissance.

The Site was observed with a single-story tilt up warehouse. The Site was noted to be occupied by the Pacific Title Archives facility which utilizes the Site for the storage and preservation of film, audio, and digital media. The warehouse spaces included an office with a mezzanine as well as racks for storage. In the northwest portion of the warehouse, a humidity controlled storage vault was seen with a heptafluoropropane gas fire suppression system. While chlorinated solvents were not noted, film preservation and storage often times incorporates solvent for cleaning and preservation of film. This should be taken into account if indoor air sampling is conducted.

There were no stains or evidence of spills at the Site. Chemical uses and storage include maintenance quantities of paint, household cleaners, and the heptafluoropropane gas as a part of a fire suppression system.

Selected photographs illustrating the property and nearby off-Site conditions are included in Appendix A. Summaries of the Site and observations are detailed below.

Description and Use of Site:	The Site is occupied by the Pacific Title Archives facility which utilizes the Site for the storage and preservation of film, audio, and digital media.
Underground and Aboveground Storage Tanks:	No evidence of USTs or ASTs were observed at the Site with the exception of the AST containing the heptafluoropropane gas.
Hazardous Materials, Hazardous Wastes or Petroleum Products:	Chemical uses and storage include maintenance quantities of paint, household cleaners, and the heptafluoropropane gas as a part of a fire suppression system.
Drains, Drain lines and Sumps:	Typical sanitary drains were observed.
Pits, Ponds, Lagoons	No pits, ponds, or lagoons were observed at the Site.
Industrial Wastewater:	No industrial wastewater was being generated at the Site at the time of the Site reconnaissance.
Stains:	No staining was observed at the Site.
Wells:	There were no wells observed at the Site.
Transformers:	Transformers were not observed at the Site.
Other Features:	Intact and damaged suspect ACMs were observed at the Site.

5.1. Site Vicinity

The Site is bound:

- to the north by San Vicente Boulevard across which are residential properties.
- on the east by South Tremaine Avenue across which is Jiffy Lube (4777 W Pico Blvd.).
- to the south by Western Kosher Supermarket - Pico Branch (4817 W Pico Blvd.), Mutt Film (4829 W Pico Blvd.), and an unlisted commercial building (4823 and 4831 W Pico Blvd.).

- to the west by South Longwood Avenue across which is Los Angeles Department of Water & Power Distributing Station 8 (4858 San Vicente Blvd.).

From a visual perspective, there were no indications that these facilities pose an environmental risk to the Site.

6. REGULATORY AGENCY DATABASE RESEARCH

Regulatory agency database information was obtained from a standard radius Site Assessment (ASTM) report by Environmental Data Resources, Inc. The center of the search was in the approximate center of the Site. Search distances for specific databases were one-quarter to one mile as specified in the ASTM 1527-21 standard. The database search includes over 70 federal, state, local, and proprietary records. A complete copy of this report is included in Appendix B.

6.1. Database Records Concerning the Target Property

The Site was listed on the following databases in the EDR Radius Report:

Location	Address	Lists	REC	RATIONALE
Los Angeles Department of Water & Power	4858 San Vicente Blvd.	HWTS	NO	This record was incorrectly plotted at the Site and belongs to the west adjacent facility. This particular record provides no evidence of a release from on- or off-Site sources.
Bittner Frank	4816 San Vicente Blvd.	EDR HIST AUTO	YES	The record for the facility stated the Site was used as a gasoline and oil service station. As the Site has been developed since this time, first in the 1940's and again in the 1960's with the current building, any related tanks were likely removed. However, the presence of historical tanks and/or residual contamination cannot be ruled out.

6.2. Database Records Concerning the Site Vicinity

We reviewed the database report for off-Site potential sources within the relevant search distance. In review of the many entries on the database, we reviewed the following factors that affect the ability of a facility to affect the Site:

- Distance from the Site,
- Location from the Site with regard to the direction of groundwater flow,
- Nature of the release and whether the release has affected soil, groundwater or both,
- Status of the investigation (e.g. open or closed)

Groundwater flow direction was assumed to generally flow to the southwest in the Site vicinity, therefore facilities located adjacent to or to the northeast were further considered. Only those facilities judged using these factors are discussed below. The following presents a summary of our findings:

Location	Address	Dist.	Dir.	Lists	REC	RATIONALE
Frontino V F	4761 W. Pico Blvd.	191’	ESE	EDR HIST AUTO	NO	Records for this east adjacent facility indicated the property was used as gasoline and oil service station from at least 1937 through 1942. It is unlikely any releases that may have occurred from this cross and slightly downgradient property have migrated below the Site.
Jiffy Lube #2816/ Unocal #5843	4777 W. Pico Blvd.	119’	ESE	LOS ANGELES AST CERS HAZ WASTE CERS TANKS HWTS HAZNET LOS ANGELES HM CERS RCRA LISTINGS E MANIFEST LUST CORTESE UST HIST UST EDR HIST AUTO UST FINDER RELEASE SWEEPS UST CA FID UST	NO	Records for the former Unocal station indicated the east adjacent property contained a service station from 1967 until it was destroyed during civil unrest in 1992. Upon removal in 1993, soil contamination was discovered prompting a LUST case to be opened with the City of LA and the RWQCB. Soil contamination was excavated and disposed of however, additional contamination was discovered. The case was closed in 2014 according to the GeoTracker case file. The latest documentation in the case file was from 1998, indicating the case was closed with the fire department with contamination left in place due to high methane and hydrogen sulfide gas detections

						making additional assessment too dangerous. The documentation stated the contamination was limited to the eastern portion of the property however the extent was unknown. There were no indications of releases for records from the Jiffy Lube facility. Given that a large portion of the contamination was removed and the case closure, it is unlikely the historic subsurface impacts pose a threat to the Site today. But as noted, the presence of methane and hydrogen sulfide in the soil gas poses a potential vapor intrusion concern to the Site.
P&M Service Station	4805 W. Pico Blvd.	71’	SSE	UST HIST UST SWEEPS UST CA FID UST LOS ANGELES HM EDR HIST AUTO	NO	Records indicate a historic gasoline and oil service station being operated at this property. There were no indications of releases. However, a theoretical release would be expected to migrate to the south and southwest away from the Site, given the southwestern groundwater gradient.
Bittner Frank	4815 Pico Blvd.	90’	SSE	EDR HIST AUTO	NO	The records report another service station of the same name as at 4816 San Vicente Boulevard, discussed in Section 6.1, at this address from at least 1929 through 1933. It is unclear if these records are related to similar records for the Site or a separate facility. Any theoretical releases from a facility such as this at this location would be expected to migrate to the south and southwest given the property’s orientation to the Site.
Coffey Overhead Doors, Inc.	4829 W. Pico Blvd.	129’	SW	LOS ANGELES HM	NO	The single record for this Site indicates an inactive Facility ID with the city of Los Angeles for hazardous waste permitting. The permit is no

						longer active and there were no records for specific chemical use or releases. No threat to the Site was assessed.
Hurst Sullivan	4831 W. Pico Blvd	146’	SW	EDR HIST AUTO	NO	The record indicates a gas and oil service station at this property in 1933. There were no records of releases. Any theoretical releases from this facility would be expected to migrate to the south and southwest due the topographic and groundwater gradient.

Orphan Sites

Orphan Sites are those properties that are included on various agency lists, but for which the records do not have sufficient address information for the database program to map the site. The Orphan Sites reviewed were not found to pose a likely threat to the Site based off the nature of the records available, closure status, and/or their orientation to the Site.

6.3. Summary of Off-Site Issues

Based on the review of the available regulatory information, the Site is located in an area with a history of industrial uses. Various facilities in the Site vicinity were indicated to currently or historically use hazardous chemicals. Additional investigation was performed for the Unocal 5843 gas and oil station as it was located immediately east of the Site, primarily for releases of petroleum hydrocarbons. This facility was closed in 1992 after it was destroyed during civil unrest during that time. The case file was indicated to have been closed with the City of Los Angeles and the RWQCB in 2014. In our assessment, any residual contamination would not likely pose a threat to the Site based on the cross and slightly down gradient orientation to the Site as well as the southwestern groundwater gradient. However, as noted above, the presence or methane and hydrogen sulfide appears to be a regional concern.

Upon further investigation, adjacent or suspect facilities were found not to pose a risk based on lack of records for releases, their closure status, orientation to the Site, and/or the nature and extent of the release.

7. LOCAL AGENCY AND OTHER RECORDS REVIEW

7.1. Tribal Records

The Site is not located in a tribal area therefore there were no tribal records to review.

7.2. Oil and Gas Wells

The State of California Department of Conservation, Division of Oil, Gas, and Geothermal Resources online mapping website was reviewed on February 3, 2025, for the location of active, plugged, or abandoned oil and gas wells in the vicinity of the Site. No oil or gas wells were listed as having been drilled on Site. The nearest plotted wells to the Site are a series plugged oil and gas wells, approximately 400 feet south of the Site.

7.3. State of California

The State of California Geotracker and EnviroStor websites were also reviewed for information on potential on or off-Site facilities that are being remediated under either RWQCB or DTSC oversight. No active cases were listed on these databases that were not listed in the EDR review.

Public records requests were also submitted to the DTSC and RWQCB on January 13, 2025. Neither agency maintained records for the Site.

7.4. Los Angeles County Fire Department

HMC submitted a public records request to the LACFD on January 13, 2025. No records were maintained for the Site.

7.5. Los Angeles Fire Department

HMC submitted a public records request to the LAFD on January 13, 2025. No records were maintained for the Site.

7.6. Los Angeles County Department of Public Works

HMC performed a public records search online with the LACDPW Environmental Resources database on February 3, 2025. There were no records on file with the LACDPW.

7.7. Los Angeles County Building and Safety Division

Building permit research was performed online at the LACBSD Building Permit Viewer on February 3, 2024. Building records indicated general construction and improvements. There were no records providing information of an environmental nature. The most notable permit was a permit from 1963 to demolish a 14 unit residential building owned

by Woodbury College, providing evidence the development observed in aerial photographs and Sanborn maps at the Site was used for residential purposes.

7.8. South Coast Air Quality Management District

HMC conducted records research on SCAQMD's online facilities database on February 3, 2024. There were no records for the Site.

8. VAPOR INTRUSION, ASBESTOS, AND OTHER CONCERNS

8.1. Vapor Intrusion

Given the finding this Phase I ESA, there is a moderate potential for a vapor intrusion condition at the Site as described below.

8.2. Methane

The Site is located in the Los Angeles Methane Zone. If the property is redeveloped, the City will require that a methane gas survey be conducted with specific protocols on how to conduct that survey. In addition, during record research, reports and other documents were reviewed for a former Unocal station adjacent the Site to the east. In these documents, it was indicated that high methane and hydrogen sulfide concentrations prevented additional investigation. Based on this report, we believe a survey for these gases is recommended. If the Site is planned for redevelopment, the methane component of this proposed survey should take into account the protocols of the City of Los Angeles.

8.3. Asbestos

Suspect asbestos containing materials were observed at the Site in intact and damaged conditions.

8.4. Radon

The Site is listed as being in Zone 2 with regards to radon indicating that radon may be present at concentrations less than 4 pico curies / liter.

8.5. Mold

Mold and water damage were not observed at the Site.

8.6. PFAS

The Site has not been assessed as a likely source of PFAS contamination however certain types of clothing manufacturing may have used PFAS containing chemicals for stain resistance.

9. SUMMARY OF FINDINGS

Key findings of this Phase I ESA are as follows:

- The was historically noted to be vacant until first listed to be occupied by a gas station in 1929. From at least 1948 to 1952, the Site was developed with two residential buildings. The Site was first seen to have been developed with the warehouse that is present today in the late 1950's. Since this time the Site has been occupied by Hollywood Clothes Manufacturers (1958-1976) and Pacific Title Archives (1981-Present Day). The former use of the Site as a gas station as well as uncertainty of the uses by Hollywood Clothes Manufacturers in Site information were considered RECs.

- The Site vicinity was observed with vacant land giving way to residential and commercial/industrial uses through much of the 20th century. Throughout the years, the area was developed primarily with residential uses to the north as well as commercial/ industrial developments to the south, as observed since the 1920's. The Site vicinity remains in these uses today.

- During the Site Reconnaissance, there were no RECs identified at the Site. There were no stains or evidence of spills at the Site. Chemical uses and storage include maintenance quantities of paint, household cleaners, and heptafluoropropane gas as a part of a fire suppression system for the humidity controlled vault.

- The EDR Radius Report as well as the City Directory records listed a gas station being present at the Site in 1929. HMC considers this to be a REC. Although it is likely that any tanks or soil contamination were removed during historic development, the possibility of these features remaining at the Site cannot be ruled out.

- According to the Sanborn and City Directory records, Hollywood Clothing Manufacturing occupied the Site for at least 20 years during the 1950's through the 1970's. Aside from records of their occupation, there no regulatory, disposal, or other records to provide insight into the operations conducted at this facility. Clothing manufacturers sometimes include dry cleaning operations as part of their

process. Due to the lack of records, HMC considers this facility to be a REC and recommends additional investigation.

- Based on the review of the available regulatory information, the Site is located in an area with a history of industrial uses. Various facilities in the Site vicinity were indicated to currently or historically use hazardous chemicals. Additional investigation was performed for the Unocal 5843 gas and oil station as it was located immediately east of the Site, primarily for releases of petroleum hydrocarbons. This facility was closed in 1992 after it was destroyed during civil unrest during that time. The case file was indicated to have been closed with the City of Los Angeles and the RWQCB in 2014.

- The records in the Unocal case file state closure was granted with residual contamination left in place as additional investigation was deemed too dangerous due to methane and hydrogen sulfide concentrations. In our assessment, any residual soil contamination would not likely pose a threat to the Site based on the cross and slightly down gradient orientation to the Site as well as the southwestern groundwater gradient. However, the indication that methane and hydrogen sulfide are present in the subsurface at this adjacent property and could be a vapor intrusion concern and prompts HMC to recommend investigation at the Site for these gases.

- Upon further investigation, adjacent or suspect facilities were found not to pose a risk based on lack of records for releases, their closure status, orientation to the Site, and/or the nature and extent of the release. We note that the Site is in the LA Methane Zone and there could be methane gas present as a regional condition.

- Given the finding this Phase I ESA, there is a moderate potential for a vapor intrusion condition at the Site.

- Suspect asbestos containing materials were observed at the Site in intact and damaged conditions.

- The Site has not been assessed as a likely source of PFAS contamination however certain types of clothing manufacturing may have used PFAS containing chemicals for stain resistance.

10. DATA GAPS

A User Questionnaire was not returned to HMC for review.

11. CONCLUSIONS

HMC has conducted a Phase I ESA Update for the Site located at 4800 San Vicente, Los Angeles, California 90019 in accordance with the ASTM E1527-21 guidelines. The findings and conclusion of HMC's investigation are as follows:

- REC – Former gas station facility in 1929.
- REC – Former clothing manufacturing facility in the 1950's through 1970's.
- REC – The Site's location in the Los Angeles Methane Zone. Potential for the presence of elevated methane and hydrogen sulfide in the subsurface.
- Non-Scope items included observations of suspect asbestos containing materials.

12. RECOMMENDATIONS

Based on the findings of this ESA, we recommend the following:

- Conduct a Phase II ESA for both soil and soil vapor analysis including methane. If the Site is planned for redevelopment, the City will require a methane survey as well. If there are plans for redevelopment, the soil gas survey component of the Phase II can be designed to satisfy the Los Angeles Department of Building and Safety level methane survey protocols.

- Conduct an asbestos survey prior to demolition or any other activity that may disturb suspect materials.

13. QUALIFICATIONS

Mark S. Cousineau, NREP

Mr. Mark S. Cousineau, principal with HMC, has a diverse professional background in environmental management, which includes working as a generator, regulator, consultant, and corporate advisor in hazardous waste and other environmental issues.

Mr. Cousineau's technical background is focused in the area of overseeing large-scale environmental investigations and regulatory compliance management related to site assessments, subsurface investigations, facility surveys, and site remediation. To projects such as these, Mr. Cousineau brings expertise in evaluating complex sites and developing solutions to solve the technical, operational, regulatory, financial and timing issues. In addition, Mr. Cousineau routinely assists clients in developing environmental business plans for single assets and multi-site real estate portfolios and has designed and implemented several tenant audit programs involving the proactive management of environmental risk caused by on-site commercial and industrial tenant activities.

Mr. Cousineau has provided litigation support and has served, as a court-appointed expert on environmental issues, is a Member of the National Registry of Environmental Professionals, holds a M.S. in Environmental Sciences from California State University Fullerton and a B.S. in Chemistry from University California San Diego.

As signatory to this report, I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of this part. I have the specific qualifications based on education, training, and experience to assess the property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."

Mark Cousineau, NREP
Principal

Troy Taylor, Project Scientist/ Certified Site Surveillance Technician

Mr. Troy Taylor, serving as a Project Scientist at Hazard Management Consulting, Inc. (HMC), boasts a multifaceted and wide-ranging background in environmental field services and consulting, rooted in over 18 years of dedicated experience in the environmental industry. His diverse expertise encompasses a comprehensive spectrum of environmental tasks, including environmental drilling, soil vapor/indoor air sampling, and complex remediation projects, illustrating his proficiency and depth of knowledge in these areas.

In his role, Mr. Taylor has been instrumental in conducting and managing a variety of due diligence investigations with precision and attention to detail. His work includes providing critical, high-quality third-party reviews, showcasing his ability to deliver insightful analyses and recommendations. Since 2018, Mr. Taylor has excelled under the mentorship of Mr. Mark S. Cousineau, further enhancing his skill set and expanding his industry knowledge.

Mr. Taylor's career is marked by a diverse array of projects that highlight his adaptability and competency in addressing assorted environmental challenges. His work is characterized by attention to detail and a commitment to quality, making him a reliable and adaptable professional.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Hazard Management Consulting were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Hazard Management Consulting were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:		*Coordinates:*	
P.O.#	NA	**Latitude:**	34.048829 34° 2' 56" North
Project:	Westport - 4800 San Vicente	**Longitude:**	-118.341419 -118° 20' 29" West
		UTM Zone:	Zone 11 North
		UTM X Meters:	376189.53
		UTM Y Meters:	3768381.63
		Elevation:	139.00' above sea level

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

4800 SAN VICENTE
LOS ANGELES, CA 90019

COORDINATES

Latitude (North):	34.0488290 - 34° 2' 55.78''
Longitude (West):	118.3414190 - 118° 20' 29.10''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	376186.8
UTM Y (Meters):	3768187.0
Elevation:	139 ft. above sea level

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL ---------- National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY ---------- Federal Facility Site Information listing
SEMS ---------- Superfund Enterprise Management System

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE ---------- Superfund Enterprise Management System Archive

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS ---------- Corrective Action Report

Lists of Federal RCRA TSD facilities

RCRA-TSDF ---------- RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-VSQG ---------- RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System
US ENG CONTROLS ---------- Engineering Controls Sites List
US INST CONTROLS ---------- Institutional Controls Sites List

EXECUTIVE SUMMARY

Federal ERNS list

ERNS ---------- Emergency Response Notification System

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE ---------- State Response Sites

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF ---------- Solid Waste Information System

Lists of state and tribal leaking storage tanks

INDIAN LUST ---------- Leaking Underground Storage Tanks on Indian Land

Lists of state and tribal registered storage tanks

FEMA UST ---------- Underground Storage Tank Listing
INDIAN UST ---------- Underground Storage Tanks on Indian Land

Lists of state and tribal voluntary cleanup sites

INDIAN VCP ---------- Voluntary Cleanup Priority Listing
VCP ---------- Voluntary Cleanup Program Properties

Lists of state and tribal brownfield sites

BROWNFIELDS ---------- Considered Brownfieds Sites Listing

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/16/2024 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/16/2024 has revealed that there are

11 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/21/2024 has revealed that there are 7 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 24 UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 11 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/16/2024 has revealed that there are 37 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 8 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 2 UST FINDER sites within approximately 0.25 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 09/16/2024 has revealed that there are 25 E MANIFEST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 9 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Citation: 22 CCR 15 66265.192(a) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(a)
Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer prior to placing the tank system in service. The written assessment shall state that, the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed to meet the regulation.
Violation Notes: Returned to compliance on 12/17/2018. OBSERVATION: A written hazardous waste tank assessment has not been obtained for the 800 gallon metal waste oil tank system prior to placing system into service. CORRECTIVE ACTION: Obtain a written hazardous waste tank system assessment for the 800 gallon metal waste oil tank system in accordance with 22 CCR 15 66265.192 and submit a copy to the CUPA. Facility cannot provide tank certification for the 800 gallon used oil tank.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

MIDTOWN CLEANERS (Continued) **1001023006**

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Waste Description: Lead

Waste Code: D009
Waste Description: Mercury

Waste Code: D010
Waste Description: Selenium

Waste Code: D011
Waste Description: Silver

Waste Code: D013
Waste Description: Lindane (1,2,3,4,5,6-Hexa-Chlorocyclohexane, Gamma Isomer)

Waste Code: D016
Waste Description: 2,4-D (2,4-Dichlorophenoxyacetic Acid)

Waste Code: D018
Waste Description: Benzene

Waste Code: D022
Waste Description: Chloroform

Waste Code: D024
Waste Description: M-Cresol

Waste Code: D025
Waste Description: P-Cresol

Waste Code: D026
Waste Description: Cresol

Waste Code: D027
Waste Description: 1,4-Dichlorobenzene

Waste Code: D029
Waste Description: 1,1-Dichloroethylene

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: P001
Waste Description: 2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenylbutyl)-, & Salts, When Present At Concentrations Greater Than 0.3% (Or) Warfarin, &

CVS PHARMACY # 9686 (Continued) **1016140200**

Salts, When Present At Concentrations Greater Than 0.3%

Waste Code: P008
Waste Description: 4-Aminopyridine (Or) 4-Pyridinamine

Waste Code: P012
Waste Description: Arsenic Oxide As2o3 (Or) Arsenic Trioxide

Waste Code: P042
Waste Description: 1,2-Benzenediol, 4-[1-Hydroxy-2-(Methylamino)Ethyl]-, (R)- (Or) Epinephrine

Waste Code: P075
Waste Description: Nicotine, & Salts (Or) Pyridine, 3-(1-Methyl-2-Pyrrolidinyl)-,(S)-, & Salts

Waste Code: P081
Waste Description: 1,2,3-Propanetriol, Trinitrate (R) (Or) Nitroglycerine (R)

Waste Code: P108
Waste Description: Strychnidin-10-One, & Salts (Or) Strychnine, & Salts

Waste Code: P188
Waste Description: Benzoic Acid, 2-Hydroxy-, Compd. With (3as-Cis)-1,2,3,3a,8,8a-Hexahydro-1,3a,8-Trimethylpyrrolo[2,3-B]Indol-5-Yl Methylcarbamate Ester (1:1) (Or) Physostigmine Salicylate

Waste Code: P204
Waste Description: Physostigmine (Or) Pyrrolo[2,3-B]Indol-5-Ol, 1,2,3,3a,8,8a-Hexahydro-1,3a,8-Trimethyl-Methylcarbamate (Ester), (3as-Cis)-

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U010
Waste Description: Azirino [2',3':3,4]Pyrrolo[1,2-A]Indole-4,7-Dione, 6-Amino-8-[[(Aminocarbonyl)Oxy]Methyl]-1,1a,2,8,8a,8b-Hexahydro-8a-Methoxy-5-Methyl-, [1as-(1aalpha, 8beta, 8aalpha, 8balpha)]- (Or) Mitomycin C

Waste Code: U031
Waste Description: 1-Butanol (I) (Or) N-Butyl Alcohol (I)

Waste Code: U034
Waste Description: Acetaldehyde, Trichloro- (Or) Chloral

Waste Code: U035
Waste Description: Benzenebutanoic Acid, 4-[Bis(2-Chloroethyl)Amino]- (Or) Chlorambucil

Waste Code: U044
Waste Description: Chloroform (Or) Methane, Trichloro-

Waste Code: U058
Waste Description: 2h-1,3,2-Oxazaphosphorin-2-Amine, N,N-Bis(2-Chloroethyl)Tetrahydro-, 2-Oxide (Or) Cyclophosphamide

CVS PHARMACY # 9686 (Continued) **1016140200**

Waste Code:	U059
Waste Description:	5,12-Naphthacenedione, 8-Acetyl-10-[(3-Amino-2,3,6-Trideoxy)-Alpha-L-Lyxo-Hexopyranosyl)Oxy]-7,8,9,10-Tetrahydro-6,8,11-Trihydroxy-1-Methoxy-, (8s-Cis)- (Or) Daunomycin
Waste Code:	U070
Waste Description:	Benzene, 1,2-Dichloro- (Or) O-Dichlorobenzene
Waste Code:	U072
Waste Description:	Benzene, 1,4-Dichloro- (Or) P-Dichlorobenzene
Waste Code:	U089
Waste Description:	Diethylstilbesterol (Or) Phenol, 4,4'-(1,2-Diethyl-1,2-Ethenediyl)Bis, (E)-
Waste Code:	U112
Waste Description:	Acetic Acid, Ethyl Ester (I) (Or) Ethyl Acetate (I)
Waste Code:	U122
Waste Description:	Formaldehyde
Waste Code:	U129
Waste Description:	Cyclohexane, 1,2,3,4,5,6-Hexachloro-, (1alpha, 2alpha, 3beta, 4alpha, 5alpha, 6beta)- (Or) Lindane
Waste Code:	U132
Waste Description:	Hexachlorophene (Or) Phenol, 2,2'-Methylenebis[3,4,6-Trichloro-
Waste Code:	U144
Waste Description:	Acetic Acid, Lead(2+) Salt (Or) Lead Acetate
Waste Code:	U150
Waste Description:	L-Phenylalanine, 4-[Bis(2-Chloroethyl)Amino]- (Or) Melphalan
Waste Code:	U151
Waste Description:	Mercury
Waste Code:	U154
Waste Description:	Methanol (I) (Or) Methyl Alcohol (I)
Waste Code:	U159
Waste Description:	2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)
Waste Code:	U165
Waste Description:	Naphthalene
Waste Code:	U187
Waste Description:	Acetamide, N-(4-Ethoxyphenyl)- (Or) Phenacetin
Waste Code:	U188
Waste Description:	Phenol
Waste Code:	U197
Waste Description:	2,5-Cyclohexadiene-1,4-Dione (Or) P-Benzoquinone
Waste Code:	U200

CVS PHARMACY # 9686 (Continued) **1016140200**

Waste Description: Reserpine (Or) Yohimban-16-Carboxylic Acid, 11,17-Dimethoxy-18-[(3,4,5-Trimethoxybenzoyl)Oxy]-, Methyl Ester, (3beta, 16beta, 17alpha, 18beta, 20alpha)-

Waste Code: U201
Waste Description: 1,3-Benzenediol (Or) Resorcinol

Waste Code: U204
Waste Description: Selenious Acid (Or) Selenium Dioxide

Waste Code: U205
Waste Description: Selenium Sulfide (Or) Selenium Sulfide Ses2 (R,T)

Waste Code: U206
Waste Description: D-Glucose, 2-Deoxy-2-[[(Methylnitrosoamino)-Carbonyl]Amino]- (Or) Glucopyranose, 2-Deoxy-2-(3-Methyl-3-Nitrosoureido)-,D- (Or) Streptozotocin

Waste Code: U210
Waste Description: Ethene, Tetrachloro- (Or) Tetrachloroethylene

Waste Code: U236
Waste Description: 2,7-Naphthalenedisulfonic Acid,3,3'-[(3,3'-Dimethyl[1,1'-Biphenyl]-4,4'-Diyl)Bis(Azo)Bis[5-Amino -4-Hydroxy]-, Tetrasodium Salt (Or) Trypan Blue

Waste Code: U240
Waste Description: 2,4-D, Salts & Esters (Or) Acetic Acid, (2,4-Dichlorophenoxy)-, Salts & Esters (Or) Dichlorophenoxyacetic Acid 2,4-D

Waste Code: U248
Waste Description: 2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenyl-Butyl)-, & Salts, When Present At Concentrations Of 0.3% Or Less (Or) Warfarin, & Salts, When Present At Concentrations Of 0.3% Or Less

Waste Code: U279
Waste Description: U279

Waste Code: U411
Waste Description: U411

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release

Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22,

CVS PHARMACY #9686 (Continued) **S117311928**

Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.
Violation Notes: Returned to compliance on 10/05/2014. OBSERVATION: Copies of hazardous waste disposal records for three years were not found on site. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. CORRECTIVE ACTION: Immediately locate a copy of all manifests and receipts for the last three years, maintain them on site, and submit copies to the CUPA by [date, 30 days from now].

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 05/05/2017. OBSERVATION: Copies of hazardous waste disposal records for 2017 for waste paint were not found on site. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. CORRECTIVE ACTION: Immediately locate a copy of all manifests and receipts for the last three years, maintain them on site, and submit copies to the CUPA by [date, 30 days from now].

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:

Site ID:	43702
Site Name:	LAUSD- MAINT & OPERATIONS CENTRAL 1
Violation Date:	01-13-2015
Citation:	22 CCR 23 66273.36 - California Code of Regulations, Title 22, Chapter 23, Section(s) 66273.36
Violation Description:	Failure of the universal waste handler to initially train and provide annually, thereafter, all personnel who manage or who supervise those who manage universal wastes and to maintain a written record by date indicating the names of personnel who received the information. The universal waste handler shall maintain these records for at least three years from the date the person last managed any universal waste at the facility. This training shall include: 1) The types and hazards associated with the universal waste that personnel may manage at the facility; 2) The proper disposition of universal wastes managed at the facility; 3) The proper procedures for responding to releases of universal wastes including the position titles and the means of contacting those personnel at the facility who are designated to respond to reports of releases and/or to respond to questions received from other personnel at the facility; and 4) The applicable requirements of universal waste regarding labeling, collecting, handling, consolidating, and shipping universal wastes at the facility, including, but not limited to, the prohibition on the disposal of universal wastes, and for personnel involved in shipping universal wastes who are hazmat employees .
Violation Notes:	Returned to compliance on 02/12/2015. OBSERVATION: Observed 2 x 5 G containers for alkaline batteries with accumulation start date of 11/20/13. Employees who handle universal wastes (UW) must be trained initially and annually thereafter. At a minimum, personnel who manage UW shall be trained and thoroughly familiar with proper universal waste management and emergency response procedures relative to those persons responsibilities, including where applicable: 1) types and hazards associated with the UW managed at the facility; 2) proper disposition of UW managed at the facility (e.g. locations of UW containers, or location of centralized UW area); 3) proper procedures for responding to releases of UW including the position titles and the means of contacting those personnel at the facility who are designated to respond to releases; 4) labeling, collecting, handling, consolidating, and shipping UW at the facility, including, but not limited to the prohibition on the disposal of UW. The UW handler shall [Truncated]

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D009
Waste Description: Mercury

Waste Code: D010
Waste Description: Selenium

Waste Code: D011
Waste Description: Silver

Waste Code: D016
Waste Description: 2,4-D (2,4-Dichlorophenoxyacetic Acid)

Waste Code: D018
Waste Description: Benzene

Waste Code: D027
Waste Description: 1,4-Dichlorobenzene

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: P075
Waste Description: Nicotine, & Salts (Or) Pyridine, 3-(1-Methyl-2-Pyrrolidinyl)-,(S)-, &

TARGET-#T3294 (Continued) **1025882925**

Salts

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U134
Waste Description: Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U188
Waste Description: Phenol

Waste Code: U279
Waste Description: U279

Eval Notes: Reviewed CERS 5/24/19 UST submittal and was not accepted because info is incorrect. OBSERVATION: UST tank information is not current in CERS. Update tanks 1, 2 & 3: MLLD Manufacturer - Red Jacket(shows FE Petro), MLLD Model # - FXIV(shows STP-MLD). Update Tank 3: UDC Monitoring Stops Flow of Product@ Dispenser - NO(shows YES). Update Site map for Tanks 1, 2 & 3 MLLDs- Red Jacket FXIV(shows STP-MLD). Any change of information must be updated in CERS within 30 days of the change. CORRECTIVE ACTION: Immediately update the required information in CERS and submit for review by the CUPA. Contacted Tom Robins via phone to make required changes. Facility resubmitted with correct info & CERS UST submittal accepted. All violations corrected.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 08/11/2020. OBSERVATION: Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. Failure to test the Overfill Prevention Equipment by 10/13/18, tested today, 8/8/19. Results to be reviewed by LAFD upon submittal. CORRECTIVE ACTION: Maintain overfill prevention system to comply with the deficiencies noted above. Submit verfiication.

Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-11-2020
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: LAFD CUPA Inspector Dorismond, on site this date to conduct routine inspection of your underground storage tank(s). Consent to enter,

CITY OF LA/DEPT OF PUBLIC WORKS (Continued) **S112884360**

inspect and take photographs was given on this date by Steve Mercado, Supervisor West Division. Monitoring system certification was conducted at this time. Monitoring certification was performed by Richard Blankenbiller, Clean Fuels Inc. Tester provided the following certifications: Richard "Eric" Blankenbiller of Clean Fuels ICC: 5012767. EXP: 12/04/2021 VR: #A20929 EXP: 10/1/2021 VMI: #3041 EXP: 3/27/2022 OMNTEC: 120517TA EXP: 12/04/2021 The UST monitoring panel showed all functions normal. The monitoring set up and alarm history were provided for review. The sumps and UDCs were opened for inspection and the sensors were observed positioned to detect a leak at the earliest opportunity. The spill buckets were also visually inspected. The Monitoring Plan was compared to the equipment onsite. The operation of the UST system [Truncated]

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS HAZ WASTE:
Name: BL AUTO BODY & PAINT
Address: 1439 S LA BREA AVE
City,State,Zip: LOS ANGELES, CA 90019
Site ID: 703012
CERS ID: 10931800
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 703012
Site Name: BL AUTO BODY & PAINT
Violation Date: 05-09-2022
Citation: HSC 6.11 25404(e)(4) - California Health and Safety Code, Chapter 6.11, Section(s) 25404(e)(4)
Violation Description: Failure to report, and report accurately, program data (such as hazardous waste generation activities) electronically.
Violation Notes: Returned to compliance on 07/06/2023. OBSERVATION: Owner/Operator failed to report program data electronically into CERS, or reported information incorrectly. Facility operator must submit the hazardous waste generator notification into the California Environmental Reporting System (CERS) by completing the Owner's Information Page and the Business Activities Page. CORRECTIVE ACTION: Complete all required reporting into CERS.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 703012
Site Name: BL AUTO BODY & PAINT
Violation Date: 05-09-2022
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 06/27/2023. OBSERVATION: Uniform Hazardous Waste Manifests for the disposal the paint waste solvent and spray booth paint filters were not available at the time of inspection.

BL AUTO BODY & PAINT (Continued) **S113800099**

CORRECTIVE ACTION: Locate a copy of all manifests for the disposal of the paint waste solvent and spray booth paint filters and submit copies to the CUPA.

Violation Division: Los Angeles County Fire Department

Disadvantaged Community:	Not reported
CA Enviroscreen 3 Score:	76-80%
CA Enviroscreen 4 Score:	80-85%
Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	LOS ANGELES RWQCB (REGION 4)
Site History:	The Site is located in the mid-city district of Los Angeles, approximately 1.4 miles north of the I-10 Freeway near the intersection of West Pico Boulevard and Crenshaw Boulevard. It is an irregularly-shaped parcel consisting of approximately 12 acres and can be divided into east and west parcels. The west parcel is improved with a retail strip center and a Metropolitan Transit Authority (MTA) bus loading area and turnaround terminal. As of 2011, the east parcel is under development as a large box retail store (or stores) and associated parking structure. Self-directed site assessments and those conducted under the Regional Board s oversight in July 2003, from March to April 2004, in June 2007 and March 2010 indicated that the Site was contaminated with petroleum hydrocarbons and volatile organic compounds (VOCs) mostly due to releases from underground storage tanks (USTs) associated with a historical railway electric power substation and an auto fueling and service station operated at the Site from approximately the 1880s through the 1920s and from approximately 1939 to the late 1980s, respectively. Soil remediation involving excavation and removal of impacted soil and excavation and removal of USTs, clarifiers, pipelines and other subsurface structures was undertaken from January to September 2005 and from June 2010 to October 2010. Confirmation soil sampling was conducted in all remediated areas to verify the completion of the soil remediation. Groundwater sampling and monitoring completed in 2005, 2009 and 2010 indicated that there were low level VOCs associated with gasoline and its additives. Based on the results of the site assessments, soil confirmation sampling and groundwater monitoring, the Regional Board granted that there were no further requirements for the site. The case was closed on August 26, 2011.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 09/25/2024

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/25/2024

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/20/2024

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

Next Scheduled EDR Contact: 04/14/2025
Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Elevation:	139 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50005776 HOLLYWOOD, CA
Version Date:	2022

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

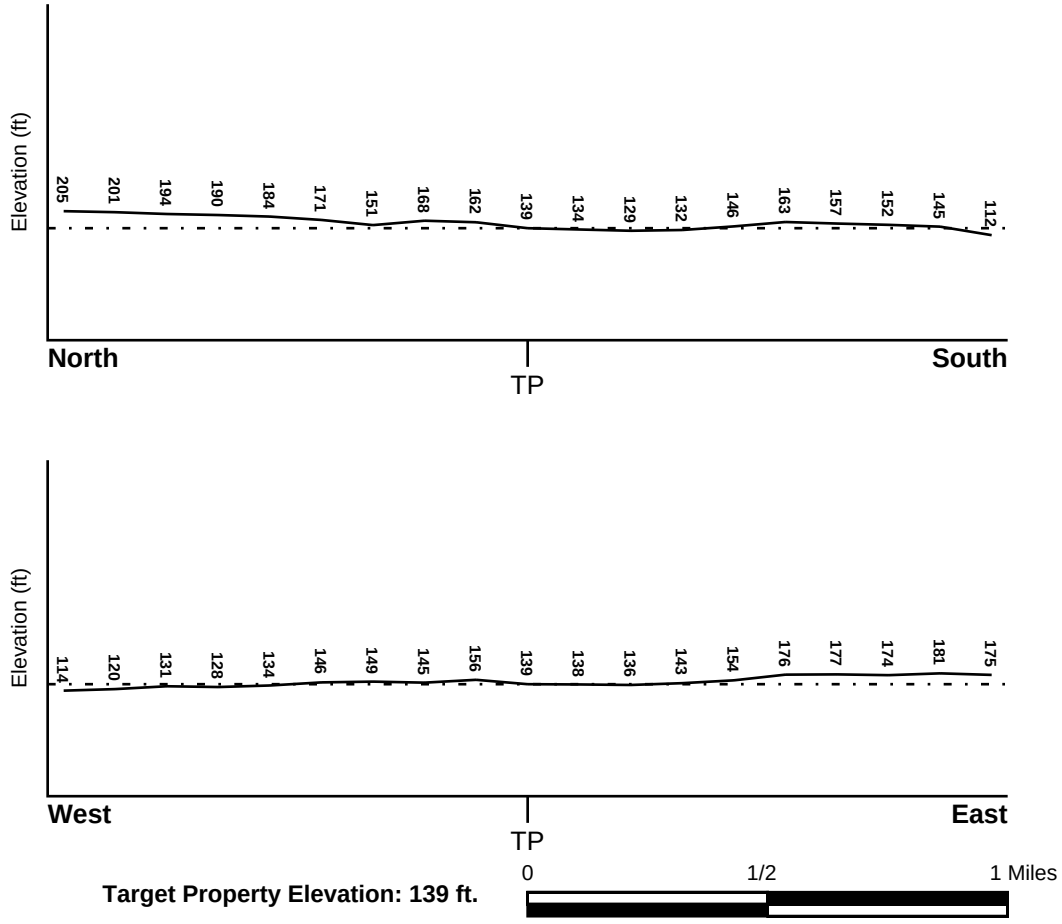

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1615F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1605F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
HOLLYWOOD	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
119	1/2 - 1 Mile SSW	Not Reported
1G	1/2 - 1 Mile SSW	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Shallow Soil Types:
fine sandy loam
gravelly - loam
sandy clay
sandy clay loam
clay
silty clay
sand

Deeper Soil Types:
gravelly - sandy loam
sandy loam
very gravelly - sandy loam
stratified
very fine sandy loam
weathered bedrock
sand
gravelly - fine sandy loam
silty clay loam
clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: A review of the RCRA-LQG list, as provided by EDR, and dated 09/16/2024 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

Target Property Map:	50005776 HOLLYWOOD, CA
Version Date:	2022

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

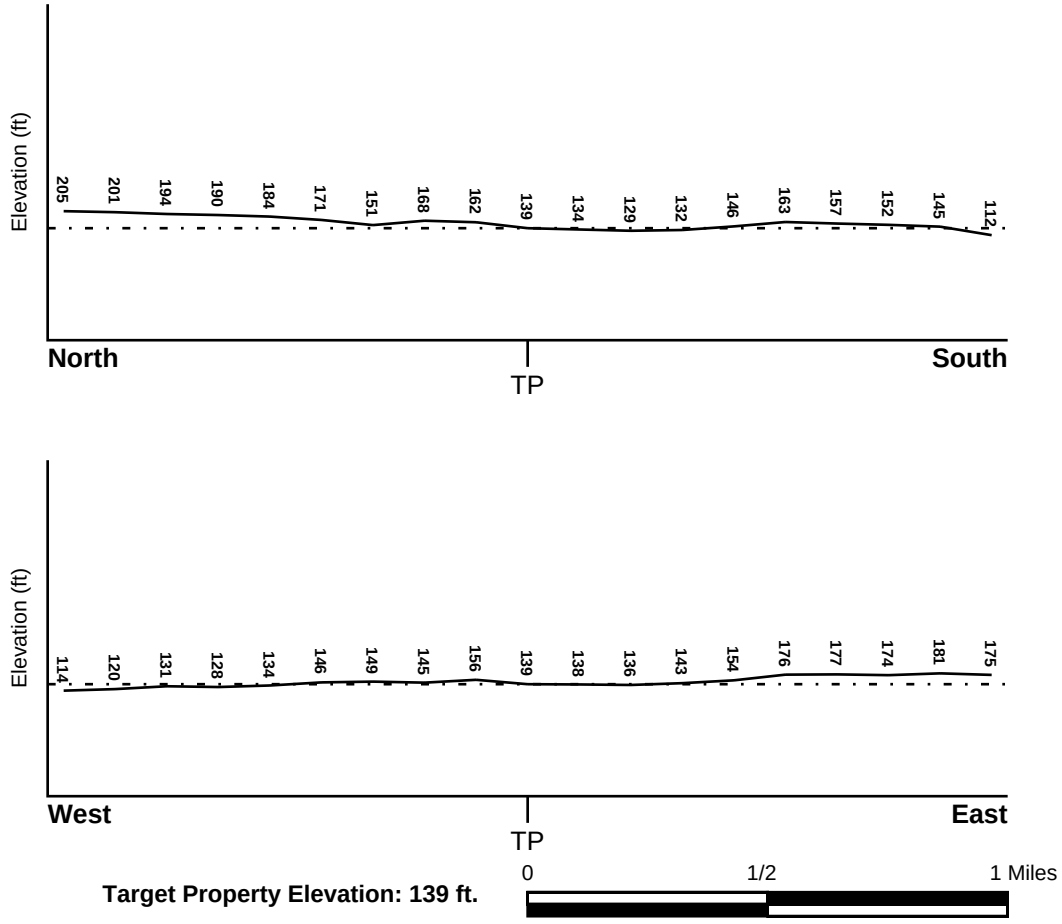

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1615F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1605F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
HOLLYWOOD	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
119	1/2 - 1 Mile SSW	Not Reported
1G	1/2 - 1 Mile SSW	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Shallow Soil Types:
fine sandy loam
gravelly - loam
sandy clay
sandy clay loam
clay
silty clay
sand

Deeper Soil Types:
gravelly - sandy loam
sandy loam
very gravelly - sandy loam
stratified
very fine sandy loam
weathered bedrock
sand
gravelly - fine sandy loam
silty clay loam
clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Property: 4800 San Vicente Boulevard, Los Angeles, CA 90019-2938

In response to the application for a policy of title insurance referenced herein, **Commonwealth Land Title Company** hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a policy or policies of title insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an exception herein or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations or Conditions of said policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Attachment One. The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Attachment One. Copies of the policy forms should be read. They are available from the office which issued this report.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

The policy(ies) of title insurance to be issued hereunder will be policy(ies) of Commonwealth Land Title Insurance Company, a Florida corporation.

Please read the exceptions shown or referred to herein and the exceptions and exclusions set forth in Attachment One of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects and encumbrances affecting title to the land.

Countersigned By:

Authorized Officer or Agent
Christopher Smith

Effective date: October 31, 2024 at 07:30 AM
The form of Policy or Policies of Title Insurance contemplated by this Report is:

ALTA Owner's Policy 2021

1. The estate or interest in the Land hereinafter described or referred to covered by this Report is:

APN: 5070-004-026

EXCEPTIONS

At the date hereof, items to be considered and exceptions to coverage in addition to the printed exceptions and exclusions in said policy form would be as follows:

A. Property taxes, including any personal property taxes and any assessments collected with taxes, are as follows:

Tax Identification No.:	5070-004-026
Fiscal Year:	2024 - 2025
1st Installment:	$14,206.79, OPEN
Penalty:	$1,420.67 (Delinquent after December 10)
2nd Installment:	$14,206.79, OPEN
Penalty and Cost:	$1,430.67 (Delinquent after April 10)
Homeowners Exemption:	$0.00
Code Area:	00401

B. The lien of supplemental or escaped assessments of property taxes, if any, made pursuant to the provisions of Chapter 3.5 (commencing with Section 75) or Part 2, Chapter 3, Articles 3 and 4, respectively, of the Revenue and Taxation Code of the State of California as a result of the transfer of title to the vestee named in Schedule A or as a result of changes in ownership or new construction occurring prior to Date of Policy.

C. Any matters arising with regard to assessments of documentary transfer tax related to the measures below.

NOTICE: Certain cities in Los Angeles County impose a documentary transfer tax that is in addition to the Los Angeles County documentary transfer tax of $.55 per $500 ($1.10 per $1,000) based upon the purchase price or value of the property transferred. Additional transfer tax is imposed by the following cities in Los Angeles County:

Culver City
Los Angeles
Pomona
Redondo Beach
Santa Monica

For details about these taxes, please contact your title officer or escrow officer. Please be advised that, in the City of Santa Monica, effective March 1, 2023, for transfers of property with a sale price or value of $8,000,000 or more, there will be a new, additional transfer tax of $5.60 per $100 ($56.00 per $1,000). In the City of Los Angeles, effective April 1, 2023, for transfers of property with a sale price or value of $5,000,000 up to $10,000,000, there will be a new, additional transfer tax of 4% of the entire sale price or value; for transfers with a sale price or value of $10,000,000 or more, there will be a new, additional transfer tax of 5.5% of the entire sale price or value.

1. Water rights, claims or title to water, whether or not disclosed by the public records.

2. Provision in a deed prohibiting the buying, selling or handling of intoxicating liquors on said Land:

   Recording No.: Book 941, Page 92, of Official Records

3. Easement(s) for the purpose(s) shown below and rights incidental thereto as disclosed by a Declaration by the Department of Water and Power of the City of Los Angeles

In Favor of:	The City of Los Angeles, as successor to Los Angeles Gas & Electric Corporation
Purposes:	Pole lines and conduits
Recording No.:	Book 14978, Page 77, of Official Records
Affects:	The rear 5 feet of said land.

4. The Land described herein is included within a project area of the Redevelopment Agency shown below, and that proceedings for the redevelopment of said project have been instituted under the Redevelopment Law (such redevelopment to proceed only after the adoption of the Redevelopment Plan) as disclosed by a document.

   Redevelopment Agency: The Mid-City Recovery Redevelopment Project
   Recording Date: May 16, 1996
   Recording No.: 96-771910, of Official Records

5. The Land described herein is included within a project area of the Redevelopment Agency shown below, and that proceedings for the redevelopment of said project have been instituted under the Redevelopment Law (such redevelopment to proceed only after the adoption of the Redevelopment Plan) as disclosed by a document.

   Redevelopment Agency: The Mid-City Recovery Redevelopment Project Area
   Recording Date: November 30, 2007
   Recording No.: 20072636437, of Official Records

6. Any rights of the parties in possession of a portion of, or all of, said Land, which rights are not disclosed by the public records.

   The Company will require, for review, a full and complete copy of any unrecorded agreement, contract, license and/or lease, together with all supplements, assignments and amendments thereto, before issuing any policy of title insurance without excepting this item from coverage.

   The Company reserves the right to except additional items and/or make additional requirements after reviewing said documents.

7. Any easements not disclosed by the public records as to matters affecting title to real property, whether or not said easements are visible and apparent.

8. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other matters which a correct survey would disclose and which are not shown by the public records.

9. Matters which may be disclosed by an inspection and/or by a correct ALTA/NSPS Land Title Survey of said Land that is satisfactory to the Company, and/or by inquiry of the parties in possession thereof.

10. Please be advised that our search did not disclose any open Deeds of Trust of record. If you should have knowledge of any outstanding obligation, please contact the Title Department immediately for further review prior to closing.

END OF EXCEPTIONS

PLEASE REFER TO THE "INFORMATIONAL NOTES" AND "REQUIREMENTS" SECTIONS WHICH FOLLOW FOR INFORMATION NECESSARY TO COMPLETE THIS TRANSACTION.

REQUIREMENTS

1. The Company will require the following documents for review prior to the issuance of any title insurance predicated upon a conveyance or encumbrance by the corporation named below:

   Name of Corporation: Pacific Title Archives, a California corporation

   a) A Copy of the corporation By-laws and Articles of Incorporation

   b) An original or certified copy of a resolution authorizing the transaction contemplated herein

   c) If the Articles and/or By-laws require approval by a 'parent' organization, a copy of the Articles and By-laws of the parent

   d) A current dated certificate of good standing from the proper governmental authority of the state in which the entity was created

   The Company reserves the right to add additional items or make further requirements after review of the requested documentation.

2. Unrecorded matters which may be disclosed by an Owner's Affidavit or Declaration. A form of the Owner's Affidavit/Declaration is attached to this Preliminary Report/Commitment. This Affidavit/Declaration is to be completed by the record owner of the land and submitted for review prior to the closing of this transaction. Your prompt attention to this requirement will help avoid delays in the closing of this transaction. Thank you.

   The Company reserves the right to add additional items or make further requirements after review of the requested Affidavit/Declaration.

3. Prior to the close of escrow, the Company requires a Statement of Information to be completed by the following party(s),

   Party(s): All Parties

   The Company reserves the right to add additional items or make further requirements after review of the requested Statement of Information.

END OF REQUIREMENTS

INFORMATIONAL NOTES

1. Note: None of the items shown in this report will cause the Company to decline to attach ALTA Endorsement Form 9 to an Extended Coverage Loan Policy, when issued.

2. Note: The Company is not aware of any matters which would cause it to decline to attach CLTA Endorsement Form 116 indicating that there is located on said Land a Commercial Property, known as 4800 San Vicente Boulevard, Los Angeles, CA 90019, to an Extended Coverage Loan Policy.

3. Note: The policy of title insurance will include an arbitration provision. The Company or the insured may demand arbitration. Arbitrable matters may include, but are not limited to, any controversy or claim between the Company and the insured arising out of or relating to this policy, any service of the Company in connection with its issuance or the breach of a policy provision or other obligation. Please ask your escrow or title officer for a sample copy of the policy to be issued if you wish to review the arbitration provisions and any other provisions pertaining to your Title Insurance coverage.

4. Notice: Please be aware that due to the conflict between federal and state laws concerning the cultivation, distribution, manufacture or sale of marijuana, the Company is not able to close or insure any transaction involving Land that is associated with these activities.

5. Pursuant to Government Code Section 27388.1, as amended and effective as of 1-1-2018, a Documentary Transfer Tax (DTT) Affidavit may be required to be completed and submitted with each document when DTT is being paid or when an exemption is being claimed from paying the tax. If a governmental agency is a party to the document, the form will not be required. DTT Affidavits may be available at a Tax Assessor-County Clerk-Recorder.

6. The following Exclusion(s) are added to preliminary reports, commitments and will be included as an endorsement in the following policies:

A. 2006 ALTA Owner's Policy (06-17-06).

6. Defects, liens, encumbrances, adverse claims, notices, or other matters not appearing in the Public Records but that would be disclosed by an examination of any records maintained by or on behalf of a Tribe or on behalf of its members.

B. 2006 ALTA Loan Policy (06-17-06)

8. Defects, liens, encumbrances, adverse claims, notices, or other matters not appearing in the Public Records but that would be disclosed by an examination of any records maintained by or on behalf of a Tribe or on behalf of its members.

9. Any claim of invalidity, unenforceability, or lack of priority of the lien of the Insured Mortgage based on the application of a Tribe's law resulting from the failure of the Insured Mortgage to specify State law as the governing law with respect to the lien of the Insured Mortgage.

C. ALTA Homeowner's Policy of Title Insurance (12-02-13) and CLTA Homeowner's Policy of Title Insurance (12-02-13).

10. Defects, liens, encumbrances, adverse claims, notices, or other matters not appearing in the Public Records but that would be disclosed by an examination of any records maintained by or on behalf of a Tribe or on behalf of its members.

D. ALTA Expanded Coverage Residential Loan Policy - Assessments Priority (04-02-15).

12. Defects, liens, encumbrances, adverse claims, notices, or other matters not appearing in the Public Records but that would be disclosed by an examination of any records maintained by or on behalf of a Tribe or on behalf of its members.

13. Any claim of invalidity, unenforceability, or lack of priority of the lien of the Insured Mortgage based on the application of a Tribe's law resulting from the failure of the Insured Mortgage to specify State law as the governing law with respect to the lien of the Insured Mortgage.

E. CLTA Standard Coverage Policy 1990 (11-09-18).

7. Defects, liens, encumbrances, adverse claims, notices, or other matters not appearing in the public records but that would be disclosed by an examination of any records maintained by or on behalf of a tribe or on behalf of its members.

8. Any claim of invalidity, unenforceability, or lack of priority of the lien of the insured mortgage based on the application of a tribe's law resulting from the failure of the insured mortgage to specify state law as the governing law with respect to the lien of the insured mortgage.

7. Note: There are NO conveyances affecting said Land recorded within 24 months of the date of this report.

END OF INFORMATIONAL NOTES

WIRE FRAUD ALERT

This Notice is not intended to provide legal or professional advice.
If you have any questions, please consult with a lawyer.

All parties to a real estate transaction are targets for wire fraud and many have lost hundreds of thousands of dollars because they simply relied on the wire instructions received via email, without further verification. **If funds are to be wired in conjunction with this real estate transaction, we strongly recommend verbal verification of wire instructions through a known, trusted phone number prior to sending funds.**

In addition, the following non-exclusive self-protection strategies are recommended to minimize exposure to possible wire fraud.

- **NEVER RELY** on emails purporting to change wire instructions. Parties to a transaction rarely change wire instructions in the course of a transaction.
- **ALWAYS VERIFY** wire instructions, specifically the ABA routing number and account number, by calling the party who sent the instructions to you. DO NOT use the phone number provided in the email containing the instructions, use phone numbers you have called before or can otherwise verify. **Obtain the number of relevant parties to the transaction as soon as an escrow account is opened.** DO NOT send an email to verify as the email address may be incorrect or the email may be intercepted by the fraudster.
- **USE COMPLEX EMAIL PASSWORDS** that employ a combination of mixed case, numbers, and symbols. Make your passwords greater than eight (8) characters. Also, change your password often and do NOT reuse the same password for other online accounts.
- **USE MULTI-FACTOR AUTHENTICATION** for email accounts. Your email provider or IT staff may have specific instructions on how to implement this feature.

For more information on wire-fraud scams or to report an incident, please refer to the following links:

FIDELITY NATIONAL FINANCIAL
CALIFORNIA PRIVACY NOTICE

Fidelity National Financial, Inc. and its majority-owned subsidiary companies (collectively, "FNF," "our," or "we") respect and are committed to protecting your privacy. This California Privacy Notice explains how we collect, use, and disclose Personal Information, when and to whom we disclose such information, and the rights you, as a California resident ("Consumer"), have regarding your Personal Information ("California Privacy Rights"). "Personal Information" means information that identifies, relates to, describes, and is reasonably capable of being associated with, or could reasonably be linked, directly or indirectly, with a particular consumer or household. If FNF has collected, used, or disclosed your Personal Information in relation to a job application or employment, independent contractor, officer, owner, or director relationship with FNF, FNF's practices are discussed in our Notice at Collection for Prospective Employees, available at ***Prospective California Employees*** (FNF.com/california-privacy).

Some subsidiaries maintain separate California Privacy Notices or privacy statements. If a subsidiary has a separate California Privacy Notice, it will be available on the subsidiary's website, and this California Privacy Notice does not apply.

Collection of categories of Personal Information:

In the preceding twelve (12) months FNF has collected, and will continue to collect, the following categories of Personal Information from you:

- Identifiers such as name, address, telephone number, IP address, email address, account name, social security number, driver's license number, state identification card, passport number, financial information, date of birth, or other similar identifiers;
- Characteristics of protected classifications under California or Federal law;
- Commercial information, including records of personal property, products or services purchased, or other purchasing or consuming histories;
- Internet or other electronic network activity information including, but not limited to browsing history on FNF websites, and information regarding a Consumer's interaction with an FNF website;
- Geolocation data;
- Unique biometric data used to authenticate a specific individual such as a fingerprint, retina, or iris image;
- Professional or employment information;
- Education Information.

This Personal Information is collected from the following sources:

- Information we receive from you on applications or other forms;
- Information about your transactions with FNF, our affiliates, or others;
- Information we receive from consumer reporting agencies and/or governmental entities, either directly from these entities, or from internet service providers, data analytics providers, and social networks;
- Information from the use of our websites and mobile applications;
- Information we receive directly from you related to doing business with us.

This Personal Information is collected for the following business purposes:

- To provide products and services to you or in connection with a transaction involving you;
- To perform a contract between FNF and the Consumer;
- To improve our products and services;
- To comply with legal obligations;
- To detect and protect against fraudulent or illegal activity;
- To communicate with you about FNF or our affiliates;
- To maintain an account with FNF or our affiliates;

- To maintain the security of our systems, tools, accounts, and applications;
- To verify and authenticate identities and credentials;
- To provide, support, personalize, and develop our websites, products, and services;
- To directly market our products to consumers;
- As described to you when collecting your Personal Information or as otherwise set forth in the California Consumer Privacy Act.

Disclosures of Personal Information for a business purpose:

In the preceding twelve (12) months FNF has disclosed, and will continue to disclose, the categories of Personal Information listed above for a business purpose. We may disclose Personal Information for a business purpose to the following categories of third parties:

- FNF affiliates and subsidiaries;
- Non-affiliated third parties, with your prior consent;
- Businesses in connection with the sale or other disposition of all or part of the FNF business and/or assets;
- Service Providers and non-affiliated third parties such as data analytics providers;
- Law enforcement or authorities in connection with an investigation, or in response to a subpoena or court order.

Sale of Personal Information:

In the preceding twelve (12) months, FNF has not sold or shared Personal Information. FNF does not sell or share Personal Information.

Retention Periods:

Due to the breadth and variety of data collected by FNF, it is not possible for us to provide you with a comprehensive list of timeframes during which we retain each category of Personal Information. FNF retains categories of information as reasonably necessary to satisfy the purpose for which we collect the information. This time period varies depending on the purpose for which we collected the information, the nature and frequency of our interactions and relationship with you, whether we have a legal basis to continue retaining the information, industry practices, the value and sensitivity of the information, and state and federal recordkeeping requirements.

Personal Information of minors:

FNF does not knowingly collect the Personal Information of minors. FNF does not sell or share the information of consumers under sixteen (16) years of age.

Sensitive Personal Information:

FNF does not use or disclose sensitive Personal Information for any purposes other than those specified in the California Consumer Privacy Act.

Right to know:

Consumers have a right to know about Personal Information collected, used, disclosed, shared, or sold, including the categories of such Personal Information, as well as the purpose for such collection, use, disclosure, sharing, or selling, categories of third parties to whom Personal Information is disclosed, shared or sold, and the specific pieces of Personal Information collected about the consumer. Consumers have the right to request FNF disclose what Personal Information it collected, used, and disclosed in the past twelve (12) months.

Right to request deletion:

Consumers have a right to request the deletion of their Personal Information, subject to certain exceptions.

Right to Correct:

Consumers have the right to correct inaccurate Personal Information.

Right to non-discrimination:

Consumers have a right not to be discriminated against because of exercising their consumer privacy rights. We will not discriminate against Consumers for exercising any of their California Privacy Rights.

Privacy Requests:

To exercise any of your California Privacy Rights, or if acting as an authorized agent on behalf of another individual, please visit *California Privacy Request* (FNF.com/california-privacy)**, call us Toll Free at 888-413-1748, or write to the address at the end of this notice.**

Upon making a California Privacy Request, FNF will verify the consumer's identity by requiring an account, loan, escrow number, or other identifying information from the consumer.

The above-rights are subject to any applicable rights and obligations including both Federal and California exemptions rendering FNF, or Personal Information collected by FNF, exempt from certain CCPA requirements.

A Consumer may use an Authorized Agent to submit any CCPA request. Authorized agents' requests will be processed like any other CCPA request, but FNF will also require the Consumer provide the agent written permission to make the request and verify his or her identity with FNF.

FNF website services for mortgage loans:

Certain FNF companies provide services to mortgage loan servicers, including hosting websites that collect customer information on behalf of mortgage loan servicers (the "Service Websites"). The Service Websites may contain links to both this Privacy Notice and the mortgage loan servicer or lender's privacy notice. The sections of this Privacy Notice describing the categories, sources, and uses of your Personal Information do not apply to the Service Websites. The mortgage loan servicer or lender's privacy notice governs use, disclosure, and access to your Information. FNF does not share Information collected through the Service Websites, except (1) as required or authorized by contract with the mortgage loan servicer or lender, or (2) as required by law or in the good-faith belief that such disclosure is necessary to comply with a legal process or applicable law, to enforce this Privacy Notice, or to protect the rights, property, or safety of FNF or the public.

California Privacy Notice - Effective Date:

This California Privacy Notice was last updated on July 1, 2024.

Contact for more information:

For questions or concerns about FNF's California Privacy Notice and privacy practices, or to exercise any of your California Privacy Rights, please visit ***California Privacy*** (FNF.com/california-privacy), call Toll Free 888-413-1748, or contact us by mail at the below address.

CALIFORNIA LAND TITLE ASSOCIATION
STANDARD COVERAGE POLICY - 1990 (11-09-18)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.

   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.

2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.

3. Defects, liens, encumbrances, adverse claims or other matters:

   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;

   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;

   (c) resulting in no loss or damage to the insured claimant;

   (d) attaching or created subsequent to Date of Policy; or

   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.

4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.

5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.

6. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.

   Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.

2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.

3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.

4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.

5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.

6. Any lien or right to a lien for services, labor or material unless such lien is shown by the public records at Date of Policy.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART II

(*Variable exceptions such as taxes, easements, CC&R's, etc., are inserted here*)

ATTACHMENT ONE
(CONTINUED)

CALIFORNIA LAND TITLE ASSOCIATION
STANDARD COVERAGE OWNER'S POLICY (02-04-22)
EXCLUSIONS FROM COVERAGE

The following matters are excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) that restricts, regulates, prohibits, or relates to:
   i. the occupancy, use, or enjoyment of the Land;
   ii. the character, dimensions, or location of any improvement on the Land;
   iii. the subdivision of land; or
   iv. environmental remediation or protection.
   b. any governmental forfeiture, police, regulatory, or national security power.
   c. the effect of a violation or enforcement of any matter excluded under Exclusion 1.a. or 1.b.

   Exclusion 1 does not modify or limit the coverage provided under Covered Risk 5 or 6.
2. Any power of eminent domain. Exclusion 2 does not modify or limit the coverage provided under Covered Risk 7.
3. Any defect, lien, encumbrance, adverse claim, or other matter:
   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at the Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to the Date of Policy (Exclusion 3.d. does not modify or limit the coverage provided under Covered Risk 9 or 10); or
   e. resulting in loss or damage that would not have been sustained if consideration sufficient to qualify the Insured named in Schedule A as a bona fide purchaser had been given for the Title at the Date of Policy.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights law, that the transaction vesting the Title as shown in Schedule A is a:
   a. fraudulent conveyance or fraudulent transfer;
   b. voidable transfer under the Uniform Voidable Transactions Act; or
   c. preferential transfer:
      i. to the extent the instrument of transfer vesting the Title as shown in Schedule A is not a transfer made as a contemporaneous exchange for new value; or
      ii. for any other reason not stated in Covered Risk 9.b.
5. Any claim of a PACA-PSA Trust. Exclusion 5 does not modify or limit the coverage provided under Covered Risk 8.
6. Any lien on the Title for real estate taxes or assessments imposed or collected by a governmental authority that becomes due and payable after the Date of Policy.

   Exclusion 6 does not modify or limit the coverage provided under Covered Risk 2.b.

7 Any discrepancy in the quantity of the area, square footage, or acreage of the Land or of any improvement to the Land.

EXCEPTIONS FROM COVERAGE

Some historical land records contain Discriminatory Covenants that are illegal and unenforceable by law. This policy treats any Discriminatory Covenant in a document referenced in Schedule B as if each Discriminatory Covenant is redacted, repudiated, removed, and not republished or recirculated. Only the remaining provisions of the document are excepted from coverage.

This policy does not insure against loss or damage and the Company will not pay costs, attorneys' fees, or expenses resulting from the terms and conditions of any lease or easement identified in Schedule A, and the following matters:

PART I

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records at Date of Policy but that could be (a) ascertained by an inspection of the Land, or (b) asserted by persons or parties in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records at Date of Policy.
4. Any encroachment, encumbrance, violation, variation, easement, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records at Date of Policy.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor, material or equipment unless such lien is shown by the Public Records at Date of Policy.
7. Any claim to (a) ownership of or rights to minerals and similar substances, including but not limited to ores, metals, coal, lignite, oil, gas, uranium, clay, rock, sand, and gravel located in, on, or under the Land or produced from the Land, whether such ownership or rights arise by lease, grant, exception, conveyance, reservation, or otherwise; and (b) any rights, privileges, immunities, rights of way, and easements associated therewith or appurtenant thereto, whether or not the interests or rights excepted in (a) or (b) appear in the Public Records or are shown in Schedule B.

PART II

(*Variable exceptions such as taxes, easements, CC&R's, etc., are inserted here*)

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (7-01-21)
EXCLUSIONS FROM COVERAGE

The following matters are excluded from the coverage of this policy and We will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) that restricts, regulates, prohibits, or relates to:
   i. the occupancy, use, or enjoyment of the Land;
   ii. the character, dimensions, or location of any improvement on the Land;
   iii. the subdivision of land; or
   iv. environmental remediation or protection.
   b. any governmental forfeiture, police, or regulatory, or national security power.
   c. the effect of a violation or enforcement of any matter excluded under Exclusion 1.a. or 1.b.

   Exclusion 1 does not modify or limit the coverage provided under Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23, or 27.
2. Any power to take the Land by condemnation. Exclusion 2 does not modify or limit the coverage provided under Covered Risk 17.
3. Any defect, lien, encumbrance, adverse claim, or other matter:
   a. created, suffered, assumed, or agreed to by You;
   b. not Known to Us, not recorded in the Public Records at the Date of Policy, but Known to You and not disclosed in writing to Us by You prior to the date You became an Insured under this policy;
   c. resulting in no loss or damage to You;
   d. attaching or created subsequent to the Date of Policy (Exclusion 3.d. does not modify or limit the coverage provided under Covered Risk 5, 8.f., 25, 26, 27, 28, or 32); or
   e. resulting in loss or damage that would not have been sustained if You paid consideration sufficient to qualify You as a bona fide purchaser of the Title at the Date of Policy.
4. Lack of a right:
   a. to any land outside the area specifically described and referred to in Item 3 of Schedule A; and
   b. in any street, road, avenue, alley, lane, right-of-way, body of water, or waterway that abut the Land.

   Exclusion 4 does not modify or limit the coverage provided under Covered Risk 11 or 21.
5. The failure of Your existing structures, or any portion of Your existing structures, to have been constructed before, on, or after the Date of Policy in accordance with applicable building codes. Exclusion 5 does not modify or limit the coverage provided under Covered Risk 14 or 15.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights law, that the transfer of the Title to You is a:
   a. fraudulent conveyance or fraudulent transfer;
   b. voidable transfer under the Uniform Voidable Transactions Act; or
   c. preferential transfer:
      i. to the extent the instrument of transfer vesting the Title as shown in Schedule A is not a transfer made as a contemporaneous exchange for new value; or
      ii. for any other reason not stated in Covered Risk 30.
7. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
8. Negligence by a person or an entity exercising a right to extract or develop oil, gas, minerals, groundwater, or any other subsurface substance.
9. Any lien on Your Title for real estate taxes or assessments, imposed or collected by a governmental authority that becomes due and payable after the Date of Policy. Exclusion 9 does not modify or limit the coverage provided under Covered Risk 8.a or 27.
10. Any discrepancy in the quantity of the area, square footage, or acreage of the Land or of any improvement to the Land.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:

- For Covered Risk 16, 18, 19 and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1.00% of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$ 10,000.00
Covered Risk 18:	1.00% of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 19:	1.00% of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 21:	1.00% of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$ 5,000.00

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (12-02-13)

EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   a. building;
   b. zoning;
   c. land use;
   d. improvements on the Land;
   e. land division; and
   f. environmental protection.

   This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.

   This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.
8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake or subsidence.
9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:

- For Covered Risk 16, 18, 19 and 21, Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1.00% of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$ 10,000.00
Covered Risk 18:	1.00% of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 19:	1.00% of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 21:	1.00% of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$ 5,000.00

ALTA OWNER'S POLICY (07-01-2021)

EXCLUSIONS FROM COVERAGE

The following matters are excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) that restricts, regulates, prohibits, or relates to:
   i. the occupancy, use, or enjoyment of the Land;
   ii. the character, dimensions, or location of any improvement on the Land;
   iii. the subdivision of land; or
   iv. environmental remediation or protection.
   b. any governmental forfeiture, police, regulatory, or national security power.
   c. the effect of a violation or enforcement of any matter excluded under Exclusion 1.a. or 1.b.

   Exclusion 1 does not modify or limit the coverage provided under Covered Risk 5 or 6.
2. Any power of eminent domain. Exclusion 2 does not modify or limit the coverage provided under Covered Risk 7.
3. Any defect, lien, encumbrance, adverse claim, or other matter:
   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at the Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to the Date of Policy (Exclusion 3.d. does not modify or limit the coverage provided under Covered Risk 9 or 10); or
   e. resulting in loss or damage that would not have been sustained if consideration sufficient to qualify the Insured named in Schedule A as a bona fide purchaser had been given for the Title at the Date of Policy.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights law, that the transaction vesting the Title as shown in Schedule A is a:
   a. fraudulent conveyance or fraudulent transfer;
   b. voidable transfer under the Uniform Voidable Transactions Act; or
   c. preferential transfer:
      i. to the extent the instrument of transfer vesting the Title as shown in Schedule A is not a transfer made as a contemporaneous exchange for new value; or
      ii. for any other reason not stated in Covered Risk 9.b.
5. Any claim of a PACA-PSA Trust. Exclusion 5 does not modify or limit the coverage provided under Covered Risk 8.
6. Any lien on the Title for real estate taxes or assessments, imposed or collected by a governmental authority that becomes due and payable after the Date of Policy. Exclusion 6 does not modify or limit the coverage provided under Covered Risk 2.b.
7. Any discrepancy in the quantity of the area, square footage, or acreage of the Land or of any improvement to the Land.

EXCEPTIONS FROM COVERAGE

Some historical land records contain Discriminatory Covenants that are illegal and unenforceable by law. This policy treats any Discriminatory Covenant in a document referenced in Schedule B as if each Discriminatory Covenant is redacted, repudiated, removed, and not republished or recirculated. Only the remaining provisions of the document are excepted from coverage.

This policy does not insure against loss or damage and the Company will not pay costs, attorneys' fees, or expenses resulting from the terms and conditions of any lease or easement identified in Schedule A, and the following matters:

NOTE: The 2021 ALTA Owner's Policy may be issued to afford either Standard Coverage or Extended Coverage. In addition to variable exceptions such as taxes, easements, CC&R's, etc., the Exceptions from Coverage in a Standard Coverage policy will also include the Western Regional Standard Coverage Exceptions listed as 1 through 7 below:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records at Date of Policy but that could be (a) ascertained by an inspection of the Land or (b) asserted by persons or parties in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records at Date of Policy.
4. Any encroachment, encumbrance, violation, variation, easement, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records at Date of Policy.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor, material or equipment unless such lien is shown by the Public Records at Date of Policy.
7. Any claim to (a) ownership of or rights to minerals and similar substances, including but not limited to ores, metals, coal, lignite, oil, gas, uranium, clay, rock, sand, and gravel located in, on, or under the Land or produced from the Land, whether such ownership or rights arise by lease, grant, exception, conveyance, reservation, or otherwise; and (b) any rights, privileges, immunities, rights of way, and easements associated therewith or appurtenant thereto, whether or not the interests or rights excepted in (a) or (b) appear in the Public Records or are shown in Schedule B.

2006 ALTA OWNER'S POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
   (a) a fraudulent conveyance or fraudulent transfer; or
   (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees, or expenses that arise by reason of:

NOTE: The 2006 ALTA Owner's Policy may be issued to afford either Standard Coverage or Extended Coverage. In addition to variable exceptions such as taxes, easements, CC&R's, etc., the Exceptions from Coverage in a Standard Coverage policy will also include the Western Regional Standard Coverage Exceptions listed below as 1 through 7 below:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records at Date of Policy but that could be (a) ascertained by an inspection of the Land, or (b) asserted by persons or parties in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records at Date of Policy.
4. Any encroachment, encumbrance, violation, variation, easement, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records at Date of Policy.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor, material or equipment unless such lien is shown by the Public Records at Date of Policy.]
7. Any claim to (a) ownership of or rights to minerals and similar substances, including but not limited to ores, metals, coal, lignite, oil, gas, uranium, clay, rock, sand, and gravel located in, on, or under the Land or produced from the Land, whether such ownership or rights arise by lease, grant, exception, conveyance, reservation, or otherwise; and (b) any rights, privileges, immunities, rights of way, and easements associated therewith or appurtenant thereto, whether or not the interests or rights excepted in (a) or (b) appear in the Public Records or are shown in Schedule B.

Notice of Available Discounts

Pursuant to Section 2355.3 in Title 10 of the California Code of Regulations Fidelity National Financial, Inc. and its subsidiaries ("FNF") must deliver a notice of each discount available under our current rate filing along with the delivery of escrow instructions, a preliminary report or commitment. Please be aware that the provision of this notice does not constitute a waiver of the consumer's right to be charged the filed rate. As such, your transaction may not qualify for the below discounts.

You are encouraged to discuss the applicability of one or more of the below discounts with a Company representative. These discounts are generally described below; consult the rate manual for a full description of the terms, conditions and requirements for such discount. These discounts only apply to transactions involving services rendered by the FNF Family of Companies. This notice only applies to transactions involving property improved with a one-to-four family residential dwelling.

Not all discounts are offered by every FNF Company. The discount will only be applicable to the FNF Company as indicated by the named discount.

FNF Underwritten Title Companies
CTC - Chicago Title Company
CLTC - Commonwealth Land Title Company
FNTC - Fidelity National Title Company of California
FNTCCA - Fidelity National Title Company of California
TICOR - Ticor Title Company of California
LTC - Lawyer's Title Company
SLTC - ServiceLink Title Company

Underwritten by FNF Underwriters
CTIC - Chicago Title Insurance Company
CLTIC - Commonwealth Land Title Insurance Company
FNTIC - Fidelity National Title Insurance Company
CTIC - Chicago Title Insurance Company

Available Discounts

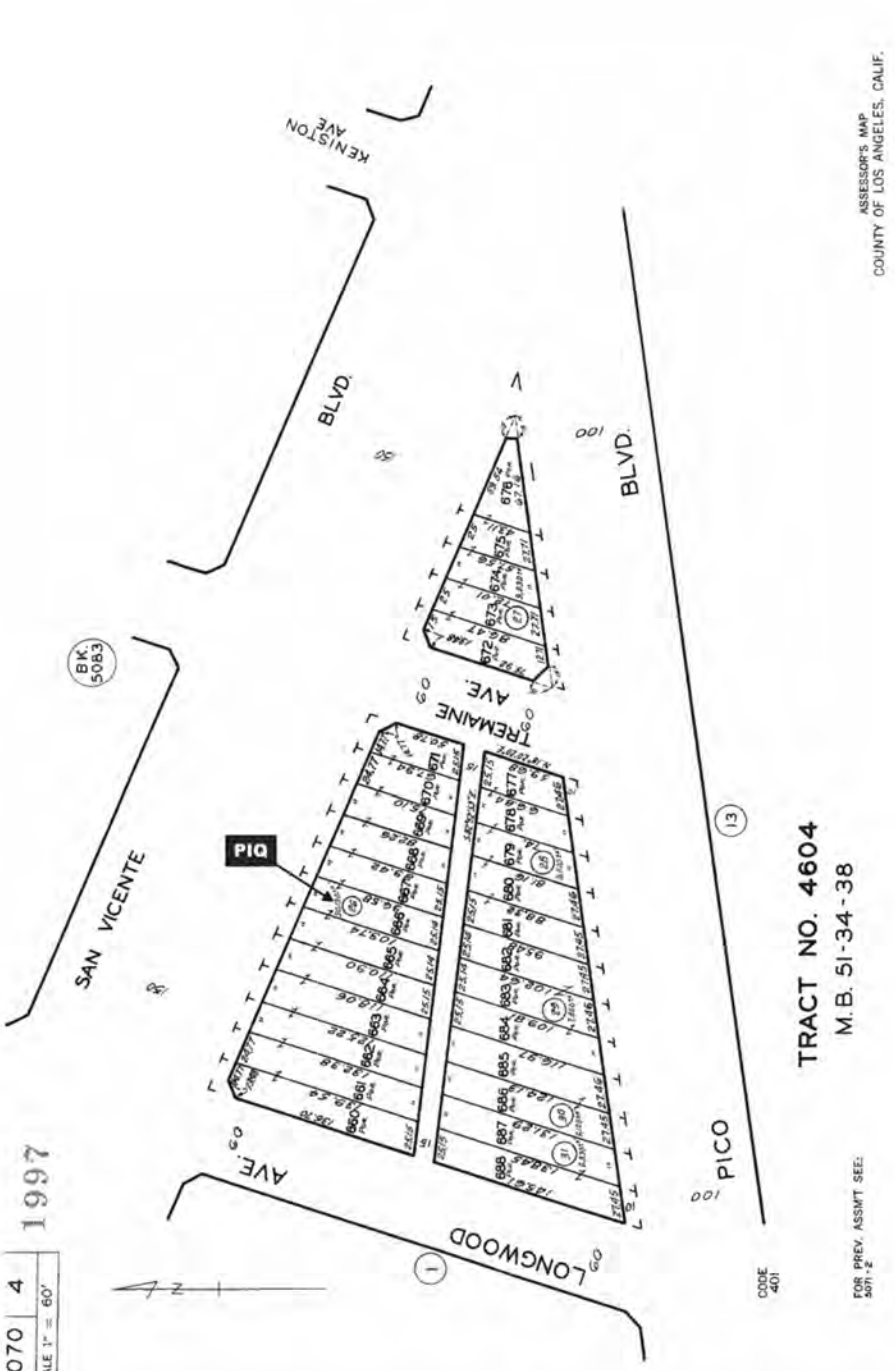

DISASTER LOANS (CTIC, CLTIC, FNTIC)
The charge for a Lender's Policy (Standard or Extended coverage) covering the financing or refinancing by an owner of record, within twenty-four (24) months of the date of a declaration of a disaster area by the government of the United States or the State of California on any land located in said area, which was partially or totally destroyed in the disaster, will be fifty percent (50%) of the appropriate title insurance rate.

CHURCHES OR CHARITABLE NON-PROFIT ORGANIZATIONS (CTIC, FNTIC)
On properties used as a church or for charitable purposes within the scope of the normal activities of such entities, provided said charge is normally the church's obligation the charge for an owner's policy shall be fifty percent (50%) to seventy percent (70%) of the appropriate title insurance rate, depending on the type of coverage selected. The charge for a lender's policy shall be forty percent (40%) to fifty percent (50%) of the appropriate title insurance rate, depending on the type of coverage selected.

MILITARY DISCOUNT RATE
Upon the Company being advised in writing and prior to the closing of the transaction that an active duty, honorably separated, or retired member of the United States Military or Military Reserves or National Guard is applicable, will be entitled to a discount equal to fifteen percent (15%) of the otherwise applicable rates such party would be charged for the title insurance policies.

Minimum charge: Four Hundred Twenty-Five And No/100 Dollars ($425.00)

The Company may require appropriate proof of eligibility from the parties to the transaction verifying they are entitled to the discount as described. No other discounts or special rates, or combination of discounts or special rates, shall be applicable.

This map/plat is being furnished as an aid in locating the herein described Land in relation to adjoining streets, natural boundaries and other land, and is not a survey of the land depicted. Except to the extent a policy of title insurance is expressly modified by endorsement, if any, the Company does not insure dimensions, distances, location of easements, acreage or other matters shown thereon.

Order: 932404187
Doc: CALOSA:MASS 5070-00004

Requested By: crcusi, Printed: 11/15/2024 8:07 AM

OWNER'S DECLARATION

Escrow No.: 932404187
Property: 4800 San Vicente Boulevard, Los Angeles, CA 90019-2938

The undersigned hereby declares as follows:

1. (Fill in the applicable paragraph and strike the other)

   A. Declarant ("Owner") is the owner or lessee, as the case may be, of certain premises located at 4800 San Vicente Boulevard, Los Angeles, CA 90019-2938, further described as follows: See Preliminary Report/Commitment No. 932404187 for full legal description (the "Land").

   B. Declarant is the _____ of _____ ("Owner"), which is the owner or lessee, as the case may be, of certain premises located at 4800 San Vicente Boulevard, Los Angeles, CA 90019-2938, further described as follows: See Preliminary Report/Commitment No. 932404187 for full legal description (the "Land").

2. (Fill in the applicable paragraph and strike the other)

   A. During the period of six (6) months immediately preceding the date of this declaration no work has been done, no surveys or architectural or engineering plans have been prepared, and no materials have been furnished in connection with the erection, equipment, repair, protection or removal of any building or other structure on the Land or in connection with the improvement of the Land in any manner whatsoever.

   B. During the period of six (6) months immediately preceding the date of this declaration certain work has been done and materials furnished in connection with _____ upon the Land in the approximate total sum of $_____, but no work whatsoever remains to be done and no materials remain to be furnished to complete the construction in full compliance with the plans and specifications, nor are there any unpaid bills incurred for labor and materials used in making such improvements or repairs upon the Land, or for the services of architects, surveyors or engineers, except as follows: _____. Owner, by the undersigned Declarant, agrees to and does hereby indemnify and hold harmless Commonwealth Land Title Insurance Company against any and all claims arising therefrom.

3. Owner has not previously conveyed the Land; is not a debtor in bankruptcy (and if a partnership, the general partner thereof is not a debtor in bankruptcy); and has not received notice of any pending court action affecting the title to the Land.

4. Except as shown in the above referenced Preliminary Report/Commitment, there are no unpaid or unsatisfied mortgages, deeds of trust, Uniform Commercial Code financing statements, regular assessments, special assessments, periodic assessments or any assessment from any source, claims of lien, special assessments, or taxes that constitute a lien against the Land or that affect the Land but have not been recorded in the public records. There are no violations of the covenants, conditions and restrictions as shown in the above referenced Preliminary Report/Commitment.

5. The Land is currently in use as _____; _____ occupy/occupies the Land; and the following are all of the leases or other occupancy rights affecting the Land:

   _____

6. There are no other persons or entities that assert an ownership interest in the Land, nor are there unrecorded easements, claims of easement, or boundary disputes that affect the Land.

7. There are no outstanding options to purchase or rights of first refusal affecting the Land.

8. Between the most recent Effective Date of the above referenced Preliminary Report/Commitment and the date of recording of the Insured Instrument(s), Owner has not taken or allowed, and will not take or allow, any action or inaction to encumber or otherwise affect title to the Land.

OWNER'S DECLARATION

(continued)

9. That the undersigned has not received any written notice of violation of any covenants, conditions or restrictions, if any, affecting the Land.

10. That there are no outstanding unpaid sellers or suppliers of PACA/PASA commodities or products incurred by the Lessee, except:

    _____

    _____

11. That no notices of claim or notices of intent to preserve claim rights have been received by the Company from PACA/PASA sellers or suppliers of the Lessee, except:

    _____

    _____

This declaration is made with the intention that Commonwealth Land Title Insurance Company (the "Company") and its policy issuing agents will rely upon it in issuing their title insurance policies and endorsements. Owner, by the undersigned Declarant, agrees to indemnify the Company against loss or damage (including attorneys' fees, expenses, and costs) incurred by the Company as a result of any untrue statement made herein. Additionally, Owner, by the undersigned Declarant, agrees to indemnify and hold the Company harmless during the gap period between the last title examination of the Land that was conducted by, for and/or on behalf of the Company, and the time when the deed, assignments and any other documents creating priority of title are recorded in connection with the sale and/or transfer of the Land.

I declare under penalty of perjury that the foregoing is true and correct and that this declaration was executed on November 18, 2024 at 06:44 PM.

Subject: Phase II Environmental Site Assessment
4800 San Vicente Boulevard, Los Angeles, California 90019

Dear Mr. Hubbard,

Hazard Management Consulting, Inc. (HMC), has prepared this report to present the results of a Phase II Environmental Site Assessment (ESA) conducted at the property located at 4800 San Vicente Boulevard in Los Angeles, California (the Site; Figure 1).

BACKGROUND

The Site currently consists of an approximately 0.7-acre property that contains one commercial building occupied by Pacific Title Archives as an audio, film, and digital media storage and preservation facility. The Site was vacant until approximately 1929 and historical uses since then have included the following:

- Gasoline station beginning around 1929.
- Residential from approximately 1948 to 1952.
- Hollywood Clothes Manufacturers from 1958 to 1976.
- Pacific Title Archives from 1981 to present.

HMC performed a Phase I ESA for the Site in February 2025 and identified the following Recognized Environmental Conditions (RECs) or environmental considerations (HMC, 2025):

1. The former use of the Site as a gasoline station and uncertainty related to the potential for dry cleaning operations by Hollywood Clothes Manufacturers were considered RECs.
2. The Site is located within the Methane Zone designated by the City of Los Angeles Department of Building and Safety (LADBS). The potential presence of subsurface gases including methane and hydrogen sulfide may pose a vapor intrusion concern and was therefore considered a REC.

3. HMC identified suspect asbestos-containing materials (ACMs) at the Site.

Based on the findings of the Phase I ESA, HMC recommended conducting (1) a Phase II ESA to assess the potential presence of hazardous materials in soil and soil vapor to investigate historical on-Site activities; and (2) an asbestos survey prior to any demolition or disturbance of suspect ACMs. This report summarizes the results of the Phase II investigation conducted in June 2025.

OBJECTIVES

The objectives of the work summarized herein were to (i) assess whether significant releases of hazardous substances related to historical Site uses, including total petroleum hydrocarbons (TPH), volatile organic compounds (VOCs), and metals, have occurred at the Site and (ii) identify the potential presence of hazardous concentrations of naturally occurring subsurface gases in soil vapor. Potential impacts were evaluated assuming that the Site would continue to be used for commercial/industrial (C/I) purposes. It should be noted that sampling and analysis of methane in soil vapor was performed as a screening-level evaluation and was not performed in strict accordance with LADBS methane testing standards for mitigation system design.

DATA EVALUATION CRITERIA

Data collected as part of the Phase II ESA were evaluated against several commonly used criteria applied by the State of California. Currently, there are no generally applicable universal standards for environmental data similar to that collected as part of this investigation. Available criteria exist for specific scenarios or uses including future land use and to assess whether the sampled material will need to be removed from the Site for disposal purposes. The following soil and soil vapor criteria for C/I land use were used to evaluate the data.

Soil Criteria

Soil sampling results were compared to State and Federal screening levels to assess whether detectable concentrations may present a possible human health risk to C/I occupants, future occupants, and the environment. Laboratory analytical results were compared to the following criteria:

- California Department of Toxic Substances Control (DTSC) Soil Screening Levels for C/I land use (DTSC-SLi).
- U.S. Environmental Protection Agency (EPA) Regional Screening Levels for industrial land use (EPA-RSLi).

- San Francisco Bay Regional Water Quality Control Board (SFBRWQCB) Environmental Screening Levels for C/I shallow soils for direct exposure human health risk (SFBRWQCB-ESLi).

The DTSC-SLi and EPA-RSLi screening values provide human health risk criteria based on dermal contact, ingestion, and inhalation for VOCs and metals. As is customary in Southern California, SFBRWQCB-ESLi screening values were only used for the evaluation of TPH in soil. Soil analytical results for TPH as gasoline (TPHg), diesel (TPHd), and motor oil (TPHmo) were compared to SFBRWQCB-ESLi for direct exposure human health risk in shallow soils. Applicable screening values are referenced and presented in Tables 1A and 1B of this report.

Metals are naturally occurring within soil and sediments. With the exception of arsenic, metals data for soil were compared to the human health risk criteria set forth in DTSC-SLi and EPA-RSLi screening values. Due to the granitic nature of California geology, naturally occurring background concentrations of arsenic typically exceed the human health risk guidelines published by the State and federal agencies. As such, arsenic data for soil was evaluated based on a 12 milligrams per kilogram (mg/kg) background threshold, as published in DTSC Human and Ecological Risk Office (HERO) Note 11 (DTSC HERO, 2020). These background concentrations are presented in Table 1B.

Soil Vapor Criteria

DTSC and EPA have established screening levels for ambient air at C/I properties based on human health risk criteria for VOCs. Subsurface soil vapor screening levels (DTSC-SLi and EPA-RSLi) were calculated by dividing the published ambient air screening level concentrations using an EPA-recommended attenuation factor of 0.03 (33 to 1). The SFBRWQCB provides screening levels for ambient air, sub-slab vapor, and soil vapor (SFBRWQCB-ESLi) based on human health risk criteria for VOCs in C/I settings.

It should be noted that these screening levels are used as guidelines to assess whether a potential human health risk might be present due to vapor intrusion. However, the values are extremely conservative and do not necessarily indicate the presence of a risk, but rather that additional Site evaluation, which could include engineering controls or remediation, is warranted. The soil vapor screening level guidelines for VOCs are referenced and presented in Table 2A.

Ordinance number 175790 (Methane Code) of the City of Los Angeles Municipal Code establishes citywide methane mitigation requirements and construction standards to control methane intrusion into buildings. LADBS is the regulatory authority defined by the Methane Code to set site testing and

mitigation standards. Methane mitigation system requirements are based on design methane concentrations and pressures, ranging from Level I (least stringent) to Level V (most stringent). The Level V design methane concentration is referenced and presented in Table 2B.

SCOPE OF WORK

The Phase II ESA was conducted on 3 June 2025 and included the soil and soil vapor sampling scope of work described in the following subsections. The boring and sampling locations are shown on Figure 2.

Field Procedures

Before beginning the field activities, the boring locations were marked at the property and Underground Service Alert was notified to mark underground utilities. In addition, boring locations were cleared for underground utilities by a private geophysical locator. The Los Angeles County Department of Public Health (LACDPH) does not require a permit for soil borings that are less than 10 feet deep or contain soil vapor probes installed within the vadose zone. Therefore, LACDPH permits were not required to complete the Phase II ESA scope of work.

The executed drilling program consisted of five soil borings (B1 through B5) drilled to total depth of 5 feet below ground surface (bgs) for collection of soil samples and installation of temporary 5-foot-deep soil vapor probes at each boring location. The soil borings were advanced using a direct-push technology drill rig. Soil was retrieved in acetate sleeves from each boring for visual logging, field screening using a photoionization detector, and collection of soil samples for laboratory analysis. Soil samples were collected from soil cores using Terra Core® sampling kits in accordance with EPA Method 5035 and unpreserved glass jars provided by the analytical laboratory. Preservatives necessary for the analyses performed were used in accordance with EPA laboratory method guidance and provided in the bottles by the analytical laboratory.

Soil vapor probe installation and sampling was performed in general accordance with procedures described in the DTSC advisory for active soil vapor investigations (DTSC, 2015). Temporary soil vapor probes were constructed in each boring using a 10-inch-long airstone filter and 1/4-inch-outside diameter Nylaflow tubing. The filter was set within 12 inches of surrounding sand filter pack. Approximately 6 inches of dry granular bentonite was placed above the sand pack and hydrated bentonite was placed to the ground surface. The tubing had a gas-tight fitting at the surface to prevent infiltration of ambient air.

Field personnel allowed for a minimum 2-hour equilibration period prior to soil vapor sampling. Sampling was not conducted within 5 days after a significant rainfall event (defined as at least 1/2 inch of rainfall during a 24-hour period). Before purging or sampling, field personnel performed a shut-in test to check for leaks in the above-ground sampling system by confirming vacuum was maintained for at least 1 minute. Field personnel performed a leak test by applying 1,1-difluoroethane as a tracer compound to each sample location prior to sample collection to ensure the proper seal of the probe. A default of 3 purge volumes was extracted at each location prior to sampling. Soil vapor was removed from each soil vapor probe using an oil-less vacuum pump at a maximum flow rate of 200 milliliters per minute. Applied vacuum at the probe was kept at less than 100 inches of water column. Soil vapor samples were collected for laboratory testing using batch-certified 1-liter passivated stainless-steel canisters provided by the analytical laboratory.

After completing sample collection, temporary vapor probes were removed manually, and boring surfaces were completed with concrete to match surrounding conditions. Investigation-derived waste soil was containerized in a labelled 55-gallon drum for off-Site disposal at a licensed facility.

The field activities for the Phase II investigation including the sampling and analytical program are summarized in the sections below.

Soil Testing

- Collected 5-foot-deep soil samples (5 samples) at 5 soil boring locations (B1 through B5).
- Submitted a total of 5 soil samples to SunStar Laboratories, Inc. (SunStar), a State-certified laboratory in Lake Forest, California, for the following analyses:
    - TPHg, TPHd, and TPHmo by EPA Method 8015B.
    - VOCs by EPA Method 8260B.
    - California Code of Regulations Title 22 (CAM 17) metals by EPA Methods 6010B and 7471.

Soil Vapor Testing

- Collected 5-foot soil vapor samples at temporary soil vapor probe locations B1 through B5 plus one replicate sample for quality assurance/quality control (total of 6 soil vapor samples).
- Submitted a total of 6 soil vapor samples to SunStar for the following analyses:
    - VOCs by EPA Method TO-15.
    - Methane by ASTM International Method D1946.

DISCUSSION OF RESULTS

The following sections summarize the laboratory analytical results for soil and soil vapor samples collected as part of the Phase II ESA. Laboratory analytical reports and chain-of-custody forms for the soil and soil vapor data are included in Attachment B.

Soil Sampling Results

Soil analytical results indicated that TPH and VOCs were generally non-detect above laboratory reporting limits (RLs). As summarized in Table 1A, detectable concentrations of TPHmo, acetone, and methyl ethyl ketone were below regulatory C/I screening criteria. A lone detection of methyl ethyl ketone at boring B4 was detected above the EPA RSL for soil leaching to groundwater. Based on the isolated detection and an estimated depth to groundwater greater than 40 feet bgs, it is unlikely that methyl ethyl ketone concentrations at boring B4 pose a significant risk to groundwater (HMC, 2025).

Soil analytical results indicated that metals were either (1) non-detect above laboratory RLs, (2) present at levels that were below regulatory C/I screening criteria, or (3) below typical background levels in California soils, as summarized in Table 1B. A lone detection of silver at boring B4 was detected above the typical California background level and EPA RSL for soil leaching to groundwater. Based on the isolated detection and an estimated depth to groundwater greater than 40 feet bgs, it is unlikely that silver concentrations at boring B4 pose a significant risk to groundwater.

Soil Vapor Results

As summarized in Table 2A, soil vapor analytical results indicated that VOCs were either non-detect above laboratory RLs or present at levels that were below regulatory C/I screening criteria, except 1,3-butadiene, benzene, and chloroform in select samples. The relatively low magnitude and sparse detections of 1,3-butadiene and benzene do not show a discernable pattern of contamination and therefore, do not appear indicative of a significant release at the Site or the result of the migration of impacts from off-Site sources. Petroleum hydrocarbons are commonly detected in ambient outdoor air at levels above indoor air screening levels. The relatively minor residual soil vapor concentrations of 1,3-butadiene and benzene at the Site do not appear to indicate a vapor intrusion condition. Furthermore, the ubiquitous presence of these hydrocarbons in background ambient air is more likely to be the primary risk driver to indoor air than migration via the vapor intrusion pathway. The presence of chloroform in soil vapor is often associated with municipal water treatment. Concentrations of chloroform in soil vapor are likely related to the Site's potable water system and not the result of a hazardous chemicals release.

As summarized in Table 2B, methane was detected at 3 of 5 soil vapor sampling locations (B3, B4, and B5) at concentrations ranging from 13 to 34 percent by volume. Concentrations of methane at locations B3, B4, and B5 were above the lower explosive limit (LEL) of 5 percent by volume and the concentrations at locations B3 and B4 beneath the Site building were above the upper explosive limit (UEL) of 15 percent by volume. At the remaining locations (B1 and B2), methane was non-detect above laboratory RLs.

Sampling and analysis of methane in soil vapor was performed as a screening-level evaluation and was not performed in strict accordance with LADBS methane testing standards. As a preliminary comparison, the detectable methane concentrations at locations B3, B4, and B5 were above the LADBS Level V design mitigation standard of 1.25 percent by volume. The laboratory RLs at locations B1 (1.5 percent) and B2 (1.6 percent) were higher than the LADBS Level V standard. As outlined in the Methane Code, methane concentrations at this magnitude would require the highest level of active mitigation system, including a sub-slab mechanical extraction system, pressure sensors, impervious membrane, ground floor ventilation, and a gas detection and alarm system.

CONCLUSIONS

This report presents the results of a Phase II ESA conducted to evaluate potential impacts to soil and soil vapor at the Site that may be related to historical Site use or naturally occurring subsurface gases. The results of the Phase II ESA support the following observations, findings, and/or conclusions

1. Soil analytical results indicated that TPH, VOCs, and metals were below regulatory C/I screening criteria. Overall results do not identify the presence of a significant release of hazardous chemicals.
2. Soil vapor analytical results for VOCs were generally below regulatory C/I screening criteria, except for sparse and relatively low magnitude concentrations of 1,3-butadiene, benzene, and chloroform. Overall VOC results do not appear indicative of a significant release at the Site or migration of impacts from off-Site sources.
3. Results of the screening-level methane survey indicated that concentrations were detected at elevated levels exceeding the LEL, UEL, and likely require installation of a LADBS Level V mitigation system.

RECOMENDATIONS

Based on the results of this Phase II ESA, HMC recommends the following:

1. No further investigation for soil or VOCs in soil vapor.

2. If the property is to be redeveloped, we recommend that you perform methane site testing following LADBS standards, including conducting a Shallow Soil Gas Test and Gas Probe Test by a LADBS-certified methane testing technician.
3. If the property is to remain in its current configuration, we recommend that a subslab depressurization system be installed to mitigate migration of methane inside of the building where it could pose an explosive risk.
4. Conduct an asbestos survey prior to any demolition or disturbance of suspect ACM.

We thank you for the opportunity to provide environmental support services for the subject Site. If there are any questions or comments regarding this report, please contact either of the undersigned at your convenience.

Sincerely,
Hazard Management Consulting, Inc.

DTSC-SLi - California Department of Toxic Substance Control, Human and Ecological Risk Office Note 3, ambient air screening level for industrial/commercial (SLi) land use divided by the suggested attenuation factor of 0.03, May 2022 revision.

SFBRWQCB-ESLi - San Francisco Bay Regional Water Quality Control Board, Environmental Screening Levels Workbook, direct exposure human health risk level for soil vapor for industrial commercial (ESLi) land use, 2019 rev. 2.

Highlighted data indicate concentrations exceeding regulatory screening levels for commercial/industrial land use.

Notes:

Sample ID - Sample Identification.

VOCs - Volatile organic compounds analyzed by EPA Method TO-15.

bgs - Below ground surface.

ug/m3 - Micrograms per cubic meter.

ND - Not detected above laboratory reporting limit listed.

J - Result is less than the reporting limit but greater than or equal to the method detection limit and the concentration is an approximate value.

C-06 - Presence of analyte in sample suspected as common laboratory contaminant, which was also found in the method blank.

NE - Not established.

EPA-RSLi - United States Environmental Protection Agency Regional Screening Level for ambient air for industrial/commercial (RSLi) land use, November 2024.

DTSC-SLi - California Department of Toxic Substance Control, Human and Ecological Risk Office Note 3, ambient air screening level for industrial/commercial (SLi) land use divided by the suggested attenuation factor of 0.03, May 2022 revision.

SFBRWQCB-ESLi - San Francisco Bay Regional Water Quality Control Board, Environmental Screening Levels Workbook, direct exposure human health risk level for soil vapor for industrial commercial (ESLi) land use, 2019 rev. 2.

Highlighted data indicate concentrations exceeding regulatory screening levels for commercial/industrial land use.

B5-SV-5-REP	5	6/3/25	9.1
			Mitigation Standards
LADBS			1.25

Notes:

Sample ID - Sample Identification.

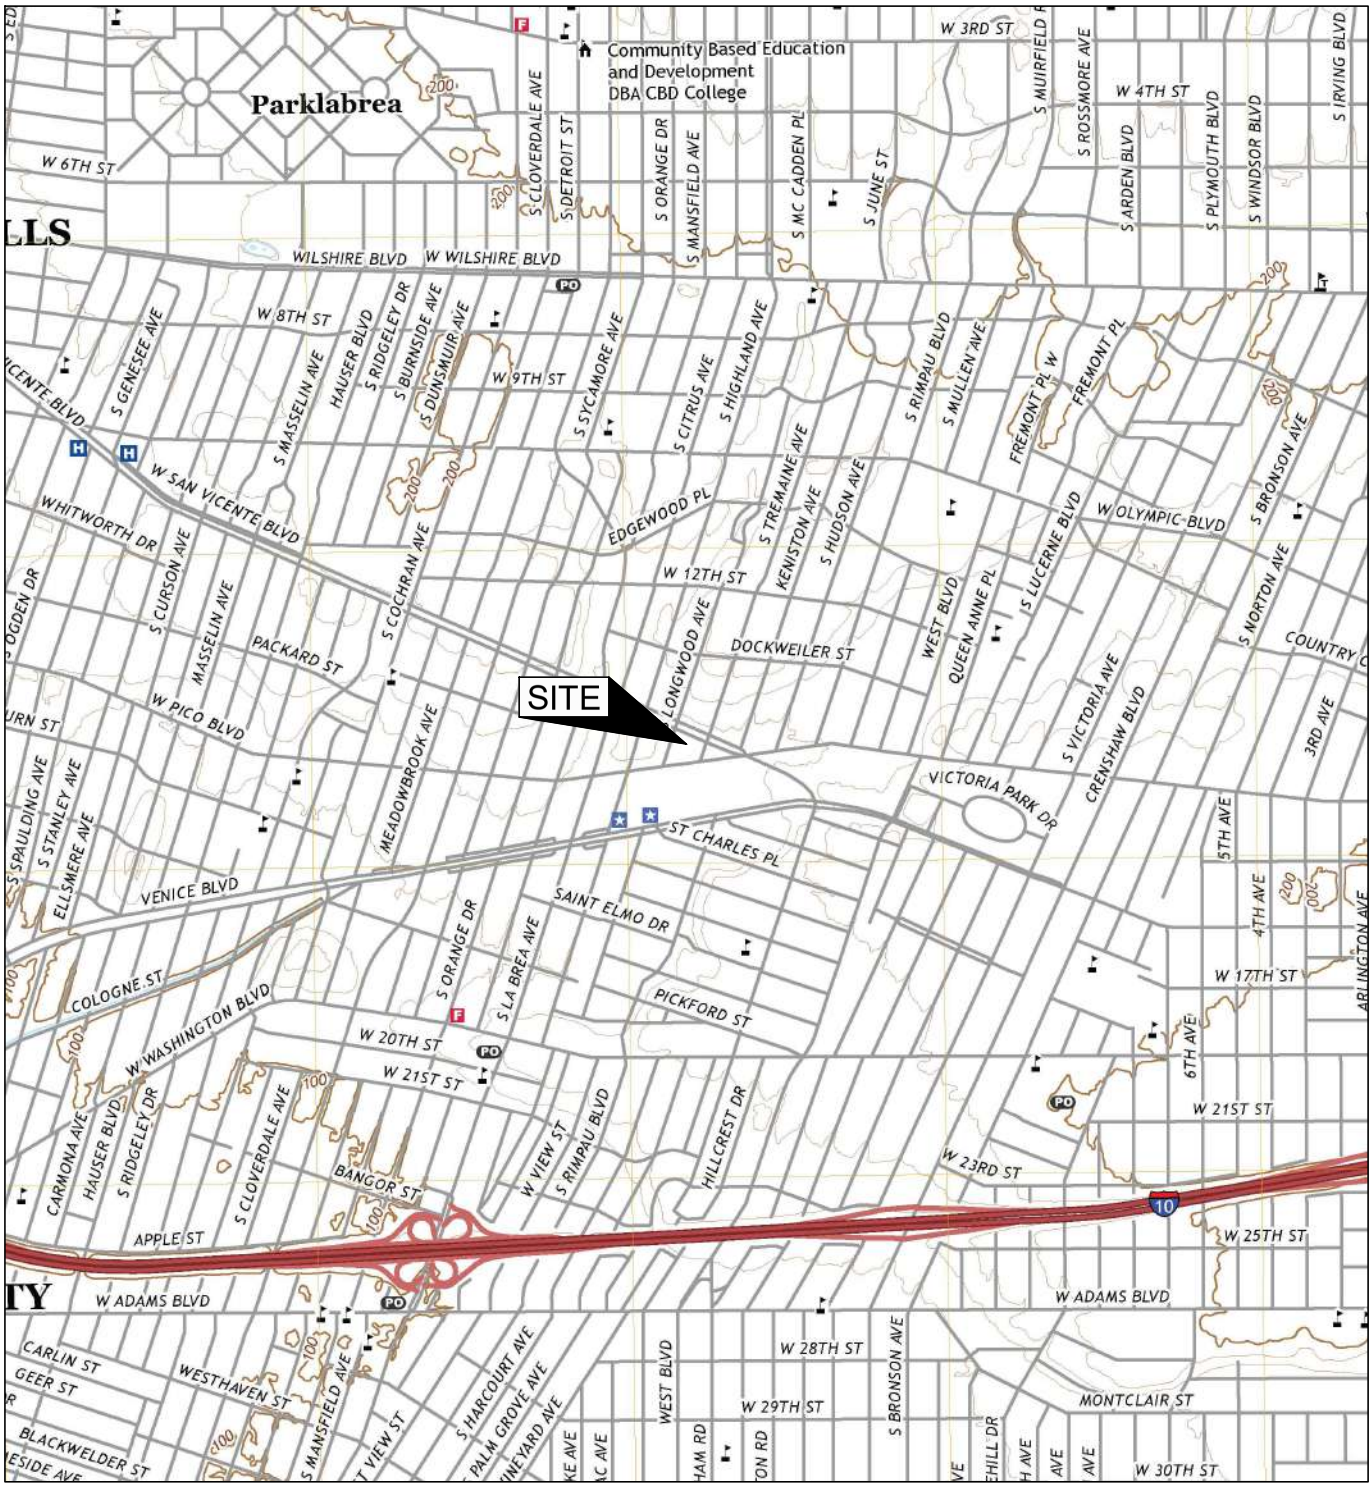

bgs - Below ground surface.

Methane analyzed by ASTM Method D1946 and reported in percent by volume.

ND - Not detected above laboratory reporting limit listed.

LADBS - Los Angeles Department of Building and Safety mitigation standard reported in percent by volume.

Highlighted data indicate concentrations exceeding mitigation standard.

Notes and Definitions

S-03	The surrogate recovery was below acceptance criteria in the sample because of a possible matrix effect. The surrogate recovery was within acceptance criteria in the method blank and LCS.
QM-07	The spike recovery and/or RPD was outside acceptance limits for the MS and/or MSD. The batch was accepted based on acceptable LCS recovery.
D-06	The sample chromatographic pattern does not resemble the fuel standard used for quantitation.
5035A	Acetone formation/presence suspected from acidification of soil. See Method EPA 5035 Section A.5.3.
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference

DETECTIONS SUMMARY

Sample ID: B1-SV-5 **Laboratory ID:** T252372-01

Analyte	Result	Reporting Limit	Units	Method	Notes
Acetone	**130**	12	ug/m³ Air	TO-15	
1,3-Butadiene	**49**	4.5	ug/m³ Air	TO-15	
Carbon Disulfide	**7.4**	3.2	ug/m³ Air	TO-15	
Chlorobenzene	**1.9**	4.7	ug/m³ Air	TO-15	J
Chloromethane	**7.2**	11	ug/m³ Air	TO-15	J
Heptane	**9.2**	4.2	ug/m³ Air	TO-15	
Dichlorodifluoromethane	**2.2**	5.0	ug/m³ Air	TO-15	J
4-Ethyltoluene	**1.8**	5.0	ug/m³ Air	TO-15	J
Methylene chloride	**4.2**	27	ug/m³ Air	TO-15	C-06, J
Tetrahydrofuran	**2.9**	3.0	ug/m³ Air	TO-15	J
Tetrachloroethene	**5.5**	6.9	ug/m³ Air	TO-15	J
1,2,4-Trimethylbenzene	**5.6**	5.0	ug/m³ Air	TO-15	
2-Butanone (MEK)	**61**	15	ug/m³ Air	TO-15	
Methyl isobutyl ketone	**28**	42	ug/m³ Air	TO-15	J
Benzene	**13**	3.3	ug/m³ Air	TO-15	
Toluene	**41**	3.8	ug/m³ Air	TO-15	
Ethylbenzene	**5.3**	4.4	ug/m³ Air	TO-15	
m,p-Xylene	**19**	8.8	ug/m³ Air	TO-15	
o-Xylene	**5.8**	4.4	ug/m³ Air	TO-15	

Sample ID: B2-SV-5 **Laboratory ID:** T252372-02

Analyte	Result	Reporting Limit	Units	Method	Notes
Acetone	**61**	12	ug/m³ Air	TO-15	
Carbon Disulfide	**6.6**	3.2	ug/m³ Air	TO-15	
Bromodichloromethane	**8.0**	6.8	ug/m³ Air	TO-15	
Chloroform	**31**	5.0	ug/m³ Air	TO-15	
Chloromethane	**1.4**	11	ug/m³ Air	TO-15	J
Heptane	**14**	4.2	ug/m³ Air	TO-15	
Hexane	**11**	3.6	ug/m³ Air	TO-15	
Dichlorodifluoromethane	**2.2**	5.0	ug/m³ Air	TO-15	J

Notes and Definitions

J	Detected but below the Standard Reporting Limit; therefore, result is an estimated concentration (CLP J-Flag).
IS-H1	High internal standard recovery due elevated hydrocarbon concentrations in the sample, IS in the method blank recovered within acceptable range. Results should be considered estimated values.
C-06	Presence of analyte in sample suspected as common laboratory contaminant, which was also found in the method blank.
B-03	Analyte present in blank due to being a common laboratory contaminant.
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the Method Detection Limit (MDL)
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference

The results in this report apply to the samples analyzed in accordance with the chain of custody document. This analytical report must be reproduced in its entirety.

INTRODUCTION

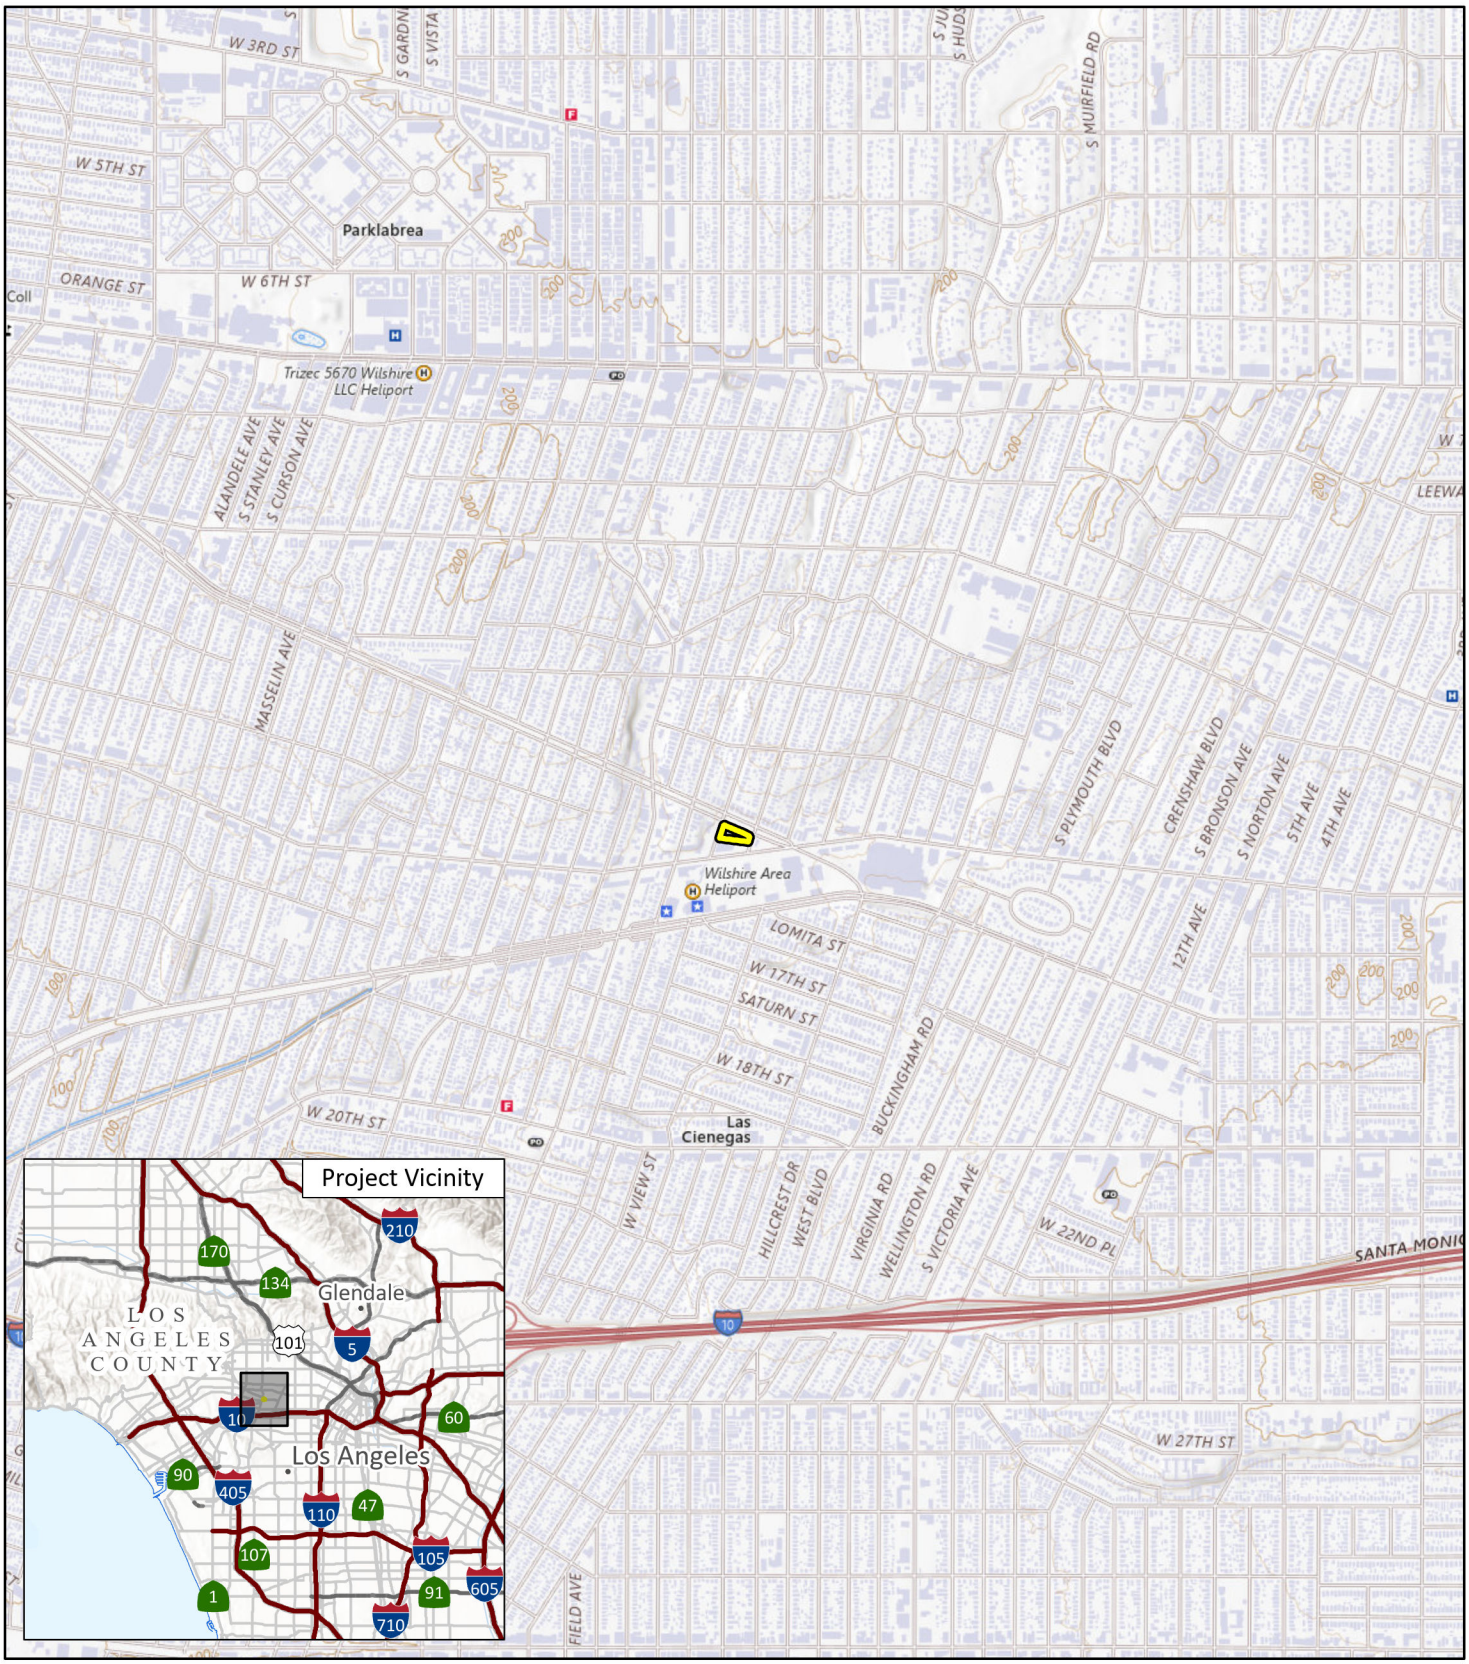

This noise and vibration impact analysis has been prepared to evaluate the potential noise and vibration impacts and reduction measures associated with the San Vicente Self Storage Project (project) in Los Angeles, California. This report is intended to satisfy the City of Los Angeles (City) requirements for a project-specific noise and vibration impact analysis by examining the impacts of the project site and evaluating noise reduction measures that the project may require.

PROJECT LOCATION AND DESCRIPTION

The proposed project is located along San Vicente Boulevard in between Tremaine Avenue and Longwood Avenue. The Property is associated with addresses 4802-4828 West San Vicente Boulevard, Los Angeles California 90019, and assigned Assessor's Parcel Number (APN) 5070-004-026. The property is currently developed with one, one-story building as well associated surface parking. The property is zoned C2-1-O and within the boundaries of the Wilshire Community Plan area. The project location is shown on Figure 1.

The project is located along a major boulevard in an area with a mix of commercial and residential uses. To the east and south, the project is bordered by a mix of commercial uses including a grocery store, a furniture store, several restaurants, a gym and car oil change service, with these properties being zoned C2-1-O. To the west, the property is across the street from Los Angeles Department of Water and Power (DWP) Distribution Station, which is zoned PF-1XL-O. The properties to the north are zoned R3-1-O and contain a residential use with a mix of single-family homes and multi-family apartment buildings.

The proposed building is comprised of 175,047 square feet of floor area, seven (7) stories, an FAR of a maximum of 6:1 and is 85 feet tall. The building includes self-storage rooms on all seven (7) floors, as well as a 731 square-foot office and 608 square-foot lobby on the ground floor. The storage units range between 25 to 200 square-foot units across each floor. Proposed hours of operation are between 6:00 a.m. to 11:00 p.m., daily. The proposed use will meet the growing demand for quality storage space in an emerging residential market as a result of the continued production of medium- and high-density multi-family developments in the neighborhood. The site plan is shown on Figure 2.

San Vicente Self Storage Project

Site Plan

EXISTING LAND USES IN THE PROJECT AREA

The project site is primarily surrounded by existing commercial and residential uses. The areas adjacent to the project site include the following uses:

- **North:** Existing residential uses opposite San Vicente Boulevard
- **East:** Existing commercial uses opposite Tremaine Avenue
- **South:** Existing commercial uses
- **West:** Existing commercial uses and Los Angeles DWP Distribution Station opposite Longwood Avenue

The nearest sensitive receptors are the existing multi-family residential uses, approximately 165 feet away from the northern project construction boundary.

NOISE AND VIBRATION FUNDAMENTALS

CHARACTERISTICS OF SOUND

Noise is usually defined as unwanted sound. Noise consists of any sound that may produce physiological or psychological damage and/or interfere with communication, work, rest, recreation, and sleep.

To the human ear, sound has two significant characteristics: pitch and loudness. Pitch is generally an annoyance, while loudness can affect the ability to hear. Pitch is the number of complete vibrations, or cycles per second, of a sound wave, which results in the tone's range from high to low. Loudness is the strength of a sound, and it describes a noisy or quiet environment; it is measured by the amplitude of the sound wave. Loudness is determined by the intensity of the sound waves combined with the reception characteristics of the human ear. Sound intensity is the average rate of sound energy transmitted through a unit area perpendicular to the direction in which the sound waves are traveling. This characteristic of sound can be precisely measured with instruments. The analysis of a project defines the noise environment of the project area in terms of sound intensity and its effect on adjacent sensitive land uses.

MEASUREMENT OF SOUND

Sound intensity is measured with the A-weighted decibel (dBA) scale to correct for the relative frequency response of the human ear. That is, an A-weighted noise level de-emphasizes low and very high frequencies of sound, similar to the human ear's de-emphasis of these frequencies. Decibels (dB), unlike the linear scale (e.g., inches or pounds), are measured on a logarithmic scale representing points on a sharply rising curve.

For example, 10 dB is 10 times more intense than 0 dB, 20 dB is 100 times more intense than 0 dB, and 30 dB is 1,000 times more intense than 0 dB. Thirty decibels (30 dB) represents 1,000 times as much acoustic energy as 0 dB. The decibel scale increases as the square of the change, representing the sound pressure energy. A sound as soft as human breathing is about 10 times greater than 0 dB. The decibel system of measuring sound gives a rough connection between the physical intensity of sound and its perceived loudness to the human ear. A 10 dB increase in sound level is perceived by the human ear as only a doubling of the sound's loudness. Ambient sounds generally range from 30 dB (very quiet) to 100 dB (very loud).

Sound levels are generated from a source, and their decibel level decreases as the distance from that source increases. Sound levels dissipate exponentially with distance from their noise sources. For a single point source, sound levels decrease approximately 6 dB for each doubling of distance from the source. This drop-off rate is appropriate for noise generated by stationary equipment. If noise is produced by a line source (e.g., highway traffic or railroad operations), the sound decreases 3 dB for each doubling of distance in a hard site environment. Line source sound levels decrease 4.5 dB for each doubling of distance in a relatively flat environment with absorptive vegetation.

There are many ways to rate noise for various time periods, but an appropriate rating of ambient noise affecting humans also accounts for the annoying effects of sound. The equivalent continuous sound level (L_{eq}) is the total sound energy of time-varying noise over a sample period. However, the predominant rating scales for human communities in the State of California are the L_{eq} and Community Noise Equivalent Level (CNEL) or the day-night average noise level (L_{dn}) based on A-weighted decibels. CNEL is the time-weighted average noise over a 24-hour period, with a 5 dBA weighting factor applied to the hourly L_{eq} for noises occurring from 7:00 p.m. to 10:00 p.m. (defined as relaxation hours) and a 10 dBA weighting factor applied to noises occurring from 10:00 p.m. to 7:00 a.m. (defined as sleeping hours). L_{dn} is similar to the CNEL scale but without the adjustment for events occurring during the relaxation. CNEL and L_{dn} are within 1 dBA of each other and are normally interchangeable. The City uses the CNEL noise scale for long-term traffic noise impact assessment.

Other noise rating scales of importance when assessing the annoyance factor include the maximum instantaneous noise level (L_{max}), which is the highest sound level that occurs during a stated time period. The noise environments discussed in this analysis for short-term noise impacts are specified in terms of maximum levels denoted by L_{max}, which reflects peak operating conditions and addresses the annoying aspects of intermittent noise. It is often used together with another noise scale, or noise standards in terms of percentile noise levels, in noise ordinances for enforcement purposes. For example, the L_{10} noise level represents the noise level exceeded 10 percent of the time during a stated period. The L_{50} noise level represents the median noise level. Half the time the noise level exceeds this level, and half the time it is less than this level. The L_{90} noise level represents the noise level exceeded 90 percent of the time and is considered the background noise level during a monitoring period. For a relatively constant noise source, the L_{eq} and L_{50} are approximately the same.

Noise impacts can be described in three categories. The first category includes audible impacts, which are increases in noise levels noticeable to humans. Audible increases in noise levels generally refer to a change of 3 dB or greater because this level has been found to be barely perceptible in exterior environments. The second category, potentially audible, refers to a change in the noise level between 1 dB and 3 dB. This range of noise levels has been found to be noticeable only in laboratory environments. The last category includes changes in noise levels of less than 1 dB, which are inaudible to the human ear. Only audible changes in existing ambient or background noise levels are considered potentially significant.

Physiological Effects of Noise

Physical damage to human hearing begins at prolonged exposure to sound levels higher than 85 dBA. Exposure to high sound levels affects the entire system, with prolonged sound exposure in excess of 75 dBA increasing body tensions, thereby affecting blood pressure and functions of the heart and the nervous system. In comparison, extended periods of sound exposure above 90 dBA would result in permanent cell damage. When the sound level reaches 120 dBA, a tickling sensation occurs in the human ear, even with short-term exposure. This level of sound is called the threshold of feeling. As the sound reaches 140 dBA, the tickling sensation is replaced by a feeling of pain in the ear (i.e., the threshold of pain). A sound level of 160–165 dBA will result in dizziness or a

loss of equilibrium. The ambient or background noise problem is widespread and generally more concentrated in urban areas than in outlying, less developed areas.

Table A lists definitions of acoustical terms, and Table B shows common sound levels and their sources.

Table A: Definitions of Acoustical Terms

Term	Definitions
Decibel, dB	A unit of sound measurement that denotes the ratio between two quantities that are proportional to power; the number of decibels is 10 times the logarithm (to the base 10) of this ratio.
Frequency, Hz	Of a function periodic in time, the number of times that the quantity repeats itself in 1 second (i.e., the number of cycles per second).
A-Weighted Sound Level, dBA	The sound level obtained by use of A-weighting. The A-weighting filter de-emphasizes the very low and very high frequency components of the sound in a manner similar to the frequency response of the human ear and correlates well with subjective reactions to noise. (All sound levels in this report are A-weighted unless reported otherwise.)
L_{01}, L_{10}, L_{50}, L_{90}	The fast A-weighted noise levels that are equaled or exceeded by a fluctuating sound level 1%, 10%, 50%, and 90% of a stated time period, respectively.
Equivalent Continuous Noise Level, L_{eq}	The level of a steady sound that, in a stated time period and at a stated location, has the same A-weighted sound energy as the time-varying sound.
Community Noise Equivalent Level, CNEL	The 24-hour A-weighted average sound level from midnight to midnight, obtained after the addition of 5 dBA to sound levels occurring in the evening from 7:00 p.m. to 10:00 p.m. and after the addition of 10 dBA to sound levels occurring in the night between 10:00 p.m. and 7:00 a.m.
Day/Night Noise Level, L_{dn}	The 24-hour A-weighted average sound level from midnight to midnight, obtained after the addition of 10 dBA to sound levels occurring in the night between 10:00 p.m. and 7:00 a.m.
L_{max}, L_{min}	The maximum and minimum A-weighted sound levels measured on a sound level meter, during a designated time interval, using fast time averaging.
Ambient Noise Level	The all-encompassing noise associated with a given environment at a specified time. Usually a composite of sound from many sources from many directions, near and far; no particular sound is dominant.
Intrusive	The noise that intrudes over and above the existing ambient noise at a given location. The relative intrusiveness of a sound depends upon its amplitude, duration, frequency, time of occurrence, and tonal or informational content, as well as the prevailing ambient noise level.

FUNDAMENTALS OF VIBRATION

Vibration refers to ground-borne noise and perceptible motion. Ground-borne vibration is almost exclusively a concern inside buildings and is rarely perceived as a problem outdoors, where the motion may not be discernible, but without the effects associated with the shaking of a building there is less adverse reaction. Vibration energy propagates from a source through intervening soil and rock layers to the foundations of nearby buildings. The vibration then propagates from the foundation throughout the remainder of the structure. Building vibration may be perceived by occupants as the motion of building surfaces, the rattling of items sitting on shelves or hanging on walls, or a low-frequency rumbling noise. The rumbling noise is caused by the vibration of walls, floors, and ceilings that radiate sound waves. Annoyance from vibration often occurs when the vibration exceeds the threshold of perception by 10 dB or less. This is an order of magnitude below the damage threshold for normal buildings.

Typical sources of ground-borne vibration are construction activities (e.g., blasting, pile-driving, and operating heavy-duty earthmoving equipment), steel-wheeled trains, and occasional traffic on rough roads. Problems with both ground-borne vibration and noise from these sources are usually localized to areas within approximately 100 feet from the vibration source, although there are examples of ground-borne vibration causing interference out to distances greater than 200 feet as detailed in the Federal Transit Administration's (FTA) 2018 *Transit Noise and Vibration Impact Assessment Manual* (FTA Manual). When roadways are smooth, vibration from traffic, even heavy

trucks, is rarely perceptible. It is assumed for most projects that the roadway surface will be smooth enough that ground-borne vibration from street traffic will not exceed the impact criteria; however, construction of the project could result in ground-borne vibration that may be perceptible and annoying.

Ground-borne noise is not likely to be a problem because noise arriving via the normal airborne path will usually be greater than ground-borne noise.

Ground-borne vibration has the potential to disturb people and damage buildings. Although it is very rare for train-induced ground-borne vibration to cause even cosmetic building damage, it is not uncommon for construction processes such as blasting and pile-driving to cause vibration of sufficient amplitudes to damage nearby buildings (FTA 2018). Ground-borne vibration is usually measured in terms of vibration velocity, either the root-mean-square (RMS) velocity or peak particle velocity (PPV). The RMS is best for characterizing human response to building vibration, and PPV is used to characterize the potential for damage. Decibel notation acts to compress the range of numbers required to describe vibration. Vibration velocity level in decibels is defined as

$$L_v = 20 \log_{10} [V/V_{ref}]$$

where "L_v" is the vibration velocity in decibels (VdB), "V" is the RMS velocity amplitude, and "V_{ref}" is the reference velocity amplitude, or 1×10^{-6} inches/second (in/sec) used in the United States.

REGULATORY SETTING

APPLICABLE NOISE STANDARDS

The applicable noise standards governing the project site include the criteria in the City's Noise Element of the General Plan and the City's Municipal Code.

City of Los Angeles

Noise Element of the General Plan

In California, cities and counties are required to adopt noise elements as part of their general plans. The purpose of a noise element is to establish a land use pattern that minimizes the exposure of residents of the community to excessive noise. The City of Los Angeles General Plan noise element provides planning guidance related to noise. It identifies goals, objectives, and an implementation program to ensure that Los Angeles residents will be protected from noise that may be detrimental to their physical and mental health and general welfare. In the noise element, the City has established an acceptable limit of noise exposure for various land use categories. The purpose of these criteria is to provide a guideline for the City to locate appropriate land uses within acceptable noise environments. Table C shows the City's land use compatibility standards for noise. Noise levels of 50 and 55 dBA CNEL are identified as being "normally acceptable" for single-family and multi-family residential land uses, respectively. Noise levels of 65 dBA CNEL are identified as being "normally acceptable" for office uses.

Municipal Code

Chapter XI of the Los Angeles Municipal Code (LAMC) establishes noise standards to limit noise affecting various land uses in the city. These standards apply to noise generated by "any machinery equipment, pump, fan, air-conditioning apparatus, or similar mechanical device." Table D summarizes the presumed ambient noise levels for various land use types as specified in Municipal Code Section 111.03.

Where the ambient noise level is less than the presumed ambient noise level designated, the presumed ambient noise level shall be deemed to be the minimum ambient noise level. At the boundary line between two zones, the presumed ambient noise level of the quieter zone shall be used. In accordance with the Noise Regulation, a noise level increase of 5 dBA over the existing average ambient noise level at an adjacent property line represents a noise violation.

Table C: City of Los Angeles Noise and Land Use Compatibility Guidelines

Land Use Category	Day-Night Average Exterior Sound Level (CNEL dB)						
	50	55	60	65	70	75	80
Residential Single Family, Duplex, Mobile Home	A	C	C	C	N	U	U
Residential Multi-Family	A	A	C	C	N	U	U
Transient Lodging, Motel, Hotel	A	A	C	C	N	U	U
School, Library, Church, Hospital, Nursing Home	A	A	C	C	N	N	U
Auditorium, Concert Hall, Ampitheater	C	C	C	C/N	U	U	U
Sports Arena, Outdoor Spectator Sports	C	C	C	C	C/U	U	U
Playground, Neighborhood Park	A	A	A	A/N	N	N/U	U
Golf Course, Riding Stable, Water Recreation, Cemetery	A	A	A	A	N	A/N	U
Office Building, Business, Commercial, Professional	A	A	A	A/C	C	C/N	N
Agriculture, Industrial, Manufacturing, Utilities	A	A	A	A	A/C	C/N	N

A = Normally acceptable. Specified land use is satisfactory, based upon assumption buildings involved are conventional construction, without any special noise insulation.

C = Conditionally acceptable. New construction or development only after a detailed analysis of noise mitigation is made and needed noise insulation features are included in project design. Conventional construction, but with closed windows and fresh air supply systems or air conditioning normally will suffice.

N = Normally unacceptable. New construction or development generally should be discouraged. A detailed analysis of noise reduction requirements must be made and noise insulation features included in the design of a project.

U = Clearly unacceptable. New construction or development generally should not be undertaken.

Construction Noise and Vibration – Updates to Thresholds and Methodology

The Construction Noise and Vibration document (City of Los Angeles, 2024) updates the construction noise and vibration thresholds to be used by the Department of City Planning in assessing the environmental impacts of projects in accordance with the California Environmental Quality Act (CEQA).

With regards to construction noise, the City's Noise Ordinance (LAMC Section 112.05) sets forth a maximum noise level for construction equipment of 75 dBA at a distance of 50 feet when operated within 500 feet of a residential zone. Compliance with this standard does not apply where compliance therewith is technically infeasible. In addition, LAMC Section 41.40 prohibits construction between the hours of 9:00 p.m. and 7:00 a.m. Monday through Friday, before 8:00 a.m. and after 6:00 p.m. on Saturday or any national holiday, and at any time on Sunday (i.e., construction is allowed Monday through Friday between 7:00 a.m. and 9:00 p.m. and Saturdays and national holidays between 8:00 a.m. and 6:00 p.m.). Construction may be permitted outside of these hours if a temporary noise variance is approved by the Los Angeles Board of Police Commissioners.

Recognizing the overly sensitive construction noise threshold in the L.A. CEQA Thresholds Guide and the FTA guidance for construction vibration, the following new thresholds are more suited to the generally urban nature of the City yet still recognize the importance of human health, including sleep disruption:

- For construction activities that occur between 7:00 a.m. and 7:00 p.m. Monday through Friday, and between 8:00 a.m. and 6:00 p.m. on Saturdays, there is no numerical threshold above ambient noise levels.

- On- and off-site construction noise during daytime hours (7:00 a.m. and 7:00 p.m. Monday through Friday, and 8:00 a.m. to 6:00 p.m. on Saturdays) are limited to a maximum 80 dBA $L_{eq(8\text{-hour})}$ absolute threshold at sensitive uses (at the property line or at the exterior of the building), including outdoor public recreational areas owned or maintained by a public agency. This standard does not apply to private residential balconies which may or may not extend past the exterior of a building, or to private residential recreational areas.

- For construction activities that occur between 7:00 a.m. and 7:00 p.m. Monday through Friday, and between 8:00 a.m. and 6:00 p.m. on Saturdays, there is no numerical threshold related to human annoyance.

- During nighttime hours (between 7:00 p.m. and 7:00 a.m. Monday through Friday, and between 6:00 p.m. and 8:00 a.m. on Saturdays), and anytime on Sundays or national holidays, construction activities shall not generate groundborne vibration levels that exceed 80 VdB at the exterior of a sensitive use building.

- Architectural Building Damage—Construction activities shall not exceed the following building damage thresholds for the identified structures:

    - Fragile Buildings: 0.1 PPV (in/sec)

- Historic Buildings: 0.25 PPV (in/sec)
- Older Residential Structures: 0.3 PPV (in/sec)
- New Residential Structures: 0.5 PPV (in/sec)
- Modern Industrial/Commercial Buildings: 0.5 PPV (in/sec)

Therefore, for construction noise analysis, a threshold of 80 dBA L_{eq} will be used. For vibration annoyance, a threshold of 80 VdB will be used, and for vibration damage, a threshold of 0.5 PPV (in/sec) will be used as the criteria.

OVERVIEW OF THE EXISTING NOISE ENVIRONMENT

The primary existing noise sources in the project area include vehicle traffic from San Vicente Boulevard and commercial uses in the vicinity of the project site.

AMBIENT NOISE MEASUREMENTS

Long-Term Noise Measurements

To assess existing noise levels, LSA conducted two long-term noise measurements in the vicinity of the project site. The long-term (24-hour) noise level measurements were conducted on July 15 through July 16, 2025, using two Larson Davis Spark 706RC Dosimeters. Table E provides a summary of the measured hourly noise levels and calculated CNEL level from the long-term noise level measurements. As shown in Table E, the calculated CNEL levels reached 70.2 dBA CNEL. Hourly noise levels at surrounding uses are as low as 51.2 dBA L_{eq} during nighttime hours and 60.8 dBA L_{eq} during daytime hours. Noise measurement sheets are provided in Appendix A. Figure 3 shows the long-term monitoring locations.

Table E: Long-Term 24-Hour Ambient Noise Monitoring Results

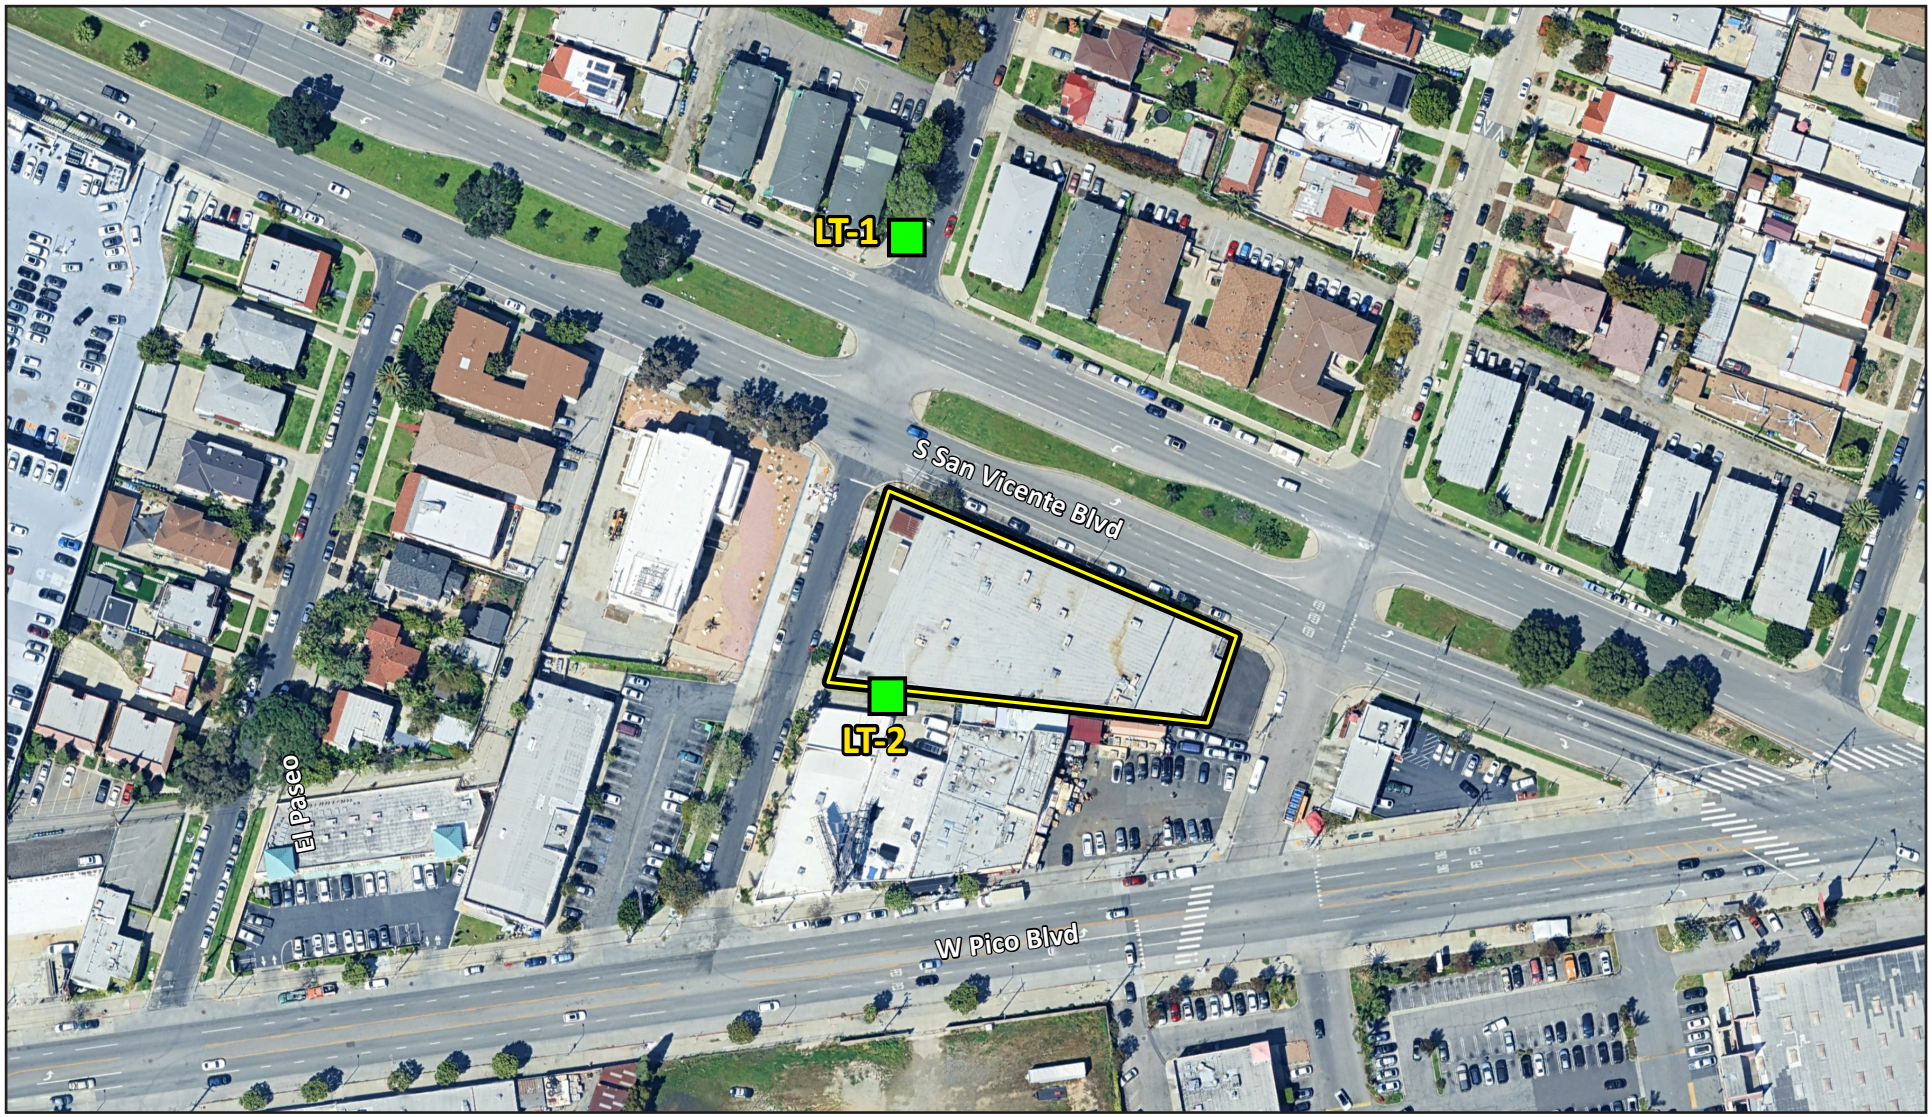

Location		Daytime Noise Levels[1] (dBA L_{eq})	Evening Noise Levels[2] (dBA L_{eq})	Nighttime Noise Levels[3] (dBA L_{eq})	Daily Noise Levels (dBA CNEL)
LT-1	On the northwest corner of Longwood Avenue and San Vicente Boulevard, on a utility pole approximately 90 feet from the San Vicente Boulevard centerline.	67.1-69.5	64.1-66.8	54.8-67.2	70.2
LT-2	4876 San Vicente Blvd, Los Angeles, CA. On a utility pole near the southeastern corner of the property, approximately 140 feet from the San Vicente Boulevard centerline.	60.8-63.3	60.5-61.9	51.2-59.6	65.0

Source: Compiled by LSA (2025).
Note: Noise measurements were conducted from July 15 to July 16, 2025, starting at 11:00 a.m.
[1] Daytime Noise Levels = noise levels during the hours from 7:00 a.m. to 7:00 p.m.
[2] Evening Noise Levels = noise levels during the hours from 7:00 p.m. to 10:00 p.m.
[3] Nighttime Noise Levels = noise levels during the hours from 10:00 p.m. to 7:00 a.m.
CNEL = Community Noise Equivalent Level ft = foot/feet
dBA = A-weighted decibels L_{eq} = equivalent continuous sound level

EXISTING AIRCRAFT NOISE

Airport-related noise levels are primarily associated with aircraft engine noise made while aircraft are taking off, landing, or running their engines while still on the ground. The closest airport to the proposed project site is Santa Monica Municipal Airport located approximately 6.5 miles west of the project site. Based on Figure 3-9, Calendar Year 2023 CNEL Noise Contours (City of Santa Monica 2023), the project is located outside the 65 dBA CNEL noise contour. Because the project site is located outside the 65 dBA CNEL airport noise contour, the project would not be adversely affected

by airport/airfield noise, nor would the project contribute to or result in adverse airport/airfield noise impacts. No further analysis is required.

PROJECT IMPACTS

SHORT-TERM CONSTRUCTION NOISE IMPACTS

Two types of short-term noise impacts could occur during the construction of the proposed project. First, construction crew commutes and the transport of construction equipment and materials to the site for the proposed project would incrementally increase noise levels on access roads leading to the site. Although there would be a relatively high single-event noise-exposure potential causing intermittent noise nuisance (passing trucks at 50 feet would generate up to 84 dBA L_{max}), the effect on longer-term ambient noise levels would be small when compared to the existing average daily traffic (ADT) volume on San Vicente Boulevard. Based on the *LADOT Traffic Counts Summary* (City of Los Angeles 2015), the existing ADT on San Vicente Boulevard is approximately 26,266 ADT in the vicinity of the project. Although the current ADT volume on San Vicente is likely higher, using the 2015 volume is considered a conservative approach. During construction, approximately 442 acoustically equivalent trips would occur during an average day from worker and delivery activities resulting in a traffic noise increase of approximately 0.1 dBA, as shown in Appendix B. The acoustically equivalent traffic volume is used in order to account for the additional noise a heavy truck creates as compared to automobile traffic and does not represent the actual number of vehicles associated with construction activities. A noise level increase of less than 3 dBA would not be perceptible to the human ear in an outdoor environment. Therefore, short-term construction-related impacts associated with worker commutes and equipment transport to the project site would be less than significant. Additionally, there would be concrete pour during the nighttime hours. However, it would be for less than five days and therefore exempt.

The second type of short-term noise impact is related to noise generated during construction, which includes demolition, site preparation, grading, building construction, paving, architectural coating, and trenching on the project site. Construction is completed in discrete steps, each of which has its own mix of equipment and, consequently, its own noise characteristics. These various sequential phases would change the character of the noise generated on the site and, therefore, the noise levels surrounding the site as construction progresses. Despite the variety in the type and size of construction equipment, similarities in the dominant noise sources and patterns of operation allow construction-related noise ranges to be categorized by work phase. Table H lists typical construction equipment noise levels recommended for noise impact assessments, based on a distance of 50 feet between the equipment and a noise receptor, taken from the Federal Highway Administration's (FHWA) *FHWA Roadway Construction Noise Model* (FHWA 2006).

In addition to the reference maximum noise level, the usage factor provided in Table F is used to calculate the hourly noise level impact for each piece of equipment based on the equation on the following page.

Table F: Typical Construction Equipment Noise Levels

Equipment Description	Acoustical Usage Factor (%)[1]	Maximum Noise Level (L_{max}) at 50 Ft[2]
Auger Drill Rig	20	85
Backhoes	40	80
Compactor (Ground)	20	80

Pneumatic Tools	50	85
Pumps	50	77
Rock Drills	20	85
Rollers	20	85
Scrapers	40	85
Tractors	40	84
Trencher	50	82
Welder	40	73

Source: *FHWA Roadway Construction Noise Model User's Guide,* Table 1 (FHWA 2006).
Note: Noise levels reported in this table are rounded to the nearest whole number.
[1] Usage factor is the percentage of time during a construction noise operation that a piece of construction equipment is operating at full power.
[2] Maximum noise levels were developed based on Specification 721.560 from the Central Artery/Tunnel program to be consistent with the City of Boston's Noise Code for the "Big Dig" project.
FHWA = Federal Highway Administration
ft = foot/feet
L_{max} = maximum instantaneous sound level

$$L_{eq}(equip) = E.L. + 10\log(U.F.) - 20\log\left(\frac{D}{50}\right)$$

where: $L_{eq}(equip)$ = L_{eq} at a receiver resulting from the operation of a single piece of equipment over a specified time period.

E.L. = noise emission level of the particular piece of equipment at a reference distance of 50 feet.

U.F. = usage factor that accounts for the fraction of time that the equipment is in use over the specified period of time.

D = distance from the receiver to the piece of equipment.

Each piece of construction equipment operates as an individual point source. Using the following equation, a composite noise level can be calculated when multiple sources of noise operate simultaneously:

$$Leq\ (composite) = 10 * \log_{10}\left(\sum_{1}^{n} 10^{\frac{Ln}{10}}\right)$$

Using the equations from the methodology above, the reference information in Table F, and the construction equipment list provided, the composite noise levels of each construction phase were calculated. The project construction composite noise levels at a distance of 50 feet would range from 76 dBA L_{eq} to 90 dBA L_{eq}, with the highest noise levels occurring during the paving and building construction phases.

Once composite noise levels are calculated, reference noise levels can then be adjusted for distance using the following equation:

$$Leq\ (at\ distance\ X) = Leq\ (at\ 50\ feet) - 20 * \log_{10}\left(\frac{X}{50}\right)$$

In general, this equation shows that doubling the distance would decrease noise levels by 6 dBA while halving the distance would increase noise levels by 6 dBA.

Table G shows the nearest sensitive uses to the project site, their distance from the center of construction activities, and composite noise levels expected during construction. These noise level projections do not consider intervening topography or barriers. Construction equipment calculations are provided in Appendix B.

Table G: Potential Construction Noise Impacts at Nearest Receptor

Receptor (Location)	Composite Noise Level (dBA L_{eq}) at 50 ft[1]	Distance (ft)	Composite Noise Level (dBA L_{eq})
Commercial (South)	90	65	87
Residential (North)		215	77
Commercial (East)		220	77
Commercial (West)		250	76

Source: Compiled by LSA (2025).

1 The composite construction noise level represents the overlap of paving and building construction phases which are expected to result in the greatest noise level as compared to other phases.

2 The assessment distance is associated with the average condition, identified by the distance from the center of construction activities to surrounding uses.

dBA L_{eq} = average A-weighted hourly noise level

ft = foot/feet

While construction noise will vary, it is expected that composite noise levels during construction would reach 87 dBA L_{eq} at the nearest commercial uses to the south and 77 dBA L_{eq} at the nearest residential uses to the north during daytime hours. These predicted noise levels would only occur when all construction equipment is operating simultaneously and, therefore, are assumed to be

rather conservative in nature. While construction-related short-term noise levels have the potential to be higher than existing ambient noise levels in the project area under existing conditions, the noise impacts would no longer occur once project construction is completed.

As stated above, the City's Noise Ordinance regulates noise impacts associated with construction activities. The proposed project would comply with the construction hours specified in the City's Noise Ordinance, which states that construction activities are not allowed between the hours of 9 p.m. and 7 a.m. on any given day. The code also prohibits noise from construction equipment within 500 ft of a residential zone before 8 a.m. or after 6 p.m. on any Saturday or national holiday nor at any time on any Sunday.

As it relates to off-site uses, construction-related noise impacts would remain below the 80 dBA construction noise level criteria for daytime construction noise level criteria as established by the City for residential uses; therefore, the impact would be considered less than significant.

SHORT-TERM CONSTRUCTION VIBRATION IMPACTS

This construction vibration impact analysis discusses the level of human annoyance using vibration levels in RMS (VdB) and assesses the potential for building damages using vibration levels in PPV (in/sec). This is because vibration levels calculated in RMS are best for characterizing human response to building vibration, while vibration level in PPV is best for characterizing potential for damage.

Table H shows the PPV and VdB values at 25 feet from the construction vibration source. As shown in Table H, bulldozers, and other heavy-tracked construction equipment (expected to be used for this project) generate approximately 0.089 PPV in/sec or 87 VdB of ground-borne vibration when measured at 25 feet, based on the FTA Manual. The distance to the nearest buildings for vibration impact analysis is measured between the nearest off-site buildings and the project construction boundary (assuming the construction equipment would be used at or near the project setback line).

The formulae for vibration transmission are provided below and Tables I and J below provide a summary of off-site construction vibration levels.

$$L_vdB\ (D) = L_vdB\ (25\ ft) - 30\ Log\ (D/25)$$

$$PPV_{equip} = PPV_{ref} \times (25/D)^{1.5}$$

Table H: Vibration Source Amplitudes for Construction Equipment

Equipment	Reference PPV/L_V at 25 ft	
	PPV (in/sec)	L_V (VdB)[1]
Pile Driver (Impact), Typical	0.644	104
Pile Driver (Sonic), Typical	0.170	93
Vibratory Roller	0.210	94
Hoe Ram	0.089	87
Large Bulldozer[2]	**0.089**	**87**
Caisson Drilling	0.089	87
Loaded Trucks[2]	**0.076**	**86**
Jackhammer	0.035	79
Small Bulldozer	0.003	58

Source: *Transit Noise and Vibration Impact Assessment Manual* (FTA 2018).
[1] RMS vibration velocity in decibels (VdB) is 1 µin/sec.
[2] Equipment shown in **bold** is expected to be used on site.
µin/sec = microinches per second
ft = foot/feet
FTA = Federal Transit Administration
in/sec = inch/inches per second
L_V = velocity in decibels
PPV = peak particle velocity
RMS = root-mean-square
VdB = vibration velocity decibels

Table I: Potential Construction Vibration Annoyance Impacts at Nearest Receptor

Receptor (Location)	Reference Vibration Level (VdB) at 25 ft[1]	Distance (ft)[2]	Vibration Level (VdB)
Commercial (South)	87	65	76
Residential (North)		215	59
Commercial (East)		220	59
Commercial (West)		250	57

Source: Compiled by LSA (2025).
[1] The reference vibration level is associated with a large bulldozer, which is expected to be representative of the heavy equipment used during construction.
[2] The assessment distance is associated with the average condition, identified by the distance from the center of construction activities to surrounding uses.
ft = foot/feet
VdB = vibration velocity decibels

Table J: Potential Construction Vibration Damage Impacts at Nearest Receptor

Receptor (Location)	Reference Vibration Level (PPV) at 25 ft[1]	Distance (ft)[2]	Vibration Level (PPV)
Commercial (South)	0.089	15	0.191
Residential (North)		165	0.005
Commercial (East)		70	0.019
Commercial (West)		100	0.011

Source: Compiled by LSA (2025).
[1] The reference vibration level is associated with a large bulldozer, which is expected to be representative of the heavy equipment used during construction.
[2] The assessment distance is associated with the peak condition, identified by the distance from the perimeter of construction activities to surrounding structures.
ft = foot/feet
PPV = peak particle velocity

Based on the information provided in Table I, vibration levels are expected to approach 76 VdB at the closest commercial uses to the south and 59 VdB at the nearest residential use to the north and would not exceed the annoyance threshold of 80 VdB.

Based on the information provided in Table L, vibration levels are expected to approach 0.191 in/sec PPV at the nearest surrounding structures to the south and would not exceed the 0.5 PPV in/sec damage threshold considered safe for modern commercial buildings, which would result in a less than significant impact. Vibration levels at all other buildings would be lower. Therefore, construction would not result in any vibration damage, and impacts would be less than significant.

Because the proposed project would comply with the construction hours specified in the City's Noise Ordinance, which states that construction activities are not allowed between the hours of 9 p.m. and 7 a.m. on any given day, vibration impacts would not occur during the more sensitive nighttime hours.

LONG-TERM OFF-SITE TRAFFIC NOISE IMPACTS

As a result of the implementation of the proposed project, off-site traffic volumes on surrounding roadways have the potential to increase. According to the *San Vicente Trip Generation Document* (EPD Solutions, Inc. 2025), the proposed project would result in an increase of 194 daily trips. According to the *LADOT Traffic Counts Summary* (City of Los Angeles 2015), the existing ADT on San Vicente Boulevard is approximately 26,266 ADT in the vicinity of the project. Although the current traffic volume on San Vicente is likely higher, using the 2015 volume is considered a conservative approach. The following equation was used to determine the potential impacts of the project:

$$\text{Change in CNEL} = 10\ log_{10}\ [V_{(e+p)}/V_{(existing)}]$$

where: $V_{existing}$ = existing daily volumes
V_{e+p} = existing daily volumes plus project
Change in CNEL = increase in noise level due to the project

The results of the calculations show that an increase of approximately 0.1 dBA CNEL is expected along San Vicente Boulevard. A noise level increase of less than 1 dBA would not be perceptible to the human ear; therefore, the traffic noise increase in the vicinity of the project site resulting from the proposed project would be less than significant.

LONG-TERM TRAFFIC-RELATED VIBRATION IMPACTS

The proposed project would not generate vibration levels related to on-site operations. In addition, vibration levels generated from project-related traffic on the adjacent roadways are unusual for on-road vehicles because the rubber tires and suspension systems of on-road vehicles provide vibration isolation. Based on a reference vibration level of 0.076 in/sec PPV, structures greater than 20 feet from the roadways that contain project trips would experience vibration levels below the most conservative standard of 0.12 in/sec PPV, and therefore vibration levels generated from project-related traffic on the adjacent roadways would be less than significant and no mitigation is required.

LONG-TERM OFF-SITE STATIONARY NOISE IMPACTS

Adjacent off-site land uses would be potentially exposed to stationary-source noise impacts from rooftop heating, ventilation, and air conditioning (HVAC) equipment and loading and unloading activities. The potential noise impacts to off-site sensitive land uses from the proposed operations are discussed below. While there could be noise impacts associated with loading and unloading activities, due to the site plan layout, the proposed buildings would provide shielding and noise associated with loading and unloading activities would be minimal.

Heating, Ventilation, and Air Conditioning Equipment

The project would have various rooftop mechanical equipment, including HVAC units on the proposed self-storage building. Based on the project site plan, the project is assumed to have three (3) rooftop HVAC units and assumed to operate 24 hours per day. The HVAC equipment would generate sound power levels (L_w) of up to 87 dBA L_w or a sound pressure level of 72 dBA L_{eq} at 5 feet, based on manufacturer data (Trane n.d.). This level is used as a reference level and is not indicative of the level at surrounding receptors.

Cumulative Operations Noise Assessment

Tables K and L below show the hourly noise levels generated by HVAC equipment at the closest off-site land uses. The results indicate that operational noise levels would be below the daytime hourly noise level standard of 50 dBA L_{eq} for residential uses. Additionally, operational noise levels would be below the lowest nighttime ambient noise level at the nearest residential uses to the north. Therefore, operations of the proposed project would be less than significant. No mitigation is required.

Table K: Daytime Exterior Noise Level Impacts

Receptor	Direction	Existing Quietest Daytime Noise Level (dBA L_{eq})	Project Generated Noise Levels (dBA L_{eq})	Potential Operational Noise Impact?[1]
Residential	North	67.1	45.3	No

Source: Compiled by LSA (2025).

[1] A potential operational noise impact would occur if (1) the quietest daytime ambient hour is less than 50 dBA L_{eq} at the nearest residential uses and project noise impacts are greater than 50 dBA L_{eq} at the nearest residential uses, or (2) the quietest daytime ambient hour is greater than 50 dBA L_{eq} at the nearest residential uses and project noise impacts are 3 dBA greater than the quietest daytime ambient hour.

dBA L_{eq} = average A-weighted hourly noise level

Table L: Nighttime Exterior Noise Level Impacts

Receptor	Direction	Existing Quietest Nighttime Noise Level (dBA L_{eq})	Project Generated Noise Levels (dBA L_{eq})	Potential Operational Noise Impact?[1]
Residential	North	54.8	45.3	No

Source: Compiled by LSA (2025).

[1] A potential operational noise impact would occur if (1) the quietest nighttime ambient hour is less than 40 dBA L_{eq} at the nearest residential uses and Project noise impacts are greater than 40 dBA L_{eq} at the nearest residential uses, or (2) the quietest nighttime ambient hour is greater than 40 dBA L_{eq} at the nearest residential uses and Project noise impacts are 3 dBA greater than the quietest nighttime ambient hour.

dBA L_{eq} = average A-weighted hourly noise level

In conclusion, the proposed project would not generate noise levels from operations above the quietest ambient noise levels during daytime and nighttime hours. Furthermore, due to the relatively high ambient noise levels, the project would not contribute to the overall ambient noise levels. The project is also not anticipated to generate vibration levels above the FTA limits to off-site receptors. Therefore, the proposed project would comply with the City's standards.

Noise Measurement Survey – 24 HR

Project Number: ESL2201.112
Project Name: 4800 San Vicente Blvd

Test Personnel: Corey Knips
Equipment: LD Spark 706RC (SN:17637)

Site Number: LT-2 Start Date: 7/15/2025

Time: From 11:00 a.m. To 11:00 a.m.

Site Location: 4876 San Vicente Blvd, Los Angeles, CA. On a utility pole near the southeastern corner of the property, approximately 140 feet from the San Vicente Boulevard centerline.

Primary Noise Sources: Traffic on San Vicente Boulevard.

Site:	4802-4828 San Vicente Boulevard, Los Angeles
Subject:	Vehicle Miles Traveled (VMT) Screening Analysis – 4802-4828 San Vicente Boulevard Self Storage Project

This technical memorandum provides an evaluation of the 4802-4828 San Vicente Boulevard Self Storage Project ("Project," or "proposed Project"). The purpose of this analysis is to determine whether a vehicle miles traveled (VMT) analysis would be required for the Project.

The Project site is located at 4802–4828 San Vicente Boulevard in the city of Los Angeles, identified as Assessor's Parcel Number (APN) 5070-004-026. The Project site consists of a single parcel encompassing approximately 30,612 square feet (SF) (0.703 acres). The proposed Project would demolish the existing 23,151 SF building, currently assumed as a warehouse (without cold storage), shown in Figure 1, and redevelop the site with a 175,047 SF mini-warehouse (to be used for self-storage of household goods). The storage units would range in size from 25 SF to 200 SF per unit across each floor. The proposed Project site plan is shown in Figure 2.

This memorandum evaluates the Project in accordance with the Los Angeles Department of Transportation (LADOT) *Transportation Assessment Guidelines* (TAG), dated August 2022.

Project Trip Generation

The Project trip generation was prepared using trip rates from the Institute of Transportation Engineers (ITE) *Trip Generation Manual, 12th Edition* (2025). The existing 23,151 SF building was analyzed as *Warehouse* (ITE Land Use Code 150), and the proposed building was analyzed as *Mini-Warehouse* (ITE Land Use Code 151). Passenger vehicle and truck trip rates for the existing warehouse building were obtained from the ITE land use code 150, and truck splits were normalized using the South Coast Air Quality Management District (SCAQMD) vehicle splits for warehouses without cold storage.[1]

Table 1 presents the trip generation estimates for both the existing use and the proposed Project. As shown in Table 1, the existing site generates an estimated 32 daily trips, including 3 trips during the AM peak hour and 3 trips during the PM peak hour. In terms of passenger vehicles, the existing site generates an estimated 21 daily trips, including 2 trips during the AM peak hour and 2 trips during the PM peak hour.

The proposed Project is expected to generate approximately 226 daily passenger vehicle trips, including 14 trips during the AM peak hour and 25 trips during the PM peak hour.

After accounting for existing trips (including trucks), the proposed Project is estimated to result in a net increase of 194 daily trips, including 11 net new trips during the AM peak hour and 22 net new trips during the PM peak hour. In terms of passenger vehicles, the Project is estimated to generate a net increase of 205

[1] South Coast Air Quality Management District (SCAQMD). (2014). *Warehouse Truck Trip Study Data Results and Usages.*

daily trips, including 12 net new trips during the AM peak hour and 23 net new trips during the PM peak hour.

Vehicle Miles Traveled Screening

Senate Bill (SB) 743 was signed by Governor Brown in 2013 and required the Governor's Office of Planning and Research (OPR) to amend the California Environmental Quality Act (CEQA) Guidelines to provide an alternative to level of service (LOS) for evaluating transportation impacts, aiming to promote the reduction of greenhouse gas emissions, the development of multimodal transportation networks, and a diversity of land uses. In response, Section 15064.3, *Determining the Significance of Transportation Impacts*, was added to the CEQA Guidelines which states that VMT is the most appropriate measure of transportation impacts and shall apply statewide beginning on July 1, 2020.

Section 2.2.2 of the LADOT TAG provides VMT screening thresholds to identify projects that would have a less-than-significant impact on VMT and therefore can be screened from further analysis. If the answer is no to either of the following questions, the VMT impact of the project is considered less than significant and no further analysis is required:

1. *Would the land use project generate a net increase of 250 or more daily vehicle trips?*
2. *Would the project generate a net increase in daily VMT?*

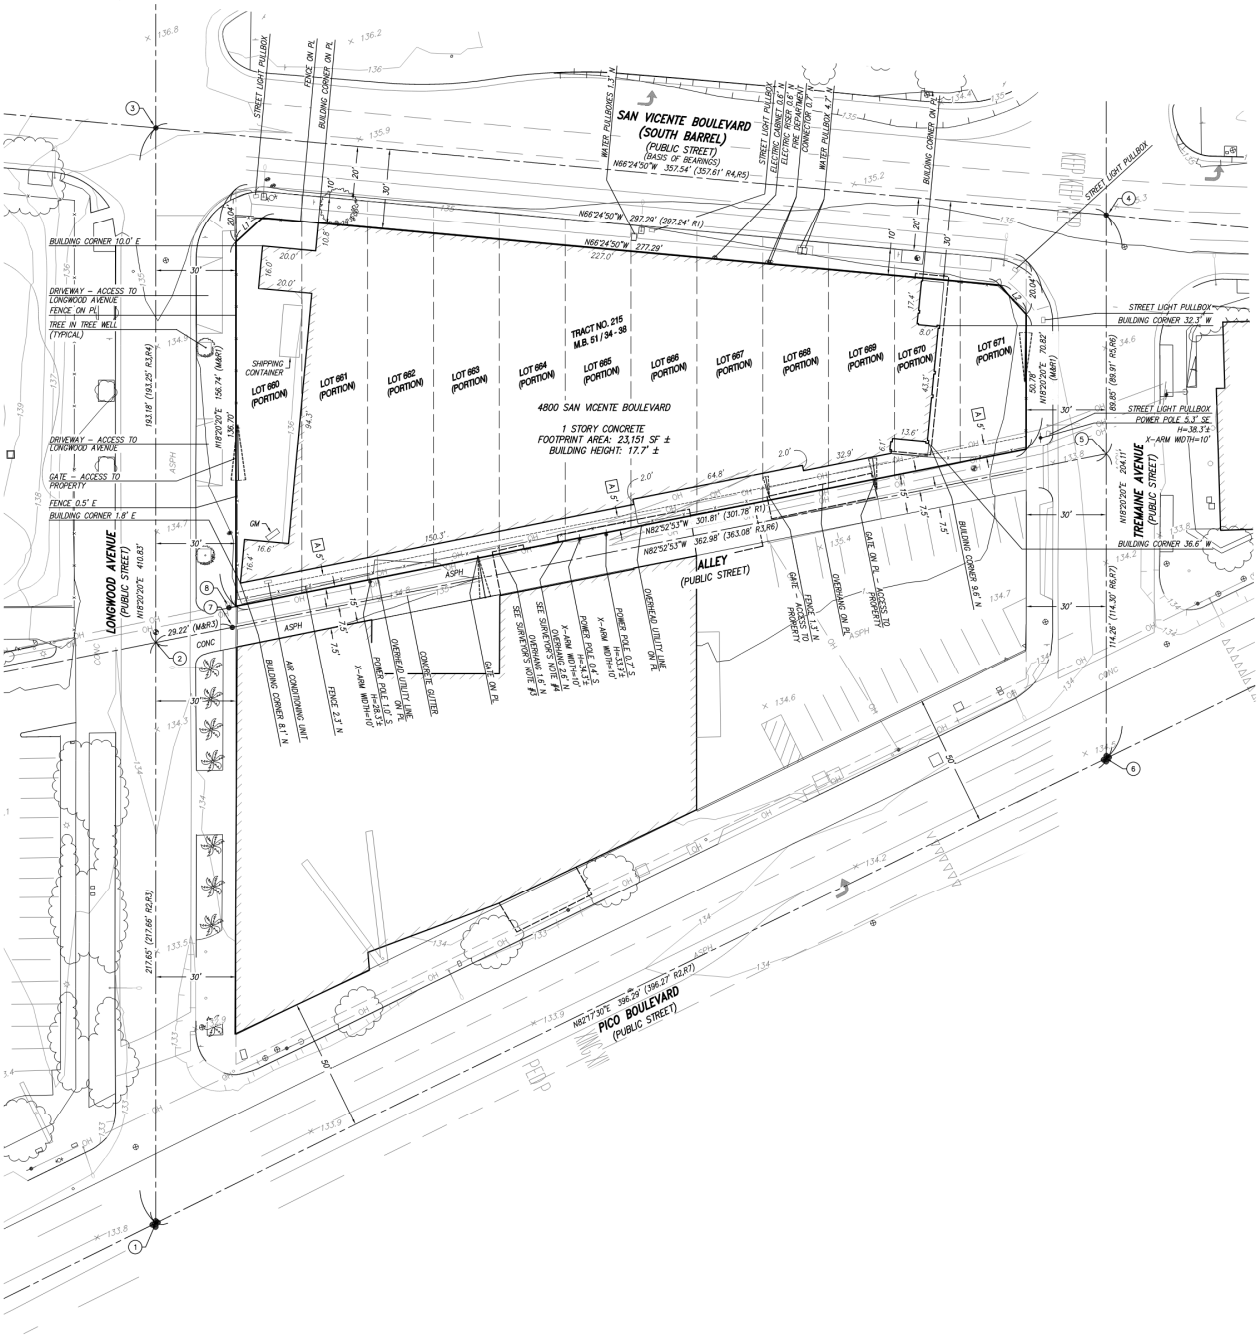

Screening Criteria 1: According to the LADOT TAG, daily vehicle trips should be estimated using either the City's VMT Calculator tool or the most recent edition of the ITE *Trip Generation Manual*. For this analysis, the most recent edition of the ITE *Trip Generation Manual* (12th Edition) was used. As shown in Table 1, the Project is estimated to generate 205 net new daily passenger vehicle trips, which is below the 250-trip threshold. Therefore, the answer to Screening Criteria 1 for the proposed Project is no, and the Project can be presumed to have a less-than-significant impact on VMT. No further analysis is required under this criterion.

Since the answer to the first screening question is no, and per the guidelines a "no" response to either criterion is sufficient to conclude less-than-significant impacts, the Project's VMT impact is considered less than significant. Therefore, Screening Criteria 2 does not need to be evaluated.

Summary

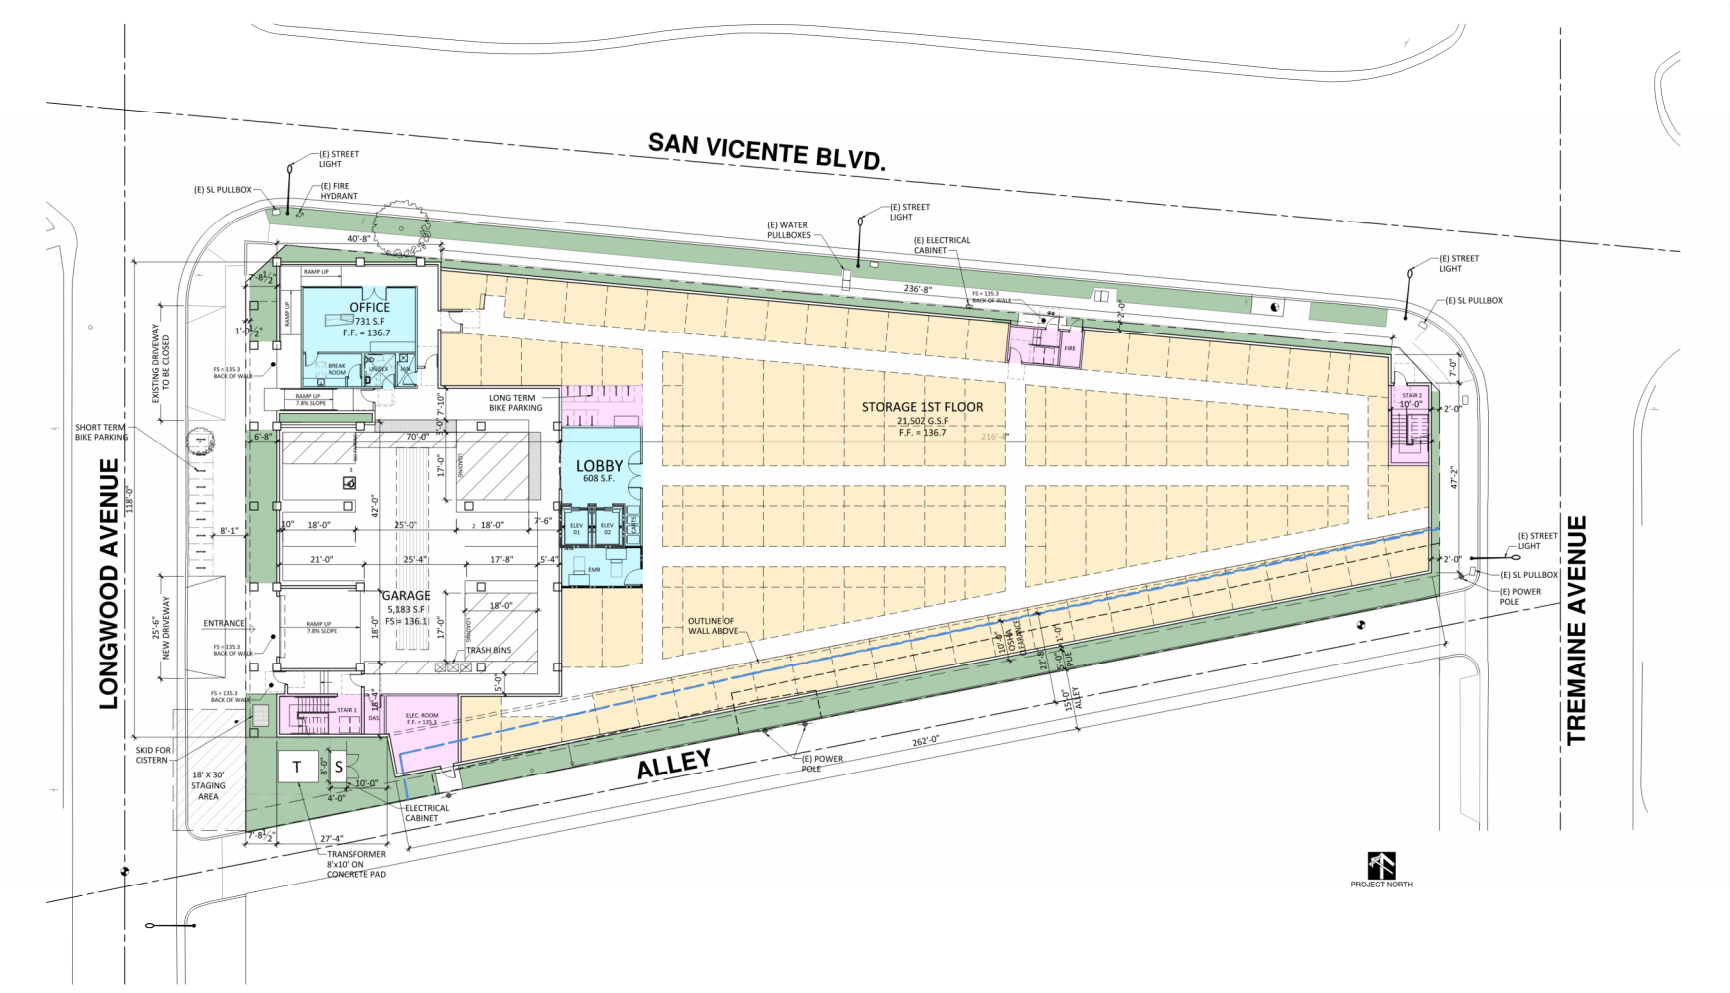

The Project was assessed using the LADOT TAG, which establish VMT screening criteria to determine whether further analysis is required. The Project meets Screening Criteria 1, as it generates 205 net new daily passenger vehicle trips, which is below the 250-trip threshold. The Project is presumed to have a less-than-significant impact on VMT, and no further analysis is required.

To:	City of Los Angeles Planning Division
From:	Sina Salehipour, Chad Karns, EPD Solutions, Inc.
Date:	9/16/2025
Site:	4802-4828 San Vicente Boulevard, Los Angeles
Subject:	Level of Service (LOS) Screening Analysis – 4802-4828 San Vicente Boulevard Self Storage Project

This technical memorandum provides an evaluation of the 4802-4828 San Vicente Boulevard Self Storage Project ("Project," or "proposed Project"). The purpose of this analysis is to determine whether preparation of a transportation assessment would be required for the Project.

The Project site is located at 4802–4828 San Vicente Boulevard in the city of Los Angeles, identified as Assessor's Parcel Number (APN) 5070-004-026. The Project site consists of a single parcel encompassing approximately 30,612 square feet (SF) (0.703 acres). The proposed Project would demolish the existing 23,151 SF building, currently assumed as a warehouse (without cold storage), shown in Figure 1, and redevelop the site with a 175,047 SF mini-warehouse (to be used for self-storage of household goods). The storage units would range in size from 25 SF to 200 SF per unit across each floor. The proposed Project site plan is shown in Figure 2.

This memorandum evaluates the Project in accordance with the Los Angeles Department of Transportation (LADOT) *Transportation Assessment Guidelines* (TAG), dated August 2022.

Project Trip Generation

The Project trip generation was prepared using trip rates from the Institute of Transportation Engineers (ITE) *Trip Generation Manual, 12th Edition* (2025). The existing 23,151 SF building was analyzed as *Warehouse* (ITE Land Use Code 150), and the proposed building was analyzed as *Mini-Warehouse* (ITE Land Use Code 151). Passenger vehicle and truck trip rates for the existing warehouse building were obtained from the ITE land use code 150, and truck splits were normalized using the South Coast Air Quality Management District (SCAQMD) vehicle splits for warehouses without cold storage.[1] The truck trips associated with the existing warehouse building were converted into passenger car equivalent (PCE) trips to more accurately assess the Project's impact on the roadway network.

Table 1 presents the trip generation estimates for both the existing use and the proposed Project. As shown in Table 1, the existing site generates an estimated 32 daily trips, including 3 trips during the AM peak hour and 3 trips during the PM peak hour. In terms of passenger car equivalent (PCE) trips, the existing site generates an estimated 49 daily PCE trips, including 5 PCE trips during the AM peak hour and 5 PCE trips during the PM peak hour.

The proposed Project is expected to generate approximately 226 daily passenger trips, including 14 trips during the AM peak hour and 25 trips during the PM peak hour. After accounting for existing trips, the

[1] South Coast Air Quality Management District (SCAQMD). (2014). *Warehouse Truck Trip Study Data Results and Usages*.

proposed Project is estimated to result in a net increase of 194 daily trips, including 11 net new trips during the AM peak hour and 22 net new trips during the PM peak hour. In terms of PCE trips, the Project is estimated to generate a net increase of 177 daily PCE trips, including 9 net new PCE trips during the AM peak hour and 20 net new PCE trips during the PM peak hour.

Project Access Safety and Circulation Evaluation Screening

Per the current LADOT TAG, the City requires preparation of a transportation assessment for Development Projects or Transportation Projects that meet any of the following criteria:

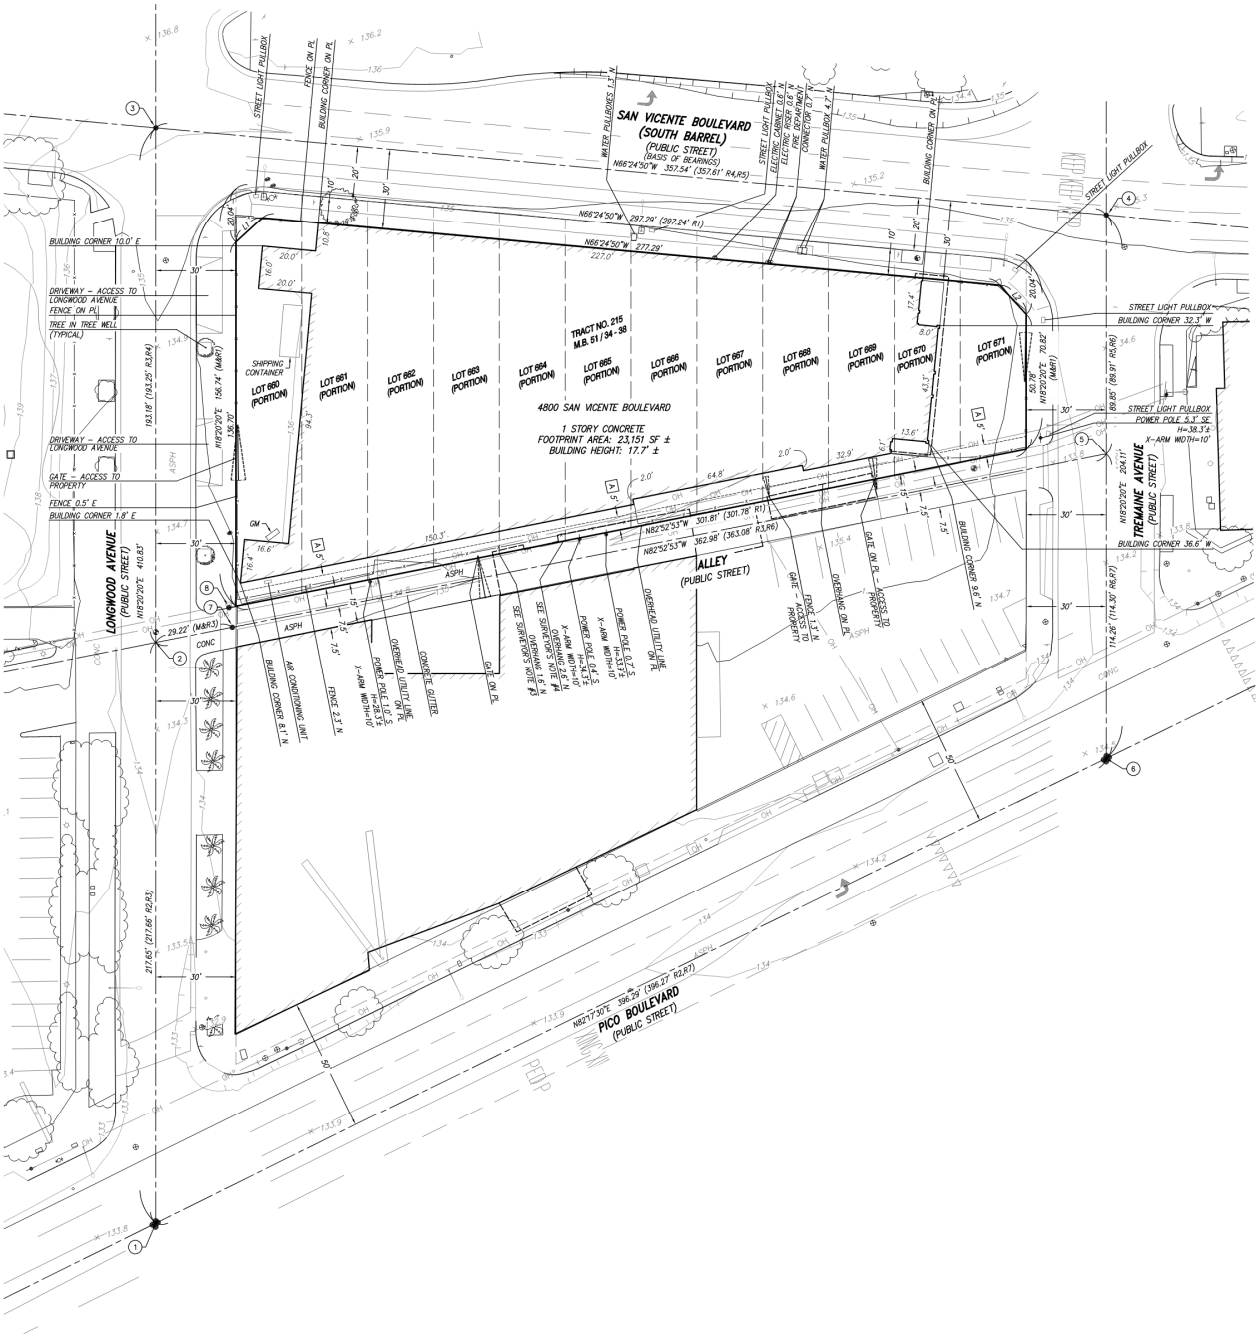

- **Development Projects:** If the project is estimated to generate a net increase of 250 or more daily vehicle trips and requires discretionary action, a transportation assessment is required.
- **Transportation Projects:** If the project is likely to either (1) induce additional vehicle miles traveled (VMT) by increasing vehicle capacity, or (2) reduce roadway through-lane capacity on a street that carries more than 750 vehicles per hour per lane for at least two consecutive hours within a 24-hour period after completion, a transportation assessment is generally required.
- **City Requirements:** A transportation assessment is required if mandated by City ordinance or regulation.

Since the proposed Project is a development project, and as shown in Table 1 is estimated to generate a net increase of 194 daily trips (or 177 daily PCE trips), it falls below the City's threshold of 250 net new daily vehicle trips. Therefore, preparation of a transportation assessment is not required for the proposed Project.

Summary

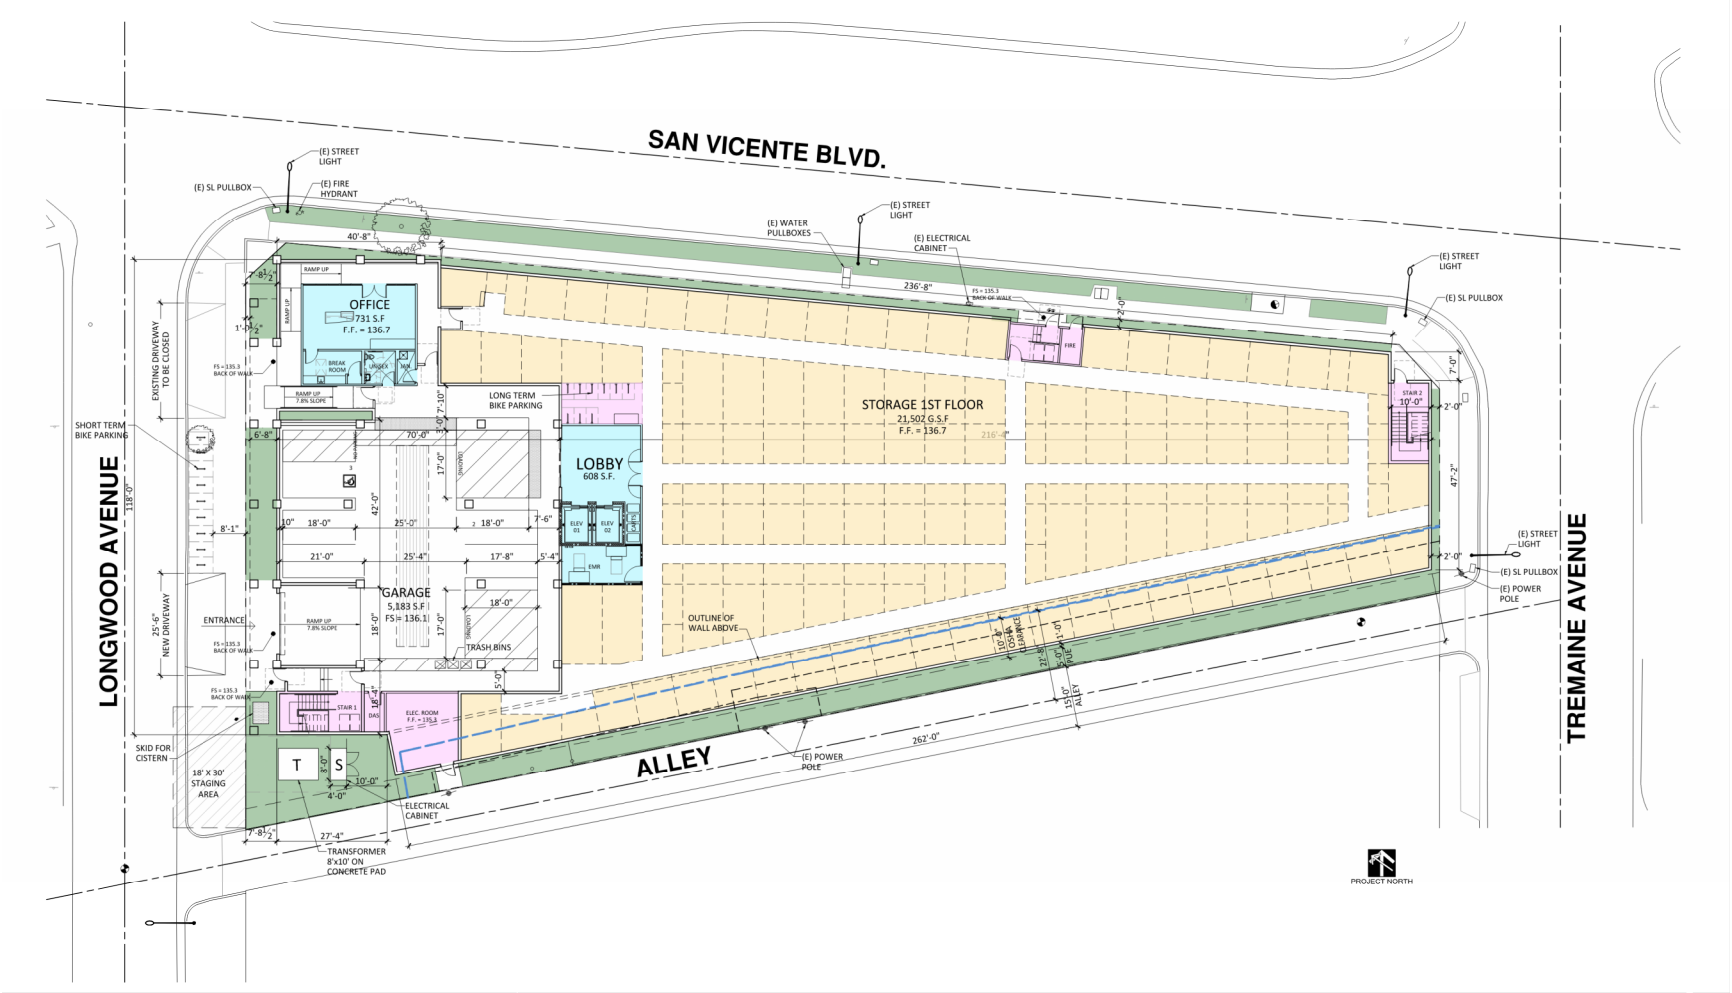

The Project was evaluated using the current LADOT TAG to determine whether preparation of a transportation assessment would be required. The proposed Project is a development project and is estimated to generate a net increase of 194 daily trips (or 177 daily PCE trips), it falls below the City's threshold of 250 net new daily vehicle trips for development projects. Therefore, preparation of a transportation assessment is not required for the proposed Project.

FORM GEN. 160 (Rev. 6-80)

CITY OF LOS ANGELES
INTER-DEPARTMENTAL CORRESPONDENCE

Date: May 6, 2026

To: Vincent P. Bertoni, Director
Department of City Planning
Attn: Dang Nguyen (City Planner)

From: Hui Huang, Principal Civil Engineer
Permit Case Management Division
Bureau of Engineering (BOE)

Subject: **Case No. CPC-2025-5194-HD-CU2-PR (4802-4828 West San Vicente Boulevard)**

The following recommendations identifying the infrastructure deficiencies adjacent to the above-referenced site. The recommendations are respectfully submitted for your consideration in the approval of a Height District, Conditional Use – Class 2, Project Review application:

1. Dedication Required:

   Longwood Avenue (Local Street) – A 15-foot by 15-foot cut corner or a 20-foot radius property line return is required at the northerly corner of the property at the intersection of Longwood Avenue and San Vicente Boulevard.

   San Vicente Boulevard (Boulevard II) – None.

   Tremaine Avenue (Local Street) – A 15-foot by 15-foot cut corner or a 20-foot radius property line return is required at the northerly corner of the property at the intersection of Tremaine Avenue and San Vicente Boulevard.

   First Alley South of San Vicente Boulevard (Alley) – A 2.5-foot wide strip of land along the property frontage to complete a 10-foot half right-of-way.

2. Improvements Required:

   Longwood Avenue – Remove and replace the existing curb ramp and alley intersection; any existing broken curb, gutter, and roadway pavement. These improvements should suitably transition to join the existing improvements satisfactory to the City Engineer.

   San Vicente Boulevard – Remove and replace any existing broken curb, gutter, roadway pavement, and sidewalk. These improvements should

suitably transition to join the existing improvements satisfactory to the City Engineer.

Tremaine Avenue – Remove and replace the existing curb ramp and alley intersection; any existing broken curb, gutter, and roadway pavement. These improvements should suitably transition to join the existing improvements satisfactory to the City Engineer.

First Alley South of San Vicente Boulevard – Construct additional surfacing to join the existing improvements to provide a 17.5-foot wide alley, including 2-foot longitudinal concrete gutter. These improvements should suitably transition to join the existing improvements satisfactory to the City Engineer.

Notes: Broken curb and/or gutter includes segments within existing score lines that are depressed or upraised by more than ¼ inch from the surrounding concrete work or are separated from the main body of the concrete piece by a crack through the entire vertical segment and greater than 1/8 inch at the surface of the section.

Non-ADA compliant sidewalk shall include any sidewalk that has a cross slope that exceeds 2% and/or is depressed or upraised by more than ¼ inch from the surrounding concrete work or has full concrete depth cracks that have separations greater than 1/8 inch at the surface. The sidewalk also includes that portion of the pedestrian path of travel across a driveway.

All new sidewalk curb and gutter shall conform to the Bureau of Engineering Standard Plans S410-2, S440-4, S442-6 and S444-0.

Upgrade all driveways and curb ramps to comply with ADA requirements.

Install tree wells with root barriers and plant street trees satisfactory to the City Engineer and the Urban Forestry Division of the Bureau of Street Services. The applicant should contact the Urban Forestry Division for further information (213) 847-3077 or via https://appointments.lacity.org/apptsys/Public/Account.

Notes: Street lighting may be required satisfactory to the Bureau of Street Lighting (213) 847-1551 or via https://appointments.lacity.org/apptsys/Public/Account.

Department of Transportation may have additional requirements for dedication and improvements.

Refer to the Department of Transportation regarding traffic signals, signs and equipment (818) 374-4699 or via https://appointments.lacity.org/apptsys/Public/Account.

Regarding any conflicts with power pole matters, contact the Department of Water and Power at (213) 367-2715 or via https://appointments.lacity.org/apptsys/Public/Account.

Refer to the Fire Department Hydrants and Access Unit regarding fire hydrants (818) 374-5005 or via https://appointments.lacity.org/apptsys/Public/Account.

3. Provide proper drainage for street being improved and for the site being developed.

   Sewer mainlines exist in the first alley south of San Vicente Boulevard. Construction of sewer laterals to the new property line will be required. All Sewerage Facilities Charges and Bonded Sewer Fees are to be paid prior to obtaining a building permit https://engpermits.lacity.org/public or https://appointments.lacity.org/apptsys/Public/Account.

4. Submit a parking area and driveway plan to the Central District Office of the Bureau of Engineering and the Department of Transportation for review and approval.

Any questions regarding this report may be directed to the Bureau of Engineering Permit Case Management Division – Land Development Group, via the Customer Service Request system at https://dscsr.lacity.org/.

CITY OF LOS ANGELES
INTER-DEPARTMENTAL CORRESPONDENCE

Date: 9/22/2025

To: Charlie Rausch, Senior City Planner
Department of City Planning
200 N. Spring St., 6th Floor MS-395

Richard Tom for

From: Jay Wong, Manager
Private Development Division
Bureau of Street Lighting

SUBJECT: STREET LIGHTING REQUIREMENTS FOR DISCRETIONARY ACTIONS
CITY PLANNING CASE No.: CPC 2025-5194 HD CU2 PR
4802 W SAN VICENTE BLVD

The Bureau of Street Lighting's recommended condition of approval for the subject city planning case is as follows: (Improvement condition added to S-3 (c) where applicable.)

SPECIFIC CONDITION: Prior to the recordation of the final map or issuance of the Certificate of Occupancy (C of O), street lighting improvement plans shall be submitted for review and the owner shall provide a good faith effort via a ballot process for the formation or annexation of the property within the boundary of the development into a Street Lighting Maintenance Assessment District.
IMPROVEMENT CONDITION: Construct new street light: one (1) on Longwood Ave. If street widening per BOE improvement conditions, relocate and upgrade street lights: three (3) on San Vicente Blvd. and one (1) on Tremaine Ave.

NOTES:
The quantity of street lights identified may be modified slightly during the plan check process based on illumination calculations and equipment selection.

Conditions set: 1) in compliance with a Specific Plan, 2) by LADOT, or 3) by other legal instrument excluding the Bureau of Engineering conditions, requiring an improvement that will change the geometrics of the public roadway or driveway apron may require additional or the reconstruction of street lighting improvements as part of that condition.

FORM GEN. 160 (Rev. 8-12)

CITY OF LOS ANGELES
INTER-DEPARTMENTAL CORRESPONDENCE

DATE: October 28, 2025

TO: Heather Bleemers, Senior City Planner
Department of City Planning

FROM: Bryan Ramirez, Street Tree Superintendent I
Bureau of Street Services, Urban Forestry Division

SUBJECT: **CPC-2025-5194-CU2-PR – 4802 W. SAN VICENTE BLVD.**

In regard to your request for review of this case regarding Urban Forestry requirements, it is our recommendation that:

1. **STREET TREES**

a. Project shall preserve all healthy mature street trees whenever possible. All feasible alternatives in project design should be considered and implemented to retain healthy mature street trees. A permit is required for the removal of any street tree and shall be replaced 2:1 as approved by the Board of Public Works and Urban Forestry Division.

b. When street dedications are required and to the extent possible, the project shall provide larger planting areas for existing street trees to allow for growth and planting of larger stature street trees. This includes and is not limited to parkway installation and/or enlargement of tree wells and parkways.

c. Plant street trees at all feasible planting locations within dedicated streets as directed and required by the Bureau of Street Services, Urban Forestry Division. All tree plantings shall be installed to current tree planting standards when the City has previously been paid for tree plantings. The sub divider or contractor shall notify the Urban Forestry Division at: (213) 847-3077 upon completion of construction for tree planting direction and instructions.

Note: Removal of street trees requires approval from the Board of Public Works. All projects must have environmental (CEQA) documents that appropriately address any removal and replacement of street trees. Contact Urban Forestry Division at: (213) 847-3077 for tree removal permit information.

+FORM. GEN. 160 (Rev. 6-80)

CITY OF LOS ANGELES

INTER-DEPARTMENTAL CORRESPONDENCE

October 5, 2025

TO: Vincent Bertoni, AICP, Director of Planning
Department of City Planning
Attention: planning.expedited@lacity.org

FROM: Los Angeles Fire Department

SUBJECT: **CPC-2025-5194-CU2-PR (4802 W. San Vicente Blvd.)**

Submit plot plans for Fire Department approval and review prior to recordation of City Planning Case.

RECOMMENDATIONS:

Access for Fire Department apparatus and personnel to and into all structures shall be required.

Address identification. New and existing buildings shall have approved building identification placed in a position that is plainly legible and visible from the street or road fronting the property.

One or more Knox Boxes will be required to be installed for LAFD access to project. Location and number to be determined by LAFD Field Inspector. (Refer to FPB Req # 75).

The entrance or exit of all ground dwelling units shall not be more than 150 feet from the edge of a roadway of an improved street, access road, or designated fire lane.

No building or portion of a building shall be constructed more than 150 feet from the edge of a roadway of an improved street, access road, or designated fire lane.

Fire Lane Requirements:

1) Fire lane width shall not be less than 20 feet. When a fire lane must accommodate the operation of Fire Department aerial ladder apparatus or where fire hydrants are installed, those portions shall not be less than 28 feet in width.
2) The width of private roadways for general access use and fire lanes shall not be less than 20 feet, and the fire lane must be clear to the sky.
3) Fire lanes, where required and dead ending streets shall terminate in a cul-de-sac or other approved turning area. No dead ending street or fire lane shall be greater than 700 feet in length or secondary access shall be required.
4) Submit plot plans indicating access road and turning area for Fire Department approval.
5) All parking restrictions for fire lanes shall be posted and/or painted prior to any Temporary Certificate of Occupancy being issued.
6) Plans showing areas to be posted and/or painted, “FIRE LANE NO PARKING” shall be submitted and approved by the Fire Department prior to building permit application sign-off.

7) Electric Gates approved by the Fire Department shall be tested by the Fire Department prior to Building and Safety granting a Certificate of Occupancy.
8) All public street and fire lane cul-de-sacs shall have the curbs painted red and/or be posted “No Parking at Any Time” prior to the issuance of a Certificate of Occupancy or Temporary Certificate of Occupancy for any structures adjacent to the cul-de-sac.
9) No framing shall be allowed until the roadway is installed to the satisfaction of the Fire Department.

Construction of public or private roadway in the proposed development shall not exceed 10 percent in grade.

On small lot subdivisions, any lots used for access purposes shall be recorded on the final map as a “Fire Lane”.

Private development shall conform to the standard street dimensions shown on Department of Public Works Standard Plan S-470-0.

Standard cut-corners will be used on all turns.

The Fire Department may require additional vehicular access where buildings exceed 30 feet in height.

Where the vertical distance between the grade plane and the highest roof surface exceeds 30 feet, approved aerial fire apparatus access roads shall be provided.

The following recommendations of the Fire Department relative to fire safety shall be incorporated into the building plans, which includes the submittal of a plot plan for approval by the Fire Department either prior to the recordation of a final map or the approval of a building permit. The plot plan shall include the following minimum design features: fire lanes, where required, shall be a minimum of 20 feet in width; all structures must be within 300 feet of an approved fire hydrant, and entrances to any dwelling unit or guest room shall not be more than 150 feet in distance in horizontal travel from the edge of the roadway of an improved street or approved fire lane.

Site plans shall include all overhead utility lines adjacent to the site.

Where access for a given development requires accommodation of Fire Department apparatus, overhead clearance shall not be less than 14 feet.

FPB #105
5101.1 Emergency responder radio coverage in new buildings. All new buildings shall have approved radio coverage for emergency responders within the building based upon the existing coverage levels of the public safety communication systems of the jurisdiction at the exterior of the building. This section shall not require improvement of the existing public safety communication systems.

Any roof elevation changes in excess of 3 feet may require the installation of ships ladders.

Entrance to the main lobby shall be located off the address side of the building.

Any required Fire Annunciator panel or Fire Control Room shall be located within 20ft visual line of site of the main entrance stairwell or to the satisfaction of the Fire Department.

Adequate off-site public and on-site private fire hydrants may be required. Their number and location to be determined after the Fire Department's review of the plot plan.

Any required fire hydrants to be installed shall be fully operational and accepted by the Fire Department prior to any building construction.

The applicant is further advised that all subsequent contact regarding these conditions must be with the Hydrant and Access Unit. This would include clarification, verification of condition compliance and plans or building permit applications, etc., and shall be accomplished **BY APPOINTMENT ONLY**, in order to assure that you receive service with a minimum amount of waiting please call **(213) 482-6543**. You should advise any consultant representing you of this requirement as well.

PUBLIC CORRESPONDENCE

June 24, 2026

VIA EMAIL

Attn: David Woon
Los Angeles Department of City Planning
200 North Spring Street, Room 763
Los Angeles, California 90012

RE: Response to Public Comments
Case No. CPC-2025-5194-HD-CU2-PR-ZC / ENV-2025-5195-MND
4802-4828 West San Vicente Boulevard, Los Angeles, California 90019

Dear Mr. Woon,

three6ixty represents Westport Properties, Inc. (the "Applicant") and hereby submits this letter to the case file for Case No. CPC-2025-5194-HD-CU2-PR-ZC / ENV-2025-5195-MND for the property located at 4802-4828 West San Vicente Boulevard, Los Angeles, California 90019 (the "Property"). The proposed project includes the demolition of an existing one-story warehouse building for the construction, use, and maintenance of a new seven-story self-storage facility totaling 161,645 square feet of floor area, (the "Project") in the C2-1-O zone.

We are submitting the following responses into the public record to address various public comments that have been submitted to the City thus far. The responses are primarily directed to comments provided for the Hearing Examiner Hearing on May 12th, 2026, by residents of South Highland Avenue and San Vicente Boulevard, including but not limited to Curtis Clark, Eugene Jones, and Barbara Calloway.

Comment No. 1: Project Exceeds Zoning Height Limit

Response to Comment No. 1: The Property is currently zoned C2-1-O. The existing C Zone with Height District "1" allows for unlimited height and stories. The Project proposes a height of 85 feet and seven stories. Thus, the Project is not requesting additional special consideration or entitlement for the building height, as the proposed height is permitted by the underlying zone and height district, and is an appropriate scale and height in the zone. There is no violation of any height standard proposed by this Project.

Comment No. 2: Request for a 3-story / 45-Foot height limit to comply with Transitional Height

Response to Comment No. 2: There is no basis to restrict height to 3-stories / 45 feet, as per above, this site is located within an unlimited height district. Additionally, transitional height is not applicable to the Project per Los Angeles Municipal Code ("LAMC") Section 12.21.1.A.10 which states,

> *"Notwithstanding any other provisions of this section, portions of buildings on a C or M zoned lot governed by the provisions of this section shall not exceed the height limits set forth below when located within the distances specified from a lot classified in the RW1 Zone or a more restrictive zone."*

The closest residential zone, located approximately 150 feet north of the Property across San Vicente Boulevard, is zoned R3-1-O, which is not more restrictive than the RW1 Zone. RW1 Zones are the least restrictive of the One-family Residential Zones. The R3 Zone falls within the Multiple Residential Zones. Thus, transitional height and the provisions of LAMC Section 12.21.1.A.10. do not apply.

Comment No. 3: Project's Floor Area Ratio is Incompatible in Scale

Response to Comment No. 3: The Property is uniquely positioned in an intermediary area between active commercial uses along commercial corridors and medium density residential in the neighborhood. The request for a Zone Change/Height District Change from the C2-1-O zone to the C2-2-O zone, in order to permit additional floor area up to a Floor Area Ratio ("FAR") of 5.28:1 from 1.5:1 is warranted, as the site's proposed zoning is still within the corresponding range of zones within the Community Commercial General Plan land use designation. The Wilshire Community Plan designates the subject property for Community Commercial land uses corresponding to the CR, C2, C4, P, PB, RAS3, RAS4, R3, R4, and R5 Zones.

Furthermore, Floor Area Ratio is a development parameter also intended to regulate the overall intensity of a use from an environmental impact standpoint, traditionally tied to traffic impacts. In this instance, although the project is seeking an entitlement for additional floor area, the overall project impact is less than significant as demonstrated by all of the environmental studies included in the published CEQA clearance document under Case No. ENV-2025-5195-MND.

Lastly, the project site is located within a fully urbanized Transit Priority Area, designated as a Tier 4 TOC site, and designated as a Transit Oriented Incentive Area 3 (TOIA 3) and Opportunity Corridor Incentive Area 3 (OC-3) by the city's housing element rezoning program – Mixed-Income Incentive Program (MIIP). Under MIIP, a residential or mixed use project is entitled up to a base Floor Area Ratio of 4.8:1, or up to 6.8:1 for the provision of certain public benefits. Thus, the proposed 6:1 FAR is similar to that permitted by other zoning programs within the city that could accommodate a project of the same size and scale, or larger on-site by right, with no entitlement or discretionary action required to permit such intensity.

Thus, the Zone Change/Height District Change to C2-2-O would is consistent with the size, scale and intensity of development that could be provided on-site for other product types, and utilizing other adopted city development programs and standards.

Comment No. 4: Objections to Reduction in Required Automobile Parking

Response to Comment No. 4: The Property is located within a Transit Priority Area ("TPA") established by Senate Bill 743/Assembly Bill 744, which is defined as a site within a one-half (½) mile radius of a Major Transit Stop. In effect on January 1, 2023, State Assembly Bill 2097 established new parking standards for any residential, commercial, or other project located

within a half-mile of a major transit stop. AB 2097 prohibits Cities from requiring or imposing any minimum parking standards in developments located within a Transit Priority Area.

The Property is approximately 470 feet from the intersection of Pico Boulevard and San Vicente Boulevard, where the northbound and southbound Midtown bus intersects with Metro Bus Route 7. As such, the Project is located within a designated TPA, and thus eligible for vehicular parking reductions stipulated by Assembly Bill 2097. Thus, while there is no city mandated minimum parking standard, the Project has elected to voluntarily provide a total of five (5) parking spaces and two (2) loading spaces on the ground floor to meet the operational demand of the proposed Project.

Comment No. 5: Objections to Bicycle Parking Provided

Response to Comment No. 5: Pursuant to LAMC Section 12.21.A.16.(a)(2), the Applicant is complying with the required number of short-term and long-term bicycle parking for the use as required per code. Storage buildings for household goods are categorized under "Warehouse" per the code. Warehouses are required to provide one (1) short-term bicycle parking space per 10,000 square feet [minimum of two (2)] and one (1) long-term bicycle parking [minimum of two (2)] per 10,000 square feet. The total floor area for the proposed project is 170,944 square feet. Therefore, the Project is required to provide 18 short-term and 18 long-term bicycle parking spaces, for a total of 36 bicycle parking spaces. Thus, the Project is providing the minimum bicycle parking spaces required per code and there is no violation of this standard.

Comment No. 6: Hours of Operation are Unreasonable

Response to Comment No. 6: The Project is not subject to restricted hours of operation. The proposed hours of operation from 6:00 a.m. to 11:00 p.m., daily, are appropriate for the self-storage facility use and zone and are similar operating hours to other storage facilities on the west side of Los Angeles.

The building will include premium security features that include internally accessed storage units, a unique passcode required for building entry and elevator usage, logged entry and exit times, and maximum parking lot lighting. Access into the building is through the ground floor lobby with two (2) elevators and stairwells at the southwestern and northeastern corners of the Property. There will be digital security cameras recording all activity in the parking lot, loading zones, elevator lobbies and internal corridors, 24/7 with no blind spots. All locks on storage units will be provided by USSC to ensure maximum security. Customer pin codes will not allow access outside of operating hours.

In response to community input and requests, the Applicant is willing to agree to restrict operating hours to standard hours of 7 am to 10 pm, in lieu of 6 am to 11 pm. Thus with standard operational measures and the Applicant's agreement to restrict operating hours, there is no reason to further restrict hours of operation which as analyzed by ENV-2025-5195-MND, poses no demonstrated impact to noise, traffic or other environmental factor.

Comment No. 7: Interpretation of Olympic Park Neighborhood Council Votes

Response to Comment No. 7: With regard to community outreach to the Olympic Park Neighborhood Council ("OPNC"), the Project was presented to and received unanimous support from voting members of the OPNC Land Use Committee on April 13th, 2026. The Project was then presented to the full board of the OPNC on May 4th, 2026. During this meeting, the board could not come to a consensus on the proposed motion, resulting in their decision to take no formal position on the Project. The Project was not "unanimously rejected". This was confirmed directly by the Chairperson of the OPNC following the vote, and reiterated as such during the Hearing Examiner Hearing on May 12th, 2026. There has been no misrepresentation of the outcome of either OPNC meeting in any public forum.

Additionally, one public comment made the assertion that the OPNC board is comprised of individuals who do not reside in the immediate vicinity of the Project. However, Neighborhood Council board members are City officials who are elected by the members of their local communities, and donate their time as volunteers. While the Neighborhood Councils hold no legal position of authority on land use matters, Neighborhood Councils in the City of Los Angeles act as official, grassroots advisory bodies to the City. Several board members provided design-related feedback. Thus, we have taken their feedback into consideration.

Comment No. 8: Request for Hearing Transparency

Response to Comment No. 8: One of the public comments requested for a "transparent hearing process where residents are given equal time to the developer and allowed a back-and-forth dialogue." The Hearing Examiner Hearing on May 12th, 2026, was conducted in accordance with LAMC Chapter 1A Section 13.B.1.4 for a Zone Change/Height District Change. The notices of public hearing and posting were completed in accordance with the LAMC's mailing and posting requirements. Any public comment periods are designated by the hearing body official, and not governed by any minimum or maximum time periods, although historically public comment is limited to one to three minutes in various city bodies (City Council, City Planning Commission, etc.) Thus, all processes and procedures related to the Project were conducted in accordance with the code and City of Los Angeles public hearing procedures.

Comment No. 9: Request for Proposed Community Alternative

Response to Comment No. 9: The proposed "community alternative" to have the Council Office facilitate the acquisition of the Property by a neighboring business, Edge Studios & Grip, is improper as the City does not own or control the Property, and therefore does not have the authority to fulfill such a request. Furthermore, as a private development proposal on private property, there is no authority for the City to entertain such request.

In response to community comments, the Applicant has modified the Project to include a Community Room on the ground floor of the Project as a public benefit amenity which may be utilized by the OPNC or other community groups within the community.

Thank you in advance for including these responses in the public record for the Project case file. Please do not hesitate to contact me with any questions. Please don't hesitate to call me at (310) 204-3500 or email me at dana@three6ixty.net if you have any questions regarding this letter.

Sincerely,
three6ixty

Case # CPC-2025-5194-HD-CU2-PR-ZC Zone: C2-1-0 to C2-2-0

Curtis Clark <curtisclark057@gmail.com> Tue, May 26, 2026 at 11:09 AM
To: david.woon@lacity.org, Gene Jones <jones9745@sbcglobal.net>

David,

Comments I wish to submit to the public record...

Dispute of OPNC Approval and Board Residency

I attended the May 4th OPNC meeting, and I dispute the legitimacy of the approval claimed by the developer (Letter attached) who attended the Olympic Park Neighborhood Council (OPNC) May 4th, 2026 meeting. The OPNC board is composed of individuals who do not reside in the immediate vicinity of this project and will not experience the daily consequences of its construction development. Furthermore, these board members possessing the power to advance this development is UNACCEPTABLE. Would you allow this development in your backyard? It is important to note that their approval does not represent the interests of the immediate residents who will be most impacted.

Regarding the developer's assertion that the OPNC approved the project, which is demonstrably false as the project was unanimously rejected, I can only surmise that the developer may believe there is a lack of communication between the OPNC board and the OPNC community constituents and neighborhood stakeholders concerning this matter. One must question the potential outcomes if this remains the standard operating procedure of OPNC.

Developer Presentation and Project Vote Representation

At the May 4, 2026 meeting, a developer presented a proposal for a seven-story self-storage facility (161,645 square feet) with approximately 5 vehicle parking spaces and 36 bicycle parking spaces, with operating hours of 6:00 AM to 11:00 PM daily.

The developer later asserted that the OPNC approved the project. I dispute this characterization based on my understanding that the proposal was rejected or not properly approved by the board.

I request clarification of:

- The official vote outcome of this agenda item
- Whether any official approval was issued or communicated
- Whether meeting minutes and records accurately reflect the board’s action

RE: FORMAL WRITTEN OBJECTION & PETITION NOTICE
CASE NO. CPC-2025-5194-HD-CU2-RP-ZC

Dear Addresses:

I am writing to formally object to the proposed seven-story development at 4802-4828 W. San Vicente Blvd. This letter serves as formal notification that I, along with several neighbors residing on S. Highland and San Vicente Streets, are currently organizing a community petition to demonstrate the broad opposition to this project.

Dispute of OPNC Approval and Board Residency

I attended the May 4th OPNC meeting, and I dispute the legitimacy of the approval claimed by the developer who attended the Olympic Park Neighborhood Council (OPNC). The OPNC board is comprised of individuals who do not reside in the immediate vicinity of this project and will not experience the daily consequences of its construction. Furthermore, these board members possess the power to advance this development. Would you allow this development in your backyard? It is important to note that your approval does not represent the interests of the immediate residents who will be most impacted.

Regarding the developer's assertion that the OPNC approved the project, which is demonstrably false as the project was unanimously rejected, I can only surmise that the developer may believe there is a lack of communication between the board and the OPNC concerning this matter. One must question the potential outcomes if this remains the standard operating procedure.

I urge the commission members to reject the proposed seven-story structure. I am prepared to utilize available administrative and public resources to protect my neighborhood..

Sincerely

Eugene Jones

To: hakeem.parke-davis@lacity.org, david.woon@lacity.org

Dear Mr Parke-Davis
In response to your email asking what do we want I'm attaching the front page of our petition.

Please tell me how to formally present the petitions to Heater Hutt..

Thank you

PETITION TO REJECT THE 7-STORY DEVELOPMENT AT 4802-4828 W. SAN VICENTE BLVD

CASE NO: CPC-2025-5194-HD-CU2-PR-ZC

To: The Los Angeles City Planning Commission and Council District 10

We, the undersigned residents of S. Highland Avenue and San Vicente Blvd, represent the immediate stakeholders directly affected by this proposal. We formally oppose the seven-story, 161,645 sq. ft. storage facility. While we support improving this lot, we reject this specific "monstrosity" that violates transitional height protections and neighborhood character.

WE DEMAND THE FOLLOWING:

1. **A 3-STORY HEIGHT LIMIT:** We support a maximum height of three stories (approx. 45 feet) to comply with **LAMC Section 12.21.1 A.10** transitional height protections.
2. **REASONABLE OPERATING HOURS:** Commercial operations must be restricted to standard hours **(7:00 AM – 10:00 PM)** to protect our quiet enjoyment; we reject the 6:00 AM start time.
3. **REJECTION OF THE BICYCLE LOOPHOLE:** We demand the city reject the developer's use of **35–36 bicycle spaces** to slash car parking. It is illogical to suggest customers will haul heavy storage goods via bicycle; this is a deceptive attempt to exploit density loopholes.
4. **PROCEDURAL FAIRNESS:** We demand a transparent hearing process where residents are given equal time to the developer and allowed a back-and-forth dialogue.

Our signatures signify that we, the immediate stakeholders, are united in protecting our neighborhood.

David Woon <david.woon@lacity.org>

RE: Case # CPC-2025-5194-HD-CU2-PR-ZC ZONE: C2-1-0 TO C2-2-0

Gene Jones <jones9745@sbcglobal.net> Thu, May 28, 2026 at 5:10 PM
To: "david.woon@lacity.org" <david.woon@lacity.org>, "vincent.bertoni@lacity.org" <vincent.bertoni@lacity.org>, "wigginsst@metro.net" <wigginsst@metro.net>, "hakeen.parke-davis@lacity.org" <hakeen.parke-davis@lacity.org>, "cpc@lacity.org" <cpc@lacity.org>, "controller.mejia@lacity.org" <controller.mejia@lacity.org>, "board@opnc.org" <board@opnc.org>
Cc: Tulie Jones <tuliejones@gmail.com>

To Whom It May Concern,

I am submitting a formal grievance regarding actions and conduct of leadership and board members of the Olympic Park Neighborhood Council (OPNC), related to the May 4, 2026 board meeting and related governance concerns.

1. Board Leadership and Potential Bylaws Violation

I am concerned that **Royal Goyal**, serving as both President and Treasurer of the OPNC board, may be holding dual officer roles in a manner that could conflict with the council's bylaws. I request a review of whether this structure complies with OPNC bylaws and applicable Neighborhood Council governance rules.

2. Board Member Residency Qualification Concern

I am also raising a concern regarding **Nathan Freeman (At-Large East Representative)**. Based on observed information, there is a question as to whether this board member meets the required residency or stakeholder eligibility for the "East" designation, as the individual may reside outside that area. I request verification of eligibility and compliance with OPNC bylaws regarding board seat qualifications.

3. Public Participation and Meeting Conduct (Brown Act Concerns)

During the May 4, 2026 meeting, I observed conduct that may have restricted or limited public participation, including public comment. I am requesting review of whether the meeting complied with the Ralph M. Brown Act and Neighborhood Council public meeting requirements.

4. Developer Presentation and Project Vote Representation

At the May 4, 2026 meeting, a developer presented a proposal for a seven-story self-storage facility (161,645 square feet) with approximately 5 vehicle parking spaces and

36 bicycle parking spaces, with operating hours of 6:00 AM to 11:00 PM daily.

The developer later asserted that the OPNC approved the project. I dispute this characterization based on my understanding that the proposal was rejected or not properly approved by the board.

I request clarification of:

- The official vote outcome of this agenda item
- Whether any official approval was issued or communicated
- Whether meeting minutes and records accurately reflect the board's action

5. Concern Regarding Representation of Affected Stakeholders

I am also concerned that the composition of the board may not adequately represent residents who are most directly affected by the proposed development. I believe this raises broader concerns about stakeholder representation in decision-making affecting local land use and development.

Requested Action

I respectfully request that the Department of Neighborhood Empowerment (DONE) or the appropriate oversight body:

1. Review OPNC compliance with its bylaws regarding officer roles and board eligibility
2. Review whether Brown Act requirements were followed during the May 4, 2026 meeting
3. Verify the official outcome and record of the developer's presentation and vote
4. Determine whether corrective action or further training/enforcement is necessary

Regards

Gene Jones.

PETITION TO REJECT THE 7-STORY DEVELOPMENT AT 4802-4828 W. SAN VICENTE BLVD

PETITION TO REJECT THE 7-STORY DEVELOPMENT AT 4802-4828 W. SAN VICENTE BLVD

CASE NO: CPC-2025-5194-HD-CU2-PR-ZC

To: The Los Angeles City Planning Commission and Council District 10

We, the undersigned residents of S. Highland Avenue and San Vicente Blvd, represent the immediate stakeholders directly affected by this proposal. We formally oppose the seven-story, 161,645 sq. ft. storage facility. While we support improving this lot, we reject this specific "monstrosity" that violates transitional height protections and neighborhood character.

WE DEMAND THE FOLLOWING:

1. **A 3-STORY HEIGHT LIMIT:** We support a maximum height of three stories (approx. 45 feet) to comply with **LAMC Section 12.21.1 A.10** transitional height protections.
2. **REASONABLE OPERATING HOURS:** Commercial operations must be restricted to standard hours **(7:00 AM – 10:00 PM)** to protect our quiet enjoyment; we reject the 6:00 AM start time.
3. **REJECTION OF THE BICYCLE LOOPHOLE:** We demand the city reject the developer's use of **35–36 bicycle spaces** to slash car parking. It is illogical to suggest customers will haul heavy storage goods via bicycle; this is a deceptive attempt to exploit density loopholes.
4. **PROCEDURAL FAIRNESS:** We demand a transparent hearing process where residents are given equal time to the developer and allowed a back-and-forth dialogue.

Our signatures signify that we, the immediate stakeholders, are united in protecting our neighborhood.

☐

REJECT THE 7-STORY MONSTROSITY AT 4802-4828 W. SAN VICENTE BLVD (CASE NO: CPC-2025-5194-

PETITION TO REJECT THE 7-STORY DEVELOPMENT AT 4802-4828 W. SAN VICENTE BLVD

CASE NO: CPC-2025-5194-HD-CU2-PR-ZC

To: The Los Angeles City Planning Commission and Council District 10

We, the undersigned residents of S. Highland Avenue and San Vicente Blvd, represent the immediate stakeholders directly affected by this proposal. We formally oppose the seven-story, 161,645 sq. ft. storage facility. While we support improving this lot, we reject this specific "monstrosity" that violates transitional height protections and neighborhood character.

WE DEMAND THE FOLLOWING:

1. **A 3-STORY HEIGHT LIMIT:** We support a maximum height of three stories (approx. 45 feet) to comply with **LAMC Section 12.21.1 A.10** transitional height protections.
2. **REASONABLE OPERATING HOURS:** Commercial operations must be restricted to standard hours **(7:00 AM – 10:00 PM)** to protect our quiet enjoyment; we reject the 6:00 AM start time.
3. **REJECTION OF THE BICYCLE LOOPHOLE:** We demand the city reject the developer's use of **35–36 bicycle spaces** to slash car parking. It is illogical to suggest customers will haul heavy storage goods via bicycle; this is a deceptive attempt to exploit density loopholes.
4. **PROCEDURAL FAIRNESS:** We demand a transparent hearing process where residents are given equal time to the developer and allowed a back-and-forth dialogue.

Our signatures signify that we, the immediate stakeholders, are united in protecting our neighborhood.
